10,000 shares of the Capital Stock (entire issue) of Sacramento Northern Railway, operating 258.98 miles of main line of railroad in California.

$5,213,475.35 par value First Mortgage 5% Twenty-Year Gold Bonds and Bond Participation Certificates of Sacramento Northern Railroad.

Deposited cash in the hands of Mortgage Trustees, as of December 31, 1929 ..... $45,341.46

The First Mortgage contains a provision subjecting to its lien after acquired property purchased with bonds or their proceeds and property directly appurtenant to or forming an integral part of the mortgaged railroad, or securities representing the same, also additional securities of subsidiary companies as defined in the First Mortgage, but the First Mortgage permits the Railroad Company to acquire with free funds, free from the lien of the First Mortgage, additional lines of railroad,

(Testimony of M. J. Curry.)

branches and extensions, equipment and securities.

From January 1, 1929 to December 31, 1929, inclusive, the Railroad Company has expended for road and equipment (including the above described equipment) the following amounts:

Road and structures and general expenses	$1,245,692.59
Equipment	189,714.57
Total	$1,435,407.16

Capital Stock

Policy as to Depreciation

No specific amount is set aside either monthly or annually on account of depreciation of roadway or structures, but all such property is fully maintained and when retired or replaced is written off out of capital account.

With respect to equipment, charges are made monthly to operating expenses and corresponding amounts credited to "Accrued depreciation equipment," at a general rate of 3% per annum on the original cost of the equipment.

(Testimony of M. J. Curry.)

Agreements

The Western Pacific Railroad Company, in consideration of the listing of the securities covered by this application, agrees with the New York Stock Exchange as follows:

To notify the New York Stock Exchange promptly of any change in the general character or nature of its business.

To notify the New York Stock Exchange immediately if it or any subsidiary or controlled company should dispose of any property or of any stock interest in any of its subsidiary or controlled companies, when such disposal would impair or materially affect its financial position or the nature or extent of its operations as theretofore conducted.

Subject to I. C. C. regulations, to publish periodical statements of earnings, as agreed upon with the Committee.

To publish at least once in each year and submit to stockholders at least fifteen days in advance of the annual meeting of the corporation, a Balance Sheet, an Income Statement for the last fiscal year and a Surplus statement of the applicant company as a separate corporate entity and of each corporation in which it holds directly or indirectly a majority of the voting stock; or, in lieu thereof, eliminating all intercompany transactions:

(a) a similar set of financial statements fully consolidated as to the applicant company and all corporations in which it owns directly or indirectly a majority of the voting stock, or

(Testimony of M. J. Curry.)

(b) a similar set of financial statements consolidated as to the applicant company and specifically named or described subsidiaries, with separate similar financial statements for each unconsolidated corporation in which the applicant company holds directly or indirectly a majority of the voting stock.

Such statements shall disclose fully the nature and extent of the interest of the applicant company in the corporations whose unconsolidated financial statements are furnished, and also the existence of any default in interest, cumulative dividend requirements or sinking fund or redemption fund requirements of any of the corporations whose accounts are thus consolidated or separately shown.

Subject to I. C. C. regulations, to publish all future annual financial statements of any character, in the form contained in the listing application and, in the publication of reports of earnings for any period of less than a fiscal year, to show net profits in the aggregate and per share after Depreciation, Depletion, Income Taxes and Interest, estimating the proportionate amount of these items as accurately as may be if not finally determined at date of publication.

Not itself, and not to permit any subsidiary, directly or indirectly controlled, to take up as Income stock dividends received at an amount greater than that charged against Earnings, Earned Sur-

(Testimony of M. J. Curry.)

plus or both of them by the issuing Company in relation thereto.

To maintain, in accordance with the rules of the Stock Exchange, a transfer office or agency in the Borough of Manhattan, City of New York, where all listed securities shall be directly transferable, and the principal of all listed securities with interest or dividends thereon shall be payable; also a registry office in the Borough of Manhattan, City of New York, south of Chambers Street, other than its transfer office or agency in said city, where all listed securities shall be registered. If its transfer books should be permanently closed, to continue to split up certificates of listed stock into smaller denominations in the same name so long as such stock shall be retained upon its list by the New York Stock Exchange. If its transfer office or agency should be or should become located north of Chambers Street, to arrange, at its own cost and expense that its registry office will receive and re-deliver all securities deposited at such registry office for the purpose of transfer.

To notify the Stock Exchange thirty days in advance of the effective date of any change in the authorized amounts of listed securities.

Not to add to the number of its transfer agencies, nor to make any change of a transfer agency or of a

(Testimony of M. J. Curry.)

trustee of its bonds or other securities without prior notice to the Committee on Stock List, and not to make any change in its listed securities, nor to add to the number of the registrars of its stock, nor to change a registrar of its stock, without the prior approval of the Committee on Stock List; nor to select an officer or director of the company as a trustee of its mortgages or other listed securities, unless such officer or director be a co-trustee for an issue having a corporate trustee.

To notify the Stock Exchange in the event of the issuance or creation in any form or manner of any rights to subscribe to, or to be allotted, its securities, or of any other rights or benefits pertaining to ownership in its securities, and to afford the holders of its listed securities a proper period within which to record their interests and to exercise their rights, and to issue all such rights in form approved by the Stock Exchange and to make the same transferable, payable and deliverable in the Borough of Manhattan, City of New York.

To make application to the Stock Exchange for the listing of additional amounts of listed securities sufficiently prior to the issuance thereof to permit action in due course upon such application.

To forward to the Stock Exchange copies of all notices mailed to stockholders looking toward Charter amendments, and to file with the Stock Exchange a certified copy of amended Charter, or Resolutions of Directors in the nature of amendments, as soon

(Testimony of M. J. Curry.)

as such amendments or resolutions have become effective.

To notify the Stock Exchange of the change or removal, to a substantial extent, of collateral deposited under any of its mortgage or trust indentures under which listed securities are outstanding.

To have on hand at all times a sufficient supply of bonds to meet the demands for transfer.

To furnish the New York Stock Exchange, on demand, such reasonable information concerning the company as may be required.

General

The fiscal year of the Railroad Company ends on the 31st day of December.

The principal office of the Company is in the Mills Building, San Francisco, California.

The annual meeting of stockholders is held on the last Wednesday in March at the principal office of the Railroad Company in San Francisco, California.

The names and addresses of the Directors, whose terms expire March 25, 1931 are: Arthur Curtiss James, Thomas M. Schumacher, Arthur W. Loasby and Winthrop W. Aldrich, of New York, N. Y.; Frank E. Sullivan, William Fries, J. G. Hooper, Scott F. Ennis, Wellington T. Smith, W. L. Hughson, H. M. Adams, A. R. Baldwin and F. M. Angellotti, of San Francisco, California; John L. Nagle, of Sacramento, California; Charles Elsey of Oakland, California; Frederic E. Williamson and James E. Gorman, of Chicago, Illinois; L. W. Baldwin, of

(Testimony of M. J. Curry.)

St. Louis, Missouri; and C. W. Nibley, of Salt Lake City, Utah.

The Executive Committee is: Arthur Curtiss James, Arthur W. Loasby, Winthrop W. Aldrich and Thomas M. Schumacher, Chairman, and H. M. Adams, President ex-officio.

The Officers of the Railroad Company are: Chairman of the Board, Arthur Curtiss James, Chairman of the Executive Committee, Thomas M. Schumacher; President, H. M. Adams; Executive Vice-President, Charles Elsey; Vice-Presidents, E. W. Mason, J. F. Hogan and M. J. Curry; Secretary, W. G. Bruen; Treasurer, E. C. Bates; Assistant Secretary and Assistant Treasurer, M. J. Curry; Assistant Secretary, Thomas J. Byrne.

The bonds are interchangeable as to denomination and may be transferred and registered at The Chase National Bank of the City of New York, 11 Broad Street, New York, N. Y.

The Agents for the payment of interest are The Chase National Bank of the City of New York and Crocker First Federal Trust Company of San Francisco, California.

The place for the payment of the principal is at the office of The Chase National Bank of the City of New York.

THE WESTERN PACIFIC RAILROAD COMPANY,
By M. J. CURRY,
Vice-President.

(Testimony of M. J. Curry.)

This Committee recommends that the above-mentioned $572,800 First Mortgage Five Per Cent. Gold Bonds, Series A, due March 1, 1946, included in numbers M-37976 to M-38547 for $1,000 each, D-1104 for $500, and C-5395 to C-5397 for $100 each (and registered bonds issued in exchange for coupon bonds), be added to the list on official notice of issuance for sale and distribution, in accordance with the terms of this application, making the total amount authorized to be listed $39,302,800.

FRANK ALTSCHUL,
Chairman.

Adopted by the Governing Commitee, August 6, 1930.

ASHBEL GREEN,
Secretary.

[Endorsed]: United States District Court, No. 26951. Western Pac. R. R. Co. v. Irving Trust Co. Exhibit No. 10. Filed 1/22/1940. Walter B. Maling, Clerk.

Mr. McCollum: And the statement of September 30, 1930, as Irving Trust Company Exhibit 11.

(The document was marked "Irving Trust Company's Exhibit 11".)

(Testimony of M. J. Curry.)

New York, September 30, 1930.

Referring to its previous application, especially to A-9504, dated July 1, 1930, The Western Pacific Railroad Company (hereinafter called the "Railroad Company") hereby makes application for the listing on the New York Stock Exchange of $5,000,000 additional (of a total authorized issue of $50,000,000) of its First Mortgage Five per Cent. Gold Bonds, Series A, due March 1, 1946, consisting of Nos. M-38551 to M-43550 both inclusive, for $1,000 each (and such fully registered bonds as may be issued in exchange for coupon bonds), on official notice of sale and distribution, making the total amount of Series A Bonds issued and applied for $44,302,800.

Authority

The issuance of said $5,000,000 Series A Bonds of the Railroad Company, covered by this application was authorized by resolutions of the Board of Directors of the Railroad Company adopted July 29, 1930, and their authentication was authorized by a resolution adopted by the Executive Committee on September 24, 1930. No action by the stockholders of the Railroad Company is required by the provisions of the First Mortgage of the Railroad Company, dated June 26, 1916, hereinafter mentioned, or by any laws or regulations applicable to the issuance and sale of any bonds secured by said First Mortgage. The issuance and sale of said $5,000,000

(Testimony of M. J. Curry.)

Series A Bonds at not less than 97½% of their face amount and accrued interest and for the purposes hereinafter stated was approved by order of the Interstate Commerce Commission, dated August 21, 1930, in Finance Docket No. 8414. No further authority is required. The Railroad Company has sold and delivered said bonds on September 24, 1930, for cash at the price of 97½% of their face amount, together with accrued interest thereon, and the proceeds have been applied to the purposes for which the bonds were issued.

Opinion of Counsel

The opinion of counsel as to the legality and validity of the issue was rendered by Mr. John B. Marsh, a member of the firm of Taylor, Blanc, Capron & Marsh, 43 Exchange Place, New York, N. Y., Mr. Carl Taylor, of that firm, being counsel to the Board of Directors of the Railroad Company.

Purpose of Issue

The purpose of the issue of said bonds was to provide proceeds to be applied to the reimbursement of the Railroad Company for expenditures for its own capital purposes and for expenditures on account of capital purposes of Sacramento Northern Railway, a subsidiary of Railroad Company, within the meaning of that term as defined in said First Mortgage; all of such expenditures having been of a character with respect to which bonds may be issued

(Testimony of M. J. Curry.)

and the proceeds of bonds paid out under the terms of Section 2 of Article Second of said First Mortgage, and having been set forth in detail in the application of the Railroad Company to the Interstate Commerce Commission upon which the above mentioned order of August 21, 1930, was based.

Description

The First Mortgage Bonds are secured by the Railroad Company's First Mortgage, dated June 26, 1916, to First Federal Trust Company (now Crocker First Federal Trust Company of San Francisco, California), and Henry E. Cooper (18 Pine Street, New York City), Trustees. The bonds covered by this application are an additional issue of Series A Bonds of $5,000,000 principal amount, all bearing interest at the rate of five per cent per annum, dated June 26, 1916, and maturing March 1, 1946.

The principal of the bonds is payable at the office or agency of the Railroad Company in the Borough of Manhattan, City of New York, N. Y., and the interest thereon is payable at its said office or agency, or at the option of the holder at its office or agency in the City and County of San Francisco, semi-annually, on March 1st and September 1st. Both principal of and interest upon each bond are payable in gold coin of the United States of America of or equal to the standard of weight and fineness as it existed June 26, 1916, without deduction for any tax, assessment or other governmental

(Testimony of M. J. Curry.)

charge (except the Federal Income Tax imposed by the Act of Congress approved October 3, 1913, with respect to income derived from interest paid thereon), which the Railroad Company or the Trustees under the mortgage securing the bonds, or either of them may be required to pay thereon or to retain therefrom under any present or future law or ordinance of the United States of America, or of any State, territory, municipality, or other taxing authority therein; and the Railroad Company assumes the payment of all such taxes, assessments and charges with the exception aforesaid.

The bonds are in coupon form of the denominations of $1,000 and $500 and $100, and are registerable as to principal only. Coupon bonds for $1,000 are interchangeable with registered bonds of the denominations of $1,000, $5,000 and $10,000 or multiples of $10,000. Coupon bonds for $1,000, $500 and $100 are also interchangeable in equal principal amounts. For any such exchange and for any transfer of registered bonds or of coupon bonds registered as to principal, the Company, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge and except in case of coupon bonds registered as to principal an additional amount not exceeding $1 for each new bond issued upon such exchange or transfer.

(Testimony of M. J. Curry.)

Sinking Fund

The Mortgage securing the bonds provides for the creation of a sinking fund, to be especially applied to the purchase or redemption of bonds, and requires the Railroad Company for that purpose to pay, out of any income lawfully applicable thereto, after payment of operating expenses of every description, taxes and interest upon the bonds, the sum of $50,000 on January 1st of each year, commencing with the year 1919. Series A Bonds are redeemable through the sinking fund at par and accrued interest on at least sixty days' previous published notice, as described under redemption. All bonds purchased or redeemed by the sinking fund are to be cancelled and delivered to the Railroad Company. These provisions have been fully complied with.

Redemption

The Railroad Company may redeem all or any part of said Series A Bonds on any semi-annual interest payment date at par and accrued interest on notice published once in each calendar week for eight successive weeks in two newspapers of general circulation published in the Borough of Manhattan, New York, N. Y., and one newspaper of general circulation published in San Francisco, California, one such publication to be not less than sixty nor more than ninety days before the date of redemption. The Company may elect to redeem the bonds of one or more series. Serial numbers of

(Testimony of M. J. Curry.)

bonds drawn by lot for redemption are required to be stated in publications of notice of redemption.

All bonds redeemed are to be cancelled or indelibly stamped with a statement that they have been redeemed. In the case, however, of bonds hereafter refunded with, or exchanged for, or the payment, redemption or retirement otherwise whereof shall be provided for by means of, refunding bonds or other obligations of the Railroad Company issued under a mortgage or other instrument providing that bonds redeemed pursuant to the provisions of the First Mortgage, notwithstanding that they shall have been cancelled or marked "Cancelled," shall be deposited with the Trustees under such new mortgage or other instrument, as security for such refunding bonds or other obligations, the bonds so redeemed and deposited shall be deemed to remain alive and unextinguished in the hands of the Trustees under such new mortgage or other instrument for the security of such refunding bonds or other obligations, to the extent specified in section 2 of Article Third of the Mortgage.

Default

The Mortgage provides that in case of default in the payment of interest continuing for the period of three months or default in the payment of principal, or in the observance or performance of any covenants, conditions or agreements on the part of the Railroad Company in the bonds or in the Mort-

(Testimony of M. J. Curry.)

gage contained continuing for the period of three months after written notice from the Trustees, or in case an order be made for the appointment of a Receiver, the Trustees may, and upon the written request of the holders of twenty-five per cent. in amount of the bonds then outstanding shall, by notice in writing, declare the principal of all of the outstanding bonds to be due and payable immediately. The mortgage provides that the holders of a majority in amount of the bonds then outstanding may waive any default that shall have happened and its consequences upon the remedying of such default. It gives the holders of a majority in amount of bonds outstanding the right to direct and to control the action of the Trustees, and the exercise of the remedies provided by the Mortgage.

Additional Bonds

The mortgage provides, subject to the limitation that the aggregate amount of bonds outstanding shall not exceed fifty million dollars, for the issuance of additional bonds to pay, or reimburse the Railroad Company for, the cost of the construction or purchase of extensions to or additional lines of railroad and for the betterment, improvement and equipment of the railroads and other property owned by the Railroad Company or its subsidiary companies and subject to the lien of the mortgage, or securities representing the same, at the rate of one thousand dollars principal amount of bonds for

(Testimony of M. J. Curry.)

each one thousand dollars of authorized expenditures for the purposes aforesaid, or liabilities incurred therefor. The mortgage also provides for the issuance of bonds sold for cash, against the deposit of the net cash proceeds with the Mortgage Trustees, subject to being withdrawn by the Railroad Company for the purposes above stated to the extent of the net proceeds of each one thousand dollars principal amount of bonds so sold for each one thousand dollars principal amount of bonds which might have been authenticated against such expenditures or liabilities.

The mortgage also provides that bonds of any series outstanding may be replaced by bonds of another series to a like aggregate principal amount; either upon surrender of the outstanding series for cancellation or upon redemption thereof. The mortgage further provides for the issuance of new bonds to replace bonds mutilated, lost or destroyed, upon proper proof and satisfactory indemnity.

Changes in Capitalization

Since December 31, 1929 (the date as of which the consolidated balance sheet contained in said previous application A-9504 was made) there has been no change in the amount of Capital Stock or funded debt of the Railroad Company authorized and outstanding except:

First: The issuance of the $572,800 of Series A 5% Bonds covered by said application A-9405, and

Second: The purchase of $50,000 face amount

(Testimony of M. J. Curry.)

of the Series "A" 5% Bonds, for the sinking fund (making the total amount so purchased $655,700); and

Third: The retirement of $375,000 (face amount) of its 5½% Equipment Trust Certificates, Series "B";

Fourth: The issuance of the $5,000,000 of Series A 5% Bonds, listing of which is herein applied for.

Properties

The properties of the Railroad Company are described in the original application for listing of Series A Bonds, No. A-4747, dated March 13, 1917, and in the subsequent applications Nos. A-5478, dated June 30, 1921; A-5667, dated May 10, 1922; A-6800, dated July 16, 1925; A-7277, dated September 30, 1926; A-7722, dated October 31, 1927; A-8696, dated May 16, 1929; and A-9504, dated July 1, 1930.

Since December 31, 1929, the following important changes in mileage have occurred.

Completion of 3.68 miles additional main line, yard, industry and side tracks the operation of which commenced on various dates between January 1, 1930 and June 30, 1930.

Completion of .10 miles additional branch line, side and spur tracks, the operation of which commenced on various dates between January 1, 1930 and June 30, 1930.

(Testimony of M. J. Curry.)

Acquisition of joint interest with other carriers in .26 miles of industry tracks, operation of which commenced on various dates between January 1, 1930 and June 30, 1930

Since December 31, 1928, the Railroad Company has made the following changes in equipment:

Additions:	
Construction and maintenance equipment:	
Water cars	9
Flat cars for gopher shovels	2
Total additions	11
Retirements:	
Locomotives—Freight	2
Freight train cars destroyed and converted:	
Box	1
Refrigerator	1
Construction and maintenance equipment:	
Steam shovel	1
Total deductions	5
Net total units added January 1, 1930 to June 30, 1930	6

Lien

Reference is made to the previous listing applications, Nos. A-4747, A-5478, A-5667, A-6800, A-7277, A-7722, A-8696 and A-9504 for a description of the property subject to the lien of the Mortgage prior to January 1, 1930. The property on which the Mortgage constitutes a first lien includes the following:

(Testimony of M. J. Curry.)

Mileage:	Miles
Main line mileage, San Francisco to Salt Lake City	926.41
Branch lines, main track	125.08
Second main track	2.73
Yard tracks and sidings, etc.	316.52
Total track miles	1,370.74

Equipment:	
Locomotives	146
Passenger cars	13
Freight cars	5,879
Service cars	404
Floating equipment	6
Total	6,448

The foregoing equipment does not include additional unmortgaged equipment covered by Equipment Trust Agreements, Series "B," Series "C" and Series "D," as follows:

Locomotives	21
Passenger cars	48
Freight cars	3,589
Service cars	1

Securities:

1,000 shares Capital Stock (50% of outstanding) of The Salt Lake City Union Depot and Railroad Company, operating the passenger terminal at Salt Lake City, leased to the Railroad Company and The Denver and Rio Grande Western Railroad Company.

4,500 shares of the Capital Stock (entire issue) of the Deep Creek Railroad Company, operating a line of railroad in Western Utah, 46 miles.

4,005 shares of the Capital Stock (entire issue) of Standard Realty and Development Company, organized to acquire and hold real estate in connection with the construction of the Railroad Company.

(Testimony of M. J. Curry.)

10,000 shares of the Capital Stock (entire issue of Sacramento Northern Railway, operating 258.98 miles of main line of railroad in California.

$1,372,733.95 Face amount Promissory Note of Sacramento Northern Railway payable to The Western Pacific Railroad Company dated December 29, 1928 due March 1, 1943 with interest at rate of 5¾% per annum.

3,213,475.35 par value First Mortgage 5% Twenty-Year Gold Bonds and Bond Participation Certificates of Sacramento Northern Railroad.

Deposited cash in the hands of Mortgage Trustees, as of June 30, 1930—$45,781.85.

The First Mortgage contains a provision subjecting to its lien after acquired property purchased with bonds or their proceeds and property directly appurtenant to or forming an integral part of the mortgaged railroad, or securities representing the same, also additional securities of subsidiary companies as defined in the First Mortgage, but the First Mortgage permits the Railroad Company to acquire with free funds, free from the lien of the First Mortgage, additional lines of railroad, branches and extensions, equipment and securities.

From January 1, 1930 to June 30, 1930, inclusive, the Railroad Company has expended for road and equipment (including the above described equipment) the following amounts.

Road and structures and general expenses	$889,198.90
Equipment	71,673.70
Total	$960,872.60

(Testimony of M. J. Curry.)

Capital Stock

All of the issued and outstanding Capital Stock, consisting of $47,500,000 par value of Common Stock and $28,300,000 par value of Preferred Stock, except Directors' qualifying shares of Common Stock, is held by The Western Pacific Railroad Corporation, a Delaware corporation. $24,200,000 of the authorized Capital Stock of the Company, consisting of $12,500,000 of Common Stock and $11,700,000 of Preferred Stock is not yet issued or outstanding.

Dividends

The following dividends have been paid on the Preferred and Common Stocks since 1922:

DIVIDENDS—PREFERRED STOCK

Year	Rate	Amount paid
1923	6%	$1,650,000
1924	6%	1,650,000
1925	7.558%	2,078,450
1926	6%	1,650,000
1927	1½%	412,500
1928	—	None
1929	—	None
1930	—	None

DIVIDENDS—COMMON STOCK

Year	Rate	Amount paid
1925	5%	$2,374,970

Prior to 1925, Railroad Company paid no dividends on its Common Stock.

Total surplus	$7,219,128.45	$4,936,735.93
Total liabilities	$150,833,263.65	$152,197,859.06

Policy as to Depreciation

No specific amount is set aside either monthly or annually on account of depreciation of roadway or structures, but all such property is fully maintained and when retired or replaced is written off out of capital account.

With respect to equipment, charges are made monthly to operating expenses and corresponding amounts credited to "Accrued depreciation equipment," at a general rate of 3% per annum on the original cost of the equipment.

Agreements

The Western Pacific Railroad Company, in consideration of the listing of the securities covered by this application, agrees with the New York Stock Exchange as follows:

To notify the New York Stock Exchange promptly of any change in the general character or nature of its business.

(Testimony of M. J. Curry.)

To notify the New York Stock Exchange immediately if it or any subsidiary or controlled company should dispose of any property or of any stock interest in any of its subsidiary or controlled companies, when such disposal would impair or materially affect its financial position or the nature or extent of its operations as theretofore conducted.

Subject to Interstate Commerce Commission regulations, to publish periodical statements of earnings, as agreed upon with the Committee.

To publish at least once in each year and submit to stockholders at least fifteen days in advance of the annual meeting of the corporation, a Balance Sheet, an Income Statement for the last fiscal year and a Surplus statement of the applicant company as a separate corporate entity and of each corporation in which it holds directly or indirectly a majority of the voting stock; or, in lieu thereof, eliminating all intercompany transactions:

(a) a similar set of financial statements fully consolidated as to the applicant company and all corporations in which it owns directly or indirectly a majority of the voting stock, or

(b) a similar set of financial statements consolidated as to the applicant company and specifically named or described subsidiaries, with separate similar financial statements for each unconsolidated corporation in which the applicant company holds directly or indirectly a majority of the voting stock.

(Testimony of M. J. Curry.)

Such statements shall disclose fully the nature and extent of the interest of the applicant company in the corporations whose unconsolidated financial statements are furnished, and also the existence of any default in interest, cumulative dividend requirements or sinking fund or redemption fund requirements of any of the corporations whose accounts are thus consolidated or separately shown.

Subject to Interstate Commerce Commission's regulations, to publish all future annual financial statements of any character, in the form contained in the listing application and, in the publication of reports of earnings for any period of less than a fiscal year, to show net profits in the aggregate and per share after Depreciation, Depletion, Income Taxes and Interest, estimating the proportionate amount of these items as accurately as may be if not finally determined at date of publication.

Not itself, and not to permit any subsidiary, directly or indirectly controlled, to take up as Income stock dividends received at an amount greater than that charged against Earnings, Earned Surplus or both of them by the issuing Company in relation thereto.

To maintain, in accordance with the rules of the Stock Exchange, a transfer office or agency in the Borough of Manhattan, City of New York, where all listed securities shall be directly transferable, and the principal of all listed securities with interest or dividends thereon shall be payable; also a reg-

(Testimony of M. J. Curry.)

istry office in the Borough of Manhattan, City of New York, south of Chambers Street, other than its transfer office or agency in said city, where all listed securities shall be registered. If its transfer books should be permanently closed, to continue to split up certificates of listed stock into smaller denominations in the same name so long as such stock shall be retained upon its list by the New York Stock Exchange. If its transfer office or agency should be or should become located north of Chambers Street, to arrange, at its own cost and expense that its registry office will receive and re-deliver all securities deposited at such registry office for the purpose of transfer.

To notify the Stock Exchange thirty days in advance of the effective date of any change in the authorized amounts of listed securities.

Not to add to the number of its transfer agencies, nor to make any change of a transfer agency or of a trustee of its bonds or other securities without prior notice to the Committee on Stock List, and not to make any change in its listed securities, nor to add to the number of the registrars of its stock, nor to change a registrar of its stock, without the prior approval of the Committee on Stock List; nor to select an officer or director of the company as a trustee of its mortgages or other listed securities, unless such officer or director be a co-trustee for an issue having a corporate trustee.

(Testimony of M. J. Curry.)

To notify the Stock Exchange in the event of the issuance or creation in any form or manner of any rights to subscribe to, or to be allotted, its securities, or of any other rights or benefits pertaining to ownership in its securities, and to afford the holders of its listed securities a proper period within which to record their interests and to exercise their rights, and to issue all such rights in form approved by the Stock Exchange and to make the same transferable, payable and deliverable in the Borough of Manhattan, City of New York.

To make application to the Stock Exchange for the listing of additional amounts of listed securities sufficiently prior to the issuance thereof to permit action in due course upon such application.

To forward to the Stock Exchange copies of all notices mailed to stockholders looking toward Charter amendments, and to file with the Stock Exchange a certified copy of amended Charter, or Resolutions of Directors in the nature of amendments, as soon as such amendments or resolutions have become effective.

To notify the Stock Exchange of the change or removal, to a substantial extent, of collateral deposited under any of its mortgage or trust indentures under which listed securities are outstanding.

To have on hand at all times a sufficient supply of bonds to meet the demands for transfer.

To furnish the New York Stock Exchange, on demand, such reasonable information concerning the company as may be required.

(Testimony of M. J. Carry.)

General

The fiscal year of the Railroad Company ends on the 31st day of December.

The principal office of the Company is in the Mills Building; San Francisco, California.

The annual meeting of stock holders is held on the last Wednesday in March at the principal office of the Railroad Company in San Francisco, California.

The names and addresses of the Directors, whose terms expire March 25, 1931, are: Arthur Curtiss James, Thomas M. Shumacher, Arthur W. Loasby and Winthrop W. Aldrich, of New York, N. Y.; Frank E. Sullivan, William Fries, J. G. Hooper, Scott F. Fmfis. Wellington T. Smith, W. L. Hughson, H. M. Adams, A. R. Baldwin and F. M. Angellotti of San Francisco, Calif.; John L. Naglé, of Sacramento, Calif.; Charles Elsey, of Oakland, Calif.; Frederick E. Williamson and James E. Gorman, of Chicago, Ill.; L. W. Baldwin, of St. Louis, Mo.; and C. W. Nibley, of Salt Lake City, Utah.

The Executive Committee is: Arthur Curtiss James, Arthur W. Loasby, Winthrop W. Aldrich and Thomas M. Schumacher, Chairman, and H. M. Adams, President ex-officio.

(Testimony of M. J. Curry.)

New York, February 20, 1931.

Referring to its previous applications, especially to A-9601, dated September 30, 1930, The Western Pacific Railroad Company (hereinafter called the "Railroad Company") hereby makes application for the listing on the New York Stock Exchange of $5,000,000 additional of its First Mortgage Five per Cent. Gold Bonds, Series A, due March 1, 1946, consisting of Nos. M-43551 to M-48550 both inclusive, for $1,000 each (and such fully registered bonds as may be issued in exchange for coupon bonds), on official notice of issuance, sale and distribution, making the total amount of Series A Bonds issued or to be issued and for which application is made, $49,302,800 (of a total authorized issue of $50,000,000).

Authority

The issuance of said $5,000,000 Series A Bonds of the Railroad Company covered by this application was authorized by resolutions of the Board of Directors of the Railroad Company adopted September 2, 1930, and their authentication was authorized by a resolution adopted by the Executive Committee on February 11, 1931. The purpose of said issuance (as more fully hereinafter described) is to finance in part the construction and/or acquisition by Railroad Company of its "Northern California Extension," the expenditure in such construction and/or acquisition, amounting to more than $1,000,000, and therefore, pursuant to sub-

(Testimony of M. J. Curry.)

paragraph Seventh of subdivision D of Section 2 of Article Second of the First Mortgage of Railroad Company, dated June 26, 1916, hereinafter mentioned, a majority in amount of such portion of the Capital Stock of Railroad Company as was present in person or represented by proxy at a meeting of stockholders of Railroad Company called for such purpose, consented to the authentication and delivery of First Mortgage Bonds and/or the payment of deposited cash therefrom with respect to the construction and/or acquisition by Railroad Company of said new line of railroad, its so-called "Northern California Extension," such meeting being held on September 22, 1930, at the principal office of Railroad Company in San Francisco, California; a tally of the ballots cast by all stockholders present at said meeting disclosed that no share of stock had been voted against said consent and that the number of shares of stock voted for said consent was 283,000 shares of Preferred Stock and 474,984 shares of Common Stock of Railroad Company, being more than 99% of all of the Capital Stock of Railroad Company then issued and outstanding. The issuance and sale of said $5,000,000 Series A Bonds at not less than 97.5% of their face amount and accrued interest, and for the purposes hereinafter stated, was approved by order of the Interstate Commerce Commission dated October 6, 1930 in

(Testimony of M. J. Curry.)

Finance Docket No. 8473. No further authority is required. The Railroad Company has sold and delivered $1,000,000 of said bonds, on February 11, 1931, for cash at the price of 97.5% of their face amount, together with accrued interest thereon, and the proceeds have been applied to the purposes for which the bonds were issued.

Opinion of Counsel

The opinion of Counsel as to the legality and validity of the issue was rendered by Mr. John B. Marsh, a member of the firm of Taylor, Blanc, Capron & Marsh, 43 Exchange Place, New York, N. Y., Mr. Carl Taylor of that firm being counsel to the Board of Directors of the Railroad Company.

Purpose of Issue

The purpose of the issue of said Bonds is to provide proceeds to finance in part the construction and/or acquisition by Railroad Company of its "Northern California Extension," a new line of railroad, to begin at a point on the existing main line of Railroad Company at or near Keddie, Plumas County, California, and to extend approximately 112 miles in a general northerly direction to a connection at or near Bieber, Lassen County, California, with a line of railroad of Great Northern Railway Company now under construction from Klamath Falls, Oregon, southerly to said Bieber; also including a line of railroad to be jointly acquired and/or constructed and owned by Railroad

(Testimony of M. J. Curry.)

Company and said Great Northern Railway Company extending from a point on the said line of Great Northern Railway Company (now under construction) in the vicinity of Lookout, Modoc County, California, westerly to a connection with the McCloud River Railroad at or near Hambone, Siskiyou County, California, approximately 36 miles in length: liabilities or expenditures on account of such construction and/or acquisition of said new line of railroad being of a character with respect to which bonds may be issued and the proceeds of bonds paid out under the terms of Section 2 of Article Second of said First Mortgage, and having been set forth in detail in the application of the Railroad Company to the Interstate Commerce Commission upon which the above mentioned order of October 6, 1930 was based.

Description

The First Mortgage Bonds are secured by the Railroad Company's First Mortgage, dated June 26, 1916, to First Federal Trust Company (now Crocker First Federal Trust Company of San Francisco, California), and Henry E. Cooper (18 Pine Street, New York City), Trustees. The Bonds covered by this application are an additional issue of Series A Bonds of $5,000,000 principal amount, all bearing interest at the rate of five per cent. per annum, dated June 26, 1916, and maturing March 1, 1946.

(Testimony of M. J. Curry.)

The principal of the Bonds is payable at the office or agency of the Railroad Company in the Borough of Manhattan, City of New York, N. Y., and the interest thereon is payable at its said office or agency, or at the option of the holder at its office or agency in the city and county of San Francisco, semi-annually, on March 1st and September 1st. Both principal of and interest upon each bond are payable in gold coin of the United States of America of or equal to the standard of weight and fineness as it existed June 26, 1916, without deduction for any tax, assessment or other governmental charge (except the Federal income tax imposed by the Act of Congress approved October 3, 1913, with respect to income derived from interest paid thereon), which the Railroad Company or the Trustees under the mortgage securing the Bonds, or either of them may be required to pay thereon or to retain therefrom under any present or future law or ordinance of the United States of America, or of any state, territory, municipality, or other taxing authority therein; and the Railroad Company assumes the payment of all such taxes, assessments and charges with the exception aforesaid.

The Bonds are in coupon form of the denominations of $1,000 and $500 and $100 and are registerable as to principal only. Coupon bonds for $1,000 are interchangeable with registered bonds of the denominations of $1,000, $5,000 and $10,000 or multiples of $10,000. Coupon bonds for $1,000, $500

(Testimony of M. J. Curry.)

and $100 are also interchangeable in equal principal amounts. For any such exchange and for any transfer of registered bonds or of coupon bonds registered as to principal, the Company, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge and except in case of coupon bonds registered as to principal an additional amount not exceeding $1 for each new bond issued upon such exchange or transfer.

Sinking Fund

The Mortgage securing the bonds provides for the creation of a sinking fund, to be especially applied to the purchase or redemption of bonds, and requires the Railroad Company for that purpose to pay, out of any income lawfully applicable thereto, after payment of operating expenses of every description, taxes and interest upon the bonds, the sum of $50,000 on January 1st of each year, commencing with the year 1919. Series A Bonds are redeemable through the sinking fund at par and accrued interest on at least sixty days' previous published notice, as described under redemption. All bonds purchased or redeemed by the sinking fund are to be cancelled and delivered to the Railroad Company. These provisions have been fully complied with.

Redemption

The Railroad Company may redeem all or any part of said Series A Bonds on any semi-annual

(Testimony of M. J. Curry.)

interest payment date at par and accrued interest on notice published once in each calendar week for eight successive weeks in two newspapers of general circulation published in the Borough of Manhattan, New York, N. Y., and one newspaper of general circulation published in San Francisco, California, one such publication to be not less than sixty nor more than ninety days before the date of redemption. The Company may elect to redeem the bonds of one or more series. Serial numbers of bonds drawn by lot for redemption are required to be stated in publications of notice of redemption.

All bonds redeemed are to be cancelled or indelibly stamped with a statement that they have been redeemed. In the case, however, of bonds hereafter refunded with, or exchanged for, or the payment, redemption or retirement otherwise whereof shall be provided for by means of, refunding bonds or other obligations of the Railroad Company issued under a mortgage or other instrument providing that bonds redeemed pursuant to the provisions of the First Mortgage, notwithstanding that they shall have been cancelled or marked "Cancelled," shall be deposited with the Trustees under such new mortgage or other instrument, as security for such refunding bonds or other obligations, the bonds so redeemed and deposited shall be deemed to remain alive and unextinguished in the hands of the Trustees under such new mortgage or other instrument for the security of such refunding bonds or other

(Testimony of M. J. Curry.)

obligations, to the extent specified in Section 2 of Article Third of the Mortgage.

Default

The Mortgage provides that in case of default in the payment of interest continuing for the period of three months or default in the payment of principal, or in the observance or performance of any covenants, conditions or agreements on the part of the Railroad Company in the Bonds or in the Mortgage contained continuing for the period of three months after written notice from the Trustees, or in case an order be made for the appointment of a Receiver, the Trustees may, and upon the written request of the holders of twenty-five per cent. in amount of the bonds then outstanding shall, by notice in writing, declare the principal of all of the outstanding bonds to be due and payable immediately. The Mortgage provides that the holders of a majority in amount of the Bonds then outstanding may waive any default that shall have happened and its consequences upon the remedying of such default. It gives the holders of a majority in amount of bonds outstanding the right to direct and to control the action of the Trustees, and the exercise of the remedies provided by the Mortgage.

Additional Bonds

The Mortgage provides, subject to the limitation that the aggregate amount of bonds outstanding shall not exceed fifty million dollars, for the issu-

(Testimony of M. J. Curry.)

nce of additional bonds to pay, or reimburse the Railroad Company for the cost of the construction or purchase of extension to or additional lines of railroad and for the betterment, improvement and equipment of the railroads and other property owned by the Railroad Company or its subsidiary companies and subject to the lien of the Mortgage, or securities representing the same, at the rate of one thousand dollars principal amount of bonds for each one thousand dollars of authorized expenditures for the purposes aforesaid, or liabilities incurred therefor. The Mortgage also provides for the issuance of bonds sold for cash, against the deposit of the net cash proceeds with the Mortgage Trustees, subject to being withdrawn by the Railroad Company for the purposes above stated to the extent of the net proceeds of each one thousand dollars principal amount of bonds so sold for each one thousand dollars principal amount of bonds which might have been authenticated against such expenditures or liabilities.

The Mortgage also provides that bonds of any series outstanding may be replaced by bonds of another series to a like aggregate principal amount, either upon surrender of the outstanding series for cancellation or upon redemption thereof. The Mortgage further provides for the issuance of new bonds to replace bonds mutilated, lost or destroyed, upon proper proof and satisfactory indemnity.

(Testimony of M. J. Curry.)

Changes in Capitalization

Since June 30, 1930 (the date as of which the consolidated balance sheet contained in said previous application A-9601 was made) there has been no change in the amount of Capital Stock or funded debt of the Railroad Company authorized and outstanding except:

First. The issuance of the $5,000,000 of Series A 5% Bonds covered by said Application A-9601, and

Second. The purchase of $52,000 face amount of the Series "A" 5% Bonds, for the sinking fund (making the total amount so purchased $707,700); and

Third. The retirement of $207,000 (face amount) of its 5½% Equipment Trust Certificates, Series "C" and $73,000 (face amount) of its 5% Equipment Trust Certificates, Series "D."

Fourth. The issuance of $1,000,000 of the $5,000,000 of Series A 5% Bonds, listing of which is herein applied for.

Properties

The properties of the Railroad Company are described in the original application for listing of Series A Bonds, No. A-4747, dated March 13, 1917, and in the subsequent applications Nos. A-5478, dated June 30, 1921; A-5667, dated May 10, 1922; A-6800, dated July 16, 1925; A-7277, dated September 30, 1926; A-7722, dated October 31, 1927; A-8696, dated May 16, 1929; A-9504, dated July 1, 1930, and A-9601, dated September 30, 1930.

(Testimony of M. J. Curry.)

Since June 30, 1930, the following important changes in mileage have occurred:

Completion of 7.71 miles additional main line, yard, industry and side tracks the operation of which commenced on various dates between July 1, 1930 and December 31, 1930.

Completion of .29 miles additional branch line side and spur tracks, the operation of which commenced on various dates between July 1, 1930 and December 31, 1930.

Acquisition of joint interest with other carriers in .15 miles of industry tracks, operation of which commenced on various dates between July 1, 1930 and December 31, 1930.

Since June 30, 1930, the Railroad Company has made the following changes in equipment:

Additions:	
Freight train cars: Flat car	1
Total additions	1
Retirements:	
Freight train cars destroyed and converted:	
Box	1
Refrigerator	5
Flat cars	3
Construction and maintenance equipment:	
Outfit cars	4
Total deductions	13
Net total units retired July 1, 1930, to December 31, 1930	12

Lien

Reference is made to the previous listing applications, Nos. A-4747, A-5478, A-5667, A-6800,

(Testimony of M. J. Curry.)

A-7277, A-7722, A-8696, A-9504 and A-9601 for a description of the property subject to the lien of the Mortgage prior to July 1, 1930. The property on which the Mortgage constitutes a first lien includes the following:

Mileage:	Miles
Main line mileage, San Francisco to Salt Lake City	926.41
Branch lines, main track	125.08
Second main track	2.73
Yard tracks and sidings, etc.	323.46
Total track miles	1,377.68

Equipment:	
Locomotives	146
Passenger cars	13
Freight cars	5,877
Service cars	400
Floating equipment	6
Total	6,442

The foregoing equipment does not include additional unmortgaged equipment covered by Equipment Trust Agreements, Series "B," Series "C" and Series "D," as follows:

Locomotives	21
Passenger cars	48
Freight cars	3,583
Service cars	1

Securities:

1,000 shares Capital Stock (50% of outstanding) of The Salt Lake City Union Depot and Railroad Company, operating the passenger terminal at Salt Lake City, leased to the Railroad Company and The Denver and Rio Grande Western Railroad Company.

4,500 shares of the Capital Stock (entire issue) of the Deep Creek Railroad Company, operating a line of railroad in Western Utah, 46 miles.

(Testimony of M. J. Curry.)

4,005 shares of the Capital Stock (entire issue) of Standard Realty and Development Company organized to acquire and hold real estate in connection with the construction of the Railroad Company.

10,000 shares of the Capital Stock (entire issue) of Sacramento Northern Railway, operating 258.98 miles of main line of railroad in California.

$1,372,733.95 Face amount Promissory Note of Sacramento Northern Railway payable to The Western Pacific Railroad Company dated December 29, 1928, due on or before March 1, 1943, with interest at rate of 5¾% per annum.

1,553,742.77 Face amount Promissory Note of Sacramento Northern Railway payable to The Western Pacific Railroad Company dated September 2, 1930, due on or before March 1, 1945, with interest at rate of 5¼% per annum.

5,213,475.35 par value First Mortgage 5% Twenty-Year Gold Bonds and Bond Participation Certificates of Sacramento Northern Railroad.

Deposited cash in the hands of Mortgage Trustees, as of December 31, 1930, $53,697.45.

The First Mortgage contains a provision subjecting to its lien after acquired property purchased with bonds or their proceeds and property directly appurtenant to or forming an integral part of the mortgaged railroad, or securities representing the same, also additional securities of subsidiary companies as defined in the First Mortgage, but the First Mortgage permits the Railroad Company to acquire with free funds, free from the lien of the First Mortgage, additional lines of railroad, branches and extension, equipment and securities.

From July 1, 1930 to December 31, 1930, inclusive, the Railroad Company has expended for road and equipment (including the above described equipment) the following amounts:

(Testimony of M. J. Curry,)

Road and structures and general expenses	$2,507,136.93
Equipment	50,540.86
Total	$2,557,677.79

Capital Stock

All of the issued and outstanding Capital Stock, consisting of $47,500,000 par value of Common Stock and $28,300,000 par value of Preferred Stock, except Directors' qualifying shares of Common Stock, is held by The Western Pacific Railroad Corporation, a Delaware corporation. $24,200,000 of the authorized Capital Stock of the Company, consisting of $12,500,000 of Common Stock and $11,700,000 of Preferred Stock is not yet issued or outstanding.

Dividends

The following dividends have been paid on the Preferred and Common Stocks since 1922:

DIVIDENDS—PREFERRED STOCK

Year	Rate	Amount paid
1923	6%	$1,650,000
1924	6%	1,650,000
1925	7.558%	2,078,450
1926	6%	1,650,000
1927	1½%	412,500
1928		None
1929		None
1930		None

DIVIDENDS—COMMON STOCK

Year	Rate	Amount paid
1925	5%	2,375,970

Prior to 1925, Railroad Company paid no dividends on its Common Stock.

(Testimony of M. J. Curry.)

Policy As to Depreciation

No specific amount is set aside either monthly or annually on account of depreciation of roadway or structures, but all such property is fully maintained and when retired or replaced is written off out of capital account.

With respect to equipment, charges are made monthly to operating expenses and corresponding amounts credited to "Accrued depreciation equipment," at a general rate of 3% per annum on the original cost of the equipment.

Agreements

The Western Pacific Railroad Company, in consideration of the listing of the securities covered by this application, agrees with the New York Stock Exchange as follows:

To notify the New York Stock Exchange promptly of any change in the general character or nature of its business.

(Testimony of M. J. Curry.)

To notify the New York Stock Exchange immediately if it or any subsidiary or controlled company should dispose of any property or of any stock interest in any of its subsidiary or controlled companies, when such disposal would impair or materially affect its financial position or the nature or extent of its operations as theretofore conducted.

Subject to Interstate Commerce Commission regulations, to publish periodical statements of earnings, as agreed upon with the Committee.

To publish at least once in each year and submit to stockholders at least fifteen days in advance of the annual meeting of the corporation, a Balance Sheet, an Income Statement for the last fiscal year and a Surplus statement of the applicant company as a separate corporate entity and of each corporation in which it holds directly or indirectly a majority of the voting stock: or, in lieu thereof, eliminating all inter-company transactions:

(a) a similar set of financial statements fully consolidated as to the applicant company and all corporations in which it owns directly or indirectly a majority of the voting stock, or

(b) a similar set of financial statements consolidated as to the applicant company and specifically named or described subsidiaries, with separate similar financial statements for each unconsolidated corporation in which the applicant company holds directly or indirectly a majority of the voting stock.

Such statements shall disclose fully the nature

(Testimony of M. J. Curry.)

and extent of the interest of the applicant company in the corporations whose unconsolidated financial statements are furnished, and also the existence of any default in interest, cumulative dividend requirements or sinking fund or redemption fund requirements of any of the corporations whose accounts are thus consolidated or separately shown.

Subject to Interstate Commerce Commission regulations, to publish all future annual financial statements of any character, in the form contained in the listing application and, in the publication of reports of earnings for any period of less than a fiscal year, to show net profits in the aggregate and per share after Depreciation, Depletion, Income Taxes and Interest, estimating the proportionate amount of these items as accurately as may be if not finally determined at date of publication.

Not itself, and not to permit any subsidiary, directly or indirectly controlled, to take up as Income stock dividends received at an amount greater than that charged against Earnings, Earned Surplus or both of them by the issuing Company in relation thereto.

To maintain, in accordance with the rules of the Stock Exchange, a transfer office or agency in the Borough of Manhattan, City of New York, where all listed securities shall be directly transferable, and the principal of all listed securities with interest or dividends thereon shall be payable; also a registry office in the Borough of Manhattan, City of

(Testimony of M. J. Curry.)

New York, south of Chambers Street, other than its transfer office or agency in said city, where all listed securities shall be registered. If its transfer books should be permanently closed, to continue to split up certificates of listed stock into smaller denominations in the same name so long as such stock shall be retained upon its list by the New York Stock Exchange. If its transfer office or agency should be or should become located north of Chambers Street, to arrange, at its own cost and expense that its registry office will receive and re-deliver all securities deposited at such registry office for the purpose of transfer.

Not to add to the number of its transfer agencies nor to make any change of a transfer agency, or of a trustee of its listed bonds or securities, without prior notice to the Committee on Stock List, and not to add to the number of registrars of its listed stock nor to change a registrar of its listed stock without the prior approval of the Committee on Stock List, nor to select an officer or director of the company as a trustee of its mortgages or other listed securities unless such officer or director be a co-trustee for an issue having a corporate trustee.

Not to make any change in the form or nature of its listed securities or in the rights or privileges of the holders thereof, without having given twenty days' prior notice to the Committee on Stock List of such proposed changes, and having made appli-

(Testimony of M. J. Curry.)

cation for the listing of the securities as changed, if the Committee on Stock List so requires.

To notify the Stock Exchange in the event of the issuance or creation in any form or manner of any rights to subscribe to, or to be allotted its securities, or of any other rights or benefits pertaining to ownership in its securities, and to afford the holders of its listed securities a proper period within which to record their interests and to exercise their rights, and to issue all such rights in form approved by the Stock Exchange and to make the same transferable, payable and deliverable in the Borough of Manhattan, City of New York.

To make application to the Stock Exchange for the listing of additional amounts of listed securities sufficiently prior to the issuance thereof to permit action in due course upon such application.

To forward to the Stock Exchange copies of all notices mailed to stockholders looking toward Charter amendments, and to file with the Stock Exchange two copies of amended Charter, or Resolutions of Directors in the nature of amendments (one of which must be certified), as soon as such amendments or resolutions have become effective.

To notify the Stock Exchange of the change or removal, to a substantial extent, of collateral deposited under any of its mortgage or trust indentures under which listed securities are outstanding.

To have on hand at all times a sufficient supply of bonds to meet the demands for transfer.

(Testimony of M. J. Curry.)

To furnish the New York Stock Exchange, on demand, such reasonable information concerning the company as may be required.

General

The fiscal year of the Railroad Company ends on the 31st day of December.

The principal office of the Company is in the Mills Building, San Francisco, California.

The annual meeting of stockholders is held on the last Wednesday in March at the principal office of the Railroad Company in San Francisco, California.

The names and addresses of the Directors, whose terms expire March 25, 1931 are: Arthur Curtiss James, Thomas M. Schumacher, Arthur W. Loasby and Winthrop W. Aldrich, of New York, N. Y.; Frank E. Sullivan, William Fries, J. G. Hooper, Scott F. Ennis, Wellington T. Smith, W. L. Hughson, H. M. Adams, A. R. Baldwin, and F. M. Angellotti, of San Francisco, California; John L. Nagle, of Sacramento, California; Charles Elsey of Oakland, California; Frederick E. Williamson and James E. Gorman, of Chicago, Illinois; L. W. Baldwin, of St. Louis, Missouri; and C. W. Nibley, of Salt Lake City, Utah.

The Executive Committee is: Arthur Curtiss James, Arthur W. Loasby, Winthrop W. Aldrich and Thomas M. Schumacher, Chairman, and H. M. Adams, President ex-officio.

The Officers of the Railroad Company are: Chairman of the Board, Arthur Curtiss James; Chairman

(Testimony of M. J. Curry.)

of the Executive Committee, Thomas M. Schumacher; President, H. M. Adams; Executive Vice-President, Charles Elsey; Vice-Presidents, E. W. Mason, J. F. Hogan and M. J. Curry; Secretary, W. G. Bruen; Treasurer, E. C. Bates; Assistant Secretary and Assistant Treasurer, M. J. Curry; Assistant Secretaries, Thomas J. Byrne and C. L. Droit.

The Bonds are interchangeable as to denomination and may be transferred and registered at The Chase National Bank of the City of New York, 11 Broad Street, New York, N. Y.

The Agents for the payment of interest are The Chase National Bank of the City of New York and Crocker First Federal Trust Company of San Francisco, California.

The place for the payment of the principal is at the office of The Chase National Bank of the City of New York.

THE WESTERN PACIFIC
RAILROAD COMPANY,
By M. J. CURRY,
Vice-President.

This Committee recommends that the above-mentioned $5,000,000 First Mortgage 5% Gold Bonds, Series A, due March 1, 1946, included in numbers M-43551 to M-48550, for $1,000 each (and registered bonds issued in exchange for coupon bonds) be added to the list on official notice of issuance, sale and distribution, in accordance with the terms

(Testimony of M. J. Curry.)

of this application, making the total amount authorized to be listed $49,302,800.

FRANK ALTSCHUL,
Chairman.

Adopted by the Governing Committee, March 11, 1931.

ASHBEL GREEN,
Secretary.

[Endorsed]: United States District Court. No. 26591. Western Pac. R. R. Co. Irving Trust Exhibit No. 12. Filed 1/22/1940. Walter B. Maling, Clerk.

Mr. McCollum: That is all I have, your Honor.

Mr. Wood: If your Honor please, in respect to these exhibits, I want to make clear the position of the First Mortgage Trustees. [1170] I do not intend to object to their admission in evidence, but I want to make clear that we do not consider that these listing applications or listing statements which they contain are proper evidence, because they are not binding upon the First Mortgage Trustees. We are perfectly willing that they go in the record, and we can argue the question of their relevancy in the argument and briefs.

The Court: Very well.

Mr. Sloss: If your Honor please, I should like to introduce an exhibit through Mr. Curry. It is prob-

(Testimony of M. J. Curry.)

ably not cross-examination, but I imagine it would be simpler to take it up at this time.

Q. Mr. Curry, you are an officer, are you not, of the Western Pacific Railroad Corporation?

A. I am.

Q. Which holds all of the stock of the Debtor?

A. I am.

Q. And you are familiar with the holdings of stock in that corporation by the Western Pacific Corporation? A. Yes, sir.

Q. There has been prepared as an exhibit a statement showing the percentage of the preferred stock of the corporation held by A. C. James and two corporations which he owns, supplementing paragraph 48 of the Stipulation of Facts. Have you that exhibit?

A. I have, Mr. Sloss. It happens to be in my papers.

Q. I will hand you this copy and I will ask you whether the statements therein are correct as shown by the stock records of the corporation?

A. Yes, sir, to the best of my knowledge they are correct.

Mr. Sloss: If your Honor please, we will offer this in evidence on behalf of the Corporation as Western Pacific Railroad Corporation's Exhibit No. 1. Copies have been handed to counsel.

(The document was marked "Western Pacific Railroad Corporation's Exhibit 1.")

(Testimony of M. J. Curry.)

WESTERN PACIFIC RAILROAD CORP.

EXHIBIT No. 1

The Western Pacific Railroad Corporation

MEMORANDUM RE HOLDINGS OF PREFERRED AND COMMON STOCK.

At the close of business on September 13, 1939 there were outstanding (excluding treasury stock) 574,501 shares of the common stock and 381,250 shares of the preferred stock of The Western Pacific Railroad Corporation.

The holdings of such shares, as shown by Paragraph 48 of the "Stipulation as to Facts not in Dispute", held by Arthur Curtiss James, Curtiss Southwestern Corporation and Curtiss Southwestern Company, constituted the following percentages of the total outstanding stock of each of such classes, to-wit:

Of the preferred stock 8.76%

Of the common stock ..... between 61% and 61.5%

Figures and computation furnished by M. J. Curry, Sec. and Treas. of The Western Pacific Railroad Corporation.

[Endorsed]: United States District Court. No. 26591. Western Pac. R. R. Co. Western Pac. R. R. Corp. Exhibit No. 1. Filed 1/22/1940. Walter B. Maling, Clerk.

The Court: Anything further of this witness? That is all. [1171]

J. W. WILLIAMS,

Called by the Institutional First Mortgage Bondholders Committee; Sworn.

The Clerk: Will you state your name to the Court, please? A. J. W. Williams.

Direct Examination

Mr. Swaine: Q. Will you state your occupation, Mr. Williams?

A. Chief Engineer of the Western Pacific Railroad Company.

Q. Were you present this morning when Mr. Elsey testified as to the present efficiency of the property? A. Yes.

Q. Do you concur in his judgment? A. Yes.

Mr. Swaine: That is all.

The Court: Any questions? That is all.

Mr. Clay: We have two witnesses for the R. F. C. I would like to call Mr. Blyth.

CHARLES R. BLYTH,

Called by Reconstruction Finance Corporation; Sworn.

The Clerk: Will you state your name to the Court? A. Charles R. Blyth.

Direct Examination

Mr. Clay: Q. Will you state your business, Mr. Blyth?

(Testimony of Charles R. Blyth.)

A. I am the President of Blyth & Company, a corporation that has been in business for twenty-five years in handling investment bonds, investment securities.

Q. They are engaged in the business of distributing and underwriting?

A. Underwriting and distributing, yes.

Q. They also underwrite securities?

A. Yes, they do.

Q. And take participation in public offerings, do they not? A. That is correct. [1172]

Q. And you have handled railroad securities?

A. Yes, we have.

Q. And you have branches both in San Francisco and New York? A. Yes, we do.

Q. With your head office here. Have you studied the characteristics of the new First Mortgage Bonds provided for in the Western Pacific plan?

A. Yes, I have.

Q. Have you formed any conclusion as to whether your firm would be interested in those bonds?

A. My firm would not be interested in those bonds at any price that I could imagine would be acceptable.

Q. Do you think any private underwriter would be interested in taking them to re-sell to the public?

A. I feel sure they would not.

Q. Do you think they would be salable through private channels?

(Testimony of Charles R. Blyth.)

A. Only that certain private individuals might be interested from a speculative standpoint in perhaps offering to buy the bonds at a big discount. They would not be available to institutional buyers.

Q. Why would they not be available to institutional buyers?

A. The chief buyers of that kind are in the East, in New York City, largely—New York savings banks and the larger institutions. The law provides a certain continuity of earnings as applicable to a sufficient amount to pay bond interest over a period of years before they would be available for such institutional investment. These bonds do not qualify.

Q. You stated a moment ago that they would not be salable except to somebody who would take them at a big discount. What do you mean by a big discount? Can you estimate at what discount they would be salable to someone?

A. These bonds I think would bear what is called in our business a rating of about "A", according to Moody, which is one of the standard organizations. We are forced to recognize these ratings. Bonds that bear an "A" rating usually yield at the present market about 4½ per cent. It would mean that the [1173] market value of these bonds, if you could forget everything except the pure statistics, would range around 90, I should say.

Q. That is, a prospective buyer who was willing to take them and hold them might pay 90, but could not re-sell publicly?

(Testimony of Charles R. Blyth.)

A. He could not re-sell them; it would be purely a speculation.

Q. Have you any other reasons which you would like to give for the conclusions you have stated?

A. I think that the most important consideration is the historical background of the Debtor corporation. I think that the public is very slow to fancy a bond which is the obligation of a corporation which has been in default, or has been reorganized, we will say, twice in about 25 years, I think. It doesn't give you much confidence in what the future might bring forth, even though the reduction in the debt, compared to what it previously had, seems to be very small.

Q. You state that they would not be legal investments for institutions. Aren't the institutions such as insurance companies and savings banks at the present time the largest buyers of a publicly-offered railroad bond?

A. They are almost the only buyers. Railroad bonds at this rate of interest are not attractive to the individual investor. They won't buy them.

Q. Do you think these bonds could be sold to anybody except R. F. C.?

A. I am sure they could not.

Mr. Clay: That is all.

The Court: Any questions?

Mr. Coulson: May I ask a question?

The Court: Yes, Colonel.

(Testimony of Charles R. Blyth.)

Cross Examination

Mr. Coulson: Q. Mr. Blyth, you are familiar with the fact that during the years 1936, 1937 and 1938 there were considerable expenditures on this property by way of the completion of an improve-
[1174] ment and rehabilitation program?

A. I have seen the figures. I am not a close student of this situation; I don't want to pose as that, but I do know that that is a fact.

Q. Do you know, Mr. Blyth, that a large part of those expenditures, almost half, were necessarily charged to the operating expenses of the company?

A. I did not know that.

Q. Well, I state to you, Mr. Blyth, that during the years 1936, 1937, and 1938 approximately ten million dollars was spent on the improvement and rehabilitation of this property, and that of that amount almost half was charged to operating expenses under Interstate Commerce Commission rules, and I ask you, would the investment public recognize in buying bonds the necessity of some readjustment in the operating income to eliminate that extraordinary factor?

A. I do not think the investment public would concern itself with that, except to say it was a sign of great weakness that a road had to do that.

Q. Let me go on further, Mr. Blyth, then: This Court will shortly have before it the 1939 operating income of this property. I ask you to assume that the operating income of the Railroad Company will

(Testimony of Charles R. Blyth.)

be approximately $1,800,000. Would that sum constitute, in your mind, taking the year 1939 alone into account, an adequate coverage for an issue of ten million 4 per cent first mortgage bonds on the property?

A. If you want me to answer directly, yes, but I should think——

Q. I will bring it out. I know what you have in mind. Mr. Blyth, assuming that that year 1939 were the first year in which this extraordinary influence on income appeared. Would you think that those earnings for 1939 would have some significance to an investor?

A. Can I make a statement before I answer that?

Q. Answer it and then explain. A. Yes.

Q. I think I know what you have in mind. I intend to bring it out, [1175] but go ahead and explain. A. All right; I will wait.

Q. Mr. Blyth, if this property had earned for a reasonable period of years a sum comparable with its earnings in the year 1939 as assumed in my question, you would regard the coverage as adequate under the standards which investment bankers apply for an issue of ten million dollars first mortgage 4 per cent. bonds? A. Yes.

Q. Now, will you explain to the Court, if I haven't brought out what you have in mind?

A. I thought I was trying to answer whether these bonds were salable or not, and the fact that

(Testimony of Charles R. Blyth.)

the road might have made money in two or three years would not necessarily affect them.

Mr. Coulson: I think that is clear, Mr. Blyth, but I just wanted the record clear also as to the fact that we are dealing with a record where the earnings are not significant. Thank you, Mr. Blyth.

Mr. Clay: That is all, Mr. Blyth.

The Court: That is all.

Mr. Clay: I wish to call Mr. Futterer.

CHARLES FUTTERER,

Called for the Reconstruction Finance Corporation; Sworn.

The Clerk: Will you state your name to the Court, please? A. Charles Futterer.

Direct Examination

Mr. Clay: Q. Mr. Futterer, will you state in your own words what your past experience has been?

A. I am presently employed as an examiner in the Railroad Division of the Reconstruction Finance Corporation. After graduation from high school in 1920 I attended the University of Maryland, and graduated from the George Washington University in 1930. From graduation date from high school I was employed by the Western Maryland Railway Company in its mechanical [1176] and transportation departments for a continuous service of two

(Testimony of Charles Futterer.)

years, and during summer vacations in the same railroad. From 1925 to 1932 I was employed by the Bureau of Railway Economics, which is a division of the then American Railway Association, now a division of the Association of American Railroads. The Bureau of Railway Economics has a department supported by railroads that engages in scientific study of railroad problems which have to do statistical analysis and other research matters dealing with freight rate investigations, and so on.

From February, 1932 until July, 1936 I was engaged by the Reconstruction Finance Corporation in its Railroad Division, serving in various capacities there as an examiner. In the tour of duty it was necessary for me to prepare reports for consideration of the directors of the R. F. C. on applications for loans to railroads, which necessitated an appraisal of the collateral offered, and other matters that an ordinary lending organization would consider.

From 1936 until the close of 1939 I was employed by the Young Management Corporation in New York City, an investment counsellor firm, and by the Union Trust Company, of Pittsburgh, in their respective research and statistical departments. In these departments I was assigned the duties of submitting material that lent themselves to the consideration of the investment committees of those institutions with regard to the purchase, sale or retention of railroad securities.

(Testimony of Charles Futterer.)

Since my return to the R.F.C., in the Railroad Division, I have been assigned similar duties heretofore outlined.

Q. In passing upon applications, or in making recommendations to the directors of the R.F.C., do you not have to consider whether the prospective borrower can obtain the money from private sources?

A. It is my understanding that under the Act that enables the R. F. C. to make loans, that it is necessary that the company cannot borrow [1177] funds through regular banking channels at reasonable terms.

Q. And, therefore, both in your duties with the R.F.C. and in your duties with the investment counsel in New York and Pittsburgh, you have had to study marketing conditions?

A. That is true.

Q. And the possibility of railroads being able to borrow through private channels?

A. That is correct.

Q. Have you made any study of the public offerings of railroad securities in recent years?

A. I have.

Q. Is this a chart which you have prepared?

A. Yes.

Q. And from what was the information on that chart taken?

A. Principally from the Commercial and Financial Chronicle.

Q. Was it not all taken from the Commercial and Financial Chronicle? A. Yes, it was.

(Testimony of Charles Futterer.)

Q. In other words, the correction shown on the chart in ink is a correct correction?

A. That is right.

Q. And the data on here is correct as shown by the Commercial and Financial Chronicle?

A. That is correct.

Mr. Clay: I would like to offer this as R.F.C. Exhibit No. 1.

The Court: How is that designated, briefly?

Mr. Clay: The chart is headed "Offerings of Railroad Bond Issues, 1937-1940."

The Witness: Your Honor, may I interpose a correction, there, to say that it is 1938 to '40?

Mr. Clay: Yes, the heading should be changed from 1937 to 1938.

(The document was marked "R.F.C. Exhibit No. 1.")

R. F. C. EXHIBIT No. 1

OFFERINGS OF RAILROAD BOND ISSUES 1937-1940

1940		Rate	Series	Description	Dated	Date Due	Sold to Bankers % Price Cost	Offered to Public % Price Yield	Amount

[Endorsed]: United States District Court. No. 26591. Western Pac. R. R. Co. R. F. C. Exhibit No. 1. Filed 1/22/1940. Walter B. Maling, Clerk.

(Testimony of Charles Futterer.)

Mr. Clay: Q. Will you in your own words comment on this exhibit?

A. To date in 1940 the principal, or the only railroad bond issue that has been offered to the public, has been the 10- and 20-year collateral trust notes of the Louisville & Nashville Railroad. Those were sold to bankers in the first instance, [1178] the 3½s of 1950 at 99½, and the 4s of the 20-year maturity at 98½. The L. & N., serving as it does part of the Pocahontas Coal Region and Southeastern Coal Regions has had a long and established record of satisfactory earning power. For years it has been enabled, by virtue of its position and credit and resources, to pay dividends on its common stock, with probably one exception in 1933.

In 1939 the issue of railroad bonds to the public was limited, other than those of terminal companies, to the issue of the Wheeling & Lake Erie Railroad Company, which sold at 3⅛ and 2⅛, with maturities of 1970 and 1969. Of my own personal knowledge I know that the 2⅛ issue of Wheeling & Lake Erie was taken solely by one institution, and the 3⅛ were taken altogether by insurance companies and institutional investors.

In so far as the terminal companies are concerned, as will be shown by the footnote in the exhibit, they are in nearly every instance guaranteed by companies or their receivers.

Q. Take one, for example.

A. For example, to take the strongest one, probably, on the exhibit, is the Cincinnati Union Ter-

(Testimony of Charles Futterer.)

minal, which has as guarantors such predominant railroad earners as the C. & O., Norfolk & Western, Louisville & Nashville, P. R. R., and C. N. O. & T. P., which is controlled directly or indirectly by the Southern Railway; and the Terminal Railroad Association of St. Louis, where the guarantee may not be established by the fact that the credit position of the guarantors is so good, which I am not admitting, but, nevertheless, it provides such an essential facility that they just could not get along without it, and, naturally, bankers or other persons, other investors, are willing to take a railroad security of that character.

Q. In other words, is there only one railroad bond issue which was offered during 1939 which does not come under the category of a [1179] terminal issue guaranteed by one or more railroads?

A. In so far as the Commercial and Financial Chronicle report, the Wheeling & Lake Erie bonds were the only ones offered privately or to the public in 1939.

Q. During the entire year?

A. During the entire year.

Q All right. Do you consider the Wheeling & Lake Erie a security that is comparable to the new Western Pacific bonds?

A. Well, this issue of the Wheeling & Lake Erie, while it is a junior mortgage, none the less it is an obligation of a railroad company that has been able throughout the depression to earn its

(Testimony of Charles Futterer.)

fixed charges at least one and one-half times in the poorest year, and has been able, probably, with the first dividend since its reorganization in 1916 of $7 in 1937, was still able to pay one in 1939 of $5 on the common.

Q. Do you consider these Western Pacific bonds comparable to the Louisville & Nashville bonds which have been publicly offered this year?

A. The Louisville & Nashville bonds, being collateral trust notes, are not comparable with respect to the assets securing them; but, nevertheless, viewing the bonds from the standpoint of a private individual as an investor, or an institutional buyer, the asset value is overcome very much by the earnings record of the company in the mind of a person who is willing to put his funds in the railroad industry in general, or the particular company that has an opportunity to sell.

Q. Do the L. & N. and Wheeling & Lake Erie extend into the same general region?

A. No; the Louisville & Nashville was considered probably a Southern carrier, whereas the Wheeling & Lake Erie's predominant operations are from Toledo and Cleveland to Wheeling, and can be considered as probably one of the Great Lakes carriers. Nevertheless, both the Louisville & Nashville and the Wheeling & Lake Erie are both coal carriers, and for that particular reason [1180] are not subjected to the wide fluctuations in earning power that a railroad, say the Western Pacific,

(Testimony of Charles Futterer.)

is subject to, in that it does not have a commodity that is predominant in its tonnage, like coal.

Q. Is that observation true, also, of the Chesapeake & Ohio Railway?

A. The Chesapeake & Ohio is one of the strongest railroad companies in the country, from an earnings standpoint, and enjoys that position by reason of the fact that it operates in the Pocahontas coal fields. It has paid continuous dividends since 1922.

Q. Now, that brings you down to the last offering on the list, the Duluth, Missabe & Iron Range.

A. In 1938 the Duluth, Missabe & Iron Range sold their 3½s in the amount of $28,000,000. As you know, the Duluth, Missabe & Iron Range is a wholly owned subsidiary of United States Steel, and its prosperity depends on the transportation of iron from the Missabe and Vermillion ranges to the lakes. That originally was taken by the parent company in the amount of thirty million dollars, and when the market became propitious they offered it to the public at a price of 98, and the Steel Company still retained two million out of an originally authorized amount of thirty.

Q. Summarizing your exhibit, or summarizing your testimony in regard to the exhibit, do I follow you that during the period shown on the exhibit only four railroad bond issues were publicly sold which do not come into the classification of terminal issues? A. Corect.

(Testimony of Charles Futterer.)

Q. Guaranteed by other carriers?

A. Correct.

Q. Have you studied the provisions of the Western Pacific plan? A. I have.

Q. And the characteristics of the new First Mortgage Bonds? A. I have.

Q. Have you formed any conclusion as to the salability of these [1181] bonds through private channels?

A. I have, yes. In considering the possibility of the sale of the new mortgage bonds of the reorganized debtor, I have first taken the element of the general disfavor into which secured obligations of railroads in general have fallen. As heretofore adverted to, only the obligations of the strongly entrenched companies—operating companies—have been able to market their bonds in the past three years.

Q. In other words, only three roads in the United States, during the last three years?

A. Yes.

Q. As shown by the Commercial and Financial Chronicle?

A. Yes. In considering the railroad industry in general, one must take note that it has been affected by competition of carriers that have not probably been brought into proper competitive control; that the railroad industry is burdened with rigid costs that include taxes, and that elements affecting the Western Pacific in particular are not

(Testimony of Charles Futterer.)

so much different from that that affects the railroad industry in general. One important—

Q. Have you made a particular study of the factors that affect the Western Pacific, or prepared any charts to illustrate your testimony?

A. I have. I have attempted to prepare a chart that shows by way of explanation the factor of safety for the new fixed mortgage interest-bearing bonds of the Western Pacific Railroad.

Q. Is this a copy of that chart, or is this the chart? A. Yes.

Q. Where did you obtain the figures and information shown on that chart?

A. As indicated by the footnotes, the total operating revenues, the income available for interest, and the adjusted income available for interest as shown respectively by columns 1, 3 and 5, were taken from the Stipulation in these proceedings. The other figures were computed from the Stipulation.

Q. The other figures are mere mathematical compilations, are they not?

A. Correct. [1182]

Q. The result of mathematical computations?

A. I might suggest with regard to this exhibit that it might be clearer in column 10 if it was shown that the result was column 1—just strike that. I think it is clear as it stands.

Q. And these computations are correct?

(Testimony of Charles Futterer.)

A. To the best of my knowledge and belief they are correct.

Mr. Clay: I would like to offer this as R.F.C. Exhibit No. 2. It is a table headed "Western Pacific Railroad Company indicated income remaining after proposed interest charges and per cent. of gross revenues of such income remaining, 1922-1938, inclusive."

(The document was marked "R.F.C. Exhibit 2.")

R. F. C. EXHIBIT No. 2

THE WESTERN PACIFIC RAILROAD COMPANY*

January 20, 1940.

[Endorsed]: United States District Court. No. 26591. Western Pac. R. R. Co. R. F. C. Exhibit No. 2. Filed 1/22/1940. Walter B. Maling, Clerk.

(Testimony of Charles Futterer.)

Q. Mr. Futterer, will you comment on this exhibit and discuss it in your own words?

A. The purpose of this exhibit is to point out the so-called factor of safety for railroad mortgage bonds. Generally speaking, it is possible that a reduction or drastic reduction in fixed charges would offer assurance to the average railroad investor that he would be protected in income and probably in principal at the maturity of his obligation. A drastic reduction in fixed charges, obviously, would assist in restoring the credit position of any company. But such a reduction, or such a course is possible only when the margin of expenses over revenues, taking into consideration the normal fluctuations in the business cycle, and railroad earnings, would give what we might call a buffer for the fixed charges as indicated under the plan, and which are 494,000 odd. For this purpose we might take the years 1936 and 1937 for comparative reasons. In the former year—that is 1936—the income available for fixed charges as shown in column 5 on the adjusted basis, which takes into consideration the rehabilitation program and amortization of discount on funded debt and other adjustments that are specified—the margin of protection, —that is what was left after you paid the bare fixed interest charg- [1183] es—was only 9 per cent. of the total operating revenues of the Western Pacific System. Now, theoretically—and it could happen actually—if you had a decline of say 9 or

(Testimony of Charles Futterer.)

10 per cent. in your gross revenues, which would not be an unusual situation or fluctuation in railroad earnings, you would wipe out the coverage for your fixed charges, which indicates that, so far as the marketability of a bond and its standing from an investor's standpoint, is damaged to that extent. One bad year might put it into disrepute that four or five good years would have similarly built it up.

Q. Look at the year 1938. What decline in gross revenues was there in 1938 as compared with the years 1936 and 1937?

A. In 1938 the gross revenues of the Western Pacific System declined 10 per cent. under 1937, and was slightly less than it was in 1936. None the less that decline on the adjusted basis, as shown in paragraph 5, you only had $225,431 available for the bare fixed charges under the plan, resulting in a net deficit, or a coverage of such fixed charges of about 50 per cent.

Q. That is, a 10 per cent. decline in gross revenues reduced the amount available for the payment of interest to $225,000?

A. Yes. Of course, that statement should be qualified to the extent that it is possible for management of a railroad to adjust its expenses in some respects to minimize the amount of the decline in the total volume of business handled.

Q. Would it not also be true if taxes and other expenses increased 10 per cent., your margin of safety would be gone?

(Testimony of Charles Futterer.)

A. It would conversely operate that way. If you would assume the same level of operating revenues, and as we had in our recent experience of 1937, when the railroad retirement taxes and increase in the general wage level pushed the operating expenses of railroads generally to an all-time high level—in that situation, assuming [1184] the same level of total operating revenues and an unexpected increase in expenses, the margin of safety for the bonds could be similarly wiped out.

Q. You mentioned the year 1937 and the results of 1937 as shown on your exhibit. Was that not a relatively good year?

A. 1937, in so far as industry was concerned, and many railroads in particular, was the best year since 1930.

Q. From the standpoint of freight revenues of the Western Pacific, how would you compare 1937 with previous years?

A. Outside of the exhibit, but in the record I am sure, it would be noted that the freight revenues of the Western Pacific System in 1937 were just about 1½ per cent. more than in the year 1929. While this increase was impressive, because of changed conditions in the industry it was necessary for the Western Pacific, in order to establish such a record, to transport 18 per cent. more tonnage than in *1939*, as measured—

Q. Pardon me; you mean 1929? A. 1929.

Q. You said 1939.

(Testimony of Charles Futterer.)

A. —1929 as measured by total revenue net ton miles. While this increase might be used to measure the potentialities of the reorganized company, it is none the less true that, between 1929 and 1937 the average revenue per ton mile on the Western Pacific Railroad declined 11 per cent., or, in figures, from somewhere around 9½ mills to about 8.6 mills.

The Court: We will take a recess now until two o'clock.

(A recess was here taken until two o'clock p. m.)

[1185]

Afternoon Session

The Court: You may proceed.

Mr. Clay: Mr. Futterer.

CHARLES FUTTERER

Recalled;

Direct Examination

(Resumed).

Mr. Coulson: If your Honor please, in the hope of shortening the proceeding somewhat, with Mr. Clay's permission, I would like to make a brief statement. As I understand it, this witness has testified, like the prior witness, to the fact that under the existing conditions, bonds such as these proposed bonds of the Western Pacific, First Mortgage Bonds, which are refund trustees' certificates, are not marketable through ordinary channels, and that

(Testimony of Charles Futterer.)

the R.F.C. would be the only available customer at par. I don't understand that any of the objectors are going to put in any contrary testimony, and, as representing my client, I would be glad to concede, for purposes of the record, that in view of the earnings record of the Western Pacific, these bonds are not marketable through ordinary channels. The importance of it is that the R.F.C is organized and authorized only to buy such bonds when they cannot be marketed through ordinary channels at par, and it will all have to be made the subject of a further proceeding before the Interstate Commerce Commission at the time the bonds are actually offered to the R.F.C.; it seems to me we are only extending the record and taking up time by further testimony by Mr. Futterer as to the grounds upon which he arrived at his conclusion as an expert.

Mr. Swaine: If your Honor please, I think it goes a little further than that, from the standpoint of my clients. Several of the objections involve the issue as to whether the R.F.C. has been given an unfair consideration for taking these bonds. In [1186] other words, I think your Honor appreciates that under the Commission's plan the R.F.C. has been given treatment better than it would be entitled to for its present claim in protecting the rights of that present claim, in consideration of its taking new bonds; so, there is not only the question as to whether, under the technicalities of the R.F.C., the R.F.C. can take the bonds—that is, whether

(Testimony of Charles Futterer.)

they are marketable—but, as to whether the consideration which the Commission has prescribed in the Commission's plan constitutes excessive consideration; so, I think this testimony is relevant to that.

Mr. Clay: Your Honor, that is the whole point; the various parties are objecting that the R.F.C. is receiving preferential treatment; that is the issue we are meeting.

The Court: Yes.

Mr. Clay: On the point of consuming time, Colonel Coulson need not be alarmed, because I have only a few more questions.

The Court: You may proceed.

Mr. Clay: Q. Mr. Futterer, you heard Mr. Blyth's testimony this morning? A. I did.

Q. And the statement that the Western Pacific bonds—fixed interest bonds, could not be sold profitably except at a price of 90; do you agree with what Mr. Blyth said in that connection?

A. I think that the estimated discount of 10 points, as suggested by Mr. Blyth, is on the side of conservatism. 10 points would be a reasonable expectation that the bonds would sell at.

Q. Had you estimated a larger discount?

A. Well, with the benefit of Mr. Blyth's considered opinion, I would go on a little further and say—or would have said—they probably would have sold at a discount of 15 to 20 points.

Q. Have you read the Stipulation in this case?

(Testimony of Charles Futterer.)

A. I have.

Q. And in forming your conclusions you have taken into consideration [1187] the data contained in the Stipulation? A. Yes.

Q. You are aware that the Stipulation shows that the book value of the property of this Debtor is around $173,000,000? A. Yes.

Q. And the value for rate-making, around one forty-four? A. Yes.

Q. In your experience, would a prospective purchaser of the bonds inform himself as to these figures?

A. I am of the opinion that an ordinarily prudent investor would take in these elements of value in considering the value of the bonds to be issued, but only as a secondary consideration to the primary one that the earning power of the property is the important base upon which to rest the fixed capitalization of the property.

Q. You said "important base." Will you expand that? Important relative to what other factors?

A. Well, with respect to the factor of safety to which I have already alluded, it seems to me that the earning power of the property is primarily the most important consideration, although valuation and book investment, and those other elements, are proper considerations.

Q. You mean the earning power and the factor of safety that you discussed this morning?

A. Yes.

(Testimony of Charles Futterer.)

Q. Would a prospective bidder of the bonds consider any other factors?

A. Yes, a person that would make a loan on any property would probably take into consideration—and particularly, with reference to the Western Pacific—that in California, Nevada and Utah the assessed valuation—

Mr. Sloss (interrupting): Just a minute; we desire to object to any testimony on the question of the assessed valuation of these properties, on the ground it is incompetent, irrelevant, and immaterial, and I am prepared to cite a number of authorities in support of that objection.

Mr. Clay: The testimony is not being offered as testimony of the value of the property; it is merely testimony as to what [1188] factors the bond buyer would inform himself to in making a bid on the bonds.

The Court: Overruled.

Mr. Clay: Will you proceed?

Mr. Sloss: May I have an exception also, your Honor?

The Court: Yes.

The Witness: (Continuing) The valuation of the Western Pacific in the States of California, Utah and Nevada, for the year 1939 amounted to $22,858,555.

Mr. Clay: That is all as to this witness.

The Court: Any cross?

(Testimony of Charles Futterer.)

Cross Examination

Mr. Sloss: Q. Mr. Futterer, on this matter of the assessed valuation, will you kindly explain how you take that into account as bearing upon the value or salability of the bonds?

A. The assessed valuation of the Western Pacific for tax purposes in those States is an element of value that can be taken, just the same as the valuation, for rate-making purposes, or the book investment of the company; it is an element to be considered among others.

Q. Is it a factor that, in your opinion, would be taken into account by the ordinary investor in determining whether a bond is or is not a good investment?

A. It may not be taken into account by an ordinary investor, but certainly, by a person who is presenting to his clients all the material facts relating to a bond, he would be prepared to answer such questions.

Q. Have you made any study of the method of assessing property for tax purposes in California?

A. I have not.

Q. Or in Nevada? A. I have not.

Q. Or in Utah? A. I have not.

Q. And do you know whether or not, as a matter of fact, property—I am speaking not only of railroad property, but of any property— [1189] is in any of those States, assessed by the taxing

(Testimony of Charles Eutterer.)

authorities at its actual value, or anything approaching it?

A. I would presume that it would not be assessed at its actual value; however, I have been informed that in Nevada, taxes on the railroad property there are approximately the actual value of the property.

Q. You have made no investigation about California? A. No.

Q. And you don't know whether or not it is the fact that in California, ordinarily, real property is assessed at 50 per cent. or less of its real value, and, personal property, at a still smaller ratio? A. I am not informed as to that.

Mr. Sloss: We will move, if your Honor please, to strike out the testimony of the witness as to assessed valuation, on the ground that it appears that there is no foundation for the testimony as relating to any issue in this case.

The Court: I don't understand that it was offered for the purpose of fixing value; I understand it was offered for the purpose of showing it was one of the elements that might be considered by the prospective buyer.

Mr. Sloss: So limited, it is perhaps not so objectionable.

The Court: Denied.

Mr. Coulson: If your Honor please, I would like to have the record clear that I object to the testimony of the witness as to the assessed valuation,

(Testimony of Charles Futterer.)

and move to strike it out, on the ground that no sufficient basis was laid for his testimony as to what the assessed valuation actually was in these States, and the qualification of this witness as a witness—

The Court (Interrupting): Is it worth making such a fuss about?

Mr. Coulson: I would like the record to be clear that we do not admit that testimony as testimony in the case for all purposes, [1190] in the first place, your Honor, and in the second place I would like the record to be quite clear that we object to proving assessed values without showing any relationship, and what relation it has to the property, generally, of the Debtor.

The Court: Mr. Clay—is that your name, sir?

Mr. Clay: Yes, sir.

The Court: I understood that you were not offering this for the purpose of proving value.

Mr. Clay: We are not; we are offering it merely as evidence of one of the factors that a prospective purchaser of the bonds would look into.

Mr. Coulson: Your Honor, if Mr. Clay will limit this testimony to being one of the factors of information which this witness had, from which he arrived at his conclusions, rather than affirmative testimony for this Court as to the fact, I am perfectly content.

Mr. Clay: Well, as to that, Colonel, if you will limit the testimony which is in the record as to valuation for rate-making——

(Testimony of Charles Futterer.)

The Court (Interrupting): I don't think the assessed value of the property in California would have great weight with the Court in fixing the value of this property, because, as Judge Sloss has pointed out, the assessors in California do not assess property here for its full value, and, as he further pointed out, real property is assessed at perhaps 50 per cent. of its value, and maybe less, and personal property is scaled down much lower, so it wouldn't have any weight at all. I don't think, with the Court. I think you simply offered it for the purpose of showing it was one of the elements a prospective purchaser of stocks or bonds might take into consideration in buying this stock, before he bought the stock. It might be natural for a man to look up the assessed valuation of property, but, as I say, gentlemen, I [1191] don't think it is worth bothering much about; your motion, Colonel, is denied.

Mr. Coulson: Exception.

The Court: Yes.

Mr. Clay: May I make this remark: that, as I see the issue in this case, the issue is valuation for the purpose of reorganization, and I would like to take a similar exception to the relevancy and materiality of the evidence which Colonel Coulson has included in the Stipulation as to valuation for rate-making, and as to book values.

The Court: Yes?

(Testimony of Charles Futterer.)

Mr. Clay (Continuing): Those figures are not relevant or material to the issue before this Court.

The Court: Is that before me now?

Mr. Coulson: The question will be before your Honor on the argument: I doubt if it is before your Honor at the moment. There is a good deal to be said about it——

The Court: Do you wish me to make a ruling at this time on that, Mr. Clay?

Mr. Clay: I do, because the stipulation expressly reserves the right of any party to object to the materiality or relevancy or competency of the evidence that was stipulated to, and I merely request that my objection be recorded so that there will be no question raised later that no objection was made.

The Court: Your objection will be overruled.

Mr. Clay: Q. Mr. Futterer, this figure as to the aggregate valuation for tax purposes; where did you obtain that?

A. That was handed to my counsel by the secretary of the Western Pacific Railroad Company, and presumably—or, in fact, the source of the information were the records of the trustee of the Western Pacific Company. [1192]

Q. You mean the trustees in bankruptcy?

A. In bankruptcy.

Mr. Clay: That is all.

The Court: I suppose we are all agreed that that would not be an element in fixing value, are we not? You agree to that, yourself, do you not, Mr. Clay?

(Testimony of Charles Futterer.)

Mr. Clay: I do, your Honor.

The Court: Anything further of this witness?

Mr. Coulson: May I ask him just one or two questions, to complete the table? It is the table where you deal with coverage in relation to gross, Mr. Futterer.

Mr. Clay: I think that is Exhibit No. 2; Exhibit No. 2 for R. F. C.

Mr. Coulson: Q. Mr. Futterer, when you prepared this table for Mr. Clay, I assume you did not have available the earnings for 1939?

A. That is correct.

Q. So they are not included for that reason?

A. The year 1939 was not included.

Q. Now, under our Stipulation, the final figures of the Debtor's Trustee, as reported to the Court, and as they will be reported to the Court within a few days, are to become part of the record. I would like to ask you—for I have the estimates from the Agent of the Debtor's Trustee—what the result would be if you take for the year 1939 the estimate of gross—your column 1—16,700,000, and for your columns 3 and 5, 1,800,000——

Mr. Swaine: (Interrupting) Just a second, Colonel, the final figure that has already gone in is 1,005,000.

The Witness: 1,539,860, according to the testimony this morning.

Mr. Coulson: That was for the system, and this is for the company, Mr. Clay, the Railway Company.

(Testimony of Charles Futterer.)

itself. I am right, Mr. Elsey, in showing the company alone would be a million eight [1193] hundred——

Mr. Elsey: The company alone.

Mr. Coulson: That is what this total is based on——

Mr. Swaine: So that your Honor will understand what we are talking about, the company earnings include a good many fictitious earnings from subsidiaries, which are, in fact, deficits for which the company has to make advances to the subsidiaries. What we are reorganizing here is the system.

Mr. Coulson: Let me find out from Mr. Futterer.

Q. Mr. Futterer, the earnings, both total operating revenues and earnings available for interest, refer to after adjustment—that is, in columns 1, 3, and 5; what have you used, system earnings, or company earnings?

A. System earnings, as set forth in the Stipulation.

Q. Well, then, let me modify my question to you: assuming that you have for the year 1939, as system earnings, 16,700,000, and for the net available for interest——

Mr. Swaine, what was your amount?

Mr. Swaine: A million five.

Mr. Coulson: Well, let's take a million five hundred thousand.

Q. (Continuing) Now, will you indicate to the Court briefly what effect that will have on columns 2, 4, 6, 9, and 11? I think you can do that very quickly, so as to bring this down through 1939,

(Testimony of Charles Futterer.)

which is, because of the deflection of earnings, based on the rehabilitation program, and in our judgment the more significant figure, your Honor.

The Witness: May I interrupt just a minute? Your "available for fixed charges" showed 1,539,868.60.

Mr. Swaine: The adjusted figure was 1,005,000—my recollection is that the figure, without adjustment, was one million four hundred four, whereas the figure after adjustment was one [1194] million five thirty-nine; that was introduced by Mr. McCollum this morning.

Mr. Coulson: Is the sixteen million seven hundred right?

Mr. Elsey: For the system?

Mr. Coulson: For the system.

Mr. Swaine: No, it is not.

Mr. Coulson: What is the correct figure?

The Witness: 18,299,412.

Mr. Coulson: Q. Good. Let's use our eighteen million two ninety-nine and the two figures given for the—one million four, for income available for interest, before adjustment, and 1,539,860 after adjustment, and just indicate briefly, so the record will be complete, what the effect is on your other column?

Mr. Clay: Your Honor, is this necessary? You have given a certain figure, and the other results follow.

(Testimony of Charles Futterer.)

Mr. Coulson: I am trying to keep the prior mathematical computation that has been introduced from being too confusing to the Court by failure to carry this down close to date. This whole question of marketability of the bonds is a question that is prospective, and the tabulation, which is only a tabulation from matters of record, is a little confusing unless he can cover the year 1939; and I think he can give you these figures very quickly.

The Witness: A. For column 1, taking the gross revenues on the basis of the same testimony submitted this morning, 18,299,412; column 2, the increase over the prior year, would be 14 per cent. Taking Mr. Coulson's adjusted figure of a million four——

Q. (Interrupting) That is Column 3, you are speaking of? That is not the adjusted figure, as I understand it; column 3 is the income available for interest, before adjustment, is that right?

A. The actual figure that was put in this morning was 1,539,860. [1195]

Q. That was after adjustment, as I understand it; the one million four is before adjustment, and one million five thirty-nine, after.

The Witness: A. Based on the prior year, the percentage comparison with one million four—that is column 3—would be without any relevant significance, by reason of the fact the prior year ran a deficit. In column 5, the adjusted income, 1,539,860 over the prior year, would represent an increase of approximately 600 per cent.

(Testimony of Charles Futterer.)

Q. Plus 600.

A. (Continuing) The net remaining, column 8, 906,000; the net remaining, column 9, 1,045,860.

Q. Now, as to this coverage——

A. As to the margin of protection on the basis of the earnings in 1939, as submitted this morning, what you would have left after the payment of the bare fixed charges, excluding the capital fund—in the first place, before adjustment, you would have a little less than 5 per cent. as a margin of safety; on the basis of your 1,539,860, you would have a little bit over 5 per cent., which is an unsafe margin.

Q. What goes into column 10 and column 11?

A. That is percentage there (indicating).

Q. What are the percentages? A. 4 and 9.

Q. What? A. 4 and 9.

Q. And in column 11? A. Column 11, 5.

Q. 5? A. Yes, a little over 5.

Q. You gave this testimony this morning about this Louisville & Nashville issue, I believe?

A. That is right.

Q. What was the coverage of the percentage of remaining gross revenues in accordance with your column 10 and 11 as to that issue?

A. I haven't that before me.

Q. Do you know what the average coverage is in the percentage of gross and railroad bonds today? A. For the industry?

Q. For the industry.

(Testimony of Charles Futterer.)

A. In 1938 the figure was an aggregate [1196] net deficit; for 1939, I don't think anybody knows yet.

Q. And you don't know what it was for the L. & N.? A. No, I don't.

Mr. Coulson: My recollection is that it was about 6 per cent., but I don't dare put it in unless you know. That is all.

The Court: Anything further?

Mr. Clay: I have nothing further of this witness.

Mr. Buckland: I wasn't going to ask this witness anything, I just wanted to offer some exhibits here.

(Witness excused.)

The Court: Yes.

Mr. Buckland: I propose, in the course of the argument in behalf of the Railroad Credit Corporation to cite two opinions of District Courts that are not reported. I have a certified copy of the opinion of the District Court of the United States for the Eastern District of Missouri, by Judge Davis, given in 1938, findings of fact and conclusions of law, and the memorandum of decision, in regard to Order No. 1 given by Judge Hinks, United States District Judge for the District of Connecticut. Both of them, your Honor, have to do with the right of a railroad corporation as a creditor—as a secured creditor, to obtain, currently, the income from the

collateral, and to apply it to the principal or interest of the debt in its untrammeled discretion. Now, I don't know what the practice of the Court is here with respect to unreported opinions. I have here the originals, and I have plenty of copies to distribute to counsel, and I would like to have the privilege either of offering them as exhibits, or the privilege of referring to them in my argument.

The Court: You certainly would have a right to refer to them in your argument; whether or not they should be received in evidence, I can't say, unless you offer them. If you offer them and there [1197] is no objection, they will be received.

Mr. Swaine: I don't believe they should be received in evidence. We had the same problem in respect to unreported opinions in respect to the Akron, Canton & Youngstown Case and the Louisiana Northern Case, but we tried to meet it in our brief by printing the unreported opinions as annexes to the brief, but on the other hand, so far as I am concerned, I think all parties ought to be able to refer to any decision, whether reported or not, subject only to the condition that the Court be supplied with a copy of the decision that is being placed before it.

Mr. Buckland: Your Honor, I had anticipated that, because I have typewritten copies of all the opinions here, which I will be very glad to distribute to counsel; I didn't know whether it was customary to offer them as exhibits in evidence.

Mr. Swaine: I don't think they are part of the record in the case.

The Court: Properly speaking, they are not part of the record. You may refer to them in your argument, and you may furnish the Co rt with copies of them.

Mr. Buckland: That was all I wished to know.

[Endorsed]: Filed Oct. 10, 1940. [1198]

[Title of District Court and Cause.]

OPINION

St. Sure, District Judge:

This is a proceeding under section 77 of the Bankruptcy Act[1] for the reorganization of the Western Pacific Railroad Company.

On August 2, 1935, the Debtor filed a petition stating that it was unable to meet its debts as they matured and that it desired to effect a plan of reorganization. The court approved the petition and authorized the Debtor, pending further order of the court, to continue in possession of and operate and maintain the railroad and its properties, and to manage and conduct its business as a railroad company. Trustees were appointed and ratified by the Interstate Commerce Commission. "The judicial functions of the bankruptcy court and the ad-

---

(1) 11 USCA, § 205. [1200]

ministrative functions of the Commission work cooperatively in reorganizations."[2]

Thereafter all necessary legal steps required by the Act were taken, and on February 8, 1936, Debtor filed a plan of reorganization with the Commission. In addition, plans were filed on behalf of the Institutional Bondholders Committee, and on behalf of A. C. James Co. On August 1, 1937, the Bureau of Finance of the Interstate Commerce Commission issued a proposed report containing a recommended plan of reorganization to which exceptions were filed by the Debtor, the Institutional Bondholders Committee, the First Mortgage Trustees, the Refunding Mortgage Trustee, A. C. James Co., Reconstruction Finance Corporation, and the Railroad Credit Corporation. Hearings were had before the Commission, and on October 10, 1938, the Commission issued its original report and order approving a plan of reorganization.[3]

On December 9, 1938, the Debtor, the Institutional Bondholders Committee, the Refunding Mortgage Trustee, A. C. James Co., Reconstruction Finance Corporation and the Railroad Credit Corporation filed their separate petitions with the Commission for rehearing and modification of the original report and order and the plan of reorganization approved therein. Answers to certain of said

(2) Warren et al. v. Palmer et al., Case No. 643, decided by the Supreme Court on April 29, 1940; Palmer v. Massachusetts, 308 U. S. 79, 87, note 14.

(3) 230 I. C. C. Reports, page 61. [1201]

petitions were filed by the First Mortgage Trustees and The Railroad Credit Corporation. Proposals for modification of the Commission's plan were attached to or contained in such petitions. A rehearing on the basis of these petitions was granted by order of the Commission entered December 30, 1938.

On June 21, 1939, the Commission issued its "Report and Order on Further Consideration" (hereinafter referred to as the supplemental report and order) approving a modified plan of reorganization (hereinabove and hereinafter referred to as the Commission plan). By its report and order of June 21, 1939, the Commission modified the original report and revoked and rescinded the original order.

On or about August 1, 1939, and prior to the certifying to the court of the Commission plan and the record before the Commission, the Debtor filed a petition for rehearing and modification of the Commission plan. Answers thereto were filed by certain parties. Said petition was denied by the Commission by a report and order entered September 19, 1939.

Pursuant to the requirements of subsection (d) of section 77, the Commission on or about September 28, 1939, certified to the court the Commission plan together with a transcript of the proceedings before it and a copy of the supplemental report and

(4) 233 I. C. C. Reports, page 409. [1202]

order approving the plan, which were filed in this proceeding on October 3, 5 and 6, 1939.

On November 8, 1939, the court, pursuant to the provisions of subsection (e) and of clause 8 of subsection (c) of section 77, entered its order fixing the time within which objections to the Commission plan and claims for equitable treatment might be filed herein, fixing the time within which applications might be filed for expenses and fees incident to the reorganization, and fixing December 8, 1939, as the date for the filing of such objections and claims for equitable treatment and petitions for an allowance for compensation for services rendered or for expenses (including reasonable attorneys' fees) incurred, in connection with the proceeding and plan of reorganization up to and including October 31, 1939, and providing for the giving of due notice by the Debtor's trustees to creditors and stockholders, or their representatives, and all other parties in interest.

Petitions for intervention were granted to several parties in interest, and pursuant to the order of November 8, 1939, objections to the Commission plan and claims for equitable treatment were filed by or on behalf of the Debtor, the Institutional Bondholders Committee, the Refunding Mortgage Trustee, A. C. James Co., Reconstruction Finance Corporation, The Railroad Credit Corporation, The Western Pacific Railroad Corporation, and The Western Realty Company. [1203]

On December 18, 1939, the court, pursuant to Rule 16 of FRCP, held a pre-trial conference of

the attorneys for the parties in interest. At the conference the parties agreed upon substantially all the facts upon which depend the decision of the issues raised by the objections and claims for equitable treatment, and accordingly, on December 20, 1939, filed a "Stipulation as to Facts Not in Dispute." The parties failed to agree upon a stipulation as to the issues. On December 21, 1939, the court made its order fixing January 22, 1940, as the time for hearing objections to the plan of reorganization. On December 29, 1939, the court made its order reciting the action taken at the pre-trial conference and ordered "that the issues for trial of said hearing on January 22, 1940, shall be the issues raised and presented by said objections to said plan of reorganization and by said claims for equitable treatment."

The Debtor owns or operates 1,207.51 miles of standard gauge railroad. A main line extends eastward 924.17 miles from Oakland, California, to Salt Lake City, Utah. The Northern California Extension extends northward 111.81 miles from Keddie to Bieber, California, with operating rights from Bieber to Hambone, California—46.38 miles—over the Great Northern Railway. In addition to said main line mileage and the Northern California Extension, the Debtor has approximately 131.66 miles of branch line mileage springing from the Oakland-Salt Lake City line.

Reference is hereby made to the original report and order of the Commission[5] for more detailed

(5) 230 I. C. C. Reports, page 61 et seq. [1205]

descriptions of the property owned and controlled by the Debtor, its corporate and financial history, financial structure, traffic and revenue, earnings available for charges, classes of creditors and stockholders, and the proposed plans of reorganization. Such reference is made for the purpose of shortening this opinion and because the data contained in the Commission's original report is in the main correct. However, it is to be understood, unless otherwise stated herein, that facts and figures stated in this opinion and upon which it is based, are from the "Stipulation as to Facts Not in Dispute", the record certified to the court by the Commission, and additional proof offered in open court.

The essential, undisputed facts with respect to the Commission plan necessary for the court's determination of the issues are set forth in the following summarization, taken from the brief of the Institutional Bondholders Committee, because concisely stated. The Commission plan, which by its terms is to be made effective as of January 1, 1939, provides the following capital structure for the reorganized company:

Title of Issue	Presently Issued	Interest, Dividends or Other Income Charges
Undisturbed Existing Equipment Trusts, Baldwin Lease and Pullman Contract	$2,750,050	$ 94,202
First Mortgage 4% Bonds, Series A, due January 1, 1974	10,000,000	400,000
Total Annual Fixed Charges		$494,202
Mandatory Capital Fund		500,000
Income Mortgage 4½% Bonds, Series A, due January 1, 2014. Interest cumulative to 13½%, otherwise non-cumulative	21,219,075	954,858
Total Funded Debt	$33,969,125	
Total annual charges (fixed and contingent) and Capital Fund		$1,949,060
Income Mortgage Sinking Fund		106,095
Participating 5% Preferred Stock ($100 par value). Dividends non-cumulative, participating share for share with Common Stock in dividends declared in any year after dividends have been declared on Common Stock at rate of $3 per share	31,850,297	1,592,515
Total securities with par value	$65,819,422	
Total annual charges, Capital Fund, Sinking Fund and Preferred dividend requirements		$3,647,670
Common Stock (without par value)	319,441 shares	

The existing claims against, and interests in, the Debtor dealt with by the Commission plan, together with interest accrued from the last interest payment date to the effective date of the plan, January 1, 1939, computed at the contract rates, are as follows. Brevity demands the use of initials for the names of claimants in the following tables, foot-

notes and context, as RFC for Reconstruction Finance Corporation, ACJ for A. C. James Co., W. P. Corp. for Western Pacific Railroad Corporation, RCC for The Railroad Credit Corporation:

[1206]

Claim or Interest	Principal of claim or interest	Accrued interest at contract rate to effective date of plan	Total claim, including interest at contract rate to effective date of plan
Trustee's Certificates	$10,000,000.00	$	$10,000,000.00
Undisturbed existing equipment obligations	2,750,050.00	94,202.00	2,844,252.00
First Mortgage 5% Bonds	49,290,100.00	13,143,776.66	62,433,876.66
RFC Collateral Notes (a)	2,963,000.00	899,869.98	3,862,869.98
RFC Collateral Notes (b)	2,445,609.88	145,314.23	2,590,924.11
ACJ Collateral Notes (c)	4,999,800.00	1,249,950.00	6,249,750.00
Total secured debt	$72,448,559.88	$15,533,112.87	$87,981,672.75
W P Corp. advances on open account	5,768,791.00	1,980,429.00	7,749,220.00
The Western Realty Company (d) advances on open account	50,000.00	11,667.00	61,667.00
Total debt	$78,267,350.88	$17,525,208.87	$95,792,559.75
W P Corp., owner of the entire outstanding 283,000 shares of Preferred Stock, par value $100 per share	28,300,000.00		28,300,000.00

W. P. Corp., owner of the entire outstanding 475,000 shares of Common Stock, par value $100 per share	47,500,000.00		47,500,000.00
Totals	$154,067,350.88	$17,525,208.87	$171,592,559.75

(a) The notes held by RFC are secured by the pledge of $8,750,000, principal amount, of refunding mortgage bonds, series A, and $2,000,000, principal amount, of refunding mortgage bonds, series B; by the pledge of voting trust certificates for 150,000 shares of common stock of Denver & Rio Grande Western Railroad Company, pledged with RFC by W. P. Corp.; and by a second lien upon $2,000,000 of refunding mortgage bonds, series A, now pledged with RCC.

(b) The notes held by RCC are secured by the pledge of $2,000,000, principal amount, of refunding mortgage bonds, series A, and $2,000,000 principal amount, of refunding mortgage bonds, series B, of which $2,000,000, principal amount, of series A bonds were repledged with it by ACJ. In addition, such notes are secured by a second lien on all the securities pledged with RFC; by a first lien on the Debtor's distributive share in the fund established by the marshalling and distributing plan, 1931; by a first lien on the advances from W. P. Corp. to the Debtor in the sum of $5,494,722; by a lien on the advances made by W. P. Corp. to Standard Realty and Development Company in the sum of $120,000; and by a lien on the advances made by W. P. Corp. to Sacramento Northern Railway in the sum of $856,260, subject, as to the Sacramento Northern advances, to any and all rights and claims in respect thereof, if any, of the trustees or the holders of first mortgage bonds.

(c) The notes held by ACJ are secured by the pledge of $6,249,500, principal amount, of refund-

The Commission plan provides for the distribution of the securities of the reorganized company among the existing security holders of the Debtor as follows:

Existing Securities of Debtor	New First Mortgage 4% Bonds, Series A	New Income Mortgage 4½% Bonds, Series A	New 5% Preferred Stock, Series A, ($100 par)	New Common Stock (No Par)
5% First Mortgage Bonds		$19,716,040	$29,574,060	230,593 shs.
RFC New Money (In exchange for Trustee's Certificates all now held by RFC.)	$10,000,000			
Collateral Notes		1,185,200	1,777,800	15,788 shs.
RCC Collateral Notes		154,111	241,681	35,425 shs.
ACJ Collateral Notes		163,724	256,756	37,635 shs.
Totals	$10,000,000	$21,219,075	$31,850,297	319,441 shs.

The first mortgage bonds are allotted new income mortgage bonds for 40% of the principal of their claim, new preferred stock for 60% of the

---

ing mortgage bonds, series A, of which $2,000,000, principal amount, are subject to the prior lien of RCC as pledgee, ACJ having repledged said $2,000,000 of such bonds with RCC as additional collateral security for the Debtor's note to RCC.

(d) While Western Realty Company is a separate corporate entity, [1207] which has separately intervened and appeared in this proceeding, all of its stock is held by W P Corp. Its rights as a creditor of the Debtor are identical with those of W P Corp. as a creditor of the Debtor. Accordingly, for the sake of simplicity, it and its rights are hereinafter included in any reference to W P Corp or W P Corp's rights as creditor of the Debtor unless the context otherwise requires. [1208]

principal of their claim and new common stock for 100% of their accrued interest, such common stock having been allotted at the price $57 per share.

RFC is allotted treatment in respect of its collateral note pari passu with the treatment allotted the first mortgage bonds in consideration of its exchanging its $10,000,000 trustees certificates for $10,000,000 new first mortgage bonds or purchasing said bonds at par to retire said trustees certificates.

RCC and ACJ are allotted new securities on the following basis: From the new securities, which the Commission finds are properly issuable in respect of the refunding mortgage bonds held as collateral for the RFC, RCC and ACJ notes, are deducted that proportion of each class which the principal amount of refunding mortgage bonds held by RFC as collateral bears to the total amount of pledged refunding mortgage bonds. The balance of such new securities is then divided between RCC and ACJ in proportion to the principal amounts of refunding mortgage bonds held by them respectively as collateral. The result is the allotment of common stock to RCC on its claim at the price of $62.00 per share.

The unsecured claims of The Western Pacific Railroad Corporation and The Western Realty Company, and other unsecured claims not entitled to priority over existing mortgage, are found by the Commission to be without value and not entitled to participate in the distribution of cash or securities of the reorganized company.

The capital stock of the debtor (all held by W. P. Corp.) is found by the Commission to be without equity or value and the stockholders not to be entitled to participate in the plan.

The issues raised by the objections relate, first, to the amount and character of the capitalization, second, to the distribution of the new securities among the holders, and, third, to the execution of the Commission plan.

It is objected by A. C. James Co., The Western Pacific Railroad Corporation, The Western Realty Company, the Debtor, and The Railroad Credit Corporation, that the Commission plan is unfair and inequitable and fails to afford due recognition to the rights of each class of creditors and stockholders in relation to the value of the assets of the Debtor; that it is discriminatory and does not comply with the law of the land; and that it is confiscatory of private property rights, in violation of the Fifth Amendment to the Constitution. While it is not asserted that section 77 is unconstitutional, objectors argue that it "should not be interpreted as authorizing the confiscation and destruction of private property," and that as "the findings and conclusions of the Commission result in such confiscation and destruction [they] are in violation of the Constitution and the law of the land." These questions go to the heart of the matter.

The powers and functions of the Commission and [1209] the court are found in subsections (d) and (e) of section 77.[6] Subsection (f) incorpor-

(6) By the provisions of section 77(b) of the Bankruptcy Act, as amended, a plan of reorganization shall include provisions modifying or altering the rights of creditors generally, or any class of them, secured or unsecured, either through the issue of new securities of any character or otherwise; shall provide for fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property in the light of its earning experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof; and shall provide adequate means for the execution of the plan. Subsection (e) of section 77 provides that the judge shall approve the plan certified to the court by us, if satisfied, after hearing, and without hearing if no objections are filed, that the plan complies with the provisions of subsection (b), is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; that the approximate amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets, for expenses and fees incident to the reorganization, have been fully disclosed so far as they can be ascertained at the date of the hearing, are reasonable, are within such maximum limits as are fixed by us, and are within such maximum limits as to be subject to the approval of the judge; that the plan provides for the

ates the provisions of section 20a[7] of the Interstate Commerce Act. relative to issuance of securities. Subsection (d) provides that the Commission "shall approve a plan * * * that will in its opinion meet with the requirements of subsections (b) and (e) of this section, *and will be compatible with the public interest.*" [Italics supplied.] Similar terms are to be found in paragraph 2 of section 20a and paragraph 3 of section 5 of the Interstate Commerce Act. In N. Y. Central Securities Co. v. U. S., 287 U. S. 12, 24, it was held that such a delegation of authority to the Commission was not invalid because the stated criteria is uncertain.

In its original report and order the Commission

---

payment of all costs of administration and all other allowances made or to be made by the judge, except that allowances for the actual and reasonable expenses, including reasonable attorney's fees, incurred in connection with the proceedings and plan by parties in interest and by reorganization managers and committees or other representatives of creditors and stockholders, and the actual and reasonable expenses incurred in connection with the proceedings and plan and reasonable compensation for services in connection therewith by trustees under indentures, depositaries, and such assistants as we, with the approval of the judge, may especially employ, may be paid in securities provided for in the plan if those entitled thereto will accept such payment. By the provisions of subsection (d) of section 77, the plan approved by us must meet with these requirements of subsections (b) and (e) and be compatible with the public interest, but such plan may be different from any which has been proposed. Original report and order of Commission, 230 I.C.C Reports, pages 86 and 87.

(7) 49 USCA, §20a. [1210]

said: "It will be observed that so far as the capitalization of a reorganized company is concerned, section 77 contains no limitations other than that the fixed charges of the company shall be adequately covered by the probable earnings available therefor, and that the plan as a whole shall be compatible with the public interest. The public interest is not defined, but it would seem obvious that to be compatible with the public interest the plan must provide a capital structure for the reorganized company which will give it a reasonable opportunity to function efficiently and continuously as a going concern. This requires that the capitalization shall not exceed a conservative appraisal of the assets to be taken over by the reorganized company, and that proposed charges, whether fixed or contingent shall be within its probable earning power."[8]

The construction given by the Commission to the term "public interest" is neither new nor arbitrary, but has been consistently followed before and since the enactment of section 20a of the Interstate Commerce Act.

The last paragraph of subsection (e) of section 77 provides: "The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effects shall be given to the

(8) 230 I.C.C. Reports, 61, 87. [1211]

present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land in light of its earning power and all other relevant facts." This paragraph was incorporated in the statute as part of the 1935 amendments.

Mr. Leslie Craven, attorney for the Railroad Security Owners Association, who was counsel for Honorable Joseph B. Eastman when he was Federal Coordinator of Transportation, testified at the hearing before the Special Sub-Committee on Bankruptcy and Reorganization of the Committee on the Judiciary, House of Representatives in 1939, concerning this legislation. The particular amendment was drawn by Mr. Craven and sponsored by him and Mr. Eastman. Mr. Craven says that "the valuation provisions in the existing law were so drawn that whoever tried to upset the valuation of the Commission would not be able to do it. The language is left in generalities. * * * As the Act stands, the value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present and prospective, and all other relative facts.'"[9] [1213]

The idea of a sound financial structure in railroad reorganization is not an innovation. In Missouri-Kansas-Texas Reorganization, 76 I. C. C. 84, 108, (1922), in administering the provisions of the Transportation Act of 1920, Commissioner Eastman said: "In the past such reorganizations have largely been a matter of bargain and trade between groups of security holders without adequate con-

---

Harvard Law Review: "Amendments simplifying and clarifying the determination of the valuation were required, because the provisions of the original act [the 1933 Act] enabling an elimination of the consent of claimants demonstrated to have no interest by a valuation, or for the value of whose interest a cash payment was provided, were regarded as unworkable because of the great task of valuing property of such magnitude and because of uncertainty as to the results, due to doubt as to the legal principles governing such a valuation. The assignment of the determination to the courts, as provided in the original Act, was inappropriate. The courts are ordinarily inexperienced with this technical problem, while the Commission has had extended experience since 1913 in its administration of the LaFollette Valuation Act. This experience has indicated great difficulty in making such determinations, if the kind of value to be determined in a reorganization case is the same as a value for rate-making purposes under the principles of Smyth v. Ames * * *. The obstructive possibilities open to the equity and creditor interests, through the probability of prolonged hearings and litigation involving these complicated questions, were evident from the Commission's valuation cases. That the equity interests were well aware of the strategic value to them of the original provisions of section 77 was evidenced by the in-

sideration of the paramount public interest, so that the results have often been consistent neither with the public interest nor even with sound business principles, and recurring receiverships have been far from uncommon. * * * The public interest, I think, clearly demands that a reorganized property should begin its new career with a capitalization which will enable it, if that be possible, not only to

---

sistence with which they fought any simplification of the process. They asserted that value in a reorganization case is the same as in a rate case.

* * * * *

"The purpose of these provisions [the provisions contained in the last paragraph of subsection (e) of section 77] is to lodge the determination of the value in the Commission in the first instance, and to incline the determination away from the doctrine of Smyth v. Ames, under which the value is fixed on the basis of a consideration of the original and reproduction cost of the property and the investment therein. [1213] The actual value of the property cannot be determined, nor is it ordinarily evidenced by the investment in the property or its present cost of construction. The railroads are competitive properties. The value of their operative property, for purposes of reorganization, must necessarily be what, for better terms, we may call the actual value or the economic worth of the property, as determined primarily by its present and prospective earning capacity. The actual value of the property depends upon the demand for its service and its ability to meet the demand economically. The provisions of the amended statute, therefore, make clear that emphasis shall be put on a consideration of earning power, past, present and prospective."—Leslie Craven and Warner Fuller, "The 1935 Amendments of the Railroad Bankruptcy Law," 49 Harv. L. Rev. 1254, 1272, 1274. [1214]

keep clear of bankruptcy but also to attract the capital necessary for future development." And in the Denver & Rio Grande Western Reorganization, 90 I. C. C. 141, 157 (1924), Commissioner Eastman said: "It seems to me that we should at least insist, in the case of any such reorganization, that the new company shall start life with a reasonably sound financial structure. If this were our policy, reorganization managers would stand on firmer ground in dealing with the holders of the securities of insolvent companies than they now find under their feet." In Chicago, Milwaukee & St. Paul Investigation, 131 I.C.C. 615 (1928), a reorganization matter, the Commission again expressed dissatisfaction with the state of the law which it was said presented a situation fundamentally unsatisfactory and required reform. The subject has been repeatedly discussed in Congress,[11] and such discussions undoubtedly induced the enactment of the amendments of 1935 for the purpose of clarifying the then existing law. Having in mind the judicial history of railroad reorganizations, and the provisions of the Transportation and Interstate Commerce Acts,

(11) As reflecting these discussions I quote the following from report No. 454 of the Senate Committee on Interstate Commerce, issued on May 18, 1939:

"For the purpose of creating a sound financial structure, it is immaterial what may at one time have been invested in the road, what it originally cost, what it would cost to reproduce, or what its value may be claimed to be as an abstraction. The

Congress in its wisdom, by the amendments of 1935, delegated to the Commission, where it logically belongs and can best be performed, authority to determine for any purpose the value of the property of the railroad seeking reorganization.

It cannot be gainsaid that the Commission knows all about the Debtor, its property, its history, financial and otherwise, its traffic and revenue, and its financial structure. No official body in the country is better qualified, by reason of experience, ability and specialized knowledge than is the Commission to find the ultimate facts as to the Debtor in relation to any of the matters mentioned. For a period of four years, since August, 1935, the Debtor has

---

controlling question is: What can the property earn to support its capital structure?

"It would be tantamount to fraud to create worthless securities in reorganizations, securities that cannot be reasonably expected to be supported by earnings. That would be simply creating tokens for stock-market speculation.

* * * * *

"Reorganizations cannot succeed if they are based on claimed values that have long since disappeared in a realistic sense and on business that has long since been lost to the railroads never to return. A reorganization based on a sound judgment of earning power destroys no values and creates no losses. It merely [1215] realistically recognizes the facts, including the unpleasant but nevertheless inescapable fact that values based on original cost or even reproduction cost simply do not exist without earning power to support them." —H. Rep., 76 Congress, 1st Session, serial 11, part 1, 1939, Hearing on Railroad Reorganization, p. 346.

been before the Commission in an intensive investigation of its affairs in the present proceeding.[12]

---

(12) In its original report, 230 I.C.C. 61, the Commission said: "Under section 19a of the Interstate Commerce Act, this Commission, by division 1, in Western Pacific Ry. Co., 29 Val. Rep. 239, reported the value for rate-making purposes of the property owned by the debtor to be $63,321,000 as of June 30, 1914, excluding working capital. In other proceedings, we reported the value for rate-making purposes of the properties of the debtor's wholly owned subsidiaries, Sacramento Northern Railway; Tidewater Southern Railway Company, and Deep Creek Railroad Company, in the total amount of $18,123,283, as of their respective valuation dates. If there were added to the above amounts the net costs of additions and retirements between valuation dates and December 31, 1935, the total would be $139,600,455." (Original Report, p. 76.)

* * * * * * *

"If this reorganization is to be successful, the capital structure of the reorganized company must be realistically related to its actual earning power, and consideration given to the investment in its property only to the extent that such investment is justified by the probable earnings reasonably foreseeable for the future." (Original Report, p. 87.)

* * * * * * *

"It is true that, considered alone, the data pertaining to the rate-making value of the debtor's property, and its investment, would support capitalizations approximating those proposed in the three plans. We have hereinbefore stated, however, the reasons why, [1216] in our opinion, those factors cannot be of controlling importance in a determination of the capital structure for the re-

In its original report and order the Commission says:

"The present reorganization of the debtor is the second since it began complete operations in 1911. A review of its financial history shows that due to an inherent lack of earning power its past operations have resulted in financial failure, and that the investment in its property has not been justified by its earnings. In Denver & R. G. Investigation, 113 I.C.C. 75, we pointed out that economically the original construction of the debtor was an ill-advised undertaking. If this reorganization is to be successful, the capital structure of the reorgan-

---

organized company. Considering all relevant data of record, we find that the approved plan should provide for the immediate issue by the reorganized company of not to exceed 295,740.3 shares of preferred stock of the par value of $100 per share, and not more than 313,703 shares of no-par-value common stock." (Original Report, p. 94.)

* * * * * * *

"Under the provisions of section 77, stockholders are not entitled to participate in the plan if we find, and the judge affirms the finding, that at the time of the finding the equity of such stockholders has no value. Section 77 also contains a similar provision with respect to creditors whose claims have been found to have no value. We have hereinbefore found that, considering the past, present, and probable future earnings of the debtor, its investment, the data of record pertaining to its rate-making value, and all other relevant data of record, we can not approve the issue of new securities in a greater amount than that hereinbefore approved. On the same basis and for the same reasons we find, therefore, that there is no equity over and

ized company, must be realistically related to its actual earning power, and consideration given to the investment in its property only to the extent that such investment is justified by the probable earnings reasonably foreseeable for the future." 230 I.C.C. Rep., p. 61, 87.

The capital structure, existing claims and distribution of securities of the reorganized company are contained in the summarization of the Commission plan hereinbefore set forth. The reported and adjusted earnings of the Debtor appearing in the stipulation of facts are as follows:

---

above the securities hereinbefore approved; and that the equity of the existing stock has no value, and hence holders of such stock are not entitled to participate in the plan." (Original Report, p. 100, 101.)

The following extract is from the Commission's supplemental report, 233 I.C.C. 409, 413:

"In our prior report we stated that the entire capital structure of the reorganized company must be realistically related to its actual earning power, and that in determining such capital structure consideration should be given to the investment in the property only to the extent that such investment should be justified by the probable earnings reasonably foreseeable for the future if the reorganization was to be successful. With these considerations in mind, and for the reasons there set forth, and upon consideration of the investment of the debtor in its property, the probable rate-making value thereof, and its traffic and earnings, we conclude that we cannot approve the total capital structure under the Credit Corporation's proposed modification." [1217]

Year	Earnings Available for Interest	
	Reported	As Adjusted
1922	$2,306,124	$2,404,890
1923	3,313,976	4,412,234
1924	3,144,124	3,241,823
1925	4,454,352	4,557,798
1926	4,759,282	4,868,390
1927	2,674,494	3,470,861
1928	2,964,371	4,376,972
1929	2,529,846	3,718,436
1930	1,552,487	2,381,529
1931	186,708 (D)	220,494 (D)
1932	252,706	283,912
1933	674,007	474,365
1934	1,084,244	1,396,353

1939 (first ten months)	1,061,883	1,174,717

(D)—Deficit.

The capitalization permitted by these earnings is a mere matter of computation,[13] which will dem-

(13) The following results of computation are taken [1218] from the brief of the Institutional Bondholders for purposes of illustration: The earnings of the Debtor's system, as adjusted for the five years 1934 to 1938, inclusive, averaged $1,195,528; for the ten years 1929 to 1938, inclusive, $1,261,539; and for the seventeen years 1922 to 1938, inclusive, $2,350,000. If such average earnings be capitalized at 5% the capitalization based on earnings for the 1934-1938 period would amount to $23,910,560; for the 1929-1938 period to $25,230,780, and for the 1922-1938 period to $47,000,000. Each such capitalization is substantially less than the $65,819,422 of senior par value securities provided for in the Commission plan.

onstrate that the Commission did not act arbitrarily in limiting capitalization nor the respective classes thereof.

In its original report the Commission, with the aid of its financial experts, has fully analyzed and

---

In order to permit a capitalization equal in amount only to the $65,819,422 par value of senior securities contemplated by the Commission plan (thus disregarding entirely the no par value common stock) the 1934-1938 average earnings would have to be capitalized on a 1.81% basis; the 1929-1938 average earnings on a 2.00% basis; the 1922-1938 average earnings on a 3.57% basis; and the 1939 adjusted earnings on a 2.34% basis.

The average system earnings for the five years ending December 31, 1938, were insufficient by $753,432 to cover the total charges through interest on the new income mortgage bonds, and by $2,452,142 to cover the charges through dividends on the new preferred stock, under the Commission plan.

The average earnings for the ten year period ending December 31, 1938, were insufficient by $687,521 to cover the total charges through the interest on the new income mortgage bonds, and by $2,386,131 to cover the charges through dividends on the new preferred stock, under the Commission plan.

The average system earnings for the seventeen year period ending December 31, 1938, were sufficient to cover the total charges through interest on the new income mortgage bonds under the Commission plan, with $400,940 to spare, but were insufficient by $1,297,670 to cover the charges through the dividends on the new preferred stock.

The system earnings for the year 1939, as adjusted, were insufficient by $409,200 to cover the total charges through interest on the new income mortgage bonds, and by $2,107,810 to cover the charges through dividends on the new preferred stock. [1219]

discussed the traffic and revenue of the Debtor and its subsidiaries, also its earnings available for charges. The Commission closes its discussion of the latter subject with the statement: "A consideration of these recent data (reported subsequent to the preparation of the Debtor's estimate), together with other data of record, convinces us that too great reliance may not be placed upon the Debtor's estimate of future earnings, and that the capital structure of the reorganized company must be conservative." And again: "It is obvious, therefore, that based upon the most optimistic estimate of earnings of record, the capitalization of the reorganized company must be maintained within strict limits if any material return on its capital stock is to be expected and the shares of its stock are not to become mere tokens for stock market speculation."

It is objected that without a finding of insolvency in the bankruptcy sense, the provision of the Commission plan excluding stockholders from participation in the reorganization is invalid and inequitable and contrary to the law of the land. The statute makes no such requirement. Subsection (e) of 77 provides for the following five alternatives: "That at the time of the finding the corporation is insolvent, *or* that at the time of the finding the equity of such class of stockholders has no value, *or* that the plan provides for the payment in cash to such class of stockholders of an amount not less than the value of their equity, if any, *or* that the

interest of such class of stockholders will not be adversely and materially affected by the plan, *or* that the debtor has, pursuant to authorized corporate [1220] action, accepted the plan and its stockholders are bound by such acceptance." [Italics supplied.]

The Commission's finding that the equity of certain stockholders was without value, is based upon the second alternative. In in re 620 Church Street Building Corp., 299 U. S. 24, a ruling in a reorganization case, under section 77B, excluding creditors and stockholders upon a finding that their claims had "no value", was sustained.

In Consolidated Rock Products Co., et al. vs. E. Blois Du Bois,[14] a reorganization case under section 77B of the Bankruptcy Act (containing in some of its provisions terms identical with those in section 77), the Circuit Court of Appeals, for the Ninth Circuit, used the following language which is applicable here:

"* * * A corporation may come within the terms of §77B although it is not insolvent, but 'unable to meet its debts as they mature'. Continental Bank v. Rock Island Ry., 294 U. S. 648, 672. The statute requires a proposed plan to be 'fair and equitable' regardless of the condition of the corporation, whether it be solvent or insolvent. The statute does not limit the test, 'fair and equitable', to plans of

(14) Case No. 9000, decided June 19, 1940. [1221]

reorganization of insolvent corporations, but lays down the requirement that a plan must be 'fair and equitable' for all corporations seeking relief under §77B. We think a proposed plan of reorganization under §77B must be 'fair and equitable', whether the corporation sought to be reorganized is solvent or insolvent.

* * * * * * *

"Considerable argument is made to the effect that the debtor's preferred stockholders are forgotten men; that they lose 96% of their investment; and that they have an equity and must be given an interest in any plan of reorganization. We are not impressed by this argument. When a person buys a bond, he obtains it on the theory that he is not an owner but a creditor. When a person buys stock, common or preferred, he knows that he is buying an interest in the corporation which is subordinate to claims of the corporate creditors. He runs the risk of having an interest in something that is valueless."

The two issues of (1) amount and character of capitalization and (2) distribution of new securities are closely related. The determination of the amount and character of the capitalization (a legislative function affecting the public interest) is exclusively within the province of the Commission. The only qualification, if any, is that the court shall independently determine whether, in the exercise of its jurisdiction, the Commission has acted fairly, within the bounds of the Constitution, and

not arbitrarily. The determination of the questions relating to the distribution of the new securities, including legal priorities and allocations, involves private rights and is a judicial function, within the province of the court. However, since these private property rights had not been adjudicated, it became the duty of the Commission to determine them preliminarily for the purpose of considering the plans [1222] before it, 230 I. C. C. 61, 97 Without such consideration and determination, it would have been impossible for the Commission to have complied with the statute and certified a plan to the court. While the decision of the Commission in the premises is advisory only, it was of inestimable value to the court in enabling it to see the whole picture and arrive at a decision. In this connection I wish to say that I have read the record and carefully considered all of the objections offered by the respective objectors to the Commission plan. I have also read the briefs of respective counsel in support of the objections. I am wholly in accord with the conclusions reached by the Commission upon both issues and all matters incidentally related thereto. It seems to me that further discussion would be superfluous. Every question presented by the objections was considered and passed upon by the Commission as shown by its original and supplemental reports.

Objections to the administration or execution of the Commission plan are without merit and will be overruled.

Petitions for allowance for compensation for services rendered and for expenses (including reasonable counsel fees) incurred, in connection with the proceeding and plan of reorganization up to and including October 31, 1939, were filed by the following persons, corporations, and committees: the Debtor and its counsel; The Institutional Bondholders Committee and its counsel; Crocker First National Bank of San Francisco as Corporate Trustee under the First Mortgage and Samuel Armstrong as Individual [1223] Trustee under the First Mortgage; The Chase National Bank of the City of New York, as Trustee (until November 13, 1936) under the Refunding Mortgage; Irving Trust Company, as successor Trustee under the Refunding Mortgage; A. C. James Co. and its counsel; and Reconstruction Finance Corporation. Said petitions were referred under the provisions of the Act to the Commission to fix the maximum limits of final allowances. The Commission filed in this court on June 1, 1940, a certified copy of its report and order fixing the maximum limits for allowances for fees and expenses. The matter came on regularly for hearing before the court on August 5, 1940. Counsel for A. C. James Co. moved that the court postpone the consideration of allowances, other than certain ad interim administration expenses. The motion will be denied. The Irving Trust Company, as successor Trustee under the general and refunding mortgage, moved (1) for payment out of the general estate of the Debtor of the compensation

and expenses of itself and its counsel in the maximum limits fixed by the Commission, and (2) for payment of the balance of reasonable compensation of the Trustee and its counsel out of the cash held by said Trustee. The motion was based upon the contention that the allowances made were unreasonably low and that "it is not entirely clear whether or not the Commission intended to fix maximum limits of compensation payable out of the general estate for *all* services of the Trustee and its attorneys." An examination of the report and order of the Commission shows that in no case did the Commission allow as a maximum the amount

[1224]

claimed for compensation. All claims appear to have been treated upon a comparative basis. And it further appears from the report that allowances were made for all services rendered. The motion will be denied. I am of the opinion that the amounts allowed by the Commission as compensation for services rendered and for actual and reasonable expenses (including attorneys' fees) incurred are reasonable, and they will be approved.

Upon a consideration of the entire record I am of the opinion that the Commission plan complies with the provisions of subsection (b) of section 77 and is supported by the evidence; that it is fair and equitable; that it affords due recognition to the rights of each class of creditors and stockholders; that it does not discriminate unfairly in favor of any class of creditors or stockholders; that it

will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; and that it provides for payment of all costs of administration and other allowances made or to be made by this court.

All objections to the Commission plan will therefore be overruled and the plan will be approved in toto.

No. 26591-S

In the Matter of
The Western Pacific Railroad Company,
Debtor.

ORDER APPROVING PLAN OF REORGANIZATION FOR DEBTOR

These proceedings coming on for hearing on the modified plan of reorganization for the Debtor, approved by the Interstate Commerce Commission in its Report and Order entered June 21, 1939, and certified to this Court by said Commission on September 28, 1939, together with a transcript of [1226] the proceedings before said Commission and

a copy of its said Report and Order approving said modified plan, and the Court having considered the entire record in these proceedigs, including the transcript of the proceedings before said Commission certified to this Court and the evidence adduced and arguments presented at the hearing before this Court on January 22 to 25, 1940, and the Court having heretofore on August 15, 1940, filed its opinion herein,

The Court finds:

1. The findings of fact made by the Interstate Commerce Commission in its Original Report of October 10, 1938, as modified by its Supplemental Report of June 21, 1939, are supported by the evidence, and as supplemented by the stipulation of the parties filed herein on December 20, 1939, are adopted as findings by this Court.

2. The Plan of Reorganization, approved by the Report and Order of the Interstate Commerce Commission of June 21, 1939:

(a) Includes provisions modifying and altering the rights of creditors of the Debtor;

(b) Provides for fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property, in light of its earnings experience and all other relevant facts, there should be adequate coverage of such fixed charges by the probable earnings available for the payment thereof;

(c) Provides adequate means for the execution [1227] of the Plan; and

(d) In all other respects complies with the provisions of Subsection (b) of Section 77.

3. Said Plan of Reorganization:

(a) Is fair and equitable;

(b) Affords due recognition to the rights of each class of creditors and stockholders;

(c) Does not discriminate unfairly in favor of any class of creditors or stockholders;

(d) Will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; and

(e) Provides for payment of all costs of administration and all other allowances made or to be made by this Court.

4. By order entered August 15, 1940, this Court fixed the amount to be paid by the Debtor, or any corporation acquiring its assets, for fees and expenses incident to the reorganization through October 31, 1939. Said amounts are reasonable and within maximum limits heretofore fixed by the Interstate Commerce Commission and said order constitutes full disclosure of the approximate amounts to be paid by the Debtor, or such other corporation, for such fees and expenses so far as they could be ascertained at the date of said hearing before this Court on January 22 to 25, 1940. Such additional amount as may be required to be paid

by the Debtor or such other corporation for services performed and expenses incurred (including reasonable attorneys' fees) after October 31, 1939, in connection with the proceedings and plan of reorganization, and in connection with the carrying out of said plan, if the same is finally confirmed, [1228] cannot be ascertained at this time, but such amounts will be subject to the approval of this Court within maximum limits hereinafter to be fixed by the Interstate Commerce Commission.

5. By order entered August 20, 1935, this Court divided the creditors and stockholders of the Debtor into classes and the classes of creditors hereinafter referred to are those fixed by said order.

Wherefore, it is ordered:

First: The objections to the Plan of Reorganization approved by the Report and Order of the Interstate Commerce Commission of June 21, 1939, and the claims for equitable treatment heretofore filed herein by or on behalf of the Debtor, the Institutional Bondholders Committee, the Trustee under the Debtor's General and Refunding Mortgage, A. C. James Co., Reconstruction Finance Corporation, The Railroad Credit Corporation, The Western Pacific Railroad Corporation and The Western Realty Company are hereby severally overruled and denied.

Second: Said Plan of Reorganization is hereby in all respects approved.

Third: The findings made by the Interstate Commerce Commission that the interests of the following classes of creditors:

(a) The Debtor's equipment obligations to be assumed by the Reorganized Company, being classes 6, 7, 8 and 9;

(b) Claims against the Debtor entitled to priority over any mortgage of the Debtor, current liabilities and obligations incurred by the Trustees of the Debtor during this reorganization [1229] proceeding, and expenses of reorganization allowed by this Court within the maximum limits fixed by the Interstate Commerce Commission, which shall be paid in cash or assumed by the Reorganized Company, and which are unclassified;

(c) Executory contracts of the Debtor which have been affirmed or have not been disaffirmed by the Trustees of the Debtor and not terminating prior to the conclusion of this reorganization proceeding which are to be assumed by the Reorganized Company and which are unclassified;

(d) Executory contracts made by the Trustees of the Debtor with the approval of this Court which by their terms do not terminate at or prior to the conclusion of this reorganization proceeding, which are to be assumed by the Reorganized Company, and which are unclassified; and

(e) All taxes levied, assessed or accrued against the Debtor or its property or against any subsidiary and remaining unpaid at the date of the confirmation of the plan, which are to be assumed and paid by the Reorganized Company

with the same relative priority that they now have with respect to other obligations of the Debtor;

will not be adversely and materially affected by said Plan of Reorganization is hereby affirmed, and said Plan of Reorganization shall not be submitted to any of such classes for acceptance or rejection.

Fourth: The finding of the Interstate Commerce Commission that, at the time of the finding, the interests of [1230] unsecured creditors of the Debtor and the equity of the holders of the Debtor's Preferred Stock and the Debtor's Common Stock have no value, and that the holders of such unsecured claims and such shareholders are not entitled to participate in the distribution of new capital securities or other assets of the Debtor under said Plan of Reorganization is hereby affirmed, and said Plan of Reorganization shall not be submitted to said unsecured creditors or shareholders for acceptance or rejection.

Fifth: The only classes of creditors to whom said Plan of Reorganization shall be submitted for acceptance or rejection are:

(a) Class (1)—holders of claims evidenced by The Western Pacific Railroad Company First Mortgage 5% Bonds due March 1, 1946, issued under the First Mortgage of The Western Pacific Railroad Company dated June 26, 1916, and the interest coupons appurtenant thereto;

(b) Class (3)—Debtor's secured promissory

notes issued to A. C. James Co., dated March 28, 1932, and May 31, 1932, respectively, bearing interest at the rate of 5% per annum and due March 28, 1935, and May 31, 1935, respectively, together with the accrued and unpaid interest thereon;

(c) Class (4)—Debtor's secured promissory notes to Reconstruction Finance Corporation, dated March 1, 1932, June 29, 1932, August 1, 1932, August 30, 1932, and March 25, 1933, respectively, bearing interest at the rate of 6% per annum, and due March 1, 1935, June 29, 1935, August 1, 1935, August 30, 1935, and March 25, 1936, respectively, [1231] together with accrued and unpaid interest thereon;

(d) Class (5)—Debtor's secured promissory notes to The Railroad Credit Corporation, dated June 29, 1932, and March 25, 1933, respectively, bearing interest at the rate provided for in the Marshalling and Distributing Plan, 1931, of The Railroad Credit Corporation, each note payable on demand, together with accrued and unpaid interest thereon.

Sixth: T. M. Schumacher and Sidney M. Ehrman, Trustees of the Debtor, be, and they are hereby directed to send a certified copy of this Order and a certified copy of the opinion of this Court filed herein on August 15, 1940, to the Interstate Commerce Commission for use in submitting said Plan of Reorganization hereby approved to the

holders of said claims and interests found to be entitled to vote thereon.

Dated: August 15, 1940.

A. F. ST. SURE,
United States District Judge.

AFFIDAVIT OF SERVICE

State of California,
City and County of San Francisco—ss.

J. Francis Hoey, being duly sworn, deposes and says: That he is over twenty-one years of age; that he is an employee of Messrs. Morrison, Hohfeld, Foerster, Shuman & Clark, Crocker Building, San Francisco, California; that on August 22nd, 1940, he served the within Notice of Entry of Orders upon the [1233] following attorneys at law:

C. W. Dooling,
878 Mills Building,
San Francisco, California,
Attorney for Debtor.

Pillsbury, Madison & Sutro,
Standard Oil Building,
San Francisco, California,
Attorneys for Irving Trust Company, as Substituted Trustee under General and Refunded Mortgage.

Garret W. McEnerney and Andrew F. Burke,
2002 Hobart Building,
San Francisco, California,
Attorneys for A. C. James & Co.
Brobeck, Phleger & Harrison,
Crocker Building,
San Francisco, California,
Attorneys for Reconstruction Finance Corporation.
Sloss, Turner & Finney,
111 Sutter Street,
San Francisco, California,
Attorneys for Western Pacific Railroad Corporation.
Chickering & Gregory,
111 Sutter Street,
San Francisco, California,
Attorneys for Crocker First National Bank of San Francisco and Samuel Armstrong, Trustee of First Mortgage.
Pillsbury, Madison & Sutro,
Standard Oil Building,
San Francisco, California,
Attorneys for Chase National Bank of the City of New York.

by delivering a copy of said Notice to said attorneys at their respective office addresses; and that he served a copy of the said Notice upon the following attorneys at law:

Edward G. Buckland,
Maryland Trust Building,

Baltimore, Maryland,
Attorney for The Railroad Credit Corporation.
LeRoy R. Goodrich,
1001 Bank of America Building,
Oakland, California,
Attorney for The Western Realty Company.

by depositing a copy of said Notice securely enclosed in a [1234] postpaid wrapper in the United States Post Office in San Francisco, California, directed to said Edward G. Buckland and LeRoy R. Goodrich at the above addresses.

J. FRANCIS HOEY.

Subscribed and sworn to before me this 22nd day of August, 1940.

[Seal] W. W. HEALEY,
Notary Public
in and for the City and County of
San Francisco, State of California.

My Commission expires August 29, 1941. [1235]

[Title of District Court and Cause.]

NOTICE OF ENTRY OF ORDERS

To: The Western Pacific Railroad Company, Debtor, and to Messrs. Pierce & Greer and C. W. Dooling, Esq., its attorneys; Irving Trust Company, as Substituted Trustee under General and Refunding Mortgage, and Messrs. Pillsbury, Madison & Sutro and Messrs. Davies, Auerbach, Cornell & Hardy, its attorneys; A. C. James & Co., and Messrs. Witman, Ransom,

Coulson & Goetz and Garret W. McEnerney and Andrew F. Burke, its attorneys; Reconstruction Finance Corporation, and C. M. Clay, Esq., Florence de Hass Dembitz, Esq., and Messrs. Brobeck, Phleger & Harrison, its attorneys; The Railroad Credit Corporation, and Edward G. Buckland, Esq., its attorney; Western Pacific Railroad Corporation, and Messrs. Sloss, Turner & Finney, its attorneys; The Western Realty Company, and LeRoy R. Goodrich, Esq., its attorney; Crocker First National Bank of San Francisco and Samuel Armstrong, Trustee of First Mortgage, and Messrs. Chickering & Gregory and Messrs. Milbank, Tweed & Hope, their attorneys; and Chase National Bank of the City of New York, and Messrs. Pillsbury, Madison & Sutro and Messrs. Milbank, Tweed & [1236] Hope, its attorneys:

You and each of you will please take notice that on August 15, 1940, there were regularly made in the above entitled cause by the Honorable A. F. St. Sure, United States District Judge, and on said date regularly entered in said cause, the following entitled orders:

(1) Order granting leave to Bankers Trust Company, Trustee, to file a claim against The Western Pacific Railroad Company;

(2) Order approving plan of reorganization for Debtor; and

(3) Order making allowances to various parties in interest for fees and expenses.

Dated: San Francisco, August 22, 1940.

MORRISON, HOHFELD, FOERSTER, SHUMAN & CLARK.

NOTICE OF APPEAL FROM ORDER CONFIRMING PLAN OF REORGANIZATION

Sirs:

Please Take Notice that The Railroad Credit Corporation, a secured creditor of the above-named debtor, hereby appeals to the United States Circuit Court of Appeals for the Ninth Circuit, from an order entered in the above-entitled proceeding in the office of the Clerk of the United States District Court for the Northern District of California, Southern Division, on the 15th day of August 1940, approving and confirming a plan of reorganization of the debtor, and from each and every part of said order.

September 20, 1940.

Yours truly,

NOTICE OF APPEAL

Notice is hereby given that Irving Trust Company, as [1243] substituted Trustee under the General and Refunding Mortgage of Western Pacific Railroad Company, hereby appeals to the Circuit Court of Appeals for the Ninth Circuit from so much of the order of this Court made and entered

August 15, 1940, as overrules and denies the objections filed herein by Irving Trust Company, as Trustee as aforesaid, to the Plan of Reorganization approved by the Report and Order of the Interstate Commerce Commission of June 21, 1939, and the claims for equitable treatment filed herein by Irving Trust Company, as Trustee as aforesaid, and from so much of said order as, contrary to the aforesaid objections and claims for equitable treatment, approves in all respects said Plan of Reorganization.

Dated: September 20, 1940.

[Title of District Court and Cause.]

DESIGNATION BY APPELLANTS, THE WESTERN PACIFIC RAILROAD COMPANY, THE WESTERN PACIFIC RAILROAD CORPORATION, A. C. JAMES CO., THE RAILROAD CREDIT CORPORATION, AND IRVING TRUST COMPANY AS TRUSTEE UNDER THE GENERAL AND REFUNDING MORTGAGE OF WESTERN PACIFIC RAILROAD COMPANY DATED JANUARY 1, 1932, OF THE PORTIONS OF THE RECORD, PROCEEDINGS AND EVIDENCE TO BE CONTAINED IN THE RECORD ON APPEAL.

The Western Pacific Railroad Company, debtor herein, The Western Pacific Railroad Corporation, A. C. James Co., a corporation, The Railroad Credit Corporation and Irving Trust Company as Trustee under the General and Refunding Mortgage of The Western Pacific Railroad Company, dated January 1, 1932, have appealed severally to the United States Circuit Court of Appeals for the Ninth Circuit, from the order of the above entitled Court approving a plan of reorganization of the debtor, which order was made and filed in the above proceeding on August 15, 1940, and hereby jointly and severally designate the following as the portions of the record, proceedings and evidence to be contained in the record on appeal herein; such designations are made in conformity with Rule 75 (a) of the Rules of Civil Procedure: [1257]

(1) The petition of The Western Pacific Rail-

road Company, debtor, filed herein on August 2, 1935, pursuant to Subdivision (a) of Section 77 of the Bankruptcy Act as amended.

(2) Order of the above entitled Court approving such petition filed August 2, 1935, and restraining the sale, conversion or other disposition of collateral.

(3) Petition for order respecting the filing of claims and division of creditors and stockholders into classes, filed August 20, 1935.

(4) Order dividing claims into classes, filed August 20, 1935.

(5) Petition for appointment of trustees and order respecting notice of hearing of said petition, filed August 31, 1935.

(6) Claim of A. C. James Co., filed herein September 10, 1935.

(7) Claim of The Western Pacific Railroad Corporation, filed September 12, 1935.

(8) Claim of Western Realty Company, filed September 13, 1935.

(9) Claim of Railroad Credit Corporation, filed on or before September 15, 1935.

(10) Claim filed on behalf of holders or pledgees of General and Refunding Mortgage Bonds, on or before September 15, 1935. [1258]

(11) Order appointing trustees, filed September 23, 1935.

(12) Order of September 30, 1935, modifying order appointing trustees.

(13) Proposed plan of reorganization filed by the debtor February 8, 1936, being Exhibit "1" of

the exhibits introduced at the hearings before the Interstate Commerce Commission.

(14) Plan of Reorganization filed with the Interstate Commerce Commission on behalf of the Committee representing Institutional Bondholders on September 28, 1936, being Interstate Commerce Commission Exhibit No. "42".

(15) Plan of Reorganization filed with the Interstate Commerce Commission on behalf of A. C. James Co. on October 26, 1936, being Interstate Commerce Commission Exhibit No. "76".

(16) Transcript of the hearings and proceedings before the Interstate Commerce Commission in this matter, which is numbered "Finance Docket No. 10913", and has heretofore been certified to and filed in the above named Court, including the transcript of all proceedings before the Commission or any of its Bureaus or Divisions, together with the remainder of the 126 exhibits (in addition to those specified in items (13), (14) and (15) above), introduced before said Commission and its Bureaus and Divisions.

(17) The proposed report of the Bureau of [1259] Finance of the Commission dated August 2, 1937.

(18) The report and order of the Commission dated October 10, 1938.

(19) The order of the Commission granting a rehearing dated December 30, 1938.

(20) The final modifying report and order of the Commission dated June 21, 1939. Two copies

of all of the Reporter's Transcript of the hearings are filed herewith pursuant to Rule 75(b) of the Rules of Civil Procedure.

(21) Petition of A. C. James Co. for leave to intervene before the Commission dated April 18, 1936.

(22) Petition of Railroad Credit Corporation for leave to intervene before the Commission dated March 14, 1936.

(23) Petition of Irving Trust Company as Trustee under the General and Refunding Mortgage of the debtor, for leave to intervene before the Commission dated November 19, 1936.

(24) Exceptions of the several parties to the aforesaid proposed report of the Bureau of Finance.

(25) Petitions of the several parties filed with the Commission on December 9, 1938, for rehearing and modification of the report and order of the Commission dated October 10, 1938.

(26) The debtor's petition, dated August 1, 1939, for rehearing and modification of the Commission's report and order of June 21, 1939. [1260]

(27) The Commission's order of September 19, 1939, denying debtor's petition of August 1, 1939, for rehearing and modification.

(28) Order of the Court made November 8, 1939, fixing the time within which objections to the Plan of Reorganization and claims for equitable treatment might be filed, and designating December 8, 1939, as the date for filing such objections and claims.

(29) Petition for leave to file petition of intervention of A. C. James Co. and order granting such petition, both filed December 1, 1939, petition of intervention of A. C. James Co. for leave to intervene and order made and filed, December 1, 1939, fixing time and place for hearing such petition, notice of filing petition of intervention of A. C. James Co. and order granting petition of intervention of A. C. James Co. made and filed December 4, 1939, and notice of making and entry of said order.

(30) Petition for leave to file petition of intervention of The Western Pacific Railroad Corporation and order granting such petition and fixing date of hearing upon petition of intervention, both filed December 7, 1939, petition of intervention of Western Pacific Railroad Corporation and notice of filing same, both dated December 7, 1939 and order granting petition of intervention, dated December 11, 1939, and notice of making and entry of said order.

(31) Petitions, orders and notices relating to [1261] intervention of Irving Trust Company as Trustee under the General and Refunding Mortgage of the debtor in this proceeding.

(32) Objections to the Plan of Reorganization and claims for equitable treatment filed herein by A. C. James Co. on December 8, 1939.

(33) Objections to the Plan of Reorganization and claims for equital le treatment filed herein by The Western Pacific Railroad Corporation on December 8, 1939.

(34) Objections to the Plan of Reorganization and claims for equitable treatment filed herein by Railroad Credit Corporation on December 8, 1939.

(35) Objections to the Plan of Reorganization and claims for equitable treatment filed herein by The Western Pacific Railroad Company on December 8, 1939.

(36) Objections to the Plan of Reorganization and claims for equitable treatment filed herein by Irving Trust Company as Trustee under the General and Refunding Mortgage of the debtor on December 8, 1939.

(37) Objections to the Plan of Reorganization and claims for equitable treatment filed herein by Western Realty Company on December 8, 1939.

(38) Stipulation as to facts not in dispute filed herein on December 20, 1939, and order of the Court made and filed December 20, 1939, making said stipulation a part of the record.

(39) Summary of issues remaining for decision by [1262] the Court, filed herein by The Western Pacific Railroad Corporation and A. C. James Co. on December 20, 1939.

(40) Summary of issues as stated by counsel for Institutional Bondholders Committee, filed herein on December 20, 1939.

(41) Order of the Court fixing January 22, 1940, as date for hearing parties in interest, providing for notice, etc. filed December 21, 1939.

(42) Order of the Court made and filed December 29, 1939, relative to issues raised by objections to the Commission Plan.

(43) Transcript of the evidence and proceedings (other than the arguments of counsel), had and taken in the above entitled Court on January 22, 1940, and all exhibits received in evidence on said hearing. Two copies of said transcript are filed with these designations, pursuant to Rule 75(b) of the Rules of Civil Procedure.

(44) Opinion of the Court upon approval of plan of reorganization dated and filed August 15, 1940.

(45) Order of the Court overruling all objections and approving plan of reorganization, filed August 15, 1940.

(46) Notice of entry of order of the above entitled Court overruling objections and approving plan of reorganization and affidavit of service of said notice, filed August 22, 1940.

(47) Notice of appeal from the aforesaid order [1263] of August 15, 1940, filed by A. C. James Co. on September 20, 1940.

(48) Notice of appeal from the aforesaid order of August 15, 1940, filed by The Western Pacific Railroad Corporation on September 20, 1940.

(49) Notice of appeal from the aforesaid order of August 15, 1940, filed by Railroad Credit Corporation on September 20, 1940.

(50) Notice of appeal from the aforesaid order of August 15, 1940, filed by The Western Pacific Railroad Company, debtor herein, on September 20, 1940.

(51) Notice of appeal from the aforesaid order of August 15, 1940, filed by Irving Trust Company

as Trustee under the General and Refunding Mortgage of the debtor on September 20, 1940.

(52) Notice from the Clerk of the Court of the filing of the aforesaid notices of appeal.

(53) Bonds for costs on appeal filed on September 20, 1940, by A. C. James Co., The Western Pacific Railroad Company, The Western Pacific Railroad Corporation, Railroad Credit Corporation and Irving Trust Company, pursuant to Rule 73(c) of the Rules of Civil Procedure.

(54) A copy of this designation.

(55) Statement of points on which The Western Pacific Railroad Company intends to rely on its appeal.

(56) Statement of points on which A. C. James Co. intends to rely on its appeal. [1264]

(57) Statement of points on which The Western Pacific Railroad Corporation intends to rely on its appeal.

(58) Statement of points on which the Railroad Credit Corporation intends to rely on its appeal.

(59) Statement of points on which Irving Trust Company as Trustee under the General and Refunding Mortgage of the debtor intends to rely on its appeal.

(60) All certificates made by the Clerk of the above named Court with reference to the proceedings, rulings and orders of the Court hereinbefore mentioned.

(61) All endorsements of filings and all acknowledgments and other proofs of service of any of the aforesaid records or papers in the above

named Court, or, in lieu thereof, memoranda by the Clerk showing the due filing and/or service of said records or papers.

Dated, October 8, 1940.

[Endorsed]: Filed Oct 10-1940. [1265]

[Title of District Court and Cause.]

STATEMENT OF POINTS UPON WHICH APPELLANT, A. C. JAMES CO., WILL RELY ON ITS APPEAL FROM THE ORDER OF THE ABOVE COURT MADE AUGUST 15, 1940, APPROVED PLAN OF REORGANIZATION OF DEBTOR.

A. C. James Co., a corporation which has heretofore appealed to the United States Circuit Court of Appeals for the Ninth Circuit from the order of the above mentioned Court made August 15, 1940, approving a plan of reorganization for the Debtor, hereby makes the following statement of points upon which it will rely upon the appeal:

1. The District Court has erred in approving a plan of reorganization which is unfair and inequitable, fails to afford due recognition to the rights of A. C. James Co. as a secured creditor in relation to the value of the assets of the debtor; discriminates unfairly against the A. C. James Co. in relation to other secured creditors; does not conform to the requirements of the law of the land regarding the participation of A. C. James Co., as a secured creditor, and is confiscatory of private property rights of A. C. James Co., in violation of the Fifth [1266] Amendment of the Constitution, the provisions of which A. C. James Co. hereby invokes.

2. The District Court has erred in approving said plan of reorganization in that it has adopted a theory and concept of the functions of the Court

in approving or disapproving a plan of reorganization, which theory and concept are without support in the law and permeate and vitiate the approval by the Court; the District Court has not exercised an independent and informed judgment in approving the plan, as is required by Section 77 of the Bankruptcy Act and the law of the land, but has merely reviewed the findings and determinations of the Interstate Commerce Commission.

3. The District Court has erred in approving a plan of reorganization which was not proposed by the debtor or any other party to the proceeding but was framed by the Commission upon the erroneous theory that the Commission was empowered under Section 77 of the Bankruptcy Act to limit the capitalization of the reorganized company solely on the basis of an estimate of probable prospective earnings in order to assure a material return on its capital stock, without giving effect to the investment in and value of the debtor's property.

4. The District Court has erred in holding that the determination of the amount and character of the capitalization of the reorganized company is a legislative function affecting the public interest and exclusively within the province of the Commission; the Commission's assumption of power to limit the capiltalization of the [1267] reorganized company, and the acquiescence of the District Court in such assumption, are unwarranted and contrary to law, and result in the confiscation of private property rights in violation of the Fifth Amendment to the Constitution.

5. The limitation on capitalization fixed in the plan approved by the District Court does not constitute a valuation or appraisal of the debtor's property, such as is required by Section 77 of the Bankruptcy Act and the law of the land.

6. Neither the District Court nor the Commission made such a precise finding as to the value of the property of the debtor as is necessary to sustain the disregard of a substantial portion of the claim of the A. C. James Co., as contemplated in the plan approved by the District Court.

7. The District Court has erred in approving a plan which does not give "Such effect * * * to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts." The drastic limitation upon the capitalization of the debtor which is imposed by the Interstate Commerce Commission in the plan certified by it disregards completely the investment in the property of the debtor and the value thereof as heretofore found and reported by the Commission, and without any new appraisal or valuation of such property by the Interstate Commerce Commission; the capitalization of a debtor in reorganization cannot lawfully be determined [1268] or limited below the amount proposed by the parties to the proceeding unless such determination is made with reference to the investment in the debtor's property and the value

thereof as disclosed by an appraisal or valuation.

8. The determinations and findings of the Interstate Commerce Commission as to the probable earnings and earning power of the debtor's property, the limitation upon total capitalization and the resulting delimitation of private property rights were made arbitrarily, in disregard of the evidence and in violation of the meaning and intent of Section 77 of the Bankruptcy Act; if Section 77 is interpreted as authorizing such findings and determinations by the Commission, or as conferring upon the Commission plenary and exclusive power to so limit the capitalization of the debtor upon reorganization, then Section 77 is unconstitutional and void as in violation of the Fifth Amendment of the Constitution, the provisions of which A. C. James Co. hereby invokes.

9. The District Court has erred in approving a plan which arbitrarily disregards and denies recognition to a substantial proportion of the secured claim of A. C. James Co., while, according to the other secured creditors (Reconstruction Finance Corporation and Railroad Credit Corporation), preferential treatment which is unfair, inequitable and discriminatory as against the A. C. James Co., and contrary to the law of the land; the preferential treatment granted in the plan to Reconstruction Finance Corporation in respect of its claim as a secured creditor, to [1269] compensate such corporation for its agreement to accept First Mortgage Bonds of the reorganized company in

exchange for the Trustees' Certificates which it now holds, is unjust and contrary to law.

10. The plan of reorganization approved by the District Court is unfair, inequitable and discriminatory in attempting to preserve to other secured creditors full rights in collateral for the obligations of the debtor furnished by a third party at the same time it completely refunds the obligations of the debtor held by such secured creditors, and disregards and fails to fund a substantial portion of the secured claim held by A. C. James Co.

11. The District Court has erred in approving a plan of reorganization which adjudicates, delimits and destroys the property rights of A. C. James Co. without a judicial determination of the facts and issues necessary to an adjudication and delimitation of private property rights in violation of Section 77 of the Bankruptcy Act, the law of the land and the Fifth Amendment of the Constitution.

12. The District Court has erred in approving a plan of reorganization which fails to recognize that a reorganization under Section 77 of the Bankruptcy Act is a statutory alternative to liquidation and forced sale of the debtor's assets and fails to recognize the statutory intent that the value of the debtor's assets shall for the purposes of a reorganization be the fair going concern value and not forced sale value or the market value of the debtor's securities. [1270]

13. The District Court erred in finding that the

secured claim of A. C. James Co. is not fully secured by the lien of the debtor's General and Refunding Mortgage, and in disregarding a large part of said claim.

14. The plan approved by the District Court discriminates against A. C. James Co. unfairly and unlawfully, in that it affords less favorable treatment to A. C. James Co. than to any other secured creditor, notwithstanding that the claim of said A. C. James Co. is deserving of more favorable equitable treatment for the reasons, among others:

(a) That it resulted from cash advances made by A. C. James Co. to the debtor, during 1931 and 1932, the depth of the financial depression from which the railroads of the country have suffered, to enable the debtor to complete its Northern California Extension which completion was essential to protect the interest of all investors in the property, and has been an important factor in the earning power of the debtor; and

(b) That the advances made during 1931 and 1932 by said A. C. James Co. to the debtor, were made with the express approval of the Interstate Commerce Commission which found the necessary issue of securities by the debtor to represent such advances to be "compatible with the public interest," even though the then earnings status of the debtor was substantially less favorable than at the time the Commission formu-

lated and [1271] promulgated the plan approved by the Court, or at the present time.

15. The District Court erred in approving the allocation, as proposed in the plan, of common stock without par value of the reorganized company, apparently valued by the Commission at $100 per share for the purpose of capitalization, to First Mortgage bondholders, and the Reconstruction Finance Corporation at $57 a share, to Railroad Credit Corporation at $62 a share, and to A. C. James Co. (if it should be urged that the entire debt of the A. C. James Co. is thereby refunded) at approximately $155 a share, in violation of Section 77 of the Bankruptcy Act and the law of the land.

16. The findings of the Commission and the above Court, that the claim of A. C. James Co. has no value in excess of that recognized by the Commission and the provisions of the plan which give effect to such findings, are and each of them is unsupported by and contrary to the evidence.

17. The District Court erred in holding that Section 77 of the Bankruptcy Act authorizes or permits the exclusion from participation in the reorganization of part of the secured claim of A. C. James Co. without a finding that the debtor was insolvent in the bankruptcy sense.

18. The District Court erred in approving a plan of reorganization which provides for the issue of common stock of the reorganized company to holders of First Mortgage Bonds of the debtor and

to secured creditors, [1272] in respect of many millions of dollars of interest accrued on the bonds and secured notes of the debtor after the filing of the debtor's petition on August 2, 1935, whereas under Section 77 of the Bankruptcy Act and the law of the land the rights and liabilities of creditors and of all persons with respect to the debtor and its property were fixed as of the date of filing said petition; the plan approved by the District Court cannot be supported in law in so far as it provides for an effective date thereof of January 1, 1939, and not August 2, 1935, as contemplated by Section 77 of the Bankruptcy Act.

19. The District Court erred in approving a plan of reorganization which imposes arbitrary limitations upon the functions of the management of the reorganized company, contemplated by said plan, through the provision for a mandatory rather than a discretionary capital fund.

20. The aforesaid order of August 15, 1940, approving the plan and overruling the objections of A. C. James Co. and other parties is erroneous upon each and all of the grounds hereinbefore specified.

Dated, October 9th, 1940.

[Endorsed]: Filed Oct. 10, 1940. [1273]

[Title of District Court and Cause.]

STATEMENT OF POINTS ON WHICH APPELLANT, THE WESTERN PACIFIC RAILROAD CORPORATION, INTENDS TO RELY ON THE APPEAL.

The Western Pacific Railroad Corporation, a corporation which has heretofore appealed to the United States Circuit Court of Appeals for the Ninth Circuit from the order of the above mentioned Court made August 15, 1940, approving a Plan of Reorganization for the Debtor, hereby makes the following statement of points upon which it will rely upon the appeal:

(1) The Plan of Reorganization approved by the Judge is not fair or equitable as to the appellant as owner of an unsecured claim. [1274]

(2) The Plan of Reorganization approved by the Judge is not fair or equitable as to the appellant as owner of all the capital stock, preferred and common, of the Debtor.

(3) The Plan of Reorganization approved by the Judge does not afford due recognition to the rights of unsecured creditors and particularly of the appellant as an unsecured creditor.

(4) The Plan of Reorganization approved by the Judge does not afford due recognition to the rights of appellant as sole stockholder of the Debtor.

(5) The Plan of Reorganization approved by the Judge does not conform to the requirements

of the law of the land regarding the participation of unsecured creditors and particularly of the appellant as an unsecured creditor.

(6) The Plan of Reorganization approved by the Judge does not conform to the requirements of the law of the land regarding the participation of the stockholders of the Debtor, and particularly of the appellant as the sole stockholder of the Debtor.

(7) The Plan of Reorganization, if made effective, would deprive the appellant of its property, i. e., its unsecured claim, without compensation, and without due process of law, contrary to the Fifth Amendment of the Constitution of the United States.

(8) The Plan of Reorganization, if made effective, would deprive the appellant of its property, i. e., of its equity and interest in the property of the Debtor, as owner and holder of all of the capital stock of the Debtor, without compensation, and without due process of law, contrary to the Fifth Amendment of the Constitution of the United States.

(9) The Plan of Reorganization approved by the Judge [1275] discriminates unfairly in favor of all classes of secured creditors and against the appellant as an unsecured creditor.

(10) The Plan of Reorganization approved by the Judge discriminates unfairly in favor of all classes of secured creditors and against the appellant as a stockholder of the Debtor, i. e., as the sole stockholder of the Debtor.

(11) The Plan of Reorganization approved by the Judge will not conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders.

(12) The finding of the Interstate Commerce Commission that, at the time of the finding, the interests of the unsecured creditors of the Debtor had no value is unsupported by the evidence.

(13) The finding of the Interstate Commerce Commission that at the time of the finding the equity of the holders of the Debtor's preferred stock and the Debtor's common stock had no value is unsupported by the evidence.

(14) The District Court and the Judge thereof erred in affirming the finding of the Interstate Commerce Commission that at the time of the finding the interests of unsecured creditors of the Debtor had no value.

(15) The District Court and the Judge thereof erred in affirming the finding of the Interstate Commerce Commission that at the time of the finding the equity of holders of the Debtor's preferred stock and the Debtor's common stock had no value.

(16) The District Court and the Judge thereof erred in holding and deciding that the Plan of Reorganization shall not be submitted to the unsecured creditors of the Debtor for acceptance or rejection. [1276]

(17) The District Court and the Judge thereof erred in holding that the Plan of Reorganization

shall not be submitted to the shareholders of the Debtor for acceptance or rejection.

(18) The evidence before the Interstate Commerce Commission and its findings, together with the evidence before the Court on the hearing of objections to the Commission's report, show that the value of the Debtor's property exceeded the aggregate amount of all claims which were given recognition in the Plan of Reorganization; there was therefore no justification under Section 77 of the Bankruptcy Act as amended, or under the law of the land, for denying participation to the holders of unsecured claims against the Debtor.

(19) The evidence before the Interstate Commerce Commission and its findings, together with the evidence before the Court on the hearing of objections to the Commission's report, show that the value of the Debtor's property exceeded the aggregate amount of all claims which were given recognition in the Plan of Reorganization, together with the amount of the unsecured claims against the Debtor. There was therefore no justification under Section 77 of the Bankruptcy Act as amended, or under the law of the land, for denying participation to the holders of the stock of the Debtor.

(20) The evidence before the Interstate Commerce Commission and the evidence before the District Court on the hearing of objections to the report of the Commission showed that the Debtor

was not and is not insolvent within the meaning of the term "insolvent", as defined in Section 1, of the Bankruptcy Act as amended.

(21) There was no finding by the Interstate Commerce Commission, or by the District Court or the Judge thereof, that [1277] the Debtor was insolvent within the meaning of the term "insolvent", as defined in Section 1, of the Bankruptcy Act as amended.

(22) Any implied finding, if such there was, by the Interstate Commerce Commission or by the District Court or the Judge thereof, that the Debtor was insolvent, as the term "insolvent" is defined in Section 1 of the Bankruptcy Act, as amended, was unsupported by the evidence before the Commission or the Court or the Judge thereof.

(23) The District Court and the Judge thereof erred in holding that Section 77 of the Bankruptcy Act as amended authorizes the exclusion of stockholders of the Debtor from participation in the reorganization even though the Debtor be not insolvent, and in holding that Section 77, as so interpreted, is not in violation of the law of the land.

(24) The Interstate Commerce Commission, in its report promulgating the Plan of Reorganization, and the District Court and the Judge thereof, in approving said Plan, proceeded in violation of Section 77 of the Bankruptcy Act as amended, and in violation of the law of the land in going upon the view that the only measure of value of the

Debtor's property was a capitalization of the net earnings of the Debtor over a past period.

(25) The Interstate Commerce Commission and the District Court and the Judge thereof erred in failing to give due consideration to the prospective earning power of the Debtor's property and in refusing to give any consideration to all or any other relevant facts.

(26) The Interstate Commerce Commission and the District Court and the Judge thereof erred in refusing to give any effect to the present cost of reproduction new and less depreciation of the property of the debtor or to the original [1278] cost of the property or to the actual investment therein.

(27) The District Court and the Judge thereof erred in failing to form or declare an informed, independent judgment on the question whether the Plan of Reorganization certified to it complies with the following requirements of subdivision (e) of Section 77 of the Bankruptcy Act as amended, or any of them; That the Plan be fair and equitable; that it afford due recognition to the rights of each class of creditors or stockholders; that it will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders.

(28) The District Court and the Judge thereof erred in failing to make an independent determination of the value of the Debtor's property in so far as such determination was an element in disposing of the appellant's contention that the Plan of Re-

organization, if carried into effect, would result in the confiscation of appellant's property, without due process of law, contrary to the Fifth Amendment to the Constitution of the United States.

(29) The District Court and the Judge thereof erred in holding that the Interstate Commerce Commission has plenary power, under Section 77 of the Bankruptcy Act as amended, to determine the amount and character of the capitalization of a reorganized railroad company.

(30) The District Court and the Judge thereof erred in holding that the determination of the amount and character of the capitalization of the reorganized debtor company is a legislative function affecting the public interest, and in holding that such determination is exclusively within the province of the Interstate Commerce Commission, subject only to the qualification that the Court shall independently determine whether, [1279] in the exercise of its jurisdiction, the Commission has acted fairly, within the bounds of the Constitution, and not arbitrarily.

[Endorsed]: Filed Oct. 10, 1940. [1280]

[Title of District Court and Cause.]

STATEMENT OF POINTS UPON WHICH APPELLANT, THE RAILROAD CREDIT CORPORATION, WILL RELY ON ITS APPEAL FROM THE ORDER OF THE ABOVE COURT MADE AUGUST 15, 1940, APPROVING PLAN OF REORGANIZATION OF DEBTOR.

The Railroad Credit Corporation, which has heretofore appealed to the United States Circuit Court of Appeals for the Ninth Circuit from the order of the above mentioned Court made August 15, 1940, approving a plan of reorganization for the Debtor, hereby makes the following statement of points upon which it will rely upon the appeal:

1. The District Court has erred in approving a plan of reorganization which provides for an effective date that will be at least a year and ten months earlier than the actual effective date of a plan of reorganization without making adequate provision and adjustments for the application of proceeds and income from collateral, including the income from advances made by The Western Pacific Railroad Corporation to The Standard Realty & Development Company, or from any income that may be payable from other pledged securities. The rights of The Railroad Credit Corporation to apply income from and proceeds of collateral exist by virtue of the general law of pledges and the guarantee of the Fifth Amendment to the Constitution. [1281]

2. The District Court has erred in approving a plan of reorganization which provides for a maximum capitalization that is so low as to be confiscatory, and therefore diverts assets of the Debtor from junior creditors to senior creditors.

3. The District Court has erred in approving a plan of reorganization which treats the new common stock, to be issued upon reorganization, for most purposes as having a value of $57.00 and $62.00 per share, but for the purposes of computing capitalization it is to be taken at $100.00 per share.

4. The District Court has erred in approving a Plan which, though providing for a low capitalization and leaving substantial assets uncapitalized, requires the establishment and maintenance of a capital fund, thus diverting income from some creditors, especially the collaterally secured creditors whose status the Plan proposes to change by shifting them in part from a creditor to an equity position.

5. The Plan further depreciates the standing accorded by it to existing collaterally secured creditors

(a) by diverting income to sinking funds for both the new fixed and income mortgages;

(b) by providing for the conversion of income bonds into common stock at the rate of 20 shares per $1,000, principal amount of such bonds;

(c) by providing that new preferred stock shall share ratably with common stock in divi-

dends declared in excess of 3% upon such common stock, and by other provisions (such as sale price of new stock) of a like effect. The effect of such a course upon future financing is obvious. [1282]

6. The District Court has erred in approving a plan of reorganization which treats the claim of the Reconstruction Finance Corporation upon a different basis with respect to the collateral securing that claim than similar claims of The Railroad Credit Corporation and the A. C. James Company to the extent that they are secured by the same or similar collateral.

7. The limitation on capitalization fixed in the Plan approved by the District Court does not constitute a valuation or appraisal of the Debtor's property, including the actual investment therein, such as is required by Section 77 of the Bankruptcy Act, as Amended, and the law of the land.

8. The District Court has erred in approving a plan of reorganization which concludes that "The Railroad Credit Corporation's equity in the collateral securing the claim of the Reconstruction Finance Corporation is found to be without value."

9. The District Court has erred in approving a plan of reorganization which is unfair and inequitable, fails to afford due recognition to the rights of the Railroad Credit Corporation as a secured creditor in relation to the value of the collateral which it holds; discriminates unfairly

against The Railroad Credit Corporation in relation to other secured creditors; does not conform to the requirements of the law of the land regarding the participation of The Railroad Credit Corporation as a secured creditor, and is confiscatory of private property right of The Railroad Credit Corporation, in violation of the Fifth Amendment of the Constitution.

[Title of District Court and Cause.]

STATEMENT OF POINTS UPON WHICH APPELLANT, THE WESTERN PACIFIC RAILROAD COMPANY, DEBTOR HEREIN, WILL RELY ON ITS APPEAL FROM THE ORDER OF THE ABOVE COURT MADE AUGUST 15, 1940, APPROVING THE PLAN OF REORGANIZATION OF THE DEBTOR CERTIFIED TO THE COURT BY THE INTERSTATE COMMERCE COMMISSION.

The Western Pacific Railroad Company, a corporation organized under the laws of the State of California, which has heretofore appealed to the

United States Circuit Court of Appeals for the Ninth Circuit from the order of the above-mentioned Court made August 15, 1940, approving a Plan of Reorganization for the Debtor, hereby makes the following statement of points upon which it will rely upon said appeal: [1284]

I.

The District Court erred in its conception of the functioning of the Court under Section 77 of the Bankruptcy Act and the law of the land and did not exercise the independent judicial judgment that the Court was required to exercise by said Section 77 and by the law of the land.

II.

The District Court, proceeded upon the erroneous assumption and theory that it was entitled to exercise or was permitted to exercise only such jurisdiction or authority as might be exercised by a Court in a proceeding to set aside an order of the Interstate Commerce Commission under the Act of Congress commonly known as the "Urgent Deficiencies Act", approved October 22, 1913, and the Acts of Congress amendatory thereof.

III.

The District Court erred in approving a Plan of Reorganization for the Debtor, certified to it by the Interstate Commerce Commission, which is unfair and inequitable and fails to give due recognition to the Debtor's unsecured creditors and

stockholders and discriminates unfairly in favor of the holders of the Debtor's First Mortgage Bonds and does not comply with the law of the land requiring the participation of the Debtor's unsecured creditors and the holders of the Debtor's Preferred Stock and Common Stock in the following particulars, among others:

(1) Said Plan of Reorganization is applied to the Debtor's capital structure as it existed on January 1, 1939, instead of the Debtor's capital structure as it existed on August 2, 1935, in violation of Subsection (1) of Section 77 of the Bankruptcy Act and Section 103 of the United States Code Annotated, being the former Section 63 of the Bankruptcy Act.

(2) Said Plan of Reorganization gives recogni- [1285] tion to large amounts of interest accrued but unearned subsequent to August 2, 1935, in violation of Subsection (1) of Section 77 of the Bankruptcy Act and Section 103 of the United States Code Annotated, being the former Section 63 of the Bankruptcy Act.

(3) Said Plan of Reorganization attempts to exclude the Debtor's unsecured creditors and the holders of its Preferred Stock and Common Stock from participation therein, although the undisputed evidence shows a substantial value for the equity represented by the Debtor's unsecured indebtedness and Preferred Stock and Common Stock.

(4) Said Plan of Reorganization attempts to take the Debtor's properties belonging in equity to its unsecured creditors and holders of Preferred Stock and Common Stock and transfer it to the holders of the Debtor's First Mortgage Bonds, without any appraisal, without any valuation and without due process of law.

(5) Said Plan of Reorganization attempts arbitrarily and without any express or implied authority under Section 77 of the Bankruptcy Act to so limit the capitalization of the Reorganized Company as to exclude the Debtor's unsecured creditors and the holders of its Preferred Stock and Common Stock from participating therein.

(6) Said Plan of Reorganization attempts arbitrarily and without any express or implied authority under Section 77 of the Bankruptcy Act to assign to new Common Stock of the Reorganized Company having no par value a value of $100, for the purpose of estimating the total capitalization and a lower value or values in settlement of the claims of creditors so as to [1286] limit the total number of shares to an amount that will leave none available for the owners of the equity represented by the Debtor's unsecured debt and its Preferred Stock and Common Stock.

(7) Said Plan of Reorganization attempts to give undue preference to Reconstruction Finance Corporation.

IV.

The District Court erred in approving a Plan of Reorganization for the Debtor which provides for the appropriation of accommodation collateral pledged by the Debtor but not owned by it and at the same time provides that collateral belonging to the Debtor shall be surrendered to the Reorganized Company, all contrary to the principles of equity and good conscience.

V.

The District Court erred in approving a Plan of Reorganization for the Debtor which is based upon an erroneous determination by the Interstate Commerce Commission (which determination the Court expressly declined to review) that the Debtor's First Mortgage covered important items of property as a first and paramount lien thereon, whereas such items of property are covered by the Debtor's General and Refunding Mortgage as a first and paramount lien thereon, the value of such properties being not less than $10,000,000.

VI.

The District Court erred in approving a Plan of Reorganization for the Debtor providing for a capitalization more than $10,000,000 greater than the Debtor's secured indebtedness without at the same time making provision for the Debtor's unsecured indebtedness and Preferred Stock and Common Stock.

VII.

The District Court erred in approving a Plan of Reorganization for the Debtor providing for annual capital expenditures [1287] cut of estimated future income of $606,095, without giving credit for such earnings to the Debtor's unsecured creditors and Preferred and Common stockholders.

VIII.

The District Court erred in approving a Plan of Reorganization for the Debtor wherein the capitalization of estimated future earnings is substituted for the elements of value required to be considered by the law of the land.

IX.

The District Court erred in approving a Plan of Reorganization for the Debtor designed to take large amounts of capital invested in the Debtor's property under the protection of the Fifth Amendment and to dedicate such property to the public use without just compensation or without any compensation.

X.

The District Court erred in approving a Plan of Reorganization for the Debtor which fails to meet the requirements of Subsections (b), (c) and (e), of Section 77 of the Bankruptcy Act and in refusing to disapprove such Plan of Reorganization and refer the proceeding back to the Inter-

state Commerce Commission in accordance with the provisions of said Subsection (e).

Railroad Company.

[Endorsed]: Filed Oct. 10, 1940. [1288]

[Title of District Court and Cause.]

STATEMENT OF POINTS UPON WHICH APPELLANT, IRVING TRUST COMPANY, AS SUBSTITUTED TRUSTEE UNDER THE GENERAL AND REFUNDING MORTGAGE OF WESTERN PACIFIC RAILROAD COMPANY, WILL RELY ON ITS APPEAL FROM THE ORDER OF THE DISTRICT COURT MADE AUGUST 15, 1940, APPROVING PLAN OF REORGANIZATION OF DEBTOR. [1289]

Irving Trust Company, as Substituted Trustee under the General and Refunding Mortgage of Western Pacific Railroad Company (hereinafter termed the "General and Refunding Mortgage" and dated as of January 1, 1932, and executed on February 29, 1932), which has heretofore appealed to the United States Circuit Court of Appeals for

the Ninth Circuit from the order of this Court made August 15, 1940, approving a plan of reorganization for the Debtor, hereby makes the following statement of points upon which it will rely upon the appeal.

1. The District Court has erred in approving a plan of reorganization which is unfair and inequitable to the holders of the General and Refunding Mortgage bonds and is contrary to the requirements of the law of the land regarding participation of said General and Refunding Mortgage bondholders and the provisions of Section 77 of the Bankruptcy Act.

2. The District Court has erred in approving a plan of reorganization which does not afford due recognition to the rights of the holders of bonds secured under the General and Refunding Mortgage bonds and discriminates unfairly in favor of the holders of bonds secured by the First Mortgage of the Western Pacific Railroad Company, dated June 26, 1916.

3. The District Court has erred in approving a plan of reorganization which fails to recognize that the Debtor's equity (amounting, as of the inception of the reorganization proceeding, to about $6,100,000) in rolling-stock subject to conditional sale or equipment trust agreements is free from the lien of the aforesaid First Mortgage and subject only to the lien of the General and Refunding Mortgage.

4. The District Court has erred in approving a plan of reorganization which fails to recognize that the [1290] aforesaid First Mortgage is a first lien upon the Northern California Extension only to the extent of the First Mortgage Bonds used in the acquisition thereof, and that otherwise the said Northern California Extension is subject to the pari passu lien of the General and Refunding Mortgage.

5. The District Court has erred in approving a plan of reorganization which fails to recognize that substantial items of non-carrier real estate, as well as cash, and receivables are free from the lien of either the First Mortgage or the General and Refunding Mortgage and that, therefore, the holders of General and Refunding Mortgage Bonds are entitled to share in the value thereof and to receive securities of the same type as issued to holders of First Mortgage Bonds on account of their share therein.

6. The District Court has erred in approving a plan of reorganization which fails to attribute adequate value to the cash deposited under the General and Refunding Mortgage and to the vote and stock of Tidewater Southern Railway Company pledged under said Mortgage.

7. The District Court has erred in approving a plan of reorganization which fails to recognize that the Central California Traction Company bonds and stock and the Alameda Belt Line Stock, all pledged under the General and Refunding Mortgage, are of material vaiue and such value

should be considered in determining the allocation of securities.

[Endorsed]: Filed Oct. 10, 1940. [1291]

Before the Interstate Commerce Commission

Finance Docket No. 10913

The Western Pacific Railroad Company Reorganization.

REPLY OF RECONSTRUCTION FINANCE CORPORATION TO EXCEPTION BRIEFS FILED BY OPPOSING PARTIES TO PROPOSED REPORT OF THE BUREAU OF FINANCE.

Three plans were filed with the Commission in this proceeding; and the Bureau has recommended

that the Commission adopt a plan which differs from any of the three filed. Each of the intervening parties has filed exceptions, with accompanying briefs, to the plan proposed by the Bureau.

At page 51 of the brief filed by the Bondholders' Committee the following suggestion is made:

> "The Bureau Plan seems lacking in specification on important substantive points. To obviate any justifiable basis for such a criticism of the ultimate Plan, the Bondholders' Committee urges that before the Commission publicly announces the Plan which it will approve, it give to all the interested parties an opportunity to confer with its representatives and work out the provisions of the ultimate Plan in sufficient detail to make to the security holders an adequate disclosure of what they are voting upon."

Reconstruction Finance Corporation (hereinafter called "Reconstruction") regards this as a constructive suggestion, inasmuch as such a conference should afford the Commission an opportunity of [1510] exploring the practical chances of a composition being worked out in this proceeding. The brief filed by the Debtor is frankly based upon the following assumption (page 30):

> "Section 77, like the Frazier-Lemke Act, the Home Owners' Loan Act, the various state enactments providing for the suspension of foreclosure remedies, and a great mass of legislation, Federal and state, which came in the wake of

the depression, was all for the protection and relief of the Debtor, and not for the aid of the creditors, and we submit with all deference, to the Bureau of Finance that the Commission should recognize this as the true spirit of Section 77."

The position of the Debtor is shown by the emphasis given to the above statement by placing it in the concluding paragraph of its brief (page 30).

The very nature of a composition is that a plan will be evolved which will receive the approval of the required percentage of *each class* of creditors and stockholders. This is admitted in the brief filed in behalf of the Debtor in the Chicago and Eastern Illinois Railway Company Reorganization Proceedings, Finance Docket No. 9952, from which we shall take the liberty of quoting (pp. 22-23):

"At the outset of our analysis of the statutory provisions we wish to direct attention to the fact that the principles of bankruptcy compositions go only to the point of binding dissenting minorities to compromises agreed to by a majority. If a majority will not agree the due-process clause of the Constitution prevents imposition of a composition upon them. See Louisville Bank v. Radford, 295, U. S. 555, particularly at pages 585-586; Ogilvie v. Dexter Horton Estate, 86 F. (2d) 282, at p. 283. [1511] It necessarily follows that statutory provisions prescribing for dissenting *classes* better treat-

ment than composition principles would produce in no way negative the conclusion that the statute adopts composition principles with respect to the treatment of dissenting *minorities* in classes which accept the plan. Similarly, statutory provisions and decisions determining how much must be given to a class in order to eliminate the necessity of its consent are not in point. Typical of such decisions are Tennessee Publishing Co. v. American National Bank, 81 F. (2d) 463; In re Murel Holding Corporation, 75 F. (2d) 941; Francisco Bldg. Corporation, Limited v. Batson, 83 F. (2d) 93. The holding in Louisville Bank v. Radford, 295 U. S. 555, was on such a point.

"We are here concerned only with the treatment which the statute prescribes for dissenting minorities in classes which accept the plan; not with the treatment which must be accorded non-assenting classes. *Composition principles cannot be applied to the latter situation.*" (Italics ours.)*

* To prevent misunderstanding, it must not be taken for granted that Reconstruction agrees with the viewpoint of the Debtor in the Chicago and Eastern Illinois proceeding, that, even in a case where it would seem likely that the requisite assents can be obtained from each class, the so-called doctrine of Northern Pacific Railway Co. v. Boyd, 228 U. S. 432, is not applicable. On that point, it is not necessary to take a position in this proceeding at the present time, since on the basis of the record herein, it remains to be shown that a composition can be proposed which will be acceptable to all the various classes. [1512]

If from such a conference it would appear to the Commission that there is no reasonable expectation of the Commission being able to approve a plan in the instant reorganization proceeding, which will command the assent of each class of creditors, then it is respectfully submitted that the Commission has no other alternative herein (if it is to approve any plan at all in this proceeding) than to approve a plan which recognizes the well-established decisions of the Supreme Court and the lower Federal courts with respect to railroad reorganizations, giving effect to the elementary principles so effectively stated by District Judge Hincks in the New York, New Haven and Hartford Railroad Company reorganization proceeding now pending in his court and before this Commission, viz:

"* * * since only an equitable plan may be approved, the plan must provide that every creditor in the order of his priority shall receive under the plan rights which in equity are the fair equivalent of such of his rights as have been subjected to equitable modification, at least in so far as the assets of the debtor's estate permit. *Any creditor found to be only partially secured is entitled to the equitable equivalent of such security as he has, with a right to share in equality with common creditors for the excess of his claim as allowed above the value of his security as ascertained by equitable considerations.* And the plan must recognize the prior right of common

creditors with respect to such assets as remain after equitable treatment has been accorded to secured creditors. Kansas City Ry. v. Central Union Trust Co., 271 U. S. 445. Such is the intent of the Act: * * *." (Italics ours.) In re New York, New Haven and Hartford Railroad Company; 16 F. Supp. 504, 509 (D. C., D. of Conn., Sept. 16, 1936).

The position taken by Reconstruction and the position taken by The Railroad Credit Corporation in their exceptions, are in accordance with the foregoing equitable principles. So, likewise, would seem to be the position taken by the Bondholders' Committee except that it is based on the assumption that the General and Refunding Mortgage is in all respects junior to the First Mortgage, a view which [1513] is clearly erroneous, as shown by exceptions, and accompanying brief, filed by the Irving Trust Company, trustee of the General and Refunding Mortgage. Likewise, the Bondholders' Committee neglects entirely that there is pledged both with Reconstruction and The Railroad Credit Corporation other collateral besides General and Refunding Bonds. As a matter of fact, both these parties, as appears from their respective exceptions, hold substantial additional collateral. (See exceptions of Reconstruction, pp. 5-8, and exceptions of The Railroad Credit Corporation, pp. 2, 8-9.) The Committee likewise does not mention the Bureau's discrimination against Reconstruction in failing to

recognize some $2,150,000 of accrued unpaid interest on the General and Refunding Mortgage Bonds pledged with Reconstruction, though recognizing the interest accrued and unpaid on the First Mortgage Bonds. Clearly, this interest is as much a part of the indebtedness represented by these Bonds, as is the principal thereof (see exceptions of Reconstruction, pp. 2-5).

The position of the A. C. James Co. requires special mention. It is not unlike the position taken by Reconstruction and The Railroad Credit Corporation, with one very important point of difference. The A. C. James Co. assumes that the claims of itself, Reconstruction, and The Railroad Credit Corporation are all fully secured and that there can be no deficiency on any of these claims. Without this assumption there can be no justification for the A. C. James Co. dismissing as [1514] inapplicable herein (page 19 of its brief) the rule in equity laid down in First National Bank of Ottawa v. Kay Bee Co., et al., 366 Ill. 202, 7 N.E.(2d) 860 (1937), with respect to deficiency claims.

Unless, and until the Commission determines the value of the collateral pledged as security for the respective claims of Reconstruction, The Railroad Credit Corporation and the A. C. James Co., it is respectfully submitted that the Commission should recommend to the court that all three creditors be permitted to reduce their collateral to possession, in order that the deficiencies on their claims, if any, may be established in court in accordance with customary practice in past reorganizations.

By this reply Reconstruction is not to be deemed to have modified or waived in any way its rights as contended for in its exceptions and in the several briefs which it has filed herein. Neither is the failure to discuss in this reply any of the proposals or principles, or statements or conclusions of fact, set forth in any of the opposing exceptions and briefs, which are in disagreement with the position taken by Reconstruction in its exceptions and briefs, to be taken as either an acceptance or an admission of the soundness or accuracy of any thereof.

In filing this answer, Reconstruction desires to assist the Commission in the development of a plan that will be able to withstand [1515] attack by dissentient classes, and will lead to a successful reorganization of the Debtor in the present proceeding.

Respectfully submitted,

C. M. CLAY,

Assistant General Counsel.

Of Counsel:

CLAUDE E. HAMILTON, JR.,

General Counsel.

[1518]

The main briefs heretofore filed herein demonstrate that the Debtor and all its creditors are in agreement not only that the Bureau Plan is invalid but also that it is impracticable and unavailable as a basis of discussion for bringing together the various interests concerned in this reorganization.

While, on superficial examination, the paths of reasoning by which the several interested parties have reached this common conclusion would appear to be divergent, careful analysis of the arguments contained in the various briefs (including those filed before the Bureau in January) will indicate that in respect of certain problems the various interests are thinking along somewhat similar lines. Such analysis will also furnish [1519] to the Commission the basis for recommending a plan which has (1) a reasonable chance of securing the assent of all classes of creditors or (2) in the alternative, a reasonable certainty of being carried through after a minimum of litigation and without being wrecked on constitutional grounds.

It will be the purpose of this Reply Brief to attempt such an analysis.

I

Total Capitalization

The Debtor and everyone of its creditors has opposed the drastically low capitalization imposed by the Bureau Plan, either directly or by urging a larger amount of securities for its own claim.

The Bureau Plan recommends a total capitalization of $91,406,510, all in securities of par value.

As against this:

The Debtor[1] now asks $88,318,269 with 300,000 no par value Common shares which, if valued at $100 per share, gives a total of $118,518,269 (brief, p. 29).

ACJ[1] now asks $111,474,730, all in securities of par value (brief, p. 44).

The Bondholders' Committee asks $69,553,056 plus 339,995 no par value Common shares which, if valued at $100 per share, gives a total of $103,552,556. The Bondholders' Plan contemplates the possibility (though not the probability) of a maximum of 150,000 additional shares of no par value Common Stock in connection with underwriting the raising of the new money.

While neither RFC nor RCC suggests a figure as to the total, both insist that the amount of securities allotted them in the Bureau Plan is inadequate, arguing not only for more securities for the principal of their collateral General and Refunding Bonds but also for more securities in recognition both of interest on these bonds and of other collateral (RFC brief, pp. 2-10; RCC brief, pp. 8-9). Accordingly, it is clear that the criticism of the Bureau Plan by RFC and RCC includes criti-

[1]References are to the Debtor's Plan and the James Plan as modified by suggestions contained in the present main briefs of the Debtor and ACJ respectively. [1520]

cism of the low capitalization permitted by the Bureau Plan.

As has already been indicated by the two briefs heretofore filed by the Bondholders' Committee and for additional reasons hereinafter pointed out, the Bondholders' Committee believes that the total capitalization suggested by the Bondholders' Plan (1) provides an adequate amount of securities to permit "due recognition" of the rights of all parties; (2) is conservative in the light of all the "relevant facts", and (3) furnishes a reasonable compromise between the views of the junior creditors, based on their private interests, and the apparent views of the Bureau based on its conception of the public interest.

II

Total Debt.

The Bureau Plan limits the total debt to $31,764,230.

As against this:

The Debtor now asks $71,825,997 of debt (brief, p. 29).

ACJ now asks $71,783,308 of debt (brief, p. 44).

The Bondholders' Plan contemplates $41,622,250 of debt.

Again neither RFC nor RCC suggests any specific figure with respect to total permissible debt, but RFC mentions, with apparent acceptance of the principle involved, [1522] its original conditional offer under the Debtor's original Plan to pur-

chase $10,000,000 of First Mortgage Bonds out of a total debt of $77,591,595, of which $25,675,000 were to be First Mortgage Bonds (RFC brief, p. 13).

The Debtor and ACJ request these large amounts of debt in order, as contemplated by their Plans, to permit all present debt to continue *as debt* (Debtor's brief, pp. 9-11, 27; ACJ brief, pp. 42-44).

Of course, the Bondholders' Committee would much prefer to have the bondholders interest in the property continue as debt, rather than be commuted into stock of any class, *if it believed the circumstances permitted.*

It was solely because the Bondholders' Committee endeavored fairly to appraise the public interest in a sound capital structure, as well as to recognize that the bondholders' own private interests would better be served by the attainment of a sound capital structure than by undue piling up of debt, that the Bondholders' Plan conceded the conversion into preferred stock of a part of the position of the present First Mortgage Bonds. As pointed out in its main brief, the Bondholders' Committee believes that its concession in this regard may have been greater than the circumstances really require, and may, as the Debtor's brief also suggests (p. 26), have resulted from the Committee's taking an unduly conservative view of the future prospects of the property.

If, however, while making this concession in "the public interest," the Bondholders' Plan nevertheless

less provides "due recognition" for the interests of the other creditors, does not the relative division of the capital structure into debt and stock proposed by the Bondholders' Plan furnish [1522] the most satisfactory and feasible basis for dealing with this particular problem?

III.

Total Fixed Charges.

While, on this point, the ACJ brief superficially indicates agreement with the Bureau Plan, and the RCC brief is silent, the arguments advanced in both those briefs with reference to the proposal of the Bureau Plan for raising the new money necessarily condemn the principle upon which the Bureau Plan based its limitation of obligations bearing a fixed charge (ACJ brief, p. 38; RCC brief, pp. 4-8).

Out of the permissible debt, the Bureau Plan and the James Plan permit only $10,000,000 to be represented by First Mortgage fixed charge obligations.

The Debtor's original Plan urged $25,675,900, and although its present brief accepts the bondholders' lower concession, the Debtor still declares its original suggestion of that amount to be sound (brief, pp. 8-9, 25-26).

The Bondholders' Plan proposes $19,858,020.

The RFC, through its reference to its conditional offer to purchase at par $10,000,000 of First Mortgage Bonds out of the total of $25,675,900 pro-

posed by the original Debtor's Plan, indicates its approval of that amount of First Mortgage Bonds (brief, p. 13).

All the briefs, in their indication that the $10,000,000 of First Mortgage 4% Bonds proposed by the Bureau Plan are worth a premium above par, with no bonus of Common Stock, indicate, as expressed by the RCC brief (p. 6) (and in substantially similar language by the RFC brief, p. 13), the belief of all parties that the Bureau Plan "tends [1523] not only to discredit the securities of the New Company but to discredit even the new First Mortgage Bonds themselves."

Here again the "ultra conservative" suggestion of the Bondholders' Committee, contrary to what might seem to be their own selfish interests, that the First Mortgage Bondholders receive only 20% of their principal in First Mortgage 4% Bonds, would seem to be both a generous recognition of the paramount public interest, and also a fair compromise in the light of the bondholders' further concession that 40% of their principal and all their interest may be converted into stock.

IV.

Future Financing

The RFC brief criticizes (p. 12) the provision of the Bureau Plan (equally pertinent to the Bondholders' Plan) permitting a total authorized issue of $50,000,000 principal amount of bonds under the First Mortgage, with provision for future is-

sues for 75% of capital expenditures. It urges that this will encourage the piling up of debt and that "the new Mortgage should provide restrictions * * * against the issuance of additional bonds when there is insufficient earnings coverage." With the principle behind this suggestion of the RFC the Bondholders' Committee is in entire accord. It believes that the First Mortgage restrictions upon the issue of further bonds should be such as not to encourage the use of First Mortgage Bonds for future financing.

However, the detail of the RFC suggestion, it is submitted, is erroneous in two respects.

In the first place: The important thing is not the total authorized amount of First Mortgage Bonds, but the [1524] circumstances under which bonds may from time to time be issued. Indeed, if the restrictions upon future issues are such as to encourage the maintenance of a sound capital structure, it may well be wise to omit any dollar amount as the authorized maximum, substituting a fixed maximum ratio to capital stock.

In the second place: It is in times when earnings coverage is reduced that a carrier will be forced to use its best bonds in order to keep down the cost of new money. It is in prosperous years, when earnings coverage on senior bonds is excessively high, but earnings coverage on junior bonds or equity securities is adequate to permit their sale on reasonable terms, that the use of First Mortgage Bonds should be denied and the use of junior securities compelled. It was for that rea-

son that the Bondholders' Committee in its main brief adopted the suggestion contained in the Bureau's Proposed Report (but not in the Bureau Plan) that the Income Mortgage should be opened to provide for the new financing.

If Income Mortgage Bonds are to be saleable at any reasonable price to provide future financing, their interest cannot be wholly non-cumulative, but must be made cumulative for some reasonably limited period, such as the three years suggested by the Bondholders' Plan. Therefore, adequate provision for the future, as well as due recognition of the bondholders' present rights in the Debtor's property, requires that this limited cumulative feature pertain to the Income Mortgage Bonds.

The Bondholders' Committee also believes that under the capital structure which it proposes not only the Income Bonds, but also the Participating Preferred Stock, might be made available for future financing. [1525]

The details of these suggestions are too complicated to be set forth in this brief, and it is submitted, should not be worked out by the Commission itself without the benefit of conferences among all the interested parties. Accordingly, this is one of the points in respect of which the Bondholders' Committee urges that the Commission, when it has settled general principles involved, should confer with all the parties in interest to work out the detailed provisions of the ultimate Plan.

V.

No Par Value Common Stock.

With the arguments advanced in the Debtor's brief (pp. 14-19) in support of its contention that the Common Stock of the reorganized Debtor should be without par value, the Bondholders' Committee is in entire accord.

With the arguments advanced in the briefs of RFC (pp. 15-17) and RCC (pp. 4-7) that the use of par value stock creates a risk upon its recipients as to its full paid character and that this risk is accentuated by the provisions of the Bureau Plan with respect to the provision of new money, the Bondholders' Committee is also in accord. These arguments furnish an additional persuasive reason why the Commission should permit the Common Stock of the reorganized Debtor to be without par value.

VI.

Provision for New Money

Every creditor, even including ACJ, the dominating interest in the Western Pacific Corporation, joins in the condemnation of the Bureau's proposal for raising new money. All agree that that proposal constitutes such an [1526] unnecessary discrimination in favor of Western Pacific Corporation as completely to invalidate the Bureau Plan (Bondholders' brief, pp. 24-27, 41-47; RFC brief, pp. 11-18; RCC brief, pp. 4-8; ACJ brief, p. 38; Refunding Mortgage Trustee's brief, pp. 19-21). Even the

Debtor, the wholly owned subsidiary of the Western Pacific Corporation, impliedly disapproves the proposal (Debtor's brief, pp. 6, 28-29).

RFC and RCC join the Bondholders' Committee in pointing out the "unrealistic", "futile" and "illusory" character of the proposal of the Bureau Plan for successive offering of the new money "package" to the junior creditors and then to the First Mortgage Bondholders upon exactly the same terms as the original offering to the Western Pacific Corporation (RFC brief, p. 18; RCC brief, p. 7; Bondholders' brief, pp. 44-45).

The Debtor, ACJ, and RFC indicate a belief, and RCC a hope, that $10,000,000 of First Mortgage 4% Bonds can be sold at par without a bonus of Common Stock.

The Debtor's original proposal (which as already pointed out the Debtor still defends, although accepting the bondholders' concession in asking but 20% instead of 30% in First Mortgage Bonds) and also the RFC brief (p. 13), indicate the belief that $10,000,000 First Mortgage 4% Bonds can be sold at par, without a stock bonus, even though the total issue of such bonds aggregates $25,675,900.[1]

It must, therefore, be clear that the reasonable probability is that a "package" composed of $10,-

[1]The ACJ brief on this point is somewhat ambiguous since it is discussing $10,000,000 of First Mortgage Bonds constituting the sole outstanding first lien, but on the other hand, part of a capital structure in which there is $61,783,308 of additional debt.

000,000 of [1527] First Mortgage Bonds out of a total issue of but $19,858,020, together with 30% of the Common Stock, subject to prior charges of only $3,542,443 (only $3,263,135 if the Preferred dividend is reduced to 5%) as proposed by the Bondholders' Plan, should be saleable at the par value of the bonds and provide the necessary new money.

The Bondholders' Plan also contains the provisions, suggested by the briefs of both RFC (p. 13) and RCC (p. 6), that if a 4% coupon will not bring substantially par for the bonds, the coupon rate may be adjusted upward.

The Bondholders' Plan also meets the criticism of RFC and RCC as to the illusory and futile character of the Bureau Plan's offerings of the new money "package", first to junior creditors, and then to the First Mortgage bondholders, after an offering on the same terms has been rejected by the Western Pacific Corporation. The Bondholders' Plan steps up, on the successive offerings, the amount of bonus stock to be contained in the "package" with the bonds. This tends to insure the raising of the new money even without raising the interest rate, should (as is not expected to be the case) the original offering to the Western Pacific Corporation not be availed of.

The Bondholders' Plan contains the further insurance feature of permitting underwriting. Although it is believed this will not be necessary, it would seem to be wise foresight to contemplate the possibility that it may be necessary by including in

the Plan such a permissive provision. The recent collapse of the securities market while several offerings to stockholders were outstanding, furnished striking examples of the value of underwriting.

The criticisms of RFC (p. 11) and RCC (p. 8) that the record shows no necessity for $10,000,000 of new money [1528] overlooks the facts that already $6,400,000 of Trustees' Certificates are outstanding which must be retired, and that an additional $3,300,000 is required to complete the rehabilitation program (Ex. 38). There can be no question as to the necessity for the $10,000,000 of new money.

The Bondholders' Committee therefore urges that the provisions of the Bondholders' Plan with respect to providing the new money should be approved by the Commission as written in the Bondholders' Plan and without the modification which the Bondholders' Committee indicated in its main brief it would be willing to accept (p. 58, modification 9).

VII.

Treatment of Present First Mortgage Bonds.

The Bondholders' Plan is predicated upon the fact that the First Mortgage is a lien prior to the General and Refunding Mortgage upon all assets of the Debtor of any substantial value.

That fact is recognized to the full in the Debtor's original Plan and the Debtor's new proposal (pp. 27-29) modifies it only to the extent of subordinating Preferred Stock allotted to present First

Mortgage Bond interests, in favor of notes allotted to RFC, RCC and ACJ.

Since the original James Plan denied participation to all claims for interest, it in principle recognized the full priority of the present First Mortgage Bonds, and its present modifications continue (pp. 42-44) to recognize that priority as to principal but, as in the case of the Debtor's modified Plan, subordinate Preferred Stock allotted to First Mortgage Bond interest to debentures proposed to be issued to junior creditors. [1529]

Upon the fact of the First Mortgage priority the Bondholders' Committee will stand. The contrary contention made in the brief of the Irving Trust Company, as Trustee under the General and Refunding Mortgage, is without sufficient merit to justify any concession by the bondholders by way of compromise with respect either to the principal of, or the interest upon, the present First Mortgage Bonds.

For the answer to this contrary contention the Bondholders' Committee refers both to its own[1] and the First Mortgage Trustees' January, 1937, briefs before the Bureau of Finance and to the present reply brief of the Trustees under the First Mortgage.

Concurring with the assertion of the Bondholders' Committee as to the priority of the First Mort-

---

[1] See pages 36-63. See particularly page 56 with reference to agreements made by RFC, RCC and ACJ with the bondholders upon their extension of the 1934 bond interest.

gage, the Bureau Plan nevertheless commuted the present First Mortgage Bonds into

Non-cumulative, 4% Income Mortgage Bonds for 40% of principal;

Non-cumulative, 5% Preferred Stock for 60% of principal;

Common Stock for accrued interest, but on a basis less favorable than that allotted junior creditors.

That there is no possible justification for such drastic treatment of the First Mortgage Bonds, nor any possible expectation that it would be accepted by the bondholders, [1530] seems clear even from the arguments advanced in the briefs of the Debtor and the other creditors.

The Debtor (pp. 25-29) now tenders the First Mortgage Bondholders

20% of principal in First Mortgage 4% Bonds.

80% of principal in non-cumulative, 4% Income Mortgage Bonds; and

Interest in Preferred Stock, but subordinate to the principal of notes issued to junior creditors.

The James Plan, as now modified (pp. 42-44), offers:

100% of principal in non-cumulative, 4% Income Mortgage Bonds; and

Interest in Preferred Stock, but subordinate to the principal of debentures issued to junior creditors.

The Bondholders' Committee, in an "ultra conservative" concession to the public interest in a sound capital structure, asks:

20% of principal in new First Mortgage 4% Bonds,

40% of principal in Income Mortgage 5% Bonds, cumulative against three years' income; and

40% of principal, and accrued interest, in 6% Preferred Stock non-cumulative to the extent that dividends for any year are not earned.

The arguments advanced in the briefs of the Debtor and all its securityholders establish that this allotment can be made within the limits of a sound, even conserva- [1531] tive, capital structure (Debtor's brief, pp. 5-9, 25-27; Bondholders' brief, pp. 8-35; ACJ brief, pp. 4-10, 42-44; RFC brief, pp. 11-18; RCC brief, pp. 4-8).

The principles enunciated even in the proposed Bureau Report sustain the bondholders' request.

The Commission should therefore approve it as made, including a maximum dividend rate of 6% on the Preferred Stock to compensate for the years in which the earnings will provide a dividend, if any, materially below the 5% return on the present First Mortgage Bonds. However, as stated in the main brief of the Bondholders' Committee (pp. 32-34), it is not believed that a reduction of the Preferred Stock dividend rate from 6% to 5% would defeat acceptance of the Plan by the bond-

holders in the interest of an expeditious reorganization if the Commission, sitting in a judicial capacity (as contrasted with "trading"), should determine that such a concession is required.

VIII.

Treatment of RFC, RCC and ACJ.

The briefs filed on behalf of these three creditors demonstrate not only the complicated character of their rights in the Debtor's property but also the hopeless conflict between them as to the proper method of appraising those rights in the reorganization.

The ACJ brief concedes (pp. 15-23) that the effect of the pledge of the General Mortgage Bonds to secure the RFC Note, RCC Note and ACJ Note, was not to create a new and additional *debt* (in the form of General and Refunding Bonds), but merely to give to the three Notes rights in the property proportionate to their collateral, [1532] and that upon the enforcement of their collateral they should share the proceeds in proportion to the principal amounts of their collateral, but up to the amount of the debts represented by the Notes, *if those proceeds so distributed leave a deficiency on any of the Notes*. But it asserts that they cannot properly be allotted new securities in proportion to the principal amount of their collateral, *because the Notes are all fully secured and there can be no deficiency on any of them*.

RFC (pp. 2-5) and RCC (p. 8), on the other hand, apparently assert that the Debtor's *debt* to

them is represented by the pledged General and Refunding Mortgage Bonds, and that they are entitled to interest on those bonds. This means that RFC contends that for a *loan* of $2,963,000 the Debtor incurred a *debt* of $10,750,000 which together with interest to January 1, 1938 amounts to $12,900,000 (see RFC brief, pp. 4-5). If this proposition needs any more answer than its mere statement, the answer is to be found in the very cases cited by ACJ (pp. 17-18), the fellow creditor of RFC and RCC, as well as the cases cited in the January, 1937, brief (p. 66) of the Bondholders' Committee.

RFC (pp. 8-10) and RCC (pp. 4-8), in further conflict with the contentions of ACJ, deny that they are fully secured, and assert that they are entitled in the reorganization, not merely to securities for their debt itself, plus apparently also for their collateral itself, but also to additional securities in recognition of their "deficiency". This contention produces the somewhat anomalous result that the less a secured creditor is secured (i.e. the greater his deficiency), the greater will be his participation in the reorganization of his debtor. [1533]

All three of these junior creditors (RFC brief, pp. 5-8; RCC brief, pp. 8-10; ACJ brief, p. 24) also make much of the point of their interlocking and cross liens (e.g., the second lien of RFC upon certain RCC collateral and conversely the second lien of RCC upon certain RFC collateral) and seem to make the argument that the fact that there are

two liens upon the same collateral requires a double allotment of securities in the reorganization. This complication is also adverted to in the Debtor's brief (pp. 19-21, 27).

RFC (pp. 5-8) and RCC (pp. 8-10) also stress their rights in collateral, not affecting the Debtor or its property (e.g., the D&RG stock), but pledged by third parties to secure the indebtedness of the Debtor. Their argument apparently is that because third parties have pledged independent property to secure the Debtor's obligations, the Commission and the Courts are without power under Section 77 to affect the Debtor's obligations in respect of which the third party pledge was made.

The Debtor joins the chorus of complications with the point that the Bureau Plan disregards its "equity of redemption" in the pledged General and Refunding Mortgage Bonds and asserts its right (p. 20) to

(a) a reasonable nisi period within which the Debtor may pay, and

(b) an opportunity to bid at a public sale, and

(c) a reasonable period thereafter within which to redeem.

With all this controversy between the junior creditors themselves, and between them and the Debtor, the Bond- [1534] holders' Committee has no concern except to see that the ultimate Plan shall so deal with these three creditors that none of them

has a reasonable chance of invalidating the Plan upon any of the points in controversy.

Both the Debtor's Plan, as now modified (pp. 27-29), and the James Plan, as now modified (pp. 42-44), attempt to solve this problem by allotting to the three junior creditors notes or debentures for the principal amount of their claims with accrued interest to the effective date of the Plan. These notes or debentures constitute fixed debt, maturing, in the case of the Debtor's Plan in 15 years, and in the case of the James Plan in 60 years, and in both cases ranking in priority to the Preferred Stock allotted to the accrued interest on the present First Mortgage Bonds. The Debtor proposes that these notes should be secured by new Preferred Stock in the same principal amount as the pledged General and Refunding Mortgage Bonds. ACJ would make the debentures convertible into $1,500 par value of Preferred Stock for each $1,000 Note, thus ultimately allotting to these junior creditors new securities ranking pari passu with those which ACJ allots to present First Mortgage Bondholders' interest, but with a premium of 50% in excess of the rate at which that stock is allotted to the First Mortgage Bonds.

Obviously these suggestions are wholly impracticable, as well as unduly discriminatory against the present First Mortgage Bonds.

If the present First Mortgage Bonds are to be commuted in part into stock, the junior debt cannot remain as debt, whatever the maturity of that debt may be.

Even if the present First Mortgage Bonds were to remain wholly (including accrued interest) as debt, it [1535] would not be proper to permit the debt issued for the junior RFC, RCC and ACJ claims to have a maturity earlier than that of the new obligations allotted to the First Mortgage Bonds and thus permit the payment of the junior creditors before payment of the senior bonds.

The situation does not permit the allocation to the RFC, RCC and ACJ General and Refunding Mortgage Bond collateral of anything higher than stock, and, the bondholders having made the concessions which the Bondholders' Plan tenders with respect to the bondholders' position, the Bondholders' Committee is in accord with the recommendation of the Bureau's proposed Report that the stock allotted in respect of the collateral General and Refunding Mortgage Bonds should be Common Stock.

But since the three creditors concerned cannot agree among themselves on a simple resolution of their complicated situation by the present distribution of that stock, the Commission must, if it is to have a Plan which will withstand attack, use a device which will recognize all the complicated legal rights which are properly asserted by these three claimants. That device is furnished in the Escrow Certificates provided by the Bondholders' Plan for these three claimants.

These Escrow Certificates constitute obligations of the reorganized Debtor to pay to the three several claimants the full amount of their respective

claims as of the effective date of the Plan, with interest at the rate of 4% per annum from that date to the maturity dates of the Certificates (RFC 5 years, RCC 6 years, and ACJ 7 years), or in the alternative, at the option of the reorganized Debtor, to deliver to the holders of the Escrow Certificates upon their maturity dates, the Common Stock issued in respect of the collateral General and Refunding Mortgage Bonds. [1536]

The successive rights of RCC in the RFC collateral, and of ACJ in the RFC and RCC collateral, are recognized by giving each successive claimant the right to redeem the collateral on which it has the subordinate lien by paying off the holder of the prior lien. Furthermore, this device recognizes the rights asserted by the Debtor as above quoted by giving to the Debtor a substantial "nisi period" within which to pay, and, in effect, a right of redemption.

The right of RFC, RCC and ACJ to interest on their claims to the effective date of the Plan is recognized by including in the principal amount of the Escrow Certificates the amount of that accrued interest. Their right to continuing interest on their claims thereafter is recognized by the provision that neither a junior creditor as to any of them, nor the Debtor itself, can redeem the Common Stock pledged under any Escrow Certificate, without paying interest upon the unpaid amount of the Escrow Certificate at the rate of 4% per annum from the effective date of the Plan.

The contention of RFC and RCC that they should have interest not only upon their primary debt but also upon their collateral bonds is, of course, wholly fallacious.

On the other hand, the contentions of RFC and RCC are sound that collateral pledged by third parties to secure their Notes, and not constituting a claim against the Debtor's property (e.g., the D&RG stock), should not be affected by the reorganization of the Debtor. Indeed, neither the Commission nor the Court can affect such outside collateral, for their jurisdiction, under Section 77, is limited to the *Debtor's property*. But on the other hand the fact of this independent collateral cannot add to the [1537] rights of RFC and RCC *in the Debtor's property* as against other creditors of the Debtor. Hence, the apparent arguments of RFC and RCC that (1) the existence of this outside third party collateral prevents the disturbance of their claims against the Debtor, or (2) that in the reorganization of the Debtor they must be allotted securities of the reorganized Debtor in recognition of this outside third party collateral are both entirely unsound.

The Bondholders' Committee did not intend, in the Bondholders' Plan, in any way to affect the outside third party collateral. To make the matter clear, and to protect RFC and RCC against any contrary claim by either AGJ or Western Pacific Corporation, the third party pledgors, an express declaration to the effect that the delivery of the

Escrow Certificates shall be without prejudice to any rights which RFC and RCC may have in outside third party collateral should be added to the Bondholders' Plan, and contained in the Escrow Certificates themselves.

RCC (p. 3) makes the further contention that it is entitled to preserve its rights under the Marshalling and Distributing Plan. The Bondholders' Plan expressly so provides with respect to the Escrow Certificate proposed to be delivered to RCC.

Accordingly, the Commission, to insure a Plan which cannot be upset by RFC, RCC or ACJ upon any argument founded upon the complications of their situation, should approve the adoption of the device of Escrow Certificates proposed by the Bondholders' Plan. Notwithstanding the willingness of the Bondholders' Committee, so far as the bondholders themselves are concerned, to eliminate those provisions, the Commission should not now eliminate them. [1538]

IX.

Protection of Dissenting Classes by Sale at Fair Up-Set Price.

The conflicting assertions of ACJ that the RFC, RCC and ACJ Notes are fully secured, and of RFC and RCC that they are entitled to recognition of a "deficiency," as well as the Debtor's own contention that its rights in the property represented by the General and Refunding Mortgage cannot be "expropriated" without "an opportunity to bid at

a public sale" confirm the wisdom, if indeed not the necessity, of including in the Plan the provision expressly permitted by sub-section (b)(5) of Section 77 for "the sale of all * * * the property of the Debtor * * * at not less than a fair up-set price" for the protection of any class which may dissent from the ultimate Plan.

The insertion of such a provision would also seem to be a wise precaution against an attack by the Debtor, or by the Western Pacific Corporation, upon the propriety of the finding, recommended by the Bureau, that the equity of the Preferred and Common stockholders of the Debtor has no value. While the Bondholders' Committee is not inclined to dispute the correctness of the Bureau's finding, it recognizes that the basing of the reorganization upon that finding (certainly on the present sketchy record) will subject the reorganization to the risk of long and complicated litigation which, to say the least, will not be frivolous. It is submitted that the public interest, as well as the private interest of the parties, that this particular reorganization shall be expedited, and the public interest that Section 77 shall be made workable, all require the elimination of this risk by the inclusion of the provision for a sale at a fair up-set price. The stockholders [1539] of the Debtor could then have no cause for complaint, even if the proposed Report were erroneous in its finding that their equity has no value.

Assuming the inclusion of such a provision, then if the Plan be confirmed but the First Mortgage

Bondholders dissent as a class, ACJ, believing the General and Refunding Bonds to be fully secured, can pay off the dissenting First Mortgage Bonds, or more probably, can bid in the property at that price, lower than the principal amount of those Bonds, at which the bondholders would be willing to give up their interest in the property.

Similarly, if either RFC, RCC or ACJ shall be a member of a dissenting class, they or any of them can bid in the property if they think it worth more than the bondholders are willing to pay to keep it for reorganization.

This expressly recognized "means for execution of the plan" would also serve to test out the rival claims of the First Mortgage Bondholders and the junior creditors as to the priority of the First Mortgage. The properties could be sold in parcels at a judicial sale and reorganized under the plan without waiting the delays which the ingenuity of counsel for the junior creditors can undoubtedly conceive in the litigation which will ultimately establish the priority of the First Mortgage. The proceeds of sale can be distributed later when the rights of the dissenting classes have been established. The judicial sale of properties similarly complicated by conflicting claims, and their reorganization, frequently occurred under the old equity procedure, the distribution of the proceeds of sale awaiting the determination of the litigation. [1540]

X.

Effective Date of the Plan.

RCC objects (p. 11) to January 1, 1937, as the effective date of the Plan on the ground that it is a date already passed. This objection seems to the Bondholders' Committee not to be without merit. The Commission should bear in mind that unless it promptly approves a Plan which has substantial hope of acceptance by enough securityholders to permit its consummation, even in the face of litigation, interest both upon the First Mortgage Bonds and upon the junior RFC, RCC and ACJ Notes will accrue in such an aggregate amount as to disturb the relationships between the parties and make January 1, 1937, so unreasonable an effective date as itself to constitute a valid objection to the Plan.

XI.

Conclusion.

The Bondholders' Committee urges the Commission, upon its consideration of all the arguments which have been made during the long delay of these proceedings, first in the January briefs of the several parties, then in the main briefs filed upon submission of the Bureau's proposed Report and the Bureau Plan, and now in the reply briefs, to approve the Bondholders' Plan with *only* the following modifications:

1. Modify the provisions of the new First Mortgage with respect to the issue of future First Mortgage Bonds, and open the Income

Mortgage to provide for future financing through Income Bonds, all under provisions to be worked [1541] out in conference with the parties and designed to induce future financing through junior securities, whenever such financing is feasible upon reasonable terms.

2. Eliminate the Contingency Reserve Fund.

3. Make the Sinking Fund payable out of available net income before Preferred dividends, but, as provided in the Bureau Plan, reduce it to an annual ½ of 1% Fund instead of a 1% Fund.

4. Clarify the provision respecting the offering of new securities to provide new money, by providing that it shall be made to the unsecured creditors, or their assignees (i.e.: the Western Pacific Corporation or RCC as its assignee, and Western Realty Company or Curtiss Southwestern Company as pledgee of its stock) proportionately to the amounts of their respective claims.

5. Include in the Escrow Certificates to be delivered to RFC and RCC for their Notes express provisions that they are delivered only in extinguishment, under Section 77, of the claims of RFC and RCC against the Debtor or its property; and that neither the delivery of said Escrow Certificates, nor their acceptance by RFC or RCC, shall prejudice the rights of RFC or RCC against collateral which has been

delivered by third persons to secure the obligations of the Debtor and which does not itself constitute a claim against the Debtor or the Debtor's property. [1542]

6. Provide that the Reorganization Committee shall be constituted of such number of members, not more than five, as the Commission may determine, but a majority of whom shall be elected by the bondholders in any manner which the Commission may prescribe.

7. Eliminate the provision requiring the consent of two-thirds of the bondholders to the confirmation of the Plan, but extend the provision for protecting a dissenting class through a judicial sale at a fair up-set price to include the bondholders as a class.

The Bondholders' Committee repeats its willingness to recommend acceptance by the bondholders of the further modifications mentioned on pages 58 and 59 of its main brief (including the reduction of the dividend rate on the Preferred Stock from 6% to 5%), if the Commission shall determine that any of those modifications should fairly be required. The Bondholders' Committee, however, now urges, in the light of the arguments revealed in the main briefs of several of the parties, that the modification of the Preferred Stock dividend rate is neither required nor fair, and that the suggested modifications of the procedure for raising the new money and for dealing with the claims of RFC, RCC and ACJ would be most unwise.

The Bondholders' Committee hopes that the Commission will recognize (what the Bureau seems to have failed to recognize) that the Bondholders' Committee has approached the problem of the Western Pacific Reorganiza- [1543] tion with a desire to give full recognition to the public interest, wherever it may conflict with the private rights of the bondholders, and also with the desire, as between their own private rights and those of other creditors, not to be unyielding or grasping of their "pound of flesh", but to make extreme concessions to junior interests in the hope of avoiding a forfeiture of those junior interests and of permitting them ultimately to recoup their present investments through the future growth and prosperity of the reorganized property.

Respectfully submitted,

Introductory Statement.

The Refunding Mortgage Trustee has filed exceptions to the conclusions in the Report with respect to the extent and priority of the lien of the First Mortgage. The First Mortgage Trustees believe that the conclusions in the Report in this respect are correct and should be approved by the Commission.

This Reply Brief will be confined to a discussion of certain points raised in these exceptions of the Refunding Mortgage Trustee. For a more comprehensive analysis of the questions involved, the First Mortgage Trustees beg leave to refer to their brief dated January 9, 1937, heretofore filed in this proceeding. [1548]

I.

The Conclusions in the Report are Correct as Regards the Extent and Priority of the Lien of the First Mortgage with Respect to the Equity in Equipment Subject to Leases, Conditional Sale Agreements or Equipment Trust Agreements.

The exceptions of the Refunding Mortgage Trustee to the conclusions in the Report with respect to the priority of the First Mortgage over the Refunding Mortgage as a lien on the Debtor's equity in equipment covered by leases, conditional sale agreements or equipment trust agreements are based upon the following grounds specified at pages 3-4 of the brief of the Refunding Mortgage Trustee dated September 24, 1937:

1. That the First Mortgage expressly excepts such equipment unless acquired by the use of First Mortgage Bonds or cash; and that the record shows that no First Mortgage Bonds or cash were used in the acquisition of such equipment.

2. That the First Mortgage omits the provision contained in the Refunding Mortgage* to the effect that when and as the Debtor acquires an equity in such equipment the equity becomes subject to the Refunding Mortgage.

3. That the Listing Application of December 21, 1931 (Exhibit 112), specifically states that such equipment is not subject to the lien of the First Mortgage. [1549]

4. That the Report is directly contrary to the conclusions reached in the memorandum opinion of Circuit Judge Sanborn in The Equitable Trust Company of New York, Trustee, vs. The Wabash Railroad Company, et al., which is discussed at pages 52-54 of the brief of the Refunding Mortgage Trustee dated January 11, 1937.

These points will be discussed in order.

(a) The So-called "Exception Clause" in the First Mortgage.

---

*In the briefs of the Refunding Mortgage Trustee dated, respectively, January 11 and September 24, 1937, the Refunding Mortgage is referred to as the "General Mortgage".

The Refunding Mortgage Trustee contends that the equity in the equipment covered by the three equipment trusts and the Baldwin Lease is entirely free of the lien of the First Mortgage, by reason of the following language (the so-called "exception clause") appearing on page 22:

> "and the Company may, unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same, purchase and acquire equipment, free from the lien hereof, by lease, conditional sale agreement or under any form of equipment trust; or purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment superior to the lien of this indenture."

The brief of the First Mortgage Trustees dated January 9, 1937, sets forth the reasons why this contention is deemed unsound and states what the First Mortgage Trustees believe to be the correct interpretation (see pages 66-68). That brief points out that the "exception clause" should be construed both in the light [1550] of the language which precedes it in the same paragraph* and in the light of

*The language referred to is the language on page 21 of the First Mortgage which states in effect that the right of the Debtor to acquire property free from the lien of the First Mortgage shall not apply to "equipment * * * consisting of * * * property * * * used or acquired for use in or for the * * * operation of * * * any of the lines of railroad * * *

the paragraph which follows the habendum clause on page 22.** It further points on that the "equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby", mentioned in the paragraph following the habendum clause, are those referred to in the "exception clause" and that therefore the "exception clause" cannot have the effect of making all equipment acquired under equipment trusts entirely free of the lien of the First Mortgage.

The First Mortgage Trustees believe that the correct interpretation of the provisions in question is as follows: the Debtor may acquire equipment and create equipment trust liens which are superior to the lien of the First Mortgage; if the equipment

---

subject * * * to the lien of this indenture." The record shows that the equipment covered by the three equipment trusts and the Baldwin Lease was acquired for use, and was actually used, on the mortgaged lines.

**The full text of the paragraph following the habendum clause is as follows:

> "Subject, however, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon, and as to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby, and as to any property hereafter acquired by the Company or by any successor or purchasing corporation and becoming subject to the lien of this indenture, to any liens thereon existing at the time of such acquisition and not expressly prohibited by the terms of this indenture."

is of such character that it would, under the after-acquired property clauses, be free of the lien of the First Mortgage if otherwise acquired, it will be free of the lien when acquired under an equipment trust; but, if the equipment is of such character that it would, if otherwise acquired, be subject to the lien of the First Mortgage, that lien will attach, [1551] subject to the lien of the equipment trust, and will spread to the Debtor's equity in the equipment as payments are made on the equipment trust obligations.

The Refunding Mortgage Trustee, in its brief dated September 24, 1937 (see pages 4-8), attempts to meet that argument by suggesting that the phrase "equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby" refers only to the possibility that the equity in equipment, subject to equipment trust or conditional sale agreements, might be acquired by the use of First Mortgage Bonds or deposited cash, in which case such equity might come under the First Mortgage by virtue of the provisions relating to the use of First Mortgage Bonds or deposited cash.

Not only is there nothing in the language of the First Mortgage to indicate that the phrase quoted has so restricted a meaning; the suggested interpretation ignores the practical realities of equipment trust financing. For a railroad to purchase equipment under an equipment trust and to finance the acquisition of the equity with first mortgage bonds authenticated and delivered against the ac-

quisition of such equity would be so unusual as to be a practically unheard of situation. It is difficult to believe that the draftsman of the First Mortgage inserted the phrase above quoted merely to provide for such a situation. It is logical to suppose that he had in mind situations involving the ordinary methods of equipment trust financing.

The phrase "as to equipment hereafter acquired", to which the phrase above quoted refers, is general; if the draftsman had intended to limit the applicability of the provision to the particular situation suggested by the Refunding Mortgage Trustee, it would have been natural to use specific language of limitation, such as "as to equipment hereafter acquired against which First Mortgage [1552] Bonds shall have been authenticated and delivered or their proceeds or cash deposited hereunder paid out".

Nor does adopting the interpretation set forth in the brief of the First Mortgage Trustees dated January 9, 1937, result, as suggested in the brief of the Refunding Mortgage Trustee dated September 24, 1937, in permitting the language of the paragraph following the habendum clause "to override the clear and controlling language of the granting clauses" (see page 6). The language of the paragraph following the habendum clause merely affords additional evidence of the intent disclosed by the preceding provisions of the granting clauses. The "exception clause" cannot be construed apart from its context, and the paragraph following the

habendum clause forms a part of that context.

No rule of construction is more fundamental than that the "writing will be read as a whole, and every part will be interpreted with reference to the whole; and if possible it will be so interpreted as to give effect to its general purpose."* [1553]

---

*3 Williston on Contracts (Williston and Thompson Revised Edition), page 1779.

"The purpose of every written contract or conveyance is to express the intention of the parties thereto. The object of all construction of the terms of a mortgage or agreement is to ascertain that intention. That intention must be deduced from the entire mortgage or contract and the situation and circumstances of the parties when they made it. That intention when ascertained must prevail over the dry words of the instrument, inapt expressions, and careless recitals in the mortgage or agreement unless it is directly contrary to the plain meaning of the binding words of the instrument." United States Fidelity & G. Co. vs. Board of Commissioners of Woodson County, Kans. 145 Fed. (CCA) 144, 145. The natural, reasonable, more obvious meaning of a mortgage or contract should be preferred to a curious recondite signification discovered by ingenuity and study." The Equitable Trust Company of New York, Trustee, vs. The Wabash Railroad Company, et al., (Appendix, infra, pages 23-24).

"Of course, the sinking fund provision should be construed not by its terms alone, but with reference to all other provisions of the mortgage. And, similarly, the mortgage should be construed not arbitrarily by its terms, but with reference to the purposes for which it was made and the objects intended and achieved in its operation." Brown vs. Pennsylvania R. Co., 250 Fed. 513, 518 (C. C. A., 3rd. Circ., 1918), cert. denied, 248 U. S. 558 (1918).

An examination of the after-acquired property clauses and of the "free funds" provision of the First Mortgage discloses a clearly defined general purpose, namely, (1) to subject to the lien all after-acquired property of the character described, provided that such property falls within any one of four specifically enumerated categories,* and (2) to permit the Debtor, through the use of its credit, or free funds, to acquire free of the lien any such property which does not fall within one of the four specifically enumerated categories.

The language used on pages 17-18 of the First Mortgage to define the extent of the after-acquired property clauses is substantially identical with the language used on pages 21-22 (preceding the "exception clause") to define the limitations upon the Debtor's right to acquire property free of the lien. The language used is not contradictory; it is complementary. The after-acquired property clauses and the "free funds" provision, when placed side by side, fit together like the two parts of an ancient

*The categories enumerated are as follows:

(1) Property on account of which First Mortgage Bonds or deposited cash shall have been taken down;

(2) Property constituting an integral part of the mortgaged property;

(3) Property used or acquired for use in or for the maintenance or operation of or appertaining to any of the mortgaged property; and

(4) Securities of certain corporations.

parchment indenture and indicate clearly the general purpose above stated.

The "exception clause" appears at the end of the paragraph containing the "free funds" provision. It is a part of the sentence which sets forth the limitations upon the Debtor's right to acquire property free of the lien, and it is connected with the preceding part of the sentence by the conjunction "and". There is therefore a strong presumption that the "exception clause" [1554] was not intended to be inconsistent with the general purpose evidenced in the preceding part of the sentence.

The "exception clause" was obviously inserted to meet the requirements of a particular situation of great practical importance—the necessity of permitting the Debtor to finance purchases of equipment through loans secured by liens upon the equipment purchased. To that end it was essential to empower the Debtor to make effective pledges of the equipment—whether under the ordinary form of equipment trust or conditional sale agreement or under some form of chattel mortgage—as security for the advances obtained. There is no reason to believe that the draftsman of the First Mortgage sought to accomplish anything more. To accomplish that result, consistently with the general purpose above stated, it was only necessary to suspend the operation of the after-acquired property clauses to the extent required to vest an unencumbered security title in the equipment lienor; it was not neces-

sary also to prevent the lien of the First Mortgage from attaching to the Debtor's equity in such equipment, and such a result would be inconsistent with the general purpose above stated.

The First Mortgage Trustees believe that the "exception clause" should be given a meaning consistent with the general purpose above stated, and they believe that the granting clauses and the paragraph containing the "free funds" provision, on pages 21-22 of the First Mortgage, when read as a whole, have the effect of subjecting to the lien of the First Mortgage the Debtor's equity in the equipment covered by the three equipment trusts and the Baldwin Lease. [1555]

(b) The Absence from the First Mortgage of the Proviso Appearing in the Refunding Mortgage.

The Refunding Mortgage Trustee further contends that the absence from the First Mortgage of language such as appears in the proviso on pages 22-23 of the Refunding Mortgage is of "controlling significance" (see brief of the Refunding Mortgage Trustee dated January 11, 1937, page 51).

The First Mortgage Trustees believe that the construction of the provisions of the First Mortgage must be governed exclusively by the terms of that instrument, without reference to the terms of the Refunding Mortgage. As pointed out above (pages 3-8), the First Mortgage Trustees believe that, under the proper construction of the granting clauses of the First Mortgage, the Debtor's equity in the equipment in question is subject to the lien of the

First Mortgage. It is not perceived how this result can be deemed to be affected by the chance circumstance that the draftsman of a mortgage executed nearly sixteen years later considered it appropriate to insert in that instrument additional language not appearing in the First Mortgage.

(c) The Listing Application of December 21, 1931.

The Refunding Mortgage Trustee further contends that certain language appearing in the Listing Application of December 21, 1931 (Exhibit 112), indicates a practical construction of the First Mortgage as not covering the Debtor's equity in the equipment under discussion (see brief of Refunding Mortgage Trustee dated January 11, 1937, pages 48-49).

The Listing Application, however, at most indicates the construction placed upon the First Mortgage by the [1556] Debtor, which is the party beneficially affected by such construction. There is nothing in the record to indicate that either the First Mortgage Trustees or the First Mortgage Bondholders—the parties adversely affected—acquiesced in such construction. It is difficult to understand how the meaning of a contract can be deemed to be governed by a purely unilateral construction placed upon it by the party beneficially affected, without such construction being acquiesced in by the parties adversely affected.

> "Contemporary construction of a contract by acts of the parties is entitled to very great weight, but it ought to appear with reasonable

certainty that they were acts of both parties, done with knowledge, and in view of a purpose at least consistent with that to which they are now sought to be applied. In the present case there was no ratification shown, or even knowledge, of the entries as to taxes, which was sufficient to establish a construction by the parties." Kane v. Schuylkill Fire Ins. Co., 48 Atl. 989 (Pa., 1901); cited with approval in Sternbergh v. Brock, 74 Atl. 166 (Pa., 1909) at page 169.

See also:

N. F. I. Bridge Co. v. Grand Trunk Ry. Co., 241 N. Y. 85 (1925).

Kinney v. McBride & Co., 88 App. Div. 92 (N. Y., 1903).

On page 53 of the brief of the Refunding Mortgage Trustee dated January 11, 1937, appears a quotation from the opinion of Judge Sanborn in The Equitable Trust Company of New York, Trustee, v. The Wabash Railroad Company, et al. (see Appendix, infra, page 28) containing a statement of the doctrine of practical construction. [1557] It should be noted, however, that the facts relied upon by Judge Sanborn in that case as indicating a practical construction of the mortgage there under consideration showed that the construction adopted had been acquiesced in by the parties adversely affected (see Appendix, infra, pages 28-29).

To give to the Listing Application the effect claimed by the Refunding Mortgage Trustee would amount to adopting the fantastic proposition that

the lien of the holders of outstanding bonds can be changed or made to vanish by the mortgagor company inserting a statement in a listing application which the bondholders may never have seen or heard of.

(d) Judge Sanborn's Opinion in The Equitable Trust Company of New York, Trustee, v. The Wabash Railroad Company, et al.

The brief of the Refunding Mortgage Trustee dated January 11, 1937, quotes (at pages 53-54) excerpts from the above mentioned opinion (which is apparently unreported) but does not set forth the full text of the opinion. For the convenience of the Commission, the text of that portion of the opinion which deals with the question of after-acquired equipment is set forth in the Appendix to this brief.

The Refunding Mortgage Trustee, in its brief above mentioned, recognizes that the "general language in the Wabash mortgage is not sufficiently close to the language in the present First Mortgage to justify an extended discussion thereof" (page 52), and apparently cites the case only in support of two propositions: (1) the doctrine of practical construction, and (2) a rule of construction based upon the position of what Judge Sanborn calls the "reservation paragraph" (in terms reserving to the [1558] mortgagor company the right to acquire certain kinds of property free of the lien*) in the

*The "reservation paragraph" in the Wabash mortgage may be said to correspond roughly with the "free funds" provision in the First Mortgage, but the language of the two provisions differs so radically as to make a comparison unprofitable.

Wabash mortgage at the end of the property descriptions and just before the habendum paragraph.

The effect of the doctrine of practical construction has already been discussed (supra, pages 9-11). As regards the rule of construction based upon the position of the "reservation paragraph", it should be pointed out that we are not here dealing with a situation in which specific contradictory language in a "reservation paragraph" is relied upon to cut down the effect of broad general language in the preceding provisions of the granting clauses. As stated above (supra, pages 6-7), the language of the granting clauses of the First Mortgage and the language of the paragraph defining the right of the Debtor to acquire property free of the lien are not contradictory but complementary and, when read together, clearly indicate the intent of the parties. In view of this fact, the rule of construction mentioned in Judge Sanborn's opinion is of little help in ascertaining that intent.

II.

The Conclusions in the Report Are Correct as Regards the Extent and Priority of the Lien of the First Mortgage with Respect to the Northern California Extension and with Respect to the Various Branches and Spurs.

The First Mortgage Trustees believe that the Report is correct in concluding that the First Mortgage is a first [1559] lien upon the entire Northern

California Extension and upon the various branch lines, spurs and industrial tracks. The questions involved are fully discussed in the brief of the First Mortgage Trustees dated January 9, 1937, at pages 4-48 (as to the Northern California Extension), at pages 48-54 (as to the branch lines), and at pages 54-57 (as to the spurs and industrial tracks). They are also discussed in the brief of the Institutional Committee dated January 9, 1937, at pages 44-52.

The Refunding Mortgage Trustee contends, in its brief dated September 24, 1937 (pages 9-12), that the lien of the Refunding Mortgage ranks equally with the lien of the First Mortgage upon the Northern California Extension and upon all branches, spurs and industrial tracks and the construction or acquisition of which was financed only in part with First Mortgage Bonds or deposited cash.

The argument advanced in support of this contention overlooks the fact that the bond take-down provisions of the First Mortgage do not permit the bonding of property unless the property bonded becomes subject in its entirety to the lien of the First Mortgage (see brief of the First Mortgage Trustees dated January 9, 1937, pages 26-27). In view of this requirement, there can be no merit in the argument that the provision on page 17 of the First Mortgage has the effect of making the First Mortgage a lien on property bonded only to the extent of the First Mortgage Bonds or deposited cash taken down.

The argument advanced by the Refunding Mortgage Trustee also overlooks the covenant contained

in Section 13 of Article Fourth of the First Mortgage (page 79), which reads as follows: [1560]

> "In case the Company shall hereafter mortgage any of the property which is, or by the terms hereof purports to be or which is intended to become, subject hereto, such mortgage shall be, and shall be expressed to be, subject to the prior lien of this indenture for the security of all First Mortgage Bonds then or thereafter to be outstanding hereunder."

In the face of this covenant, it is impossible to construe the after-acquired property clauses of the First Mortgage as creating a lien ranking merely pari passu with the lien of a subsequently executed mortgage on property financed only in part with First Mortgage Bonds or deposited cash. If the lien of the First Mortgage attaches at all to the property, it clearly attaches as a first lien upon the property in its entirety and is prior in every respect to the lien of the subsequently executed mortgage.

Inasmuch as the Refunding Mortgage by its terms (page 23) is made expressly subordinate to the lien of the First Mortgage, there can be no basis for any claim that the lien of the Refunding Mortgage ranks equally with the lien of the First Mortgage upon any property which is subject to the lien of the First Mortgage.

The Refunding Mortgage Trustee also contends, in its brief dated September 24, 1937 (page 9), and in its brief dated January 11, 1937 (pages 56-57 and

59-61), that certain branch lines, aggregating in length some twenty-three miles, and certain spurs and industrial tracks are free of the lien of the First Mortgage, because (it is asserted) their purchase, acquisition or construction was not financed by the use of First Mortgage Bonds or deposited cash.

With respect to these branch lines, the record shows that deposited cash was withdrawn to finance expendi- [1561] tures upon all of them, with the exception of only two, namely, the Glannvale-Bradford Winery Branch, which is about 1.6 miles long, and the Spanish Creek Spur, which is about 0.6 miles long.

The Refunding Mortgage Trustee contends that the use of First Mortgage Bonds or deposited cash to finance the making of additions and betterments to branch lines (as distinguished from the purchase, acquisition or construction thereof) is insufficient to subject such branch lines to the lien of the First Mortgage. This contention ignores the express language of Clause Third of the granting clauses of the First Mortgage (page 17), which provides in effect that after-acquired branches shall become subject to the lien of the First Mortgage if First Mortgage Bonds or deposited cash shall be taken down "on account of the purchase, acquisition or construction thereof *or work thereon*" (Italics ours). This contention also ignores the fact that, as stated above (page 13), the bond take-down provisions of the First Mortgage do not permit the bonding of

property unless the property bonded becomes subject in its entirety to the lien of the First Mortgage.

Moreover, it is clear that all of these branch lines constitute integral parts of the main line or are used in the maintenance or operation of the main line and are therefore subject to the lien of the First Mortgage (see page 17 of the First Mortgage), irrespective of whether or not their purchase, construction or acquisition was financed by the use of First Mortgage Bonds or deposited cash.

As regards the spurs and industrial tracks, the record shows that very substantial amounts of deposited cash were withdrawn under the First Mortgage to reimburse expenditures for the construction of numerous spurs, industrial tracks, and similar tracks located on [1562] various parts of the mortgaged lines. Furthermore, spurs, industrial tracks, and other similar tracks are, by their very nature, so inseparably connected with the mortgaged lines, and with their use and operation, that they clearly constitute an integral part of them. It therefore seems clear that all of the spurs, industrial tracks, and other similar tracks owned by the Debtor are subject to the lien of the First Mortgage, (1) because they are integral parts of the mortgaged lines, used in their maintenance and operation and appurtenant to them, and also, at least as to the substantial part of them, (2) because they were financed in whole or in part by the use of deposited cash under the First Mortgage.

III.

The Conclusions in the Report Are Correct as Regards the Extent and Priority of the Lien of the First Mortgage with Respect to Non-Carrier Real Estate.

(a) With Respect to Non-Carrier Real Estate Acquired Prior to the Execution and Delivery of the First Mortgage.

The Refunding Mortgage Trustee contends, both in its brief dated September 24, 1937 (pages 13-14), and in its brief dated January 11, 1937 (pages 65-69), that non-carrier real estate acquired prior to the execution and delivery of the First Mortgage is not subject to the lien thereof, because the plan of reorganization of the old Western Pacific Railway Company, dated December 15, 1915, provided that the First Mortgage Bonds were to be secured, inter alia, by a first mortgage upon all of [1563] the "existing railway properties" of the Debtor's predecessor.*

---

*Article XIX of the Plan of Reorganization above referred to reads as follows:

"Statements Contained in Plan.

"This Plan has been adopted by the Protective Committee, acting under the Protective Agreement. The statements contained in the Plan have been compiled from sources believed to be reliable and accurate, but certain of them are necessarily approximate *and none is to be construed as a repre-*

Subdivision VII of the granting clauses of the First Mortgage (pages 15-16) covers the following property:

"All and singular the property, interests and rights, (except cash, accounts and bills receivable, traffic and other operating balances and other cash items) not comprised in the descriptions contained in the foregoing subdivisions of this clause First of these granting clauses, which belong to the Company or to which it may be entitled in any manner and which heretofore were owned by Western Pacific Railway Company or to which said company was or its receivers were entitled."

The language used is clear and free from ambiguity. It plainly includes all non-carrier real estate acquired by the Debtor from its predecessor, the Western Pacific Railway Company. The provisions of the plan of reorganization are inadmissible to contradict the clear and unambiguous provisions of the First Mortgage.

(b) With Respect to After-Acquired Non-Carrier Real Estate.

The arguments advanced by the Refunding Mort-

---

sentation or as an inducement to any action or to any omission to act upon the part of anyone. No error or misstatement of any description in the Plan shall constitute ground for the withdrawal of any Depositor from the Plan and Agreement nor for any complaint with respect to the same or with respect to any consequences arising from having become a party thereto." (Italics ours.) [1564]

gage Trustee in support of its contention that after-acquired non-carrier real estate is not subje t to the lien of the First Mortgage are set forth at pages 14-15 of its brief dated September 24, 1937, and at pages 63-65 of its brief dated January 11, 1937. The questions involved are fully discussed at pages 57-62 of the brief of the First Mortgage Trustees dated January 9, 1937. They are also discussed in the brief of the Institutional Committee dated January 9, 1937, at pages 53-55.

The after-acquired property clauses of the First Mortgage are not limited to property actually used for transportation purposes, and the fact that the Debtor, in its reports to the Commission, characterized certain property as being for "non-carrier purposes" does not affect the question of the scope of the after-acquired property clauses of the First Mortgage. Moreover, the record shows* that most, if not all, of the major items which the Debtor reported to the Commission as "non-carrier" property were originally carried on the books of the Debtor as "carrier" property and were subsequently transferred from Account 701, which is the account entitled "Investment in Road and Equipment." The items so transferred include both property acquired prior to the date of the execution and delivery of the First Mortgage and property acquired subsequent to that date.

---

*See Exhibit 12, Exhibit 31 (sheets 208, 233, 252, 273, 277, 278, 280, 281, and 284) and Exhibit 113 (footnote, page 4). [1565]

The after-acquired property clauses of the First Mortgage (page 21) cover property "acquired for use in or for the maintenance or operation of or appertaining to any of the lines of railroad, extensions, branches or other property subject * * * to the lien of this indenture." It is difficult to understand how the lien of the First Mortgage upon property which had become subject thereto could be destroyed by a subsequent change in the accounting classification under which the property was carried upon the books of the Debtor.

IV.

Any Property of the Debtor Which May Be Free of the Lien of the First Mortgage Is of Insufficient Value Materially to Affect the Fairness of Any Plan.

The Refunding Mortgage Trustee, in support of its contention that the holders of Refunding Mortgage Bonds are entitled to more favorable treatment than is accorded them in the Plan proposed in the Report, sets forth at page 17 of its brief dated September 24, 1937, a list of property which the Refunding Mortgage Trustee claims is free from the lien of the First Mortgage. This list includes certain branch lines, spurs and industrial tracks, and non-carrier real estate, as well as certain cash and other collateral pledged under the Refunding Mortgage and certain cash in the hands of the Debtor at the date of the institution of the reorganization proceedings.

As regards the branch lines, spurs and industrial tracks, and non-carrier real estate, the questions involved have been discussed above at pages 12-16 (as regards branch lines, spurs and industrial tracks) and at pages 16-19 (as regards non-carrier real estate).

As regards the cash and other collateral pledged under the Refunding Mortgage, the questions involved are discussed at pages 69-71 of the brief of the First Mortgage Trustees dated January 9, 1937. They are also discussed at pages 58-63 of the brief of the Institutional Committee dated January 9, 1937. It is not believed that any cash or other collateral which the Refunding Mortgage Trustee may hold free of the lien of the First Mortgage is of sufficient value to affect, in any material degree, the fairness of any plan. [1566]

As regards the cash in the hands of the Debtor at the date of the institution of the reorganization proceedings, the questions involved are discussed at pages 68-69 of the brief of the First Mortgage Trustees dated January 9, 1937. They are also discussed at pages 55-56 of the brief of the Institutional Committee dated January 9, 1937. So far as the record discloses, no part of this cash now remains on hand.

Conclusion.

The First Mortgage Trustees ask that the Commission approve the conclusions in the Report with respect to the extent and priority of the lien of the First Mortgage.

Opportunity for oral argument is respectfully requested.

Respectfully submitted,
MILBANK, TWEED, HOPE & WEBB,
Attorneys for First Mortgage Trustees,

In Equity No. 3977
Filed Nov. 7th, 1921

THE EQUITABLE TRUST COMPANY OF NEW YORK

Trustee,

vs.

THE WABASH RAILROAD COMPANY and JAMES B. FORGAN

Defendants.

IN THE MATTER OF THE INTERVENTION OF ROME LANE, ET AL., AND OF THE EXCEPTIONS TO THE REPORT OF BYRON F. BABBIT, ESQUIRE, SPECIAL MASTER HEREIN.

Mr. Wells H. Blodgett, for Receivers under the Creditors' bill.

Mr. Clifford B. Allen and Mr. Lee W. Hagerman, (Mr. P. H. Cullen was with them on the Brief) for the interveners.

Mr. James L. Minnis for the defendants. [1568]

Mr. N. S. Brown for the Wabash Railway Company, the purchaser at the foreclosure sale, (Mr. Winslow S. Pierce and Mr. Lawrence Greer, were with him on the brief.)

Sanborn, Circuit Judge.

It is not intended by this memorandum to discuss or even state the many serious questions presented

by the exceptions to the Master's Report, or to do more than to indicate the views of the court upon a few of the issues.

* * * * *

II.

Interveners' Claim on Account of the Seventy Locomotives.

The Railroad Company in October 1907 entered into an equipment trust agreement for the purchase of seventy locomotives. The refunding mortgage was made on July 1, 1906. Prior to the filing of the foreclosure bill the Railroad Company had paid $852,240.55 for these locomotives according to the terms of the trust agreement. The unpaid balance thereunder, $399,000.00 was paid by the receivers and charged in their reports against the proceeds of the unmortgaged assets of the railroad company. After the foreclosure decree, but before the sale, a bill of sale of these locomotives was made to the mortgagor company by the trustee of the equipment trust. Although there was no allegation in the foreclosure bill, all the averments of which were admitted by the answer of the mortgagor, that these locomotives were a part of the mortgaged property, although the special master in the consolidated cause, in pursuance to an order of the court to ascertain and report the mortgaged property, [1569] did not report these locomotives as a part thereof while he did so report other rolling stock subject to equipment trust agreements, and although these locomotives were not specifically described in the

decree or notice of sale, the receivers delivered them to the Wabash Railway Company, the actual purchaser at that sale. The interveners insist that these locomotives were not subject to the refunding mortgage, but were in equity subject to the trust for the benefit of themselves and the other unsecured creditors that was fastened upon them by the filing of the creditors' bill, that the railway company took them subject to that trust, and that the interveners and their associates are entitled to an accounting for these locomotives by the railway company.

The Special Master in his report held that this property was not covered by the refunding mortgage, and that the interveners as against the railway company, were entitled in equity to the $852,240.55 paid for them by the mortgagor before the receivership or to an interest in them in the proportion which that amount bears to the whole amount paid for them. Upon exception to this conclusion by the Railway Company and after hearing further testimony and argument he concluded that these locomotives were subject to the refunding mortgage and that the interveners were entitled to no relief on account of this claim.

The question is—did the refunding mortgage subject these locomotives to its lien? The purpose of every written contract or conveyance is to express the intention of the parties thereto. The object of all construction of the terms of a mortgage or agreement is to ascertain that intention. That intention must be deduced from the entire mortgage or con-

tract and the situation and circumstances of the parties when they made it. That intention when ascertained must prevail over the dry words [1570] of the instrument, inapt expressions, and careless recitals in the mortgage or agreement unless it is directly contrary to the plain meaning of the binding words of the instrument. United States Fidelity & G. Co. vs. Board of Commissioners of Woodson County, Kans. 145 Fed. (CCA) 144, 145. The natural, reasonable, more obvious meaning of a mortgage or contract should be preferred to a curious recondite signification discovered by ingenuity and study.

This refunding mortgage of July 1, 1906 was authorized by a resolution of the Board of Directors of the Railroad Company, which provided that the bonds issued under it should be secured by "A mortgage or deed of trust covering and embracing all of the railroads and property now owned by the company, and all other property hereafter acquired by it through the issue of said bonds or their proceeds, as well as all other property which may from time to time be expressly conveyed, assigned or pledged, or by writing of any kind transferred to the trustee of said mortgage or anyone in its behalf." The seventy locomotives in question were not thereafter acquired by the railroad company through the issue of the bonds secured by that mortgage or by their proceeds, nor were they ever expressly assigned, conveyed or mortgaged to the trustee, so that it is reasonably clear that they never fell

into any of the classes of property which the railroad company intended to subject to the mortgage when its Board of Directors passed this resolution which authorized it.

The refunding mortgage granted to the trustees named therein, the railroads of the mortgagor by a specific description of each of them, and, among other things "also all property of every kind and description, real, personal, or mixed, stocks, interests, rights, privileges and franchises now owned by the railroad com- [1571] pany or hereafter acquired by it, and which may be or become subject to the lien of any of the mortgages of the railroad company herein before recited." One of the mortgages therein recited was the mortgage of May 1, 1889, which contained a grant to the trustee for its bondholders of the railroads therein specified "and all other things, real and personal, now owned or used or that may hereinafter be owned or used by the party of the first part in connection with said lines of railroad or appertaining thereto." It is contended that the seventy locomotives which were purchased in October, 1907, more than a year after the date of the refunding mortgage, under the equipment trust agreement whereby the title was retained in the vendor until the purchase price was paid years thereafter, fell under that portion of the refunding mortgage above quoted, which reads: "or hereafter acquired by it, and which may be or become subject to the lien of any of the mortgages of the railroad company herein before recited", and became subject

to that mortgage because they came within that part of the quotation from the mortgage of July 1, 1889 which describes property "that may hereafter be owned or used by the party of the first part in connection with said lines of railroad or appertaining thereto." This contention, however, seems to invoke an unauthorized stretch or extension of the grant of the refunding mortgage beyond the intention of the parties to it therein expressed. It is evident that the draftsman of that mortgage was not of the opinion that the interest of the mortgagor in locomotives and other rolling stock then held by it under equipment trust agreements, was included in the terms which have been quoted; much less the interest the mortgagor might thereafter acquire in property under such agreements; [1572] for the third paragraph of the mortgage quoted reads in this way: "Also, subject to the provisions hereinafter in this indenture contained all the right, title and interest which the railroad company now has or hereafter may acquire in and to all rolling stock now covered by the equipment agreements herein before recited." That paragraph in all probability would never have been written and inserted in the mortgage if the draftsman had supposed that he had covered the interests of the mortgagor therein described by the preceding paragraphs quoted, and it is clear that he did not intend to include or subject to the mortgage, by any of the paragraphs quoted, interests in locomotives, rolling stock, or equipments thereafter acquired under equipment trust

agreements, for, if that had been his intention, the matter would have come to his attention when he wrote the paragraph last quoted, and he would have included them in that paragraph. The paragraphs of the refunding mortgage to which reference has been made, and which have been considered, fail to satisfy that the parties to the refunding mortgage intended to subject to that mortgage the seventy locomotives thereafter acquired by the mortgagor under the equipment trust agreement.

But, supposing that the paragraph quoted from the mortgage of July 1, 1889, is broad enough to cover the interest which the mortgagor secured in the seventy locomotives in October 1907 and thereafter under the equipment agreement; and supposing that the provision of the refunding mortgage covering property of the mortgagor "hereafter acquired by it and which may be or become subject to the lien of any of the mortgages of the railroad company hereinbefore recited" was sufficient, standing alone, to include the after-acquired interest in the seventy locomotives. Nevertheless, it was [1573] competent for the parties to that mortgage, by a stipulation therein, to except that interest from the lien thereof. They could have done so by the addition thereto of the clause "Except that property acquired by the mortgagor otherwise than by the use of the proceeds of the bonds secured by this mortgage shall not become subject to the lien thereof unless made so by a subsequent written instru-

ment's and for this purpose, as it seems to the court, they did insert, after all the numerous descriptions of the mortgaged property and just preceding the habendum clause of the mortgage, this reservation covenant and agreement: "But it is hereby covenanted and agreed that the Railroad Company reserves the right, except as in this indenture expressly otherwise provided, to acquire or construct any railroad, branch or extension and to acquire any stocks, bonds, securities and other property of any kind and description free from the lien of this indenture and any railroad, branch or extension and any stocks, bonds, securities and other property of any kind or description, acquired by the Railroad Company without the use of bonds or proceeds of bonds issued hereunder or constructed or acquired by the use of any such bonds or the proceeds of any such bonds as may be delivered to the Railroad Company as hereinafter provided in reimbursement of expenditures then already made out of other resources for purposes for which bonds secured by this Indenture are hereinafter provided to be issued, shall, except as in this Indenture expressly otherwise provided, be free from the lien of this Indenture unless specifically subjected thereto by an instrument in writing executed by the Railroad Company or by any one with its consent on its behalf to the Trustee hereof." A comparison of this reservation with the resolution which warranted the mortgage is very persuasive that both [1574] parties to that instrument

had the abiding intention and settled purpose which was clearly expressed in that resolution to leave such after acquired property as these seventy locomotives, which was not acquired through the issue of the bonds secured by the mortgage, free of its lien unless and until such property was specifically subjected to that lien by an express conveyance, assignment, pledge, or writing such as the resolution requires or "by an instrument in writing executed by the railroad company" as the reservation paragraph describes.

This view that an intention to subject these seventy locomotives to the lien of the refunding mortgage is not evidenced by that instrument, and the situation and circumstances of the parties when they made it is strongly supported by their practical interpretation of it before the present controversy arose. The practical interpretation given to their contracts by the parties to them while they are engaged in their performance, and before any controversy had arisen concerning them, is one of the best indications of their true intent, and courts that adopt and enforce such a construction are not likely to commit serious errors. Topliff vs. Topliff, 122 U. S. 121, 131; City of Chicago vs. Sheldon, 9 Wall. 50, 54; Manhattan Life Insurance Co. vs. Wright, 126 Fed. (CCA) 82, 87.

The Equitable Trust Company, the representative of the bondholders secured by the refunding mortgage, applied in 1913 to the court in the consolidated cause to appoint a Master to hear testi-

mony, ascertain and report what property was covered by the mortgage, and the court appointed Mr. Thomas T. Fauntleroy and ordered him to take evidence, find and report what property was subject to the mortgage. He received testimony and reported that the mortgage covered much specifically described property, and; (1) "and all locomotives, [1575] engines, and other rolling stock * * * and all other property of every kind and description owned by the railroad company at the time of the execution and delivery of said refunding mortgage appurtenant to and used with the lines of road, and; (2) all extensions, branches, equipment, terminals and other property of every nature acquired by said railroad company through the use of the bonds secured by said first refunding and extensions mortgage or the proceeds thereof." He did not, however find or report that this mortgage covered the interest of the mortgagor in these seventy locomotives. It is common knowledge that the Equitable Trust Company, through its counsel, presented the evidence and claim of the Bondholders to the property which they deemed covered by this mortgage to the Special Master and the obvious inference from this hearing and the report of the Master is that neither the mortgagee, the mortgagor, nor the Master was of the opinion that the railroad company intended to mortgage or did mortgage the interest of the mortgagor in these seventy locomotives, which was acquired through the equipment trust agreement of 1907.

In opposition to the considerations which have been recited counsel for the defendant earnestly contends that these locomotives do not fall under the reservation paragraph because it contains the words "except as in this indenture expressly otherwise provided" and the mortgagor had in a previous part of this mortgage granted all property thereafter "acquired by it and which has become or may become subject to the lien of any of the mortgages of the railroad company herein before recited." But this exception in the mortgage covers only dispositions therein before "expressly otherwise provided;" that is to say "in an express, direct or pointed [1576] manner; of set purpose; in direct terms; plainly; explicitly." Century Dictionary, 2087, and in view of the facts that the clause of the grant invoked is so general and indefinite, that the mortgage contains an express grant of the interest of the mortgagor in all rolling stock covered by equipment trust agreements therein recited but no express grant of any interest that it should thereafter acquire in locomotives under equipment trust agreements, the court is unable to conclude that it was anywhere in that mortgage "expressly otherwise provided" than as it was provided in the other parts of the reservation paragraph.

Another contention of counsel for the defendant and that which persuaded the Master to reverse his opinion finding that the seventy locomotives were

not subject to the lien of the mortgage, is that the reservation paragraph does not conflict with the granting clause of the refunding mortgage which extends its lien to after acquired property that might be or become subject to the lien of the prior mortgages recited therein because it is limited and restricted in its meaning, scope and effect to the property described in Section 4 of Article II of the refunding mortgage which provides that $110,260,500.00 par value of the bonds secured by the mortgage shall be issued and used for certain specified purposes only and the acquisition of locomotives under equipment trust agreements is not one of the purposes so specified. But (1) if the granting parts of the mortgage fail to evidence an intention of the parties to subject after acquired locomotives, procured through equipment trust agreements, to the lien of the refunding mortgage, they were not subjected thereto by the reservation paragraph, and the question presented by this contention becomes immaterial; (2), if, on the other hand the granting clauses do evidence such an intention, the position of the reservation para- [1577] graph in the mortgage after all the descriptions of the property granted and just before the habendum paragraph, its independent, clear and sweeping covenant in these terms "but it is hereby covenanted and agreed that the railroad company reserves the right, except as in this indenture expressly otherwise provided, to acquire or construct any railway, branch, or extension and to acquire

any stock, bonds and other property" not other property of the kinds therein described, but "of any kind and description free from the lien of this indenture" etc., and the evident purpose of this paragraph to carry out thereby the intention expressed in the authorizing resolution seem to the court, to converge with almost compelling force to persuade that the construction which this contention seeks to apply to the reservation never was intended by the parties to it, and; (3) the provisions of Section 4, Article II relate to property purchased or to be purchased by the use of the proceeds of the bonds to be issued and to the application of those proceeds. The reservation paragraph relating to property not purchased or to be purchased by means of such bonds or proceeds, was evidently put into the mortgage for the purpose of preventing such property from falling under the lien thereof unless so placed by a subsequent written agreement, and it does not seem probable that the provisions of Section 4, regarding property, of which the locomotives are not a part, were intended to restrict the reservation of property not procured by means of the bonds.

In his final conclusion the Master suggested, as one reason therefor, that these locomotives, which he had held in his original report, had not been acquired by the railroad company by the execution of the trust agreement were subsequently acquired after the decree and before the sale by a bill of sale of the trustee in the equipment agreement. But it

seems to the court that this change [1578] in the situation is immaterial. It is inclined to the view that if the lien of the refunding mortgage had ever attached to the locomotives it would have attached to the equitable interest of the mortgagor at the time it commenced to pay for them under the agreement, and would have increased with the increase of the payments.

In the consideration of this claim the court has received great assistance from the able and exhaustive arguments and briefs of counsel for each of the parties and from the studied and comprehensive report of the Master. All these have received examination and reflection, with the result that the entire mortgage the parts thereof specified and discussed, the situation and circumstances of the parties when they made the mortgage, the resolution which authorized it and the practical interpretation of it by the parties before this controversy arose, and other considerations which have been referred to herein, have led to the conclusion that the parties to the refunding mortgage never intended thereby, to subject, and did not subject, after acquired locomotives purchased, by means of equipment trust agreements to the lien of that mortgage; that the interveners are entitled to an accounting by the Wabash Railway Company for those locomotives and their use by it, and to equitable and just relief on account thereof.

[Endorsed]: Filed Oct. 5, 1939. [1579]

Before the
Interstate Commerce Commission
Finance Docket No. 10913.

In the Matter of THE WESTERN PACIFIC RAILROAD COMPANY,

Debtor.

REPLY OF THE RAILROAD CREDIT CORPORATION TO THE EXCEPTION BRIEFS FILED HEREIN ON OR BEFORE SEPTEMBER 27, 1937.

There appears to be no substantial difference between the position taken by the A. C. James Co. and the position taken by the R.F.C. and The Railroad Credit Corporation in their respective exceptions (and supporting briefs) in relation to the treatment proposed by the Bureau of Finance for their several claims.

All agree on the underlying principles:

(1) That every creditor is entitled to such priority with respect to the Debtor's estate, as derives from the security which he holds.

(2) That if a secured creditor is not fully secured, he is to be treated as a general creditor for the amount of the deficiency, or unsecured portion of his claim.

(3) That every creditor is entitled to be paid in full in money or moneys worth, before any part of the Debtor's estate is allocated, in cash or new securities, to junior claimants,

whether they be creditors or stockholders, unless such junior claimant furnishes an adequate new consideration. (Obviously it would be proper to admit strangers on this basis.)

Apparent rather than real differences arise in the application of these principles to the facts in this proceeding:

The claims of the Reconstruction Finance Corporation, The Railroad Credit Corporation, and A. C. James Co. are each secured by General and Refunding Bonds of the Debtor in varying amounts. (The Reconstruction Finance Corporation [1581] and The Railroad Credit Corporation each holds additional security, but for simplification consideration of that security is deferred to a later point in this memorandum.) If those General and Refunding Bonds were completely junior to the First Mortgage, it would be clear that their holders would not be entitled to receive anything from the estate of the Debtor, either in cash or new securities, until the First Mortgage Bondholders had been satisfied. A fortiori those junior to the General and Refunding Mortgage would be entitled to nothing until that Mortgage had been satisfied. It appears, however, that the General and Refunding Mortgage is not in all respects junior to the First Mortgage. It can not be said, even tentatively, that the First Mortgage is entitled to look to the entire estate of the Debtor ahead of the General and Refunding Mortgage.

The Bureau of Finance states in its proposed

report that after the First Mortgage has been given all that the Bureau believes that Mortgage is entitled to receive, the value remaining in the estate of the Debtor will be sufficient to support approximately $21,000,000 par value of common stock (in addition to the approximately $8,000,000 of common stock to be issued to cover unpaid interest on First Mortgage Bonds), and that approximately only $11,000,000 par value of that stock is available for General and Refunding Bonds. Assuming this to be true, it follows that the holders of those bonds are entitled to their pro rata share of that stock, up to the full amount of their claims. If their pro rata shares are insufficient to satisfy their claims, deficiencies will result. If an assignment of two shares of stock for $100 of claim is not excessive, as indicated in the Bureau's proposal, with respect to Reconstruction Finance Corporation, then assignments of lesser amounts of stock, as in the case of The Railroad Credit Corporation and A. C. James Company, necessarily leave deficiencies.

[1582]

If there is no remaining asset value, then no further stock should be issued, and the deficiencies must be wiped out, along with the claims of general creditors and stockholders.

The A. C. James Company argument is based on the assumption, which we believe is amply supported, that there is additional value in the Debtor's estate sufficient to satisfy these deficiencies. Whether or not sufficient value does in

fact exist, remains to be determined, but it is clear that substantial additional value has been found by the Bureau to exist, for it proposes to issue $10,000,000 of common stock as a bonus. That stock, unless paid for (by a creditor, stockholder, or third party, it is immaterial which), must be distributed among the note holders to the extent necessary, if it is more than sufficient, otherwise in its entirety, towards satisfaction of the deficiencies above referred to.

Thus the arguments advanced by A. C. James Company, Reconstruction Finance Corporation, and The Railroad Credit Corporation, in this respect are based on the same principles of law, and all tend to the same end—with but one point of difference: the Reconstruction Finance Corporation and The Railroad Credit Corporation contend that the stock proposed to be issued to them will be worth substantially less than $50 per share, and that in consequence deficiencies will exist. This low valuation of the new stock is supported by the Bureau's proposed report, as above shown. The A. C. James Company, however, appears to assume, in spite of the record and the action of the Bureau, that the new common stock *will* be worth $100 a share, or so nearly that amount that there *is* an excess of collateral held by Reconstruction Finance Corporation. If the A. C. James Co. is right about the value of the new stock, then it is right in its conclusion, but its valuation finds no support in the Bureau's figures. The Railroad Credit Corporation

contends that if the full value of General and Refunding Bonds were recognized, both R.F.C. and The Railroad Credit Corporation would have an excess [1583] of collateral, but on the basis of exchange proposed by the Bureau, no excess could exist. (Here again no consideration is given to the additional collateral held by The Railroad Credit Corporation).

In other words, the Reconstruction Finance Corporation and The Railroad Credit Corporation see sufficient value in their existing collateral to warrant issuing to them new securities equal in value to their respective claims, and they regard the stock allocated to them as inadequate. The A. C. James Co. also believes that present collateral note claims, including its own, are fully secured, but it sees sufficient value in the new common stock to satisfy those claims, provided the new stock is allocated in proportion to the amounts of the several claims. Thus, the only issue between them is as to the *value* of the new stock. A conclusive answer would seem to be found in the Bureau's proposed report, unless substantially greater value is assigned to the Debtor's estate. In that event, a different distribution would be required.

The Railroad Credit Corporation holds as security for its claim, valuable items of collateral in addition to General and Refunding Bonds; its right to that collateral is a substantive property right that can not be taken away from it without due process of law, or just compensation. Reference is

made to the Brief of The Railroad Credit Corporation for a more extended discussion of the value of that collateral.

It is idle to dismiss these difficulties, as the Bondholders' Committee seeks to do at page 49 of their brief, by saying "and since R.F.C., R.C.C. and A.C.J. must, as the proposed Report correctly finds, participate as among themselves in proportion to their collateral, the participations allotted to R.C.C. and A.C.J. in respect of their Notes must be proportionately less than the participation allotted to R.F.C." That statement is, of course, true in the sense that it is true of all secured creditors, including First Mortgage Bondholders, but recognition must be given to all collateral and to all elements [1584] of value in the collateral held by the several secured creditors. The Railroad Credit Corporation has liens upon certain property of the Debtor, superior to the lien of the First Mortgage. Recognition of the rights of The Railroad Credit Corporation necessarily defeats the attempt to have the claims of First Mortgage Bondholders treated without regard to other creditors, and to relegate the claims of other creditors, including the claim of The Railroad Credit Corporation to the level of inconsequential details.

There is nothing in the record to support the suggestion that the $2,000,000 principal amount of bonds pledged by the A. C. James Company with The Railroad Credit Corporation as security for

obligations of the Debtor, were "loaned" to The Railroad Credit Corporation, as stated on page 24 of the brief of the A. C. James Company. The evidence is clear that those bonds were pledged to The Railroad Credit Corporation, and that The Railroad Credit Corporation has all the rights of a pledgee therein.

Passim it should be noted that there is absolutely no basis in the record in this proceeding for the suggestion by the A. C. James Company, that it has any rights of subrogation or exoneration, or that there is occasion for marshaling or restitution, insofar as the aforesaid bonds are concerned. (For brief summary of law as to marshaling see 38 Corpus Juris pp. 1368 ff.)

These propositions have nothing to do with the error, assigned by all three of the collateral note holders to the Bureau proposal that stock which is to be exchanged for collateral, must be accepted, by the holders of that collateral in full discharge of the principal debts. The error of that proposal lies, insofar as private interests are concerned, primarily in its substantial failure to recognize deficiencies, or other collateral, or existing priorities, or the rights of general creditors, as has been previously pointed out. [1585]

The Bondholders' Committee, Reconstruction Finance Corporation and the A. C. James Company, all object to the offer of $10,000,000 of common stock to the general claim of Western Pacific Rail-

road Corporation as being a discrimination in favor of The Railroad Credit Corporation, which holds that claim in pledge: The Railroad Credit Corporation admits this to be true, even though it may well be entitled, because of the collateral held by it, to that amount (or more) of additional stock. Taken by itself, the proposed offer of this $10,000,000 par value of stock is as unsound in law as it is in economics.

The Debtor's brief at page 27 et seq. proposes a new plan of reorganization involving the issue of 15 year collateral income notes to the secured note holders. The Railroad Credit Corporation does not oppose this proposal, which may afford a practical solution, provided such notes are given upon such terms and in such amounts as to satisfy its claim in full. The proposed priority provision must be rejected as without support in law or equity. Unless made as here indicated, this new proposal can not be accepted even on composition principles in view of the treatment proposed for other creditors, and the equity holders. If The Railroad Credit Corporation is not paid in full, it is entitled to "(a) voting power and, (b) the right to participate in possible future prosperity," ahead of junior creditors and stockholders. Assigning a book value of one dollar to no par stock that carries the rights above quoted, is no justification for giving those rights to parties who no longer have any interest in the Debtor's estate. The principle of de minimis

can not be made to apply through the simple expedient of labeling as "minima" matters (such as those quoted) that do not in fact belong in that category.

Failure to discuss in this memorandum any proposals or principles of law or equity, or statements or conclusions of fact, to be found in any of the briefs submitted herein, in disagreement with this answer or any brief filed in behalf of The Railroad Credit Corporation is not to be taken as an acceptance, [1586] or admission of the soundness or accuracy thereof. The Railroad Credit Corporation adheres to the statements of fact and principles of law and equity set out in its several briefs herein.

The Railroad Credit Corporation unreservedly joins in the suggestion of the Bondholders' Committee stated at page 51 of their brief as follows:

> "The Bureau Plan seems lacking in specification on important substantive points. To obviate any justifiable basis for such a criticism of the ultimate Plan, the Bondholders' Committee urges that before the Commission publicly announces the Plan which it will approve, it give to all the interested parties an opportunity to confer with its representatives and work out the provisions of the ultimate Plan in sufficient detail to make the security

holders an adequate disclosure of what they are voting upon."

Respectfully submitted,

D. WILLARD, JR.,
General Counsel, The Railroad Credit Corporation.

Office and P. O. Address:
D. WILLARD, JR.,

17th & H Streets, Northwest, Washington, D. C.

Dated—Washington, D. C., October 6, 1937.

CERTIFICATE OF SERVICE

I hereby certify that I have this day served the foregoing document upon all parties of record in this proceeding, by mailing a copy thereof properly addressed to each party.

Dated at Washington, D. C., this 6th day of October, 1937.

D. WILLARD, JR.,
General Counsel, The Railroad Credit Corporation.

[Endorsed]: Filed Oct. 5, 1939. [1587]

Before the
Interstate Commerce Commission
Finance Docket No. 10913

THE WESTERN PACIFIC RAILROAD COMPANY REORGANIZATION.

REPLY ON BEHALF OF CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO AND SAMUEL ARMSTRONG, AS TRUSTEES UNDER THE WESTERN PACIFIC RAILROAD COMPANY FIRST MORTGAGE DATED JUNE 26, 1916, TO PETITIONS FILED HEREIN UNDER SUBSECTION (d) OF SECTION 77 OF THE BANKRUPTCY ACT.

The above named trustees under The Western Pacific Railroad Company First Mortgage dated June 26, 1916, intervenors in the above entitled proceeding, for reply to the above-mentioned petitions, respectfully state:

I.

Said First Mortgage trustees submit that the Plan of Reorganization (hereinafter called the Commission Plan) approved by the Report and Order entered herein under date of October 10, 1938, fails, in the allotment of common stock therein contemplated, to afford due recognition to the rights of the holders of bonds outstanding under said First Mortgage (hereinafter called the First Mortgage bondholders).

The Commission Plan in effect allots 154,241 shares [1589] of new common stock to the $11,-

914,521 claim of the First Mortgage bondholders for accrued and unpaid interest to June 30, 1938, 90,255.5 shares of new common stock to the $3,612,181 claim of the Reconstruction Finance Corporation (hereinafter called the RFC) and 33,646.5 shares of new common stock to the $2,580,906 claim of the Railroad Credit Corporation (hereinafter called the RCC).

This allocation results in giving the First Mortgage bondholders $129.46 of new common stock (taken at $100 per share) for each $100 of that portion of their claim representing accrued and unpaid interest to June 30, 1938, whereas the RFC is given $249.86 of new common stock (taken at $100 per share) for each $100 of its claim and the RCC is given $130.37 of new common stock (taken at $100 per share) for each $100 of its claim. Thus a portion of the claim of the First Mortgage bondholders is accorded less favorable treatment than the claims of the RFC and the RCC, notwithstanding the fact that the Commission found in its Report (pp. 59-60) that the claims of the RFC and the RCC were "not entitled to the same treatment as first-mortgage bondholders, who should be considered as having a first lien upon practically all the assets of the debtor".

II.

Said First Mortgage trustees submit that the Plan of Reorganization of the Institutional Bondholders' Committee [1590] (hereinafter called the Committee Plan), which is annexed as Exhibit A

to the petition of said Committee, provides for a fair allotment of new common stock and affords due recognition to the rights of the First Mortgage bondholders.

III.

Said First Mortgage trustees submit that the Committee Plan affords due recognition to the value and earnings of the collateral subject to the General Mortgage as a first lien.

The petition of the Irving Trust Company as trustee discusses (pp. 3-9) the values to be attributed to the collateral subject to the General Mortgage as a first lien. The figures given in the petition for the Central California Traction Company securities and for the Alameda Belt Line stock are the values carried on the books of the Debtor. It is submitted that such book values do not furnish an appropriate test of values for a plan under Section 77. Furthermore, the discussion of these securities and of this stock in the petition ignores the fact that both companies have been operating at a loss; reference is made to the brief (pp. 60-63) dated January 9, 1937, filed herein on behalf of the Institutional Bondholders' Committee, for a summary and analysis of the data in the record as to the earnings of these companies. [1591]

The petition mentions $810,331 free cash on hand at the institution of the reorganization proceedings as something entitling the General Mortgage bondholders to favorable treatment in the reorganization. Since the shortage of cash for operation dur-

ing the reorganization proceedings was such as to require the issue of $10,000,000 in principal amount of trustees' certificates, the cash on hand at the institution of the reorganization proceedings cannot, it is submitted, be deemed a fund available for payment to the unsecured creditors; where all the cash on hand at the institution of the reorganization proceedings is used up in the operation of the railroad, to say that, for the purpose of determining a fair distribution of securities at the end of the reorganization, unsecured creditors are entitled to credit for the cash on hand at the institution of the reorganization proceedings is to say that such creditors are entitled to credit for a nonexistent thing.

The General Mortgage bonds are held in pledge by the RFC, the RCC and the A. C. James Co. (hereinafter called the ACJ). The Committee Plan accords to the RFC special treatment in consideration of its agreement to furnish $10,000,000 of new money. The Committee Plan allots to First Mortgage bondholders $150 of new common stock (taken at $100 per share) for each $100 of that portion of their claim representing accrued and unpaid interest to January 1, 1939, but allots to the RCC $142.86 of new common stock [1592] (taken at $100 per share) for each $100 of its $2,592,113 claim (interest accrued and unpaid to January 1, 1939), and allots to the ACJ new common stock in the proportion which the General Mortgage bonds of the Debtor held by the ACJ bear to the General Mortgage bonds held by the RCC. Accordingly, this distri-

bution of common stock to the RCC and (proportionately) to the ACJ is on a basis nearly as favorable as that accorded in the distribution on said claim of the First Mortgage bondholders, which is secured by all the property on which the First Mortgage is a first lien.

Wherefore said First Mortgage trustees respectfully pray that the Report and Order of the Commission entered herein under date of October 10, 1938, be modified so as to give due recognition to the rights of the First Mortgage bondholders by the approval of the Committee Plan hereinabove referred to or otherwise as to the Commission may seem just and reasonable, and that the Commission enter such further order or orders as to it may seem just and reasonable.

Dated December 17, 1938.

[Endorsed]: Filed Oct. 5, 1939. [1593]

Before the
Interstate Commerce Commission
Finance Docket No. 10913

In the Matter of

THE WESTERN PACIFIC RAILROAD COMPANY REORGANIZATION.

ANSWER OF FREDERICK H. ECKER, JOHN W. STEDMAN AND REEVE SCHLEY (AS A COMMITTEE REPRESENTING INSTITUTIONAL HOLDERS OF FIRST MORTGAGE BONDS OF THE WESTERN PACIFIC RAILROAD COMPANY) TO THE PETITION OF THE WESTERN PACIFIC RAILROAD COMPANY DATED AUGUST 1, 1939.

Answering the Petition dated August 1, 1939, of The Western Pacific Railroad Company (hereinafter called the Debtor), Frederick H. Ecker, John W. Stedman and Reeve Schley, as a Committee representing institutional holders of First Mortgage Bonds of The Western Pacific Railroad Company (hereinafter called the Committee) respectfully show:

First: The Committee is without knowledge of any negotiations between the parties to the proceeding herein for "an agreed upon Plan of Reorganization which might be [1594] acceptable to the Interstate Commerce Commission and susceptible of early consummation," after December 9, 1938, and prior

to June 9, 1939. On the latter date counsel for the A. C. James Co. and the Debtor asked the opinion of counsel for the Committee as to the basis upon which the Committee would consider agreement upon a compromise of the various questions affecting the reorganization of the Debtor then pending, undecided, before the Interstate Commerce Commission. Following that conference there was submitted by counsel for the A. C. James Co. to the Committee a proof of a Plan of Reorganization which did not comply with the conditions expressed in the opinion of the Committee's counsel at said conference of June 9, 1939. At a meeting of the Committee, attended also by counsel for the Committee, counsel for the A. C. James Co., counsel for the Debtor, and counsel for The Western Pacific Railroad Corporation, on June 30, 1939, the Committee failed to agree upon the proposals of the other parties and the other parties failed to agree upon proposals by the Committee.

Second: All said proposals were predicated upon the fact that numerous issues between the parties had not yet been decided by the Interstate Commerce Commission and that it was possible, as to each of the parties concerned, that such issues might be determined adversely. [1595]

Third: On July 24, 1939, counsel for the Debtor and counsel for The Western Pacific Railroad Corporation advised counsel for the Committee that those corporations were prepared to accept the proposals made by the Committee on June 30, 1939.

Before any action by A. C. James Co. in the premises and before any reconsideration by the Committee whether it was prepared to renew the proposals rejected by the other parties on June 30, 1939, the Final Report and Order herein of the Interstate Commerce Commission, bearing a notation "Decided June 21, 1939," was made public on July 25, 1939. This decision determined most of the issues between the parties in favor of the position taken by the Committee and approved a Plan materially more favorable to the First Mortgage Bondholders than the proof of Plan annexed to said Petition dated August 1, 1939, of the Debtor, not only in the respects mentioned in said Petition but also in other and material respects. Thus in large part the basis for a compromise which had theretofore existed was removed upon the publication of said Final Report and Order.

Fourth: The Committee represents the holders of approximately 34.37% of the outstanding First Mortgage Bonds. While the Committee believes that prior to the determination by the Commission all of the holders of bonds which the Committee represents would have accepted the compromise which [1596] the Committee was then willing to recommend, and that a sufficient additional number of the holders of publicly held bonds would have followed such a recommendation to enable a compromise so recommended to be accepted by a sufficient number of the holders of First Mortgage Bonds to permit its confirmation under the provisions of Section 77 of the Bankruptcy Act, the

Committee does not believe that, in the present state of the record, it can fairly recommend such a compromise.

Fifth: Reorganization of the Debtor has already been unduly delayed and the Committee believes that no useful purpose would be served by reopening the record before the Commission upon which the Commission's Final Report and Order released July 25, 1939, was entered.

Wherefore, the Committee respectfully prays (1) that said Petition of the Debtor, dated August 1, 1939, be denied, and (2) that the Commission promptly "certify the Plan to the Court, together with a transcript of the proceedings before it, and a copy of the Report and Order approving the Plan" in accordance with the provisions of subsection (d) of Section 77 of the Bankruptcy Act.

Respectfully submitted,

FREDERICK H. ECKER,
JOHN W. STEDMAN and
REEVE SCHLEY,
as a Committee representing institutional holders of First Mortgage Bonds of The Western Pacific Railroad Company,

By CRAVATH, deGERSDORFF,
SWAINE & WOOD,
Counsel for the Committee,

[Title of District Court and Cause.]

OBJECTIONS TO PLAN OF REORGANIZATION OF DEBTOR APPROVED BY INTERSTATE COMMERCE COMMISSION AND CLAIMS FOR EQUITABLE TREATMENT

To the Honorable the Judge of the United States District Court for the Northern District of California, Southern Division:

Now come Frederick H. Ecker, John W. Stedman and Reeve Schley, as a Committee representing a group of institutional owners and holders of First Mortgage Bonds of The Western Pacific Railroad Company, Debtor herein (hereinafter [1634] referred to as the Committee), by its attorneys, Messrs. Morrison, Hohfeld, Foerster, Shuman & Clark and Messrs. Cravath, de Gersdorff, Swaine & Wood, and pursuant to the order of this Court entered November 8, 1939, file these the Committee's objections to the Plan of Reorganization of the Debtor approved by the Interstate Commerce Commission June 21, 1939, and certified to this Honorable Court on or about September 28, 1939 (hereinafter referred to as the Commission Plan) and its claims for equitable treatment:

I.

Subparagraph 4 of paragraph P of the Commission Plan (pages 26-27 of mimeographed Report and Order) provides that there shall be allotted to The Railroad Credit Corporation, in addition to

35,425 shares of Common Stock of the Reorganized Company, $154,111 of Income Mortgage 4-1/2% Bonds, Series A, and $241,681 of 5% Preferred Stock, Series A, of the Reorganized Company.

Subparagraph 5 of paragraph P of the Commission Plan (page 27 of mimeographed Report and Order) provides that there shall be allotted to A. C. James Co., in addition to the 37,635 shares of Common Stock of the Reorganized Company, $163,724 of Income Mortgage 4-1/2% Bonds, Series A, and $256,756 of 5% Preferred Stock, Series A, of the Reorganized Company.

Accordingly, the notes of The Railroad Credit Corporation and of A. C. James Co., although secured by the Debtor's General and Refunding Mortgage Bonds, which Bonds are junior in lien to the Debtor's First Mortgage Bonds on substantially all of the property of the Debtor, are accorded *pro tanto* like treatment as that accorded [1635] the First Mortgage Bonds. In other words, the Commission necessarily found that the collateral pledged under the General and Refunding Mortgage had a value sufficiently great to justify the foregoing allocation of Income Mortgage Bonds and Preferred Stock to The Railroad Credit Corporation and A. C. James Co.

It appears from the face of the Report of the Commission on Further Consideration, decided June 21, 1939, which accompanies the Commission Plan (pages 9-13 of mimeographed Report and Order) that the allocation of said Income Mortgage Bonds

and Preferred Stock to said The Railroad Credit Corporation and said A. C. James Co. is based on a finding of the Commission that the securities of Tidewater Southern Railway Co. (a subsidiary of the Debtor), pledged under the General and Refunding Mortgage of the Debtor, have a value equal to their par value. It further appears from the face of the Report (pages 11-12 of the mimeographed Report and Order) that the Commission found that the lien of the General and Refunding Mortgage on the securities of the other companies, namely, the Central California Traction Company and the Alameda Belt Line, pledged under said Mortgage, has no material value.

The Commission found in its said Report (page 12 of mimeographed Report and Order) that the creditors secured by the General and Refunding Mortgage Bonds, that is, Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co., should be awarded new Income Mortgage Bonds in the amount of $732,010 and new Preferred Stock of a par value of $1,147,955. The aggregate par value of such new securities is $1,879,965. This is exactly the [1636] total of the Tidewater Southern securities pledged under the General and Refunding Mortgage ($508,278 note and $1,147,955, par value, capital stock) plus cash ($223,732) in the hands of the Trustee under said General and Refunding Mortgage. It appears, therefore, that the creditors secured by the General and Refunding Mortgage Bonds have been awarded by

the Commission, in respect of the Tidewater Southern collateral, $508,278 of the Reorganized Company's Income Mortgage 4-1/2% Bonds and $1,147,955 of the Reorganized Company's 5% Preferred Stock.

Earnings required to pay interest on such Income Mortgage Bonds ($22,872) and dividends on such new Preferred Stock ($57,398) aggregate $80,270. The Tidewater Southern's earnings available for payment of interest during the ten-year period 1929-1938 averaged $75,436 a year. Against these earnings should be offset the Debtor's proportion of the deficits of the Central California Traction and the Alameda Belt Line. The Debtor's average yearly proportion of the Traction Company's deficits during the 1929-1939 period was $31,920 per year, and its average yearly proportion of the Belt Line's deficit during the period was $20,700 per year, making an average total deficit of $52,600 per year which the Debtor had to make good by advances. Deducting such average losses from the Tidewater Southern's average earnings ($75,436 minus $52,600) gives average annual earnings of $22,836 from the collateral pledged under the General and Refunding Mortgage. Such average earnings lack $57,000 of being sufficient to cover the $80,270 required to pay interest on the Income Mortgage Bonds and dividends on the Preferred Stock which the Commission [1637] found should be awarded to the creditors secured by the General and Refunding Mortgage Bonds. In only one year

since 1925 (the year 1935) would the earnings on the General and Refunding Mortgage collateral have been sufficient to pay such charges.

It further appears from the record that the note which is pledged under the General and Refunding Mortgage (in the face amount of $508,278) represents an accumulation of advances made by the Debtor to the Tidewater Southern in each of the years 1927 to 1932, inclusive. It further appears from the record that in 1923 the Debtor paid an assessment of 30¢ per share on the 1,147,955 shares of Tidewater Southern stock owned by it, and in 1924 an assessment of 18¢ per share. Such assessments aggregated $344,390 in 1923 and $206,234 in 1924. It further appears from the record that no dividends have ever been paid on the Tidewater Southern stock since the acquisition thereof by the Debtor in 1917.

For the foregoing reasons, the Committee alleges that the Commission erred in its valuation of the securities pledged under the General and Refunding Mortgage; and in finding that the creditors secured by the Debtor's General and Refunding Mortgage Bonds should be awarded new Income Mortgage Bonds in the amount of $732,010, and new Preferred Stock of a par value of $1,147,955.

II.

Paragraph R of the Commission Plan (page 30 of mimeographed Report and Order) provides that the Plan shall be carried out under the supervision

of a reorganization committee consisting of three persons, one of whom shall be [1638] designated by the Bondholders Committee, one by Reconstruction Finance Corporation, and one by The Railroad Credit Corporation and A. C. James Co. jointly. This gives to the junior creditors (Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co., the pledgees of the General and Refunding Mortgage Bonds), whose total claims aggregate $12,704,000, two-thirds of the reorganization committee as against one-third to the holders of approximately $62,000,000 of senior claims. The Committee alleges, therefore, that the Commission Plan is unfair to the First Mortgage Bondholders.

The Committee believes that, in order for the Plan to be fair and equitable, the reorganization committee should be composed of five persons, three to be designated by the holders of existing First Mortgage Bonds in such manner as the Court or the Commission may prescribe, one by Reconstruction Finance Corporation, and one by The Railroad Credit Corporation and A. C. James Co. jointly.

III.

The Committee reluctantly finds it necessary to file these objections to the Commission Plan. It has heretofore consistently manifested a willingness to make sacrifices in the interest of the reorganization. It has no desire or inclination to depart from that policy. The Committee states, therefore, that if the Commission Plan be approved by the Court

in its entirety, it is prepared to, and will, waive the foregoing objections. The Committee reserves all rights to object to any changes in the Commission Plan other than changes to correct the foregoing defects. [1639]

Wherefore, the Committee respectfully prays that the Commission Plan be approved as an entirety without change but that if any change therein is made that the defects in the Commission Plan in respect of which objections are herein taken be corrected by this Honorable Court and holders of First Mortgage Bonds of the Debtor be given equitable treatment:

(1) by allocating to The Railroad Credit Corporation and A. C. James Co., respectively, Income Mortgage Bonds and Preferred Stock of the Reorganized Company only in such amounts and proportions as a fair valuation of the collateral under the Debtor's General and Refunding Mortgage shows them to be entitled; and

(2) by modifying and correcting the provisions of the Commission Plan respecting the constitution of the reorganization committee to read as follows:

> "The Plan shall be carried out under the supervision of a reorganization committee consisting of five persons, all to be approved by the Court, who shall be designated, three by holders of existing First Mortgage Bonds in such manner as the Court or the Commission may prescribe, one by Reconstruction Finance

Corporation, and one by The Railroad Credit Corporation and A. C. James Co. jointly. Should the holders of existing First Mortgage Bonds or Reconstruction Finance Corporation or The Railroad Credit Corporation and A. C. James Co., jointly, fail to designate a representative or representatives for membership on the committee within such time as the Court [1640] shall consider reasonable, the Court shall appoint such representative or representatives."

Dated New York, N. Y., December 6, 1939.

[Endorsed]: Filed Dec 8-1939. [1642]

[Title of District Court and Cause.]

MEMORANDUM STATEMENT SUBMITTED BY RECONSTRUCTION FINANCE CORPORATION IN REGARD TO THE PLAN OF REORGANIZATION CERTIFIED TO THE COURT BY THE INTERSTATE COMMERCE COMMISSION, WITH OBJECTION AND CLAIM FOR EQUITABLE TREATMENT IN CASE THAT PLAN IS NOT APPROVED.

On November 8, 1939, this Court entered an order requiring all parties in interest, having any objection to the plan of reorganization certified to the Court by the Interstate Commerce Commission to file with the Clerk of this Court their detailed and specific objections in writing to said plan and their claims, if any, for equitable treatment.

Reconstruction Finance Corporation (hereinafter called RFC) submits to the Court the following statement of its position with respect to that plan:

I.

RFC is the holder for value of $10,000,000 principal amount of certificates of indebtedness issued by the Trustees herein. Upon the maturity of those [1643] certificates on December 1, 1939, the Trustees, pursuant to the prior authorizations of the Interstate Commerce Commission granted in its report and certificate of November 21, 1939, Finance Docket No. 12,213, and the approval of RFC, extended the maturity thereof until December 1,

1940. Interest on said Trustees' Certificates, as extended, is payable monthly at the rate of four per cent per annum. The Trustees herein have the privilege of redeeming all of said Trustees' Certificates, but not less than all, on any monthly interest payment date on thirty (30) days' previous notice, at the principal amount and accrued interest to the date fixed for redemption.

Under the applicable orders of this Court, said Trustees' Certificates rank equally and ratably as expenses of the administration by the Court of the property of the Debtor and, as such, constitute equally with other expenses of administration, a direct charge and lien on all property held by the Trustees of the Debtor as such.

II.

Subsections (d) and (e) of Section 77 of the Bankruptcy Act, as amended, it is respectfully submitted, require the liquidation in cash of all expenses of administration. Reference to these subsections clearly indicates that the term "creditors" as used throughout refers to creditors of the Debtor and not to creditors of the Trustees of the Debtor. Thus RFC's treatment in respect of the $10,000,000 of Trustees' Certificates which it holds is not governed by the clauses of the statute governing creditors of the Debtor. This is made even clearer by a provision in subsection (e) to the effect that the Court shall approve the plan (previously certified by the Interstate Commerce Commission) if satis-

fied, among other things, that "the plan provides for the payment of all costs of administration." In the instant case, the Certificates held by RFC by their terms are "expenses of administration" by the Court of the property of the Debtor; and under the terms of the statute, it would seem that the holder thereof, RFC, is entitled to insist that any plan effectuated herein provide for the payment thereof, along with other expenses of administration. [1644]

III.

RFC, however, has heretofore indicated (Petition dated December 9, 1938, for Modification of the Report and Order of the Interstate Commerce Commission of October 10, 1938) that it would not insist on said $10,000,000 of Trustees' Certificates being paid in cash, if, in respect thereof and in respect of its claim against the Debtor, RFC should receive the treatment actually provided for in the plan certified by the Commission.

Prompt effectuation of a plan of reorganization of the Debtor is in the public interest, and in the interest of all classes of creditors of the Debtor, who since the institution of these proceedings more than four (4) years ago have received no interest on their claims, though there have been earnings available for the payment of interest. Since the position taken by RFC represents a concession on its part of rights which it is entitled to assert under the statute, it is hoped that other creditors in consideration thereof will be willing to make cor-

responding concessions, in the common interest of all, so that the Debtor can be reorganized without further delay.

IV

Apart from the above considerations, the Interstate Commerce Commission has approved the plan which it has certified to the Court, including the treatment provided therein for RFC, as meeting, in its opinion, the requirements of subsections (b) and (e) of said Section 77, and as being compatible with the public interest. In so doing, the Interstate Commerce Commission necessarily has had to consider legal questions not yet passed upon by this Court, such as the legal effect of mortgages and of other instruments evidencing creditors' rights. Otherwise it is necessary to impute to the Interstate Commerce Commission the adoption by it of an unrealistic conception of its function in these proceedings; for, if the Court disapproves the plan, the Court is required, by subsection (e) of Section 77, either to dismiss the proceedings or to refer the plan back to the Commission for further action.

The treatment proposed for RFC in the plan certified by the Interstate [1645] Commerce Commission is fully justified on the basis, alone, of RFC's taking in exchange for the $10,000,000 of Trustees' Certificates which it holds an equivalent amount of the new fixed interest bonds provided for in that plan, in lieu of payment in cash of said Trustees' Certificates. No assurance has been af-

forded at any time by any party herein that the $10,000,000 of said new fixed interest bonds can be sold at par, as required in the plan certified by the Interstate Commerce Commission, through private channels. In compensation of the RFC's taking, instead of cash, new fixed interest bonds, for its $10,000,000 of Trustees' Certificates, the plan certified by the Commission allows the RFC MORE new income mortgage bonds and new participating preferred stock, and LESS new common stock than would be allowed to it solely on the basis of the general mortgage bonds pledged with it. This provision is fully warranted in view of the fact that if the plan is effectuated RFC will hold, in lieu of $10,000,000 of short-term Trustees' Certificates which are obligations of the Court's Trustees, $10,000,000 of 35-year bonds which will be obligations of a reorganized company and a much less valuable security.

V.

Should the plan certified by the Interstate Commerce Commission not be approved, RFC urges the following detailed and specific objection to any plan which provides for RFC different and less favorable treatment than is provided for RFC in that plan.

The plan approved by the Commission allocates to the holders of the General Mortgage Bonds of the Debtor a total of $732,010 of new income mortgage bonds and $1,147,955 of new participating pre-

ferred stock, in recognition of the admittedly prior lien of the General and Refunding Mortgage upon $223,732 of cash in the hands of the Mortgage Trustee and upon a note of Tidewater Southern Railroad Company for $508,278 and $1,147,955 par value of capital stock of Tidewater Southern Railroad Company pledged under a General and Refunding Mortgage. Additional new income mortgage bonds and new participating preferred stock are provided in that plan for RFC, in respect of RFC's collateral other than the [1646] General Mortgage Bonds, and in consideration of RFC's accepting, in exchange for the $10,000,000 of Trustees' Certificates which it holds, in lieu of cash payment therefor, the $10,000,000 of new fixed interest bonds provided for in said plan. Should the Court find that there has been error in the construction placed by the Interstate Commerce Commission upon certain provisions of the First Mortgage of the Debtor and the effects which were assumed to follow, necessitating the disapproval of that plan by the Court, then RFC objects to any plan which does not provide for the payment in cash of the $10,000,000 of Trustees' Certificates which RFC holds, and the full recognition, in the new securities allocated to RFC, not only of the collateral pledged with RFC other than General Mortgage Bonds, but also, of the share of the new securities which are allocated to the General Mortgage Bonds to which RFC is entitled by reason

of RFC's first lien on $10,750,000 of General Mortgage Bonds and its second lien on an additional $2,000,000 of General Mortgage Bonds, out of the total $18,999,500 of General Mortgage Bonds issued and outstanding.

VI.

In case the plan certified by the Interstate Commerce Commission is not approved, RFC urges the following claim for equitable treatment:

(a) The $10,000,000 of Trustees' Certificates which RFC now holds should be paid in cash with accrued interest.

(b) Full recognition, in the new securities allocated to RFC should be had, not only of the collateral pledged with RFC other than General Mortgage Bonds, but also, of the share of the new securities which are allocated to the General Mortgage Bonds to which RFC is entitled by reason of RFC's first lien on $10,750,000 of General Mortgage Bonds and its second lien on an additional $2,000,000 of General Mortgage Bonds, out of the total $18,999,500 of General Mortgage Bonds issued and outstanding.

Wherefore, RFC prays that the plan of reorganization certified by the Interstate Commerce Commission be approved, and, if that plan be not so approved, that no plan be approved that does not give due effect to RFC's [1647] objection and its claim for equitable treatment, herein stated.

Dated at Washington, D. C., the 5th day of December, 1939.

[Title of District Court and Cause.]

DESIGNATION BY APPELLEES, FREDERICK H. ECKER, JOHN W. STEDMAN AND REEVE SCHLEY, AS A COMMITTEE FOR A GROUP OF INSTITUTIONAL HOLDERS OF FIRST MORTGAGE BONDS OF THE WESTERN PACIFIC RAILROAD COMPANY, AND CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO AND SAMUEL ARMSTRONG, AS TRUSTEES UNDER THE FIRST MORTGAGE DATED JUNE 26, 1916, OF THE WESTERN PACIFIC RAILROAD COMPANY, OF ADDITIONAL PORTIONS OF THE RECORD, PROCEEDINGS AND EVIDENCE TO BE INCLUDED IN THE RECORD ON APPEAL.

Pursuant to the provisions of Rule 75(a) of the Federal Rules of Civil Procedure and of Rule

19(6). of the Circuit Court of Appeals for the Nint . Circuit, Frederick H. Ecker, John W. Stedman and Reeve Schley (hereinafter referred to as the Institutional Committee), as a Committee for a Group of institutional holders of First Mortgage Bonds of The Western Pacific Railroad Company (hereinafter referred to as the Debtor), and Crocker First National Bank of San Francisco and Samuel Armstrong, as Trustees under the First Mortgage dated June 26, 1916, of the Debtor (hereinafter referred to as the First Mortgage Trustees), appellees in connection with the appeals taken by the Debtor, The Western Pacific Railroad Corporation, A. C. James Co., a corporation, The Railroad Credit Corporation and Irving Trust Company, as Trustee under the General and [1650] Refunding Mortgage dated January 1, 1932, of the Debtor, pursuant to notices filed September 20, 1940 (hereinafter together referred to as the appellants), hereby designate the following portions of the record, proceedings and evidence to be included in the record on appeal to the Circuit Court of Appeals for the Ninth Circuit in addition to the portions of such record, proceedings and evidence heretofore on October 10, 1940, designated by the appellants:

1. The verified statement of Crocker First National Bank of San Francisco, as Corporate Trustee under the Debtor's First Mortgage, filed herein on September 4, 1935, and showing the principal amount of First Mortgage Bonds outstanding under said First Mortgage.

2. Opinion and Order entered November 9, 1935, of the District Court confirming appointment of Trustees of the Debtor.

3. Petition of the First Mortgage Trustees for an order impounding income, for leave to intervene, and other relief, filed March 5, 1936, and Order to Show Cause, dated March 5, 1936, fixing time and place of hearing on said Petition.

4. Order entered March 9, 1936, permitting First Mortgage Trustees to intervene and making provision as to rights of said Trustees with respect to income of the Debtor.

5. Petition dated June 25, 1936, of the Institutional Committee for leave to intervene in proceedings before the Interstate Commerce Commission and filed on or about June 26, 1936.

6. Order of Interstate Commerce Commission [165] entered July 9, 1936, permitting intervention of Institutional Committee in proceedings before said Commission.

7. Petition dated October 23, 1936, of the First Mortgage Trustees for leave to intervene before the Interstate Commerce Commission and filed on October 26, 1936.

8. The exceptions to the proposed report dated August 2, 1937, of the Bureau of Finance of the Interstate Commerce Commission, filed on behalf of the Institutional Committee and on behalf of the First Mortgage Trustees, if such exceptions are not already included in designation No. (24) of the appellants, filed herein on October 10, 1940.

9. Replies of the several parties to the exceptions of the parties to the proposed report of the Bureau of Finance of the Interstate Commerce Commission dated August 2, 1937.

[Endorsed]: Filed Oct. 21, 1940. [1654]

[Title of District Court and Cause.]

PETITION RESPECTING THE SALE OR DISPOSITION OF COLLATERAL BY RECONSTRUCTION FINANCE CORPORATION, THE RAILROAD CREDIT CORPORATION AND A. C. JAMES CO. [1655]

To the Honorable the Judges of the District Court of the United States for the Northern District of California, Southern Division.

Now comes The Western Pacific Railroad Company, debtor in the above proceeding, and respectfully represents to the Court:

First: That Reconstruction Finance Corporation is a corporation created by Act of Congress approved January 22, 1932, and certain Acts supplementary thereto and amendatory thereof; that The Railroad Credit Corporation is a corporation organized and doing business under and by virtue of the laws of the State of Delaware; and that A. C. James Co. is a corporation organized and doing business under and by virtue of the laws of the State of Delaware.

Second: That under authority of the Interstate Commerce Commission the debtor from time to time borrowed sums of money from Reconstruction Finance Corporation, the amount whereof as of June 30, 1935, after crediting certain amounts repaid thereon, is $2,963,000. That these loans are evidenced by promissory notes a copy of one of

which is hereto annexed and made a part hereof and marked Exhibit "A." [1656]

Third: That the debtor from time to time has borrowed from The Railroad Credit Corporation sums of money, the amount whereof as of June 30, 1935, after crediting certain amounts repaid thereon, is $2,538,956. That these loans are evidenced by promissory notes, a copy of one of which is hereto annexed and made a part hereof and marked Exhibit "B."

Fourth: That the debtor from time to time has borrowed from A. C. James Co. sums of money which as of June 30, 1935, amount to $4,999,800. These loans are evidenced by promissory notes, a copy of one of which is hereto annexed and made a part hereof and marked Exhibit "C."

Fifth: All of the said notes are secured by the deposit and pledge, in varying amounts, of General and Refunding Mortgage Bonds of the debtor dated January 1, 1932. The aggregate amount of General and Refunding Bonds pledged under said notes is $18,999,500, or a sum amounting to more than 180% of the face amount of the notes held by the above named corporations as of June 30, 1935. In addition to the General and Refunding Mortgage Bonds so pledged there are pledged under certain of said notes other collateral having a substantial value, the exact amount of which the debtor is unable to estimate at the present time and under prevailing market conditions.

Sixth: Each of said notes held by Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co contains provisions that upon non-performance of any of the covenants or agreements made with the payee, or upon the non-payment of the liabilities contained in such notes, or upon default in payment of interest thereon, or in case of the insolvency of the debtor, or the appointment of a receiver of the debtor or of its property, or in case of an assignment for the benefit of creditors, the payee may sell, assign, transfer and deliver any of the said collateral security, either at any broker's board or at public or private sale, and for cash, or upon credit, or for future delivery, without demand, advertisement, or notice of the time or place of sale.

[1657]

Seventh: That by reason of the fact that the said notes of the debtor are held by corporations, the debtor believes that there is danger that certain of the noteholders may claim that one or more of the events entitling them to sell said collateral have occurred, and may proceed to exercise their rights of sale under said collateral notes, which action the debtor fears would precipitate similar action by other holders of pledged collateral.

Eighth: That sale of such collateral, including, as it does, an amount of General and Refunding Mortgage Bonds of the debtor, largely in excess of the amount of indebtedness secured thereby, would greatly increase the debt of the corporation

and would cause a substantial and irreparable loss to the trust estate, and would impede, if not render abortive, the plan of reorganization which the debtor proposes forthwith to submit to the Interstate Commerce Commission, and the sale of such collateral during the progress of the reorganization proceeding would require such changes in detail from time to time as to force an abandonment of the proceedings. For this reason the debtor submits that the maintenance of the status quo for a reasonable length of time is necessary to enable the debtor to perfect a reorganization under the plan which it is to submit to the said Commission.

Ninth: That the debtor has no adequate remedy at law and accordingly files this petition in this Court pursuant to Section 77 of Chapter VIII of the Acts of Congress relating to bankruptcy, whereunder this Court, having approved the debtor's petition, has during the pendency of these proceedings exclusive jurisdiction of the debtor and its property, wherever located.

Tenth: Wherefore, the debtor asks that this Court include in its Order approving the petition filed herein under the aforesaid Section 77, a provision that all persons and corporations holding collateral heretofore pledged by the debtor as security for its [1658] notes and obligations, be and each of them is restrained and enjoined from selling, converting, or otherwise disposing of, such col-

lateral or any part thereof until further Order of this Court.

THE WESTERN PACIFIC RAILROAD COMPANY,
Debtor.

(EXHIBIT "A")

NOTE

New York, New York,
August 1, 1932.

$136,045.00

On or before Aug. 1, 1935, The Western Pacific Railroad Company, a corporation of the State of California (hereinafter called the "Railroad Company"), for value received promises to pay to the Reconstruction Finance Corporation (hereinafter called the "payee"), or order, at the Federal Reserve Bank of New York, in New York, New York, in gold coin of the United States of America of the present standard of weight and fineness, One Hundred Thirty-six Thousand and Forty-five Dollars, with interest at the rate of six per cent (6%) per annum from the date hereof, payable quarterly on the first day of November, February, May, and August in each calendar year and until payment of said principal sum, with the option on the part of the said Railroad Company to repay the whole or any part of said principal sum, with accrued interest thereon, at any time before maturity; having deposited with the said payee as collateral security for the payment

of this note or any extension or renewal thereof, or for the payment of any other liability or liabilities of the Railroad Company to the said payee due or to become due, or which may hereaftter be contracted or existing, including, among said liabilities, note of the Railroad Company for $799,000, maturing on before March 1, 1935, and the note of the Railroad Company for $734,584, maturing on or before June 29, 1935; both payable to Reconstruction Finance Corporation, or order, the following described property, which shall be applied pari passu and without preference to all of said notes and liability or liabilities:

$8,750,000 principal amount of The Western Pacific Railroad Company's General and Refunding Mortgage, Series "A" 5% Bonds of 1957;

100,000 principal amount of Tidewater Southern Railway Company's First Mortgage 5% 30-year Sinking Fund Bonds, due 1942;

All of the right, title and interest of The Western Pacific Railroad Corporation in 150,000 shares of the Common Capital Stock of The Denver & Rio Grande Western Railroad Company represented by stock trust certificates, subject, among other things, to all covenants and agreements made in a certain agreement dated June 15, 1923, between The Western Pacific Railroad Corporation and the Missouri Pacific Railroad Company.

The Railroad Company hereby agrees, on demand of the payee, to deposit with the payee such additional security as it may from time to time demand, and further agrees that the securities hereby pledged, together with any that may be pledged hereafter or may have been pledged heretofore as security for this or any other obligation of the Railroad Company to the payee, shall be applicable in like manner to secure the payment of any and all such obligations. And all such securities in the hands of the payee shall stand as one general continuing collateral security for the whole of said obligations so that the deficiency on any one may be made good by enforcement of the rights and remedies of the payee in respect of the sale of collateral or otherwise as to the rest. And the Railroad Company hereby gives to the payee a lien for the amount of all the liabilities aforesaid upon all other property of the Railroad Company at any time coming into the possession of the payee. And the Railroad Company hereby agrees to remain responsible for any deficiency in payment, waiving any benefit, exemption, or privilege under any law now or hereafter to be in force.

The Railroad Company further agrees that on the nonperformance of the foregoing agreement to furnish additional security upon demand of the payee and/or upon nonperformance of any of the covenants or agreements made with and on file with the Interstate Commerce Commission or the Reconstruction Finance Corporation and/or the payee, as

hereinafter defined, or upon the nonpayment of any of the abovementioned liabilities, or upon default in payment of interest on any of the said liabilities as the same may become due, or in case of insolvency or the appointment of a receiver for the Railroad Company or of its property, or assignment for the benefit of creditors, then in any such case the payee is hereby authorized to sell, assign, transfer, and deliver any or all of said securities or interest therein or any substitute therefor, or any additions thereto, or any such other property, at such time or times to such person or persons, and in such several parts or parcels as the payee may decide, and to sell the whole or any of such parts or parcels or interest therein, either at any broker's board or at public or private sale, either for cash, upon credit, or for future delivery, at the option of the payee, without demand, advertisement, or notice of the time or place of sale or adjournments thereof which are hereby expressly waived. Upon the nonpayment or the nonfulfillment of any of the conditions of this note, or upon any sale of any of the collateral security held by the payee or upon the appointment of a receiver of the Railroad or of its property or upon an assignment for the benefit of creditors as aforesaid, then the whole or any designated part of the liabilities of the Railroad Company to the payee shall mature at the election of the payee by presentation thereof for payment.

In case of any sale by the payee in pursuance of the terms of the last preceding paragraph of any or

all of said securities or interest therein or other property on credit or for future delivery, such securities or such interest therein or such other property shall remain vested in and shall be retained by the payee until the sale price therefor be paid by the purchaser, but the payee shall incur no liability in case of failure by the purchaser to take up and pay for such securities or such interest or such other property so sold. In case of any such failure the payee shall have the same right to dispose of said securities and interest therein and such other property as are given in the last preceding paragraph to the same effect as though no sale had theretofore been made.

At any sale under the provisions of this instrument, the payee may itself purchase the whole or any part of the securities sold or interest therein or other property, free from all right of redemption on the part of the Railroad Company, which right is hereby waived and released. In case of any sale the payee may first deduct all expenses incident to the collection, sale, and delivery of the securities or properly so sold, and any other expenses incurred by the payee in connection with such sale; and may then apply the residue to any one, or more, or all, of said liabilities, whether due or not due, returning the overplus, if any, to the Railroad Company, which shall remain liable to the payee for any deficiency remaining or existing after such sale. And the Railroad Company hereby further authorizes the payee, at its option, at any time, to appropriate and apply

to the payment of any of the aforesaid liabilities, whether now existing or hereafter contracted, any and all property now or hereafter in the hands of the payee belonging to the Railroad Company, whether the aforesaid liabilities are then due or not due.

The Railroad Company further agrees that, upon any transfer of this note, the payee may deliver the securities or property held as security, or any part thereof, or interest therein, to the transferee, who shall thereupon become vested with all the powers and rights above given to the payee in respect thereto for the purpose of securing and enforcing the payment to the holder of the whole or any part of the indebtedness evidenced by this note. And the payee shall thereafter be forever relieved and fully discharged from any liability or responsibility in the matter to the Railroad Company or to its successors or assigns.

The Railroad Company and indorsers and guarantors hereby waive presentment, protest, and notice of dishonor, and agree to remain bound for the payment of this note and all interest and charges thereon, and that the lien hereof and the pledge hereunder shall remain undisturbed, notwithstanding any extension of time, substitution of collateral, or other indulgence granted by the holder of this note, hereby waiving all notice of such extension, substitution, or other indulgence.

In the event this note, or any part thereof, is collected by an attorney, either with or without suit,

the Railroad Company agrees to pay a reasonable attorney's fee and cost of collection.

The term payee shall mean and include the Reconstruction Finance Corporation and/or any successor, or assign, or liquidator, or transferee of the Reconstruction Finance Corporation or any other transferee of this note.

In Witness Whereof, The Railroad Company has caused this note to be executed by its president or vice-president and its corporate seal to be hereunto affixed by its secretary or assistant secretary, this 1st day of August, 1932.

Assistant Secretary. [1661]

EXHIBIT "B"

NOTE OF BORROWING CARRIER

New York, N. Y.,
June 29, 1932.

$1,303,000.

On demand, but if no demand is made, then on or before February 28, 1934, The Western Pacific Rail-

road Company, a corporation of the State of California (hereinafter called the "Railroad Company"), for value received, promises to pay to The Railroad Credit Corporation (hereinafter called the "payee"), or order, at its office in Washington, D. C., in gold coin of the United States of America of the present standard of weight and fineness, One Million Three Hundred Three Thousand Dollars, with interest thereon payable semi-annually at the rate of 2½ per cent per annum from the date hereof, to and including the 30th day of June, 1932, and thereafter at rates to be fixed as provided in the Marshalling and Distributing Plan, 1931, and until payment of said principal sum, with the option on the part of the Railroad Company to repay the whole or any part of said principal sum, with accrued interest thereon, at any time before maturity; having deposited with the payee as collateral security for the payment of this note and any extension or renewal thereof, as well as for the payment of any other liability or liabilities of the Railroad Company to the payee due or to become due, or which may hereafter be contracted or existing, the following described property: [1662]

In addition thereto the Railroad Company agrees subject to the approval of the Interstate Commerce Commission when required by law, to pledge and does hereby pledge with the payee, the Railroad Company's distributive share in the fund established under the aforesaid Plan, as the same may

e at any time and from time to time determined, nd also all right, title and interest of the Railroad Company in and to any and all securities now or hereafter deposited as collateral security for any oan or loans from the Reconstruction Finance Corporation to the Railroad Company, subject always o the lien thereon of said Reconstruction Finance Corporation.

The Railroad Company hereby agrees, on demand f the payee, to deposit with the payee such additional security as the payee may from time to time demand, and further agrees that the securities hereby pledged, together with any that may be pledged hereafter or may have been pledged heretofore as security for this or any other obligation f the Railroad Company to the payee, shall be applicable in like manner to secure the payment of any nd all such obligations. And all such securities in he hands of the payee shall stand as one general ontinuing collateral security for the whole of said bligations so that the deficiency on any one may be nade good by enforcement of the rights and remeies of the payee in respect of the sale of collateral r otherwise as to the rest. And the Railroad Company hereby gives to the payee a lien for the amount f all the liabilities aforesaid upon all other property of the Railroad Company at any time coming to the possession of the payee. And the Railroad Company hereby agrees to remain responsible or any deficiency in payment, waiving any benefit,

exemption, or privilege under any law now or hereafter to be in force.

The Railroad Company further agrees that on the nonperformance of the foregoing agreement to furnish additional security upon demand of the payee and/or upon nonperformance of any of the covenants or agreements made with the payee, as hereinafter defined, or upon the nonpayment of any of the above mentioned liabilities, or upon default in payment of interest on any of the said liabilities as the same may become due, or in case of insolvency or the appointment of a receiver for the Railroad Company or of its property, or assignment for the benefit of creditors, then in any such case the payee is hereby authorized to sell, assign, transfer, and deliver any or all of said securities or interest therein or any substitute therefor, or any additions thereto, or any such other property, at such time or times, to such person or persons, and in such several parts or parcels as the payee may decide, and to sell the whole or any of such parts or parcels or interest therein, either at any broker's board or at public or private sale, either for cash, upon credit, or for future delivery, at the option of the payee, without demand, advertisement, or notice of the time or place of sale or adjournments thereof which are hereby expressly waived. Upon the nonpayment or the nonfulfillment of any of the conditions of this note, or upon any sale of any of the collateral security held by the payee or upon the appointment of a receiver of the Railroad Company or of its

property or upon an assignment for the benefit of creditors as aforesaid, then the whole or any designated part of the liabilities of the Railroad Company to the payee shall mature at the election of the payee by presentation thereof for payment.

In case of any sale by the payee in pursuance of the terms of the last preceding paragraph of any or all of said securities or interest therein or other property on credit or for future delivery, the payee shall incur no liability in case of failure by the purchaser to take up and pay for such securities or such interest or such other property so sold. In case of any such failure the payee shall have the same right to dispose of said securities and interest therein and such other property as are given in the last preceding paragraph to the same effect as though no sale had theretofore been made.

At any sale under the provisions of this instrument, the payee may itself purchase the whole or any part of the securities sold or interest therein or other property, free from all right of redemption on the part of the Railroad Company, which right is hereby waived and released. In case of any sale the payee may first deduct all expenses incident to the collection, sale, and delivery of the securities or property so sold, and any other expenses incurred by the payee in connection with such sale; and may then apply the residue to any one, or more, or all, of said liabilities, whether due or not due, returning the overplus, if any, to the Railroad Company, which shall remain liable to the payee for any

deficiency remaining or existing after such sale. And the Railroad Company hereby further authorizes the payee, at its option, at any time, to appropriate and apply to the payment of any of the aforesaid liabilities, whether now existing or hereafter contracted, any and all property now or hereafter in the hands of the payee belonging to the Railroad Company, whether the aforesaid liabilities are then due or not due.

The Railroad Company further agrees that, upon any transfer of this note, the payee may deliver the securities or property held as security, or any part thereof, or interest therein, to the transferee, who shall thereupon become vested with all the powers and rights above given to the payee in respect thereto for the purpose of securing and enforcing the payment to the holder of the whole or any part of the indebtedness evidenced by this note. And the payee shall thereafter be forever relieved and fully discharged from any liability or responsibility in the matter of the Railroad Company or to its successors or assigns.

The Railroad Company and indorsers and guarantors hereby waive presentment, protest, and notice of dishonor, and agree to remain bound for the payment of this note and all interest and charges thereon, and that the lien hereof and the pledge hereunder shall remain undisturbed, notwithstanding any extension of time, substitution of collateral, or other indulgence granted by the holder of this

note, hereby waiving all notice of such extension, substitution, or other indulgence.

In the event this note, or any part thereof, is collected by an attorney, either with or without suit, the Railroad Company agrees to pay a reasonable attorney's fee and cost of collection.

The term payee shall mean and include The Railroad Credit Corporation and/or any successor, or assign, or liquidator, or transferee of The Railroad Credit Corporation or any other transferee of this note.

Until this note and interest thereon have been fully paid, the Railroad Company agrees not to pay any dividend on any of its capital stock (except on stock, if any, on which non-payment of a specific dividend constitutes a default).

In witness whereof the Railroad Company has caused this note to be executed by its Vice-President and attested or countersigned by its Assistant Secretary, both being thereunto duly authorized, this 29th day of June, 1932.

EXHIBIT "C"

March 28, 1932.

$347,000.

Three years after date, The Western Pacific Railroad Company, a corporation of the State of California, (hereinafter called the "Railroad Company") for value received, promises to pay to the A. C. James Co., a Delaware corporation (hereinafter called the "payee") or order, at the office of the payee at No. 40 Wall Street, in the City of New York, in gold coin of the United States of America of the present standard of weight and fineness, Three Hundred Forty-seven Thousand Dollars ($347,000), with interest at the rate of Five per cent (5%) per annum from the date hereof, payable quarterly on the first day of April, July, October and January in each year and until payment of said principal sum; having deposited with said payee as collateral security for the payment of this or any other liability or liabilities of the Railroad Company to the payee due or to become due, or which may hereafter be contracted or existing, the following described property:

$433,500. principal amount of the Railroad Company's General and Refunding Mortgage Gold Bonds, Series A.

The Railroad Company hereby agrees to deposit with the payee such additional security as the payee may from time to time demand, and also hereby gives to the payee a lien for the amount of all the

liabilities aforesaid upon all property of the Railroad Company at any time coming into the possession of the payee.

On the nonperformance of the foregoing agreement as to furnishing additional security, or upon the nonperformance of any of the covenants or agreements of the Railroad Company in its First Mortgage of June 26, 1916, its General and Refunding Mortgage of January 1, 1932, or in an obligation dated March 1, 1932 made by the Railroad Company with and on file with the Reconstruction Finance Corporation, or upon the nonpayment of any of the above mentioned liabilities, or in case of insolvency or the appointment of a receiver for the Railroad Company or of its property, then in any such case the payee is hereby authorized to sell, assign and deliver, the said property or any substitute therefor, or any additions thereto, or any such other property, at such time or times and in such several parts or parcels as the payee may decide, and to sell the whole or any said parts or parcels, either at any broker's board or at public or private sale, either for cash, upon credit, or for future delivery, at the option of the payee, without advertisement, or notice, which are hereby expressly waived. Upon the non-payment or the nonfulfillment of any of the conditions of this note, then the whole or any designated part of the liabilities of the Railroad Company to the payee shall mature at the election of the payee by presentation thereof

for [1664] payment. In case of any sale by the payee of any of said property on credit or for future delivery, the property sold shall be retained by the payee until the selling price is paid by the purchaser, but the payee shall incur no liability in case of failure of the purchaser to take up and pay for the property so sold.

In case of any such failure the property may be again sold. At any sale hereunder the payee may itself purchase the whole or any part of the property sold, free from all right of redemption on the part of the Railroad Company, which is hereby waived and released. In case of any sale the payee may first deduct all the expenses of collection, sale, and delivery of the property so sold, and any other expenses incurred by the payee in connection with such sale; and may then apply the residue to any one, or more, or all, of said liabilities, whether due or not due, returning the overplus, if any, to the Railroad Company, which shall remain liable to the payee for any deficiency arising upon any such sale. The Railroad Company does hereby further authorize the payee at its option at any time to appropriate and apply to the payment of any of said liabilities, whether now existing or hereafter contracted, any and all property now or hereafter in the hands of the payee belonging to the Railroad Company, whether the said liabilities are then due or not due. The Railroad Company further agrees that, upon any transfer of this note, the payee may

deliver the property held as security, or any part thereof, to the transferee, who shall thereupon become vested with all the powers and rights above given to the payee in respect thereto, and the payee shall thereafter be forever relieved and fully discharged from any liability or responsibility in the matter.

The term "payee" shall mean and include the A. C. James Co. and/or any successor or assign or liquidator or transferee of said A. C. James Co. or any other transferee of this note.

[Title of District Court and Cause.]

PETITION OF REORGANIZATION TRUSTEES FOR SUPPLEMENTAL ORDER AUTHORIZING THEM TO BORROW $10,000,000 FROM RECONSTRUCTION FINANCE CORPORATION AND TO EVIDENCE AND SECURE SAID LOAN BY THE ISSUANCE OF THEIR CERTIFICATES OF INDEBTEDNESS.

T. M. Schumacher and Sidney M. Ehrman, the duly appointed and qualified Trustees of the properties of the debtor above named, hereby represent to the court and petition as follows:

I.

On October 5, 1938, upon hearing after due notice and with the approval of the Interstate Commerce Commission in accordance with Section 20a of the Interstate Commerce Act, [1711] this court made its order (1) finding (a) that your petitioners had theretofore issued and there were then outstanding their certificates of indebtedness in the principal amount of $10,000,000, maturing and payable on December 1, 1938, (b) that said certificates represented an indebtedness all of which was authorized and incurred for the purpose of meeting the cost of doing certain work upon and acquiring certain equipment for the railroad of the debtor which it was necessary should be done and acquired in order that said railroad might be operated with safety and reasonable efficiency, that its physical

elements might be conserved and its existing business retained and that it might furnish to the public service in the way of transportation of persons and property adequately responsive to the reasonable requirements and demands of the public upon said railroad for such service, (c) that it was necessary that your petitioners provide themselves with funds for payment of said certificates at their maturity in order to insure against a default upon them and (d) that the only means your petitioners had for securing the necessary funds with which to meet the principal of said certificates when it falls due was the issuance by them of new certificates of indebtedness in the amount of such principal, and (2) authorizing and empowering your petitioners, for the purpose of paying at maturity their said certificates of indebtedness then outstanding, to issue and to sell their certificates of indebtedness in the aggregate principal amount of $10,000,000 and prescribing the terms of such certificates and the conditions of their sale. The necessity for your petitioners to provide themselves with funds for payment of said outstanding certificates at their maturity in order to insure against a default upon them and to issue for said purpose new certificates of indebtedness in the [1712] amount of the principal of said outstanding certificates, as found by said order, continues to exist. Your petitioners have made inquiries and conducted negotiations looking to the issuance and sale of the certificates so authorized but have not

yet been able to sell the same upon satisfactory terms or to arrange to do so. Your petitioners believe, however, that they can obtain a loan from the Reconstruction Finance Corporation in the said sum of $10,000,000, such loan to be evidenced and secured by the issuance to said Reconstruction Finance Corporation of the certificates of indebtedness of your petitioners in that aggregate amount maturing either December 1, 1939, or December 1, 1940, and bearing interest at the rate of 4 per cent per annum. It is in the interest of their trust estate that your petitioners be authorized to borrow said sum from Reconstruction Finance Corporation in order to insure that your petitioners have the necessary funds with which to meet the principal of said outstanding certificates when it falls due, in case they are unable shortly to sell, upon more favorable terms, their certificates as already authorized. If such loan is made, the terms of the certificates of indebtedness to be issued to evidence and secure the same should be the same as those authorized or prescribed by said order of October 5, 1938. To consummate and fully authorize the making of said loan it is necessary for your petitioners to make formal application for the same to the Reconstruction Finance Corporation and to secure the approval of the loan by the Interstate Commerce Commission.

II.

For the purpose of meeting the requirements of Section 4 of Public Act No. 35 of the Seventy-

Third Congress of the United [1713] States, approved June 10, 1933, it will be necessary, if said loan is made, for your petitioners to enter into an agreement with the Reconstruction Finance Corporation substantially in the form attached hereto and marked Exhibit I.

Wherefore, your petitioners pray:

1. That upon the filing of this petition the court set the same for hearing and prescribe the notice to be given thereof and authorize your petitioners forthwith to apply to the Reconstruction Finance Corporation for said loan and to the Interstate Commerce Commission for its approval thereof.

2. That upon the hearing of said petition the court make its order supplemental to said order of October 5, 1938, whereby, in addition to the authority given by said order and without derogation therefrom, your petitioners be authorized, in case they find it advantageous to their trust so to do, in lieu of selling their certificates of indebtedness as authorized by said order of October 5, 1938, to borrow from the Reconstruction Finance Corporation the sum of $10,000,000 for the purpose of paying at maturity their certificates of indebtedness now outstanding, and to evidence and secure such loan by the issuance to that corporation of their certificates of indebtedness in said aggregate amount, the terms of said certificates to be the same as those of the certificates authorized by said order of October 5, 1938.

3. That your petitioners be further authorized by such supplemental order to make an agreement with the Reconstruction Finance Corporation substantially in the form of the agreement attached hereto as Exhibit I.

WARREN OLNEY, JR.,
Counsel for Petitioners.

EXHIBIT I

....., 1938.

Reconstruction Finance Corporation,
Washington, D. C.

Dear Sirs:

Pursuant to the report and order of the Interstate Commerce Commission dated ....., 1938 in Finance Docket No. ....., approving a loan by the Reconstruction Finance Corporation (hereinafter called Reconstruction) to the undersigned Trustees in Reorganization of The Western Pacific Railroad Company, a debtor, (hereinafter called the Trustees), in the total amount of $10,000,000, the Trustees as such and not individually hereby agree with Reconstruction as follows:

1. The term "compensation" as used in this agreement shall include all salaries, bonuses, commissions or other payment, direct or indirect, in money or otherwise, for personal services.

2. Attached hereto as Exhibit "A" is a schedule, consisting of one sheet, showing as of October ....., 1938, the compensation of officers and employees of the Trustees at a rate in excess of $4800 per annum. Attached hereto as Exhibit "B" is a schedule, consisting of ..... sheets, showing as of ....., 1938, the compensation of all officers and employees of the Trustees receiving compensation at a rate of $4800 per annum or less. Attached hereto as Exhibit "C" is a statement, consisting of one sheet, showing compensation paid by any

company controlling or affiliated with or controlled by the debtor to any officer or employee of the Trustees. In addition to the compensation shown by the foregoing exhibits the Directors of The Western Pacific Railroad [1716] Company who are not officers or employees of the Trustees are each paid a fee of $20 for each meeting attended and these fees are paid by the Trustees. The total of such fees paid in 1937 was $460. No fees are paid other Directors.

3. While said loan from Reconstruction is outstanding and unpaid, the Trustees will not, without in each case obtaining the prior written consent of Reconstruction,

(a) Increase the compensation (either directly or through appointment to any additional office or position) of (1) any officer or employee shown on said Exhibit "A" above the rate shown on said Exhibit "A" for such officer or employee, or (2) of any officer or employee shown on said Exhibit "B" to a rate in excess of $4800 per annum; or (3) of any Director.

(b) Elect, appoint or otherwise engage or employ any person to or for any office or position not shown on such schedules at a compensation in excess of $4800 per annum,

4. Nothing contained in this agreement shall be deemed to prohibit the Trustees from effecting any reduction in compensation below the respective amounts set forth in Exhibit "A" or Exhibit "B," as the case may be, for the officers and employees

therein specified, or in case of a vacancy of any of the offices or positions shown on Exhibit "A," from filling such vacancy through promotion, new employment or otherwise, at the rate of compensation for such office or position set forth on Exhibit "A," or to require the Trustees to violate any of the provisions of the Railway Labor Act or of any existing or future agreements made with labor organizations. [1717]

5. If any company controlling or affiliated with or controlled by the debtor shall, directly or indirectly, increase the compensation paid by it to any officer or employee of the Trustees so as to increase the total compensation of such officer or employee above the amount thereof shown on said Exhibit "A," Exhibit "B" or Exhibit "C," the compensation payable to such officer or employee by the Trustees shall be forthwith correspondingly reduced by them so as to avoid such increase in total compensation. The Trustees will give immediate notice to Reconstruction of any such increase by any such company of such compensation paid to any officer or employee of the Trustees.

6. From time to time on request of Reconstruction, the Trustees will furnish to Reconstruction, in the form attached, schedules of all compensation currently paid to the officers and employees of the Trustees.

7. During the life of said loan the Trustees will not permit the creation of any lien upon the property of said The Western Pacific Railroad

Company, or upon the trust estate of the Trustees, which shall have priority over the lien of the Trustees' Certificates to be issued by the Trustees as security for said loan, except the liens of current taxes and such necessary expenses of the Trustees as may be allowed by the Court and given such priority.

8. This agreement shall be binding on the successors of the Trustees and shall inure to the benefit of the successors and assigns of Reconstruction.

T. M. SCHUMACHER,
SIDNEY M. EHRMAN,
Trustees in Reorganization of The Western Pacific Railroad Company.

[Endorsed]: Filed Oct. 21, 1938. [1718]

[Title of District Court and Cause.]

ORDER PROVIDING FOR HEARING UPON PETITION OF REORGANIZATION TRUSTEES FOR SUPPLEMENTAL ORDER AUTHORIZING THEM TO BORROW $10,000,000 FROM RECONSTRUCTION FINANCE CORPORATION AND TO EVIDENCE AND SECURE SAID LOAN BY THE ISSUANCE OF THEIR CERTIFICATES OF INDEBTEDNESS.

Upon due consideration of the petition of T. M. Schumacher and Sidney M. Ehrman, Trustees of the properties of the debtor, filed herein and praying for a supplemental order authorizing said

Trustees to borrow $10,000,000 from the Reconstruction Finance Corporation and to evidence and secure said loan by the [1719] issuance of their certificate of indebtedness,

It is hereby ordered as follows:

1. That said petition shall be and it hereby is set for hearing before this court on November 7th, 1938, at 10 o'clock A. M.

2. That the said Trustees be and they hereby are directed to give notice of the said hearing. That such notice be given by the publication, on or before October 22, 1938, of a notice substantially in the following form in two newspapers of general circulation published in the City and County of San Francisco, State of California, to-wit: The Recorder and the San Francisco Examiner.

LEGAL NOTICE

In the District Court of the United States for the Northern District of California, Southern Division.

No. 26591-S

In the Matter of
THE WESTERN PACIFIC RAILROAD COMPANY, Debtor.

NOTICE OF HEARING UPON PETITION OF REORGANIZATION TRUSTEES FOR SUPPLEMENTAL ORDER AUTHORIZING THEM TO BORROW $10,000,000 FROM RECONSTRUCTION FI-

NANCE CORPORATION AND TO EVIDENCE AND SECURE SAID LOAN BY THE ISSUANCE OF THEIR CERTIFICATES OF INDEBTEDNESS.

Notice is hereby given, pursuant to the order of the above named court, that a hearing will be held before the Honorable A. F. St. Sure, Judge of the above entitled court, at the Courtroom of the said Judge in the United States Postoffice and Courtroom Building, Seventh and Mission Streets, in the City and County of San Francisco, State of California, on November 7th, 1938, at 10 o'clock A. M., or as soon thereafter as the same may be heard, upon the petition of T. M. Schumacher and Sidney M. Ehrman, Trustees in Reorganization of The Western Pacific Railroad Company, praying for an order supplemental to the order of court of October 5, 1938, authorizing them to borrow $10,000,000 from the Reconstruction Finance Corporation and to evidence and secure said loan by the issuance of their certificates of indebtedness.

T. M. SCHUMACHER,
SIDNEY M. EHRMAN,
Trustees in Reorganization of The
Western Pacific Railroad Company.

[1720]

And by mailing prior to the 23rd day of October, 1938, a copy of this order and of said petition to the following parties:

1. Crocker First National Bank of San Francisco and Samuel Armstrong.

2. Irving Trust Company, as Trustees under indenture securing Debtor's General and Refunding Mortgage Bonds.

3. A. C. James Co.

4. Reconstruction Finance Corporation.

5. The Railroad Credit Corporation.

6. Fidelity-Philadelphia Trust Co.

7. The Chase National Bank of the City of New York, as Trustees under agreement dated March 15, 1924, covering Equipment Trust Certificates.

8. The Chase National Bank of the City of New York, as Trustee under agreement dated May 1, 1929, covering Equipment Trust Certificates.

9. The Western Pacific Railroad Company.

10. The Western Pacific Railroad Corporation.

11. The Western Realty Company.

12. Central Hanover Bank and Trust Company, as Trustee under agreement dated February 1, 1937, covering Equipment Trust Certificates.

It is further ordered that the said Trustees be and they are hereby authorized to make application to the Reconstruction Finance Corporation to borrow said $10,000,000 and to apply to the Interstate Commerce Commission for its approval of said loan.

Dated October 21, 1938.

A. F. ST. SURE,
District Judge.

[Endorsed]: Filed Oct. 21, 1938. [1721]

[Title of District Court and Cause.]

SUPPLEMENTAL ORDER (1) AUTHORIZING REORGANIZATION TRUSTEES TO BORROW $10,000,000 FROM RECONSTRUCTION FINANCE CORPORATION AND TO EVIDENCE AND SECURE SAID LOAN BY THE ISSUANCE OF THEIR CERTIFICATES OF INDEBTEDNESS AND (2) AUTHORIZING AGREEMENT BY REORGANIZATION TRUSTEES WITH RECONSTRUCTION FINANCE CORPORATION.

The petition of T. M. Schumacher and Sidney M. Ehrman, Trustees of the properties of the debtor above named, filed October 21, 1938, for an order supplemental to the court's order of October 5, 1938, whereby the said Trustees (1) would [1722] be authorized, in case they find it advantageous to their trust so to do, in lieu of selling their certificates of indebtedness as authorized by said order of October 5, 1938, to borrow from the Reconstruction Finance Corporation the sum of $10,000,000 for the purpose of paying at maturity their certificates of indebtedness now outstanding, and to evi-

dence and secure such loan by the issuance to that corporation of their certificates of indebtedness in said aggregate amount, and (2) would be authorized to execute an agreement with Reconstruction Finance Corporation in the terms, or substantially in the terms, hereinafter set forth, came on duly to be heard this day. The said Trustees, Crocker First National Bank of San Francisco and Samuel Armstrong, Trustees under the Indenture securing the debtor's First Mortgage Bonds, and Irving Trust Company, Trustee under the indenture securing the debtor's General and Refunding Mortgage Bonds, appeared by their respective counsel, and no other person or party appeared.

The petition was heard and submitted to the court for its decision thereon. The court being now fully advised, makes its findings and order with respect to said petition as follows:

The court finds:

1. Notice of the hearing upon said petition was given to all parties interested as required by law and the previous order of this court.

2. All of the averments of said petition are true.

3. The necessity for said Trustees to provide themselves with funds for payment of their outstanding certificates of indebtedness in the aggregate principal amount of $10,000,000 at their maturity in order to insure against a default upon them and to issue for said purpose new certificates of indebtedness in the [1723] amount of the prin-

cipal of said outstanding certificates, as found by said order of October 5, 1938, continues to exist and it is in the interest of their trust estate that said Trustees be authorized to borrow said sum from Reconstruction Finance Corporation upon the terms stated in said petition.

Now, therefore, it is hereby ordered, adjudged and decreed:

(1) That in addition to the authority given the said Trustees by said order of October 5, 1938, and without derogation therefrom, they be and they are hereby authorized, in case they find it advantageous to their trust so to do, in lieu of selling their certificates of indebtedness as authorized by said order of October 5, 1938, to borrow from the Reconstruction Finance Corporation the sum of $10,000,000 for the purpose of paying at maturity their certificates of indebtedness now outstanding and to evidence and secure such loan by the issuance to that corporation of their certificates of indebtedness in said aggregate amount, bearing interest at the rate of 4 per cent per annum, said certificates to be issued and authenticated as provided in said order of October 5, 1938, and the terms of said certificates to be the same as those of the certificates authorized by said order.

(2) That the Trustees be and they hereby are authorized to make an agreement with the Reconstruction Finance Corporation in the following, or substantially in the following, terms:

....., 1938.

Reconstruction Finance Corporation,
Washington, D. C.

Dear Sirs:

Pursuant to the report and order of the Interstate Commerce Commission dated ....., 1938, in [1724] Finance Docket No. ....., approving a loan by the Reconstruction Finance Corporation (hereinafter called Reconstruction) to the undersigned Trustees in Reorganization of The Western Pacific Railroad Company, a debtor, (hereinafter called the Trustees), in the total amount of $10,000,000, the Trustees as such and not individually hereby agree with Reconstruction as follows:

1. The term "compensation" as used in this agreement shall include all salaries, bonuses, commissions or other payment, direct or indirect, in money or otherwise, for personal services.

2. Attached hereto as Exhibit "A" is a schedule, consisting of one sheet, showing as of October ....., 1938, the compensation of officers and employees of the Trustees at a rate in excess of $4800 per annum. Attached hereto as Exhibit "B" is a schedule, consisting of ..... sheets, showing as of ....., 1938, the compensation of all officers and employees of the Trustees receiving compensation at a rate of $4800 per annum or less. Attached

hereto as Exhibit "C" is a statement, consisting of one sheet, showing compensation paid by any company controlling or affiliated with or controlled by the debtor to any officer or employee of the Trustees. In addition to the compensation shown by the foregoing exhibits the Directors of The Western Pacific Railroad Company who are not officers or employees of the Trustees are each paid a fee of $20 for each meeting attended and these fees are paid by the Trustees. The total of such fees paid in 1937 was $460. No fees are paid other Directors.

3. While said loan from Reconstruction is outstanding and unpaid, the Trustees will not, without in each case obtaining the prior written consent of Reconstruction,

(a) Increase the compensation (either directly or through appointment to any additional office or position) of (1) any officer or employee shown on said Exhibit "A" above the rate shown on said Exhibit "A" for such officer or employee, or (2) of any officer or employee shown on said Exhibit "B" to a rate in excess of $4800 per annum; or (3) of any Director.

(b) Elect, appoint or otherwise engage or employ any person, to or for any office or position not shown on such schedules at a compensation in excess of $4800 per annum.

4. Nothing contained in this agreement shall be deemed to prohibit the Trustees from effecting any reduction in compensation below the respective amounts set forth in Exhibit "A" or Exhibit "B," as the case may be, for the officers and employees therein specified, or in case of a vacancy of any of the offices or positions shown on Exhibit "A," from filling such vacancy through promotion, new employment or otherwise, at the rate of compensation for such office or position set forth on Exhibit "A," or to require [1725] the Trustees to violate any of the provisions of the Railway Labor Act or of any existing or future agreements made with labor organizations.

5. If any company controlling or affiliated with or controlled by the debtor shall, directly or indirectly, increase the compensation paid by it to any officer or employee of the Trustees so as to increase the total compensation of such officer or employee above the amount thereof shown on said Exhibit "A," Exhibit "B" or Exhibit "C," the compensation payable to such officer or employee by the Trustees shall be forthwith correspondingly reduced by them so as to avoid such increase in total compensation. The Trustees will give immediate written notice to Reconstruction of any such increase by any such company of such compensation paid to any officer or employee of the Trustees.

6. From time to time on request of Reconstruction, the Trustees will furnish to Reconstruction, in the form attached, schedules of all compensation currently paid to the officers and employees of the Trustees.

7. During the life of said loan the Trustees will not permit the creation of any lien upon the property of said The Western Pacific Railroad Company, or upon the trust estate of the Trustees, which shall have priority over the lien of the Trustees' Certificates to be issued by the Trustees as security for said loan, except the liens of current taxes and such necessary expenses of the Trustees as may be allowed by the Court and given such priority.

8. This agreement shall be binding on the successors of the Trustees and shall inure to the benefit of the successors and assigns of Reconstruction.

T. M. SCHUMACHER,
SIDNEY M. EHRMAN,
Trustees in Reorganization of The
Western Pacific Railroad Company.

It is further ordered that the authority granted to the Trustees by the Court's order of October 21, 1938, to make formal application to the Reconstruction Finance Corporation for such loan and to make application to the Interstate Commerce Commission for approval thereof be and the same hereby is confirmed.

Dated November 7, 1938.

A. F. ST. SURE,

District Judge.

[Endorsed]: Filed Nov. 7, 1938. [1726]

[Title of District Court and Cause.]

PETITION OF TRUSTEES FOR ORDER AUTHORIZING THEM TO EXTEND THEIR CERTIFICATES OF INDEBTEDNESS PRESENTLY OUTSTANDING IN THE AMOUNT OF $10,000,000.

T. M. Schumacher and Sidney M. Ehrman, the duly appointed and qualified Trustees of the properties of the Debtor above named, hereby petition the court and represent as follows:

I.

Pursuant to authority duly given them by this Court, with the approval of the Interstate Commerce Commission, your petitioners, as such Trustees, have heretofore issued and there are now outstanding their certificates of [1727] indebtedness in the principal amount of $10,000,000, maturing and payable on December 1, 1939. The said certificates were issued to evidence and secure a loan in the sum of $10,000,000 from the Reconstruction Finance Corporation. The Trustees borrowed the said sum of $10,000,000 from the Reconstruction

Finance Corporation for the purpose of paying at maturity their certificates of indebtedness then outstanding and maturing and payable on December 1, 1938. The proceeds of said loan were used for said purpose. The said certificates then outstanding and maturing and payable on December 1, 1938, represented an indebtedness all of which was authorized and incurred for the purpose of meeting the cost of doing certain work upon and acquiring certain equipment for the railroad of the Debtor which it was necessary should be done and acquired in order that said railroad might be operated with safety and reasonable efficiency that its physical elements might be conserved and its existing business retained, and that it might furnish to the public service in the way of transportation of persons and property adequately responsive to the reasonable requirements and demands of the public upon said railroad for such service. The proceeds realized by the incurrence of the indebtedness represented by said certificates were expended in the doing of said work and the acquiring of said equipment.

II.

The orders of this Court authorizing the issuance of said certificates of indebtedness now outstanding and maturing and payable on December 1, 1939, and the orders of the Interstate Commerce Commission approving the issuance [1728] of said certificates expressly provide that said certificates rank as expenses of the administration by the Court

of the Debtor's property and as such are payable in due course of administration equally with other expenses of administration out of said property and constitute a charge and direct first lien upon said property prior in right to the debts and obligations of the Debtor and to any lien created by it; and said certificates were issued by your petitioners for value upon the representation that such was their character.

III.

At the time said certificates now outstanding and maturing and payable on December 1, 1939, were issued your petitioners anticipated that before December 1, 1939, a plan of reorganization of the Debtor providing for the redemption and payment of said certificates would be adopted by the Court and put into effect. No plan of reorganization has, however, been adopted by the Court. While your petitioners anticipate that they will be able to meet the interest charges on said certificates out of current funds, they have not, nor is there any reasonable possibility that they will have when said certificates mature, the funds wherewith to meet the principal of the certificates, either in whole or in part, and it is necessary that your petitioners obtain an extension of said loan and that they extend the said certificates as evidence of and security for said loan, in order to insure against a default upon the said certificates. Your petitioners believe that they can obtain an extension of said loan to December 1, 1940, from the Reconstruction Finance Cor-

poration, the said extension of said loan to be evidenced and secured by an extension of the said certificates of indebtedness by [1729] your petitioners to December 1, 1940, with interest at the rate of four per cent (4%) per annum payable monthly in lieu of at the rate of three per cent (3%) per annum payable semi-annually as provided in said outstanding certificates (the said certificates having been issued and deposited at a discount from the par value thereof by an amount that, when added to the interest at said rate of three per cent (3%) per annum from the date of issuance to the date of maturity of said certificates, equals the amount of interest on said certificates for the same period at a rate of four per cent (4%) per annum) and subject to a right on the part of the Trustees to redeem upon thirty (30) days' notice all but not less than all of said outstanding certificates on any interest payment date, the said extension of said certificates to be effectuated by stamping or writing upon each of said certificates a legend or endorsement reading substantially as follows:

> "The holder thereof by acceptance hereof bearing hereon this endorsement hereby agrees that the maturity of the within certificate is extended to December 1, 1940, with interest at the rate of 4% per annum payable monthly and with the privilege of redemption by the Trustees of all but not less than all of the Trustees' Certificates of this issue on any interest payment date on thirty days' previous notice at the

principal amount and accrued interest to the date fixed for redemption."

It is in the interest of the trust estate of your petitioners that they be authorized to obtain an extension of said loan and to extend said certificates as evidence of and security for said loan in order to insure against a default upon the said certificates when the principal thereof falls due on December 1, 1939. To consummate and fully authorize the extension [1730] of said loan it is necessary for your petitioners to make formal application for said extension to the Reconstruction Finance Corporation and to secure the approval thereof by the Interstate Commerce Commission.

IV.

Because of the possibility that your petitioners may not be able to arrange with the Reconstruction Finance Corporation for an extension of said loan it is advisable that the Court, in its order granting the authority herein asked for, reserve jurisdiction to authorize, by supplemental order made with or without notice, the issuance and sale by your petitioners of new certificates of indebtedness in the total amount of $10,000,000, dated December 1, 1939, and bearing interest at the rate of four per cent (4%) per annum or a higher rate of interest, for the purpose of providing themselves with funds for the payment of said outstanding certificates at maturity.

V.

For the purpose of meeting the requirements of Section 4 of Public Act No. 35 of the Seventy-Third Congress of the United States, approved June 10, 1933, it will be necessary, if said extension of said loan is made, for your petitioners to enter into a supplemental agreement with the Reconstruction Finance Corporation substantially in the form attached hereto and marked Exhibit I.

Wherefore, your petitioners pray.

1. That upon the filing of this petition the Court set the same for hearing and prescribe the notice to be given thereof and authorize your petitioners forthwith to apply to the Reconstruction Finance Corporation for an extension [1731] of said loan to December 1, 1940, and to the Interstate Commerce Commission for its approval thereof, and to make such other application or supplemental application to the Interstate Commerce Commission as may be required in respect to said extension of said outstanding certificates of indebtedness.

2. That upon the hearing of said petition the Court make its order whereby your petitioners will be authorized to extend to December 1, 1940, their outstanding certificates of indebtedness in the total amount of $10,000,000, as evidence of and security for the said extension of said loan, the said certificates as extended to bear interest at the rate of four per cent (4%) per annum payable monthly in lieu of at the rate of three per cent (3%) per annum payable semi-annually as provided in said

certificates (the said certificates having been issued and deposited at a discount from the par value thereof by an amount that, when added to the interest at said rate of three per cent (3%) per annum from the date of issuance to the date of maturity of said certificates, equals the amount of interest on said certificates for the same period at a rate of four per cent (4%) per annum) and to be subject to a right of the Trustees to redeem upon thirty (30) days' notice all but not less than all of said certificates on any interest payment date, and the said extension to be effectuated by the Trustees by stamping or writing upon each of the said outstanding certificates a legend or endorsement reading substantially as follows:

> "The holder thereof by acceptance hereof bearing hereon this endorsement hereby agrees that the maturity of the within [1732] certificate is extended to December 1, 1940, with interest at the rate of 4% per annum payable monthly and with the privilege of redemption by the Trustees of all but not less than all of the Trustees' Certificates of this issue on any interest payment date on thirty days' previous notice at the principal amount and accrued interest to the date fixed for redemption."

provided, however, that the Court reserve jurisdiction to provide by supplemental order, made with or without notice, that with the approval of the Interstate Commerce Commission first had, and

obtained the Trustees may issue and sell new certificates of indebtedness in the total amount of $10,000,000, dated December 1, 1939, and bearing interest at the rate of four per cent (4%) per annum or a higher rate of interest, for the purpose of meeting the principal of the said outstanding certificates at maturity.

3. That your petitioners be further authorized by such order to make a supplemental agreement with the Reconstruction Finance Corporation substantially in the form attached hereto as Exhibit 1.

SUPPLEMENTAL AGREEMENT

Dear Sirs:

Pursuant to the report and order of the Interstate Commerce Commission dated ....., 1939, in Finance Docket No. ....., approving an extension to December 1, 1940, by the Reconstruction Finance Corporation (hereinafter called Reconstruction) of the loan made by Reconstruction to the undersigned Trustees in Reorganization of The Western Pacific Railroad Company, a debtor, (hereinafter called the Trustees) in the total amount of $10,000,000 and maturing on December 1, 1939, the Trustee as such and not individually, in consideration of said extension of said loan, hereby agree with Reconstruction as follows:

The agreement made and entered into by and between Reconstruction and the Trustees on November 23, 1938, pursuant to the report and order of the Interstate Commerce Commission dated November 10, 1938, in Finance Docket No. 12,213, approving said loan by Reconstruction to the Trustees, shall be and is hereby extended and shall be and remain in full force and effect during the period of

said extension of said loan, or until December 1, 1940.

T. M. SCHUMACHER
SIDNEY M. EHRMAN
Trustees in Reorganization of The Western Pacific Railroad Company

[Endorsed]: Filed Oct. 10, 1939. [1735]

[Title of District Court and Cause.]

ORDER PROVIDING FOR HEARING UPON PETITION OF TRUSTEES FOR ORDER AUTHORIZING THEM TO EXTEND THEIR CERTIFICATES OF INDEBTEDNESS PRESENTLY OUTSTANDING IN THE AMOUNT OF $10,000,000.

Upon due consideration of the petition of T. M. Schumacher and Sidney M. Ehrman, Trustees of the properties of the Debtor above named, filed herein and praying for an order authorizing them to extend their certificates of indebtedness presently outstanding in the amount of $10,000,000.

It is hereby ordered as follows:

1. That said petition shall be and it hereby is set for hearing before this court on November 6, 1939, at 10 o'clock, A. M. [1736]

2. That the said Trustees be and they hereby are directed to give notice of the said hearing. That said notice be given by publication on or before October 13, 1939, of a notice substantially in the

following form in The Wall Street Journal (Pacific Coast Edition) and The Recorder, two newspapers of general circulation published in the City and County of San Francisco, State of California:

LEGAL NOTICE

In the District Court of the United States for the Northern District of California, Southern Division

No. 26591-S

In the Matter of
THE WESTERN PACIFIC RAILROAD COMPANY,

Debtor.

NOTICE OF HEARING UPON PETITION OF TRUSTEES FOR ORDER AUTHORIZING THEM TO EXTEND THEIR CERTIFICATES OF INDEBTEDNESS PRESENTLY OUTSTANDING IN THE AMOUNT OF $10,000,000

Notice is hereby given, pursuant to the order of the above named court, that a hearing will be held before the Honorable A. F. St. Sure, Judge of the above entitled court, at the Courtroom of the said Judge, in the United States Postoffice and Courthouse Building, Seventh and Mission Streets, in the City and County of San Francisco, State of California, on November 6, 1939, at 10 o'clock, A. M., or as soon thereafter as the same may be heard, upon the petition of

T. M. Schumacher and Sidney M. Ehrman, Trustees in Reorganization of The Western Pacific Railroad Company, praying that they be authorized:

To apply to the Reconstruction Finance Corporation for an extension to December 1, 1940, of the outstanding loan by the Reconstruction Finance Corporation to the said Trustees in the total amount of $10,000,000, and to extend as evidence of and security for said extension of said loan their outstanding certificates of indebtedness in said total amount, the said certificates as extended to bear interest at the rate of four per cent (4%) per annum payable monthly in lieu of at the rate of three per cent (3%) per annum payable semiannually as provided in said certificates (the said certificates having been issued and deposited at a discount from the par value thereof by an amount that, when added to the [1737] interest at said rate of three per cent (3%) per annum from the date of issuance to the date of maturity of said certificates, equals the amount of interest on said certificates for the same period at a rate of four per cent (4%) per annum) and to be subject to a right of the Trustees to redeem upon thirty (30) days' notice all but not less than all of said certificates on any interest payment date, and the said extension to be effectuated by the Trustees by stamping

or writing upon each of the said outstanding certificates a legend or endorsement reading substantially as follows:

"The holder thereof by acceptance hereof bearing hereon this endorsement hereby agrees that the maturity of the within certificate is extended to December 1, 1940, with interest at the rate of 4% per annum payable monthly and with the privilege of redemption by the Trustees of all but not less than all of the Trustees' Certificates of this issue on any interest payment date on thirty days' previous notice at the principal amount and accrued interest to the date fixed for redemption."

provided, however, that the Court reserve jurisdiction to provide by supplemental order, made with or without notice, that with the approval of the Interstate Commerce Commission first had and obtained the Trustees may issue and sell new certificates of indebtedness in the total amount of $10,000,000, dated December 1, 1939, and bearing interest at the rate of four per cent (4%) per annum or a higher rate of interest, for the purpose of meeting the principal of the said outstanding certificates at maturity.

T. M. SCHUMACHER
SIDNEY M. EHRMAN
Trustees in Reorganization of The Western Pacific Railroad Company

And by mailing prior to October 14, 1939, a copy of this order and of said petition to the following parties:

1. Crocker First National Bank of San Francisco and Samuel Armstrong.
2. Irving Trust Company, as Trustee under indenture securing Debtor's General and Refunding Mortgage Bonds.
3. A. C. James Co. [1738]
4. Reconstruction Finance Corporation.
5. The Railroad Credit Corporation.
6. Fidelity-Philadelphia Trust Co.
7. The Chase National Bank of the City of New York, as Trustee under agreement dated May 1, 1929, covering Equipment Trust Certificates.
8. The Western Pacific Railroad Company.
9. The Western Pacific Railroad Corporation.
10. The Western Realty Company.
11. Central Hanover Bank and Trust Company, as Trustee under agreement dated February 1, 1937, covering Equipment Trust Certificates.

It is further ordered that said Trustees be and they are hereby authorized to make application to the Reconstruction Finance Corporation for said extension of said loan to December 1, 1940, and to the Interstate Commerce Commission for its approval thereof, and to make such other application or supplemental application to the Interstate Com-

merce Commission as may be required in respect to said extension of said outstanding certificates of indebtedness.

Dated, October 10, 1939.

HAROLD LOUDERBACK

District Judge

[Endorsed]: Filed Oct. 10, 1939. [1739]

[Title of District Court and Cause.]

ORDER (1) AUTHORIZING REORGANIZATION TRUSTEES TO EXTEND THEIR CERTIFICATES OF INDEBTEDNESS PRESENTLY OUTSTANDING IN THE AMOUNT OF $10,000,000 AND (2) AUTHORIZING AGREEMENT BY REORGANIZATION TRUSTEES WITH RECONSTRUCTION FINANCE CORPORATION.

The petition of T. M. Schumacher and Sidney M. Ehrman, Trustees of the properties of the Debtor above named, filed October 10, 1939, for an order authorizing the said Trustees to extend to December 1, 1940, their certificates of indebtedness presently outstanding in the amount of $10,000,000, as evidence of and security for the proposed extension to said date of the outstanding loan by the Reconstruction Finance Corporation to the said Trustees in said Trustees [1740] and the Crocker First Na-

tional Bank of San Francisco and Samuel Armstrong, Trustees under the Indenture securing the Debtor's First Mortgage Bonds, appeared by their respective counsel, and no other person or party appeared. The said petition was heard and submitted to the court for its decision thereon. The Court being now fully advised, makes its findings and order with respect to said petition as follows:

The Court finds:

1. Notice of the hearing upon said petition was given to all parties interested as required by law and the previous order of this Court.

2. The extension of said certificates to December 1, 1940, upon the terms and in the manner stated in said petition, as evidence of and security for the extension of said loan, has been approved by the Interstate Commerce Commission by its supplemental order duly made on the 21st day of November, 1939.

3. All of the averments of said petition are true.

4. Pursuant to and in accord with the authority duly granted them by this Court, with the prior approval of the Interstate Commerce Commission, said Trustees have heretofore issued and there are now outstanding their certificates of indebtedness in the principal amount of $10,000,000, maturing and payable on December 1, 1939. The said certificates were issued to evidence and secure a loan in the sum of $10,000,000 from the Reconstruction Finance Corporation. The said Trustees borrowed the said sum of $10,000,000 from the Reconstruction Finance

Corporation for the purpose of paying at maturity their certificates of indebtedness then [1741] outstanding and maturing and payable on December 1, 1938. The proceeds of said loan were used for said purpose. The said certificates then outstanding and maturing and payable on December 1, 1938, represented an indebtedness all of which was authorized and incurred for the purpose of meeting the cost of doing certain necessary work upon and acquiring certain necessary equipment for the railroad of the Debtor, and the proceeds realized by the incurrence of the indebtedness representd by said certificates were expended in the doing of said necessary work and the acquisition of said necessary equipment.

5. As more fully provided in said certificates of indebtedness now outstanding and maturing and payable on December 1, 1939, and in the orders of this Court authorizing the issuance of said certificates, said certificates rank as expenses of administration by the Court of the Debtor's property and as such are payable in due course of administration equally with other expenses of administration out of said property and constitute a charge and direct first lien upon all the said property, real, personal and mixed, and the earnings and income therefrom, prior in right to the debts and obligations of the Debtor and to any lien created by it, and said certificates were issued by said Trustees for value upon the representation that such was their character.

6. No payment on account of principal of said outstanding certificates of indebtedness, or any of

them, has been made. The funds of the Trustees on hand will provide the Trustees on December 1, 1939, with the funds to meet the interest charges on said certificates but will not [1742] provide the funds to pay the principal thereof, in whole or in part. It is necessary that said Trustees obtain an extension of said loan and that they extend the said certificates as evidence of and security for said loan, in order to insure against a default upon the said certificates.

7. It is in the interest of the trust estate of said Trustees that they be authorized to obtain an extension of said loan to December 1, 1940, from the Reconstruction Finance Corporation, and to extend the said certificates of indebtedness to December 1, 1940, upon the terms and in the manner stated in said petition, as evidence of and security for said extension of said loan.

Wherefore, It Is Hereby Ordered, Adjudged and Decreed that said Trustees be and they are hereby authorized to obtain from the Reconstruction Finance Corporation an extension of said outstanding loan to December 1, 1940, and as evidence of and security for the said extension of said loan, to extend to December 1, 1940, their outstanding certificates of indebtedness in the total principal amount of $10,000,000, the said certificates as extended to bear interest at the rate of four per cent (4%) per annum payable monthly in lieu of at the rate of three per cent (3%) per annum payable semi-annually as provided in said certificates (the said certificates having been issued and deposited at a

discount from the par value thereof by an amount that, when added to the interest at said rate of three per cent (3%) per annum from the date of issuance to the date of maturity of said certificates, equals the amount of interest on said certificates for the same period at a rate of four per cent (4%) per annum) and to be subject to a right of said Trustees to redeem [1743] upon thirty (30) days' notice all but not less than all of said certificates on any interest payment date, and the said extension to be effectuated by said Trustees by stamping or writing upon each of the said outstanding certificates a legend or endorsement reading substantially as follows:

> "The holder thereof by acceptance hereof bearing hereon this endorsement hereby agrees that the maturity of the within certificate is extended to December 1, 1940, with interest at the rate of 4% per annum payable monthly and with the privilege of redemption by the Trustees of all but not less than all of the Trustees' Certificates of this issue on any interest payment date on thirty days' previous notice at the principal amount and accrued interest to the date fixed for redemption."

provided, however, that the Court reserves jurisdiction to provide by supplemental order, made with or without notice, that with the approval of the Interstate Commerce Commission first had and obtained the Trustees may issue and sell new certificates of indebtedness in the total amount of $10,-

000,000, dated December 1, 1939, and bearing interest at the rate of four per cent (4%) per annum or a higher rate of interest, for the purpose of meeting the principal of the said outstanding certificates at maturity.

It Is Further Ordered that, except as modified by this Order, all the terms and provisions of said certificates and the rights of the holder or holders of said certificates as such holder or holders be and they shall remain in full force and effect.

It Is Further Ordered that said Trustees be and they are hereby authorized to make an agreement with the Reconstruction Finance Corporation in the following, or substantially in the following form:

[1744]

December 1, 1939

Reconstruction Finance Corporation
1825 H Street, N. W.,
Washington, D. C.

Dear Sirs:

The undersigned Trustees of The Western Pacific Railroad Company are indebted to your Corporation on account of a certain loan represented by Trustees' Certificates in the principal amount of $10,000,000 which mature on December 1, 1939.

In consideration of the granting by your Corporation of an extension of the maturity date of the above mentioned Trustees' Certificates, authorized by the supplemental report and sup-

plemental order of the Interstate Commerce Commission, dated November 21, 1939, in Finance Docket No. 12158, the undersigned Trustees, as such and not individually, hereby agree with your Corporation as follows:

1. The term "compensation" as used in this Agreement shall include all salaries, fees, bonuses, commissions or other payments, direct or indirect, in money or otherwise, for personal services;

2. So long as they are indebted to your Corporation, the undersigned Trustees will not increase the compensation of any of their officers, directors or employees to any amount not permitted by the terms of the agreement dated November 23, 1938, between your Corporation and the undersigned Trustees, and any written consents given by your Corporation pursuant to the provisions of said agreement;

3. The undersigned Trustees hereby ratify, confirm and reaffirm the said agreement of November 23, 1938, and each and every covenant contained in said agreement.

Respectfully submitted,

.....

.....

As Trustees of The Western Pacific Railroad Company.

Attest:

.....

Agent for the Trustees of The
Western Pacific Railroad Company.

Dated, November 29, 1939.

A. F. ST. SURE,
District Judge.

[Endorsed]: Filed Nov. 29, 1939. [1745]

[Title of District Court and Cause.]

DESIGNATION BY APPELLEE, RECONSTRUCTION FINANCE CORPORATION, OF ADDITIONAL PORTIONS OF THE RECORD, PROCEEDINGS AND EVIDENCE TO BE CONTAINED IN THE RECORD ON APPEAL.

Reconstruction Finance Corporation, an appellee in connection with the appeals taken by The Western Pacific Railroad Company, Debtor, The Western Pacific Railroad Corporation, A. C. James Co., a corporation, The Railroad Credit Corporation, and Irving Trust Company as trustee under the General and Refunding Mortgage of The Western Pacific Railroad Company, Debtor, dated January 1, 1932, pursuant to notices filed September 20, 1940, hereby designates, in accordance with Rule 75(a) of the Rules of Civil Procedure, the following portions of the record, proceedings and evidence to be included in the record on appeal to the Circuit

Court of Appeals for the Ninth Circuit, in addition to the portions of such record, proceedings and evidence designated by the appellants:

(1) Petition of The Western Pacific Railroad Company, Debtor, filed herein August 2, 1935, respecting the sale or disposition of collateral by Reconstruction Finance Corporation, The Railroad Credit Corporation, and A. C. James Co.

(2) Opinion and order of the above-entitled court dated November 9, 1935, confirming the appointment of trustees as appointed by the court and ratified by the Commission.

(3) Claim of Reconstruction Finance Corporation filed on or before September 12, 1935.

(4) Petition of Reconstruction Finance Corporation for leave to intervene before the Interstate Commerce Commission (hereinafter called the Commission), dated October 5, 1936.

[1746]

(5) Order of the Commission dated October 7, 1936 granting intervention to the Reconstruction Finance Corporation.

(6) Exhibits marked as Exhibits Nos. 127-148, both inclusive, incorporated in the record before the Commission in this matter, which is numbered "Finance Docket No. 10913", and has heretofore been certified to and filed in the above-named court.

(7) Reply of Reconstruction Finance Corporation, filed with the Commission on or about

October 6, 1937, to the exceptions of various parties to the proposed report of the Bureau of Finance of the Commission dated August 2, 1937.

(8) Petition of Reconstruction Finance Corporation filed with the Commission for rehearing and modification of the report and order of the Commission dated October 10, 1938, if that petition be not included in Appellants' Designation No. 25.

(9) Petition for leave to file petition of intervention of Reconstruction Finance Corporation and order granting such petition and fixing date of hearing on petition of intervention, both filed December 7, 1939, petition of intervention of Reconstruction Finance Corporation and notice of filing same, both dated December 7, 1939, and order granting petition of intervention dated December 11, 1939, and notice of making and entry of said order.

(10) Memorandum statement filed herein on or about December 8, 1939, in regard to plan of reorganization certified to the above court by the Commission, with objection and claim for equitable treatment in case that plan is not approved.

(11) Petition filed herein October 21, 1938, of reorganization Trustees for supplemental order authorizing them to borrow $10,000,000 from Reconstruction Finance Corporation and to evidence and secure said loan by the issuance of their certificates of indebtedness, and order and supplemental order entered thereon by the

above court on October 21, 1938 and November 7, 1938, respectively.

(12) Petition filed herein October 10, 1939, of Trustees for order authorizing them to extend their certificates of indebtedness presently outstanding in the amount of $10,000,000 and order and supplemental order entered thereon by the above court on October 10, 1939 and November 29, 1939, respectively.

(13) Copy of this additional designation.

(14) All endorsements of filing and all acknowledgments and other proofs of service of any of the aforesaid records or papers in the above court, or, in lieu thereof, memorandum by the Clerk showing the due filing and/or service of said records or papers.

Dated this 17th day of October, 1940.

[Title of District Court and Cause.]

ORDER EXTENDING TIME WITHIN WHICH TO FILE IN CIRCUIT COURT OF APPEALS THE RECORD ON APPEAL FROM ORDER OF AUGUST 15, 1940, APPROVING PLAN OF REORGANIZATION OF DEBTOR, AND TO DOCKET ACTION IN THE CIRCUIT COURT OF APPEALS

It appearing to the Court that several appeals (all taken by Notice of Appeal filed herein September 20, 1940) have been taken to the United States Circuit Court of Appeals for the Ninth Circuit from the order of this Court, made, filed and entered herein on August 15, 1940, Approving Plan of Reorganization of the Debtor, and that the parts of the record, proceedings and evidence in the above proceeding which have been designated for inclusion in the Record on Appeal in accordance with Rule 75(a) of the Rules of Civil Procedure for the District Courts of the United States, are voluminous and it will be necessary for [1748] the Clerk of this Court to prepare for use on said appeals, a record on appeal, which shall include, without duplication, all of the matters designated for inclusion therein, by the various appellants and appellees on said appeals, and it is unlikely that such record on appeal can be prepared by the Clerk in time to permit the filing thereof in said Circuit Court of Appeals within the time limited by Rule 73(g) of said Rules of Civil Procedure;

Now, therefore, in consideration of the premises, and good cause appearing therefor, it is hereby ordered that, in accordance with said Rule 73(g) of said Rules of Civil Procedure, the time for filing said record on appeal in said Circuit Court of Appeals, and for docketing said action in said Circuit Court of Appeals, be and the same is hereby extended to and including November 30, 1940 (which date is seventy-one days from the date of the filing of the first Notice of Appeal from the aforesaid Order of August 15, 1940).

Dated: October 25, 1940.

A. F. ST. SURE
Judge

[Endorsed]: Filed Oct. 25, 1940. [1749]

[Title of District Court and Cause.]

ORDER EXTENDING TIME WITHIN WHICH TO FILE IN CIRCUIT COURT OF APPEALS THE RECORD ON APPEAL FROM ORDER OF AUGUST 15, 1940, APPROVING PLAN OF REORGANIZATION OF DEBTOR, AND TO DOCKET ACTION IN CIRCUIT COURT OF APPEALS

It appearing to the Court that the time allowed by law (as extended by the order of this Court made October 25, 1940) for the preparation and filing in the Circuit Court of Appeals for the Ninth

Circuit of the record on appeal on the several appeals heretofore taken to said last mentioned Court from the order of this Court made, filed and entered herein on August 15, 1940, Approving Plan of Reorganization of the Debtor, is insufficient to permit of the preparation and filing of said record on appeal and the docketing of said action within the time so allowed by law, as extended by said order of this Court.

Now, therefore, in consideration of the premises and good cause [1750] appearing therefor, it is hereby ordered that, (in accordance with Rule 73 [g] of the Rules of Civil Procedure for the District Courts of the United States), the time for filing said record on appeal and docketing said action in said Circuit Court of Appeals, be and the same is hereby extended to and including December 15, 1940 (which date is eighty-six days from the date of the filing of the first notice of appeal from the aforesaid order of August 15, 1940).

Dated: November 27, 1940.

A. F. ST. SURE
Judge.

[Endorsed]: Filed Nov. 27, 1940. [1751]

[Title of District Court and Cause.]

ORDER EXTENDING TIME WITHIN WHICH TO FILE IN CIRCUIT COURT OF APPEALS THE RECORD ON APPEAL FROM ORDER OF AUGUST 15, 1940, APPROVING PLAN OF REORGANIZATION OF DEBTOR, AND TO DOCKET ACTION IN CIRCUIT COURT OF APPEALS

It appearing to the Court that the time allowed by law (as extended by the orders of this Court made October 25, 1940, and November 27, 1940, respectively,) for the preparation and filing in the Circuit Court of Appeals for the Ninth Circuit of the record on appeal on the several appeals heretofore taken to said last mentioned Court from the order of this Court made, filed and entered herein on August 15, 1940, Approving Plan of Reorganization of the Debtor, is insufficient to permit of the preparation and filing of said record on appeal and the docketing of said action within the time so allowed by law, as extended by said Order of this Court,

Now, therefore, in consideration of the premises and good cause [1752] appearing therefor, it is hereby ordered that, (in accordance with Rule 73 [g] of the Rules of Civil Procedure for the District Courts of the United States), the time for filing said record on appeal and docketing said action in said Circuit Court of Appeals, be and the same

is hereby extended to and including December 19, 1940, (which date is ninety days from the date of the filing of the first notice of appeal from the aforesaid order of August 15, 1940).

Dated: December 12th, 1940.

A. F. ST. SURE
Judge.

[Endorsed]: Filed Dec. 12, 1940. [1752A]

[Title of District Court and Cause.]

ORDER EXTENDING TIME WITHIN WHICH TO FILE TRANSCRIPT OF RECORD ON APPEALS.

Good cause appearing therefor, it is hereby ordered that the time for filing the transcript of record on the appeals heretofore taken to this Court by The Western Pacific Railroad Company, A. C. James Co., The Western Pacific Railroad Corporation, The Railroad Credit Corporation and Irving Trust Company as Trustee under the General and Refunding Mortgage of the Debtor, from the order of the United States District Court for the Northern District of California, Southern Division, made, filed and entered August 15, 1940, approving the Plan of Reorganization of the above named Debtor, which said time (as fixed by Rule 73 of the Rules of Civil Procedure for the District Courts of the United States, and three orders of the Dis-

trict Court, dated October 25, 1940, November 27, 1940 and December 12, 1940, respectively), will expire December 19, 1940 (i.e., ninety days after the date upon which the Notices of Appeal on said appeals were filed in said District Court) be and the same is hereby extended to and including December 31, 1940.

Dated: December 18, 1940.

CURTIS D. WILBUR
Senior U. S. Circuit Judge.

[Title of District Court and Cause.]

ORDER PROVIDING FOR OMISSION OF COPIES OF CERTAIN ORIGINAL EXHIBITS FROM RECORD ON APPEAL AS MADE UP BY CLERK AND FOR THE TRANSMISSION OF SUCH ORIGINAL EXHIBITS TO THE CIRCUIT COURT OF APPEALS

It appearing to the Court that several appeals (all taken by notices of appeal filed herein on Sep-

tember 20, 1940) have been taken to the United States Circuit Court of Appeals for the Ninth Circuit from the order of this Court made, filed and entered herein on August 15, 1940, approving plan of reorganization of the Debtor;

And it further appearing that (1) the original exhibits (except those numbered 1, 42, 76 and 127-148, both inclusive) which were offered in evidence on the hearing in the above matter before the Interstate Commerce Commission of the United States (hereinafter called "Commission") in the proceeding designated by the Commission as Finance Docket No. 10913, as shown by the transcript and record of the proceedings before the Commission heretofore certified by it to [1754] this Court and filed herein, and (2) the original exhibits (except the "Stipulation as to Facts not in Dispute" and the memorandum of corrections therein, identified by the witness Charles Elsey, which said stipulation and memorandum were offered in evidence and filed on the hearing next mentioned, and the exhibits which are annexed to said "Stipulation as to Facts not in Dispute", or were filed as a part thereof) which were offered in evidence on the hearing in this Court, on January 22, 1940, of the Objections to the plan of reorganization of the Debtor certified to this Court by the Commission, are of such character and form as to be unsuitable for inclusion in the record on appeal to be prepared by the Clerk of this Court as required by the Rules of Civil Procedure for the District Court

of the United States, but that it is necessary that said original exhibits be inspected and considered by said Circuit Court of Appeals in connection with said appeals as part of the Record on Appeal thereon,

Now, therefore, in consideration of the premises, and good cause appearing therefor,

It is hereby ordered that all of the original exhibits (other than those excepted as aforesaid) which were received in evidence on the hearing in the above matter before the Commission as shown by the transcript and record of the proceedings before the Commission heretofore certified by it to this Court and filed herein, and all of the original exhibits (other than those excepted as aforesaid) which were received in evidence on said hearing, in this Court on January 22, 1940, shall be transmitted by the Clerk to the appellate court, in lieu of copies of such exhibits, and shall constitute a part of the record on appeal on said appeals.

Dated: November 27, 1940.

Before the
Interstate Commerce Commission
Finance Docket 10913.
Western Pacific Railroad Company Reorganization
TESTIMONY
Hearing Room C, I.C.C. Building,
Washington, D. C.
Monday, March 23, 1936.

Met pursuant to notice at 10:00 o'clock a. m.

Before:

R. T. Boyden and
Harvey H. Wilkinson, Examiners.

Appearances:

Frank C. Nicodemus, Jr., 37 Wall Street, New York City, appearing for the Western Pacific Railroad Company.

Robert E. Coulson, 40 Wall Street, appearing for A. C. James Company.

James B. Alley, C. C. McChord, and C. M. Clay, Washington, D. C., appearing for Reconstruction Finance Corporation.

Daniel Willard, Jr., Transportation Building, Washington, D. C., appearing for the Railroad Credit Corpora- [1756] tion.

Robert T. Swaine, 15 Broad Street, New York City, appearing for Metropolitan Life Insurance Company; Prudential Life Insurance Company; New York Life Insurance Company; Mutual Benefit Life Insurance Company; John Hancock Life

Insurance Company; Travellers Life Insurance Company; Home Life Insurance Company and Chase National Bank, (Pledgee), holding $16,941,400 First Mortgage Bonds of Debtor, acting through Frederick H. Ecker, John W. Stedman and Reeve Schley, as an Executive Committee.

Orville W. Wood, 15 Broad Street, New York City, appearing for Trustees under Debtor's First Mortgage and trustee under Debtor's General and Refunding Mortgage. [1757]

PROCEEDINGS

Examiner Boyden: The Interstate Commerce Commission has assigned for hearing at this time and place, Finance Docket No. 10913, proceeding for reorganization of the Western Pacific Railroad Company.

Evidence will be received in support of and in opposition to the plan of reorganization which has been filed by the Western Pacific Railroad Company, and other plans of reorganization also will be received by parties having the requisite interest in the proceedings, and evidence in support of and in opposition to those claims.

Who appears for the Western Pacific Railroad Company?

Mr. Nicodemus: Frank C. Nicodemus, Jr.

Examiner Boyden: Are there other appearances?

Mr. Swaine: I appear for the Metropolitan Life Insurance Company, Prudential Life Insurance Company, New York Life Insurance Com-

pany, Mutual Benefit Life Insurance Company, John Hancock Life Insurance Company, Travellers Life Insurance Company, Home Life Insurance Company and Chase National Bank, the latter as Pledgee, together representing $16,941,400 principal amount of First Mortgage Bonds of the Debtor.

Examiner Boyden: Have you filed a petition of intervention, Mr. Swaine?

Mr. Swaine: No, I have not. [1760]

Examiner Boyden: Do you expect to do so?

Mr. Swaine: Probably.

Examiner Boyden: Are there other appearances?

Mr. Coulson: I am appearing on behalf of A. C. James Company, security creditor. Robert E. Coulson, 40 Wall Street, New York City.

Examiner Boyden: Have you filed a petition?

Mr. Coulson: I have not, sir, but probably will.

I might say that the court has classified the claim of this creditor as a separate class in the order entered in the proceeding in the California court.

Examiner Boyden: Have you been admitted to practice before the Commission?

Mr. Coulson: Yes.

Examiner Boyden: Are there other appearances?

Mr. Willard: The Railroad Credit Corporation appears by D. Willard, Junior, counsel. Petition of intervention has been granted by the Commission by order dated March 14th.

Mr. Boyden: Are there any other appearances?

(No response.)

Since the filing of its petition in the United States District Court for the Northern District of California, southern division, the Western Pacific Railroad Company has filed in the proceedings before the court various [1761] petitions and accounting records. Other documents have also been filed by other parties.

Pursuant to the rules of the United States Supreme Court, many of those documents have been transmitted to the Commission and filed in Finance Docket 10913. They are open to public inspection. May it be understood that those documents heretofore filed in the court proceedings and those which may hereafter be filed in such proceedings and transmitted to the Commission will constitute a part of the record in this proceeding?

Mr. Nicodemus: Debtor so stipulates.

Examiner Boyden: You may proceed, Mr. Nicodemus.

Mr. Nicodemus: In the interest of brevity we will omit any preliminary statements and go right ahead with the witnesses.

We will call as the first witness, Mr. Michael J. Curry.

MICHAEL J. CURRY

was sworn and testified as follows:

Direct Examination

Q. (By Mr. Nicodemus) Will you state your connection with the Western Pacific Railroad Company?

A. I am vice president and assistant secretary of the Western Pacific Railroad Company.

Q. You also are an officer of the corporation?

[1762]

A. I am secretary and treasurer of the Western Pacific Railroad Corporation.

Q. Mr. Curry, before we proceed further, the order of the Commission fixing a hearing at this time and place requires notice to be published. Have you evidence of the publication of that?

A. I have evidence of the publication.

Mr. Nicodemus: May we file this as a part of the record? That is an affidavit of the publication of the notice in the Wall Street Journal at San Francisco and the New York Herald-Tribune in New York. You need not give it an exhibit number, because I have none to distribute.

Examiner Boyden: It may be filed as part of the record.

(The documents referred to were thereupon filed.)

Q. (By Mr. Nicodemus) Are you custodian of

(Testimony of Michael J. Curry.)

the record of the action of the Executive Committee of the Railroad Company? A. I am.

Q. You also have duplicate records of the action of the board of directors when held in San Francisco? A. I have.

Q. The plan of reorganization pursuant to which this hearing has been held was filed on the 8th of February in the United States Court at San Francisco and on the same [1763] date with the Interstate Commerce Commission? A. It was.

Q. Can you identify that as a counterpart of the plan so filed?

A. I do identify it as such plan.

Q. On what date was that plan submitted to the board of directors of the railroad company?

A. On February 7, 1936.

Q. Have you a certified copy of the minutes adopted by the board of directors on that date pertaining to the plan? A. I have.

Q. Can you produce it?

A. I identified it as a certified copy of the action taken at meeting of the board of directors of the Western Pacific Railroad Company, held on February 7, 1936, at its office in San Francisco, California.

Mr. Nicodemus: I offer those documents in evidence.

Examiner Boyden: Is there any objection?

(Testimony of Michael J. Curry.)

The plan of reorganization will be received as exhibit 1, and the copy of the minutes will be received as exhibit 2.

(Exhibits 1 and 2, Witness Curry, received in evidence.)

[Printer's Note: Exhibit 1 (Plan of Reorganization effective January 1, 1936) is not set out here as it already appears at page 19 of this printed record.]

Mr. Nicodemus: That finishes this witness.

[1764]

Examiner Boyden: Is there any examination of this witness? The witness is excused.)

(Witness excused.)

Mr. Nicodemus: Charles Elsey.

CHARLES ELSEY

was sworn and testified as follows:

Direct Examination

Q. (By Mr. Nicodemus) Mr. Elsey, what is your name and residence?

A. Charles Elsey, Oakland, California.

Q. And your occupation?

A. President of the Western Pacific Railroad Company.

Q. How long have you been connected with the Western Pacific Railroad Company?

A. Since 1907.

(Testimony of Charles Elsey.)

Q. The present company was reorganized in 1916, so that your connection goes back to the predecessor company, is that correct?

A. That is correct.

Q. When did the predecessor company commence operations? A. July 1, 1911.

Q. So you went with the Company when it was a paper company and was not operating then?

A. No, the company was incorporated on March 3, 1903. [1765]

Q. But had not started formal operations?

A. Commenced formal operations, as I said before, on July 1, 1911.

Q. You started in with the predecessor company as assistant treasurer, is that correct?

A. That is correct.

Q. You later became treasurer?

A. Yes, sir.

Q. And subsequently vice president. In what year was that? A. 1921.

Q. Vice president in charge of finance in 1921?

A. Yes, sir.

Q. And continued in that office until 1929. Is that correct? A. Yes, sir.

Q. When you became executive vice president and afterwards president? A. Yes, sir.

Q. And you were elected president in 1932, and have held that position continuously?

A. Yes, sir.

(Testimony of Charles Elsey.)

Q. Throughout the entire period of your service, you have been more or less identified with the financial end of the property? [1766]

A. That is correct.

Q. To complete the record, will you give the date of the prior receivership, its inception and its termination?

A. Went into receivership on March 4, 1915; was in the hands of a receiver until July 14, 1916.

Q. That was a model of brevity, then, as to that receivership? A. Yes, sir.

Q. Mr. Elsey, will you give a brief description of the present lines of railroad of the debtor, the Western Pacific Railroad Company?

A. The main line of the Western Pacific extends from Oakland, California, to Salt Lake City, a distance of 924.17 miles; another main line from Keddie, California to Bieber, California, a distance of 111.81 miles—a total main line mileage of 1035.98.

The main line from Oakland to Salt Lake City serves the principal cities in northern California, such as San Francisco, Oakland, Stockton, Sacramento, Marysville and Oroville, also the main shipping points in Nevada.

The principal branch lines are the San Jose Branch, which takes off the main line at Niles and terminates at San José, a city of 57,000 population.

This line serves the Santa Clara Valley, one of the richest agricultural territories in the state, a distance [1767] of 23.07 miles.

(Testimony of Charles Elsey.)

The Terminous branch takes off the main line at Terminous Junction and terminates at Terminous, a distance of 7.92 miles.

This branch line serves a territory, the principal commodities of which are celery, asparagus and other vegetables.

The Calpine Branch, 12.62 miles and the Loyalton Branch, 12.79 miles—both of these branches serve a lumber territory in Plumas County.

The Reno Branch takes off the main line at Reno Junction and runs to Reno, a distance of 33.11 miles.

A branch of Burmester to Warner cuts off the main line at Burmester and connects with the Toole Valley Railroad at Warner, which latter railroad serves the International Smelter, a distance of 15.52 miles.

Miscellaneous branches, 72.14.

Total branches of 177.17 miles. Grand Total, 1213.15 miles, with the water mileage between San Francisco and Oakland of 4.20 or a total mileage of 1217.35.

Q. Summing it all up, the roads traverse at least three states, California, Nevada and Utah, and the carrier is engaged in interstate commerce. Is that correct? A. That is correct.

Q. You have referred to a line to Bieber. Will you state [1768] briefly the history of the construction of that line, which is referred to from time to time as the northern California extension?

A. That line takes off of our Salt Lake-San Francisco Line at Keddie, California, and runs in

(Testimony of Charles Elsey.)

a northwesterly direction to Bieber, where we have a connection with the Great Northern Railroad. This line serves a very important lumber district, and at Westwood is located the largest lumber mill in California, which this line serves.

Q. When was the line constructed?

A. It was commenced in 1929 and completed in November, 1931.

Q. When did you start to carry its operations in the accounts of the parent company?

A. In November, 1931.

Q. So the accounts prior to that are somewhat distorted by the fact that the earnings of that line are not included. Is that correct?

A. Yes, sir.

Q. How was that financed, Mr. Elsey?

A. The total cost was approximately ten million dollars. It was financed 50 per cent by the issuance of our first mortgage bonds. Our first mortgage bond is a closed issue of $50,000,000 and this $5,000,000 exhausted our ability to issue bonds under this mortgage. It was therefore [1769] necessary to finance the balance of the line by the issuance of debentures, which were sold to the A. C. James Company.

Q. And the A. C. James Company took a junior position in respect of half of the cost of that construction?

A. Yes, sir. I might say in connection with the northern California extension that we have a full

(Testimony of Charles Elsey.)

line of rates with the Great Northern Railway, and the Santa Fe connects with our line at Stockton, with which company we also have a full line of rates, making a north and south route serving all the points on the Great Northern in Washington and Oregon and all points on the Santa Fe System.

Q. Mr. Elsey, coming to the plan of reorganization in support of which you are appearing as a witness, will you state in the order substantially of their importance what you regard as the outstanding features of this plan? I take it that the feature of outstanding and primary importance is the reduction of fixed charges? A. Yes, sir.

Q. The extent of that reduction is indicated by the plan itself, is it not? Will you, however, state those figures again so that this will appear in your testimony?

A. Our present fixed charges amount to $3,180,053, and under the plan of reorganization our fixed charges will [1770] be $1,027,036.

Q. So substantially 66⅔ per cent of the fixed charges have been eliminated?

A. Yes, sir.

Q. The amended section 77 of the Bankruptcy Act describes in paragraph C of section 77 that a plan approved under the Act shall provide for interest charges in such an amount that after due consideration of the probable prospective earnings of the property in the light of its earnings experience and all other relevant facts, there shall be adequate coverage for such fixed charges by the probable

(Testimony of Charles Elsey.)

earnings available for the payment thereof.

Do you feel and are you prepared to give the reasons why you feel that this plan meets that test?

A. Yes, sir.

Q. Looking into the immediate past, Mr. Elsey, the period from 1929 to 1935 was a very severe period for successful railroad operation, was it not?

A. Yes, sir.

Q. Do you think a period of stress equally severe may reasonably be anticipated within the next quarter of a century? A. I would not think so.

Q. So that a first mortgage bond with a 30-year maturity put out under this plan, if it would have stood up [1771] during that period, would in all probability stand up during the 30-year period of its life? Is that correct? A. Yes, sir.

Q. Have you prepared a statement showing the interest available for fixed charges during that period? A. Yes, sir.

Q. 1929 to 1935? A. Yes, sir.

Q. That was prepared at your request in the regular course of business from the records of the company? A. Yes, sir.

Q. You believe it to be correct?

A. Yes, sir.

Mr. Nicodemus: I offer it in evidence.

Examiner Boyden: Is there any objection?

The exhibit will be marked exhibit 3, for identification.

(Exhibit 3, Witness Elsey, marked for identification.)

(Testimony of Charles Elsey.)

Q. (By Mr. Nicodemus) In connection with that exhibit, the plan provides for a contingency reserve fund of $500,000 to be applied to the payment of interest in any lean year that we might encounter? A. That is correct.

Q. That application of that contingency reserve fund is [1772] also shown by this statement?

A. Yes, sir.

Q. It would have been applied to make up the deficiency in the years 1930 and 1931?

A. 1931 and 1932.

Q. Mr. Elsey, the next feature of the plan which you wish to comment on is what?

A. The next most important point is putting the property into good operating condition. The plan of reorganization provides for an expenditure of $9,500,000 on road and equipment over a period of three years.

It is my opinion that with this expenditure the road will be brought to normal efficiency and we will be able to operate the property in the future without any abnormal expenditures as far as maintenance of way and structures is concerned, and also maintenance of equipment. The program will provide that during these three years, all the old rail will have been relaid, a considerable portion of the road ballasted, and taking up the deferred maintenance on our equipment, particularly freight equipment.

Q. Do you feel that after that $9,500,000 is expended, the road will be in A-1 condition for opera-

(Testimony of Charles Elsey.)

tion and will not require any extraordinary maintenance in the future, barring floods, and acts of God, or something of that sort?

A. Yes, sir. [1773]

Q. Arrangements have been perfected, as I understand it, subject to the approval of the Commission, for the borrowing of that ten million dollars?

A. Yes, sir.

Q. I say ten million dollars because $500,000 of the $10,000,000 is to be applied to the creation of the contingency reserve fund to which you have already referred, so you have net capital available for completing this rehabilitation program of $9,500,000. That is being obtained from the Reconstruction Finance Corporation on what you regard as favorable terms? A. Very favorable.

Q. You can draw the money down over a three year period as and when you need it?

A. Yes, sir.

Q. And you can call on the Reconstruction Finance Corporation to buy, regardless of the then market conditions, is that correct?

A. That is correct.

Q. Will you state the condition upon which the Reconstruction Finance Corporation made that undertaking? They required that the present indebtedness of the railroad company to the Reconstruction Finance Corporation be advanced and given the same rank that the first mortgage bonds hold; is that the condition? [1774]

(Testimony of Charles Elsey.)

A. That was the condition on which they agreed to purchase this $10,000,000 of our new first mortgage bonds.

Q. We will pass to the next feature of the plan as to which you propose to comment. My memorandum indicates that in that connection you wish to speak about the contingent interests, the bonded debt that will be created under the plan carrying only the contingent interest.

A. That is covered by our income bonds, and that is contingent for two years, or eleven per cent.

Q. You mean, it is cumulative for two years?

A. Yes, sir.

Q. So that maximum accumulation will never be more than approximately 11 per cent. But before we get to that, the aggregate of the fixed charge bonds and the income bonds is greater than the present bonded debt of the reorganized company, and that has been commented on somewhat in connection with the public discussions of this plan.

Will you explain that increase to the Commission?

A. Our present outstanding debt exclusive of equipment trust obligations is $49,290,100 of first mortgage bonds. Under the plan of reorganization the mortgage debt of all classes will total $75,543,405, an increase of $25,253,305.

This increase is more than offset by the uncapitalized expenditures. For example, A. C. James Com-
[1775] pany contributed $4,999,800 to finance the

(Testimony of Charles Elsey.)

construction of the Northern California extension and took a junior position.

In addition to this, the company's uncapitalized capital expenditures down to September 30, 1935, amounted to $22,275,780.

New capital expenditures under the rehabilitation program are estimated at $3,085,323, making a total of $30,360,903, which is approximately $5,000,000 more than the increase is funded debt.

But only a relatively small portion of this funded debt is of fixed interest obligations.

To further explain this situation, there was invested in the property by the predecessor company, the Western Pacific Railway Company, to July 14, 1916, the date that the company went into the hands of the receiver, $82,398,852. The present company invested in the property from July 14, 1916 to December 31, 1935, $76,967,015, making a total of $159,365,867.

With the capital expenditures in round figures around $3,000,000, it is a grand total of $162,365,867. This is against a fixed interest debt under the plan of reorganization of only $25,675,900. This latter figure includes the $10,000,000 of new bonds which we propose to sell to the Reconstruction Finance Corporation. [1776]

Q. Mr. Elsey, before there is any definite obligation to pay contingent interest on income bonds, do you feel that adequate working funds will be available to you to enable you to properly operate and maintain the property? A. Yes, sir.

(Testimony of Charles Elsey.)

Q. Will you explain that feature of the plan?

A. In the plan of reorganization there is set up what is called the capital fund. Money from the capital fund can be spent for additions and betterments or for the payment of principal and installments on equipment trust notes before any money is allocated to the income bondholder, either as interest or for sinking fund.

Q. The amount of that fund during the first five-year period of the plan is what?

A. $500,000 a year.

Q. Is that subsequently increased to a larger amount?

A. Yes, sir. For the next five years it is increased to a million dollars a year, and thereafter, 3 per cent of our gross operating revenues.

Q. So you feel there is no danger whatever of the property being starved under this plan?

A. None whatever.

Q. So much for that. You have already adverted to the limited accumulative feature of the income bonds. Do you wish to add anything to what you have already said on [1777] that subject?

A. No, I cannot say that I do.

Q. That is, there is no danger under this plan of heavy accumulations, such as have been criticised in other reorganizations, where income bonds were the feature? A. No, sir.

Q. A small issue of junior lien bonds is allocated to the A. C. James Company and the Railroad

(Testimony of Charles Elsey.)

Credit Corporation under this plan. Is the interest cumulative or non-cumulative?

A. Non-cumulative entirely.

Q. That is entirely non-cumulative, so there is no problem in connection with that?

A. None whatever.

Q. Mr. Elsey, the director of the Bureau of Finance communicated with the Railroad Corporation and requested that certain exhibits be assembled. Have you taken up that request?

A. Yes, sir.

Q. First on the list is the articles of incorporation and by-laws. That is a formal exhibit which I offer without any comment. It speaks for itself.

Examiner Boyden: Let the exhibit, including the articles of incorporation of the Western Pacific Railroad Company be marked exhibit 4. [1778]

(Exhibit 4, Witness Elsey, marked for identification.)

Mr. Nicodemus: We next offer the first mortgage of the Western Pacific Railroad Company to the First Federal Trust Company and Henry E. Cooper, Trustees, dated June 26, 1916.

Q. Mr. Elsey, in connection with this exhibit has the name of the corporate trustee been changed?

A. Yes, sir.

Q. What is the present name of the corporate trustee?

A. Crocker First National Bank of San Francisco.

(Testimony of Charles Elsey.)

Q. Has Henry E. Cooper, originally the individual trustee, continued to serve as such, or has he been superseded? A. Yes, sir.

Q. He has been superseded? A. Yes, sir.

Q. By Samuel Armstrong?

A. That is correct.

Q. The papers incident to the substitution of Mr. Armstrong are annexed? A. Yes, sir.

Mr. Nicodemus: I offer the mortgage and the accompanying papers as exhibit 5.

Examiner Boyden: Let it be marked exhibit 5.

(Exhibit 5, Witness Elsey, marked for identi- [1779] fication.)

Mr. Nicodemus: We next offer the general refunding mortgage of the Western Pacific Railroad Company to the Chase National Bank of the City of New York, trustee, dated as of January 1, 1932.

Examiner Boyden: Let it be marked Exhibit 6.

(Exhibit 6, Witness Elsey, marked for identification.)

Q. (By Mr. Nicodemus) With reference to the exhibit just introduced, Mr. Elsey, that mortgage was created quite recently. Will you state the amount of bonds that have been authenticated under that mortgage? Certain bonds were authenticated by the trustee in place of the treasurer of the company. Will you state the position of those bonds at the present time?

(Testimony of Charles Elsey.)

A. Those bonds amount to $18,999,500, and are pledged as collateral under notes of the A. C. James Company, Reconstruction Finance Corporation, and the Railroad Credit Corporation.

Q. None of the bonds of that issue is outstanding in the hands of the public and the other issue is canceled under the plan? Is that correct?

A. Yes, sir.

Mr. Nicodemus: I next offer the certificate for common stock of the debtor. [1780]

Examiner Boyden: Let it be marked exhibit 7.

(Exhibit 7, Witness Elsey, marked for identification.)

Mr. Nicodemus: We then offer the certificate for preferred stock of the debtor.

Examiner Boyden: Let it be marked exhibit 8.

(Exhibit 8, Witness Elsey, marked for identification.)

Mr. Nicodemus: The next exhibit which we offer pursuant to the request of the Commission is a complete and detailed statement of the short term obligations of the carrier, the three issues of notes to which the witness has just referred, and the schedules of collateral therefor, and we believe all the information necessary to enable the Commission to determine the status of these short term notes.

Examiner Boyden: Let it be marked exhibit 9.

(Exhibit 9, Witness Elsey, marked for identification.)

(Testimony of Charles Elsey.)

Mr. Nicodemus: Exhibit 9 is supplemented by a brief statement of data pertaining to other securities of the company, which might go in as exhibit 10. This shows the status of the equipment trusts and unsecured indebtedness, and like items.

Examiner Boyden: Let it be marked exhibit 10.

[1781]

(Exhibit 10, Witness Elsey, marked for identification.)

Q. (By Mr. Nicodemus) Mr. Elsey, have you caused to be prepared an analysis of the road's available balance sheet? A. Yes, sir.

Q. What date has been selected for that purpose? A. December 31, 1935.

Q. The plan of reorganization contemplates that the old company will pass out as of midnight of that date, and that the new company will start to function on January 1, 1936?

A. That is the reorganized company.

Mr. Nicodemus: We offer that in evidence.

Examiner Boyden: Let the analysis of the balance sheet be marked exhibit 11.

(Exhibit 11, Witness Elsey, marked for identification.)

Q. (By Mr. Nicodemus) Have you prepared or caused to be prepared a similar analysis of the investment account as of the same date?

A. Yes, sir.

(Testimony of Charles Elsey.)

Mr. Nicodemus: We offer that analysis in evidence.

Examiner Boyden: Let it be marked exhibit 12.

(Exhibit 12, Witness Elsey, marked for identi- [1782] fication.)

Mr. Nicodemus: Mr. Examiner, the Commission requested traffic density charts. We have a traffic density chart for 1934. It has very little significance in this proceeding, because there are no divisional liens or anything of that character.

However, we offer it in evidence. We could supply years if needed, but we think it would serve no particular useful purpose. It will be substantially the same as 1934.

The Witness: Yes.

Examiner Boyden: Let the 1934 traffic density chart be marked exhibit 13.

(Exhibit 13, Witness Elsey, marked for identification.)

Mr. Nicodemus: We also have prepared at the request of the Commission a brief reference to the corporation laws under which the debtor is organized.

Examiner Boyden: Let it be marked exhibit 14.

(Exhibit 14, Witness Elsey, marked for identification.)

Q. (By Mr. Nicodemus) Have you caused to be prepared, Mr. Elsey, a statement showing the pres-

(Testimony of Charles Elsey.)

ent status of equipment with regard to its age, condition, ledger value, and accrued depreciation as of December 31st? [1783]

A. Yes, sir.

Q. That was prepared by you and for you in the usual course of business by the auditor or superintendent of motive power?

A. The superintendent of motive power.

Q. Examiner Boyden: Let it be marked exhibit 15.

(Exhibit 15, Witness Elsey, marked for identification.)

Q. (By Mr. Nicodemus) Have you any comment to make on that exhibit?

A. None other than the fact that under our plan of reorganization with the expenditure of a portion of our $9,500,000 for equipment we feel that it will bring our equipment up to good operating condition.

Q. Mr. Elsey, in view of the fact that the plan of reorganization is proposed to be made effective as of January 1, 1936, have you requested the auditor to prepare and has he prepared a pro forma balance sheet for the reorganization company?

A. Yes, sir.

Q. Is the auditor available for examination should anyone present care to make inquiry as to the method by which this was prepared?

A. Yes, sir.

Q. That is also true as to the other financial exhibits, [1784] the analysis of investment account and the analysis of balance sheet?

(Testimony of Charles Elsey.)

A. That is correct.

Q. Have you any comment to make on this pro forma balance sheet? A. No, sir.

Mr. Nicodemus: It is offered in evidence.

Examiner Boyden: Let the pro forma general balance sheet be marked as exhibit 16.

(Exhibit 16, Witness Elsey, marked for identification.)

Mr. Nicodemus: In order to make the plan of reorganization effective, it is necessary to execute certain new instruments. First among these is the first mortgage, next in importance the income mortgage, then the junior lien mortgage, escrow agreement, and the voting trust agreement.

Drafts of these five instruments have been prepared.

Under the plan the so-called Ecker Committee, the committee of which Mr. Frederick H. Ecker is Chairman, have reserved the right to review these documents, and we offer them with the understanding that they are subject to revision by counsel for the committee. There is nothing sacrosanct about these documents. We will be glad to have the suggestions of any of the interested counsel. [1785]

We now tender them as the documents that we are required to execute under the plan.

First, I will offer the first mortgage.

Examiner Boyden: Let it be marked Exhibit 17.

(Exhibit 17, Witness Elsey, marked for identification.)

(Testimony of Charles Elsey.)

Q. (By Mr. Nicodemus) Have you any comments to make on the first mortgage, Mr. Elsey?

A. The first mortgage will be dated January 1, 1936, and will be a closed mortgage of $50,000,000. Under the plan of reorganization there will be $15,675,900 of these bonds issued to the present first mortgage bondholders and the Reconstruction Finance Corporation.

$10,000,000 will be sold to the Reconstruction Finance Corporation to provide funds for the contingency reserve fund and the improvement program. $1,000,000 will be issued and placed in the treasury. The balance of $23,324,100 will be reserved for future additions and betterments. The bonds or deposited cash can only be drawn down to the extent of 75 per cent of the actual net expenditures.

Q. Is that a conservative mortgage, in your judgment, in respect to the limitations on the issuance of future bonds? A. Yes, sir. [1786]

Q. The trustees under that mortgage are the Crocker First National Bank of San Francisco and Samuel Armstrong? A. Yes, sir.

Mr. Nicodemus: We next offer the proposed income mortgage to the United States Trust Company, Trustee.

Examiner Boyden: Let it be marked exhibit 18.

(Exhibit 18, Witness Elsey, marked for identification.)

Q. (By Mr. Nicodemus) Have you any comment to make on the income mortgage?

(Testimony of Charles Elsey.)

A. The income mortgage is dated January 1, 1936. It has a life of 75 years. It consists of two series, series A and series B.

Q. Fifty years, that is?

A. Pardon me; fifty years.

Series A is to be issued in the amount of $20,887,398, and Series B in a like amount, making a total of $41,774,796. It will be a closed mortgage.

Q. The interest is wholly contingent upon available net income? A. Yes, sir.

Q. The subject of available net income has been negotiated at considerable length with the representatives of the insurance companies and the Ecker Committee? A. Yes, sir. [1787]

Q. You have already referred to the fact that it is cumulative for two years' interest only?

A. Yes, sir.

Mr. Nicodemus: We next offer the proposed junior lien mortgage to the Chase National Bank of the City of New York.

Q. Have you any comment to make upon that?

A. It is dated January 1, 1936. It is for a period of 75 years. The total amount to be issued under this mortgage is $8,092,709. It is a closed mortgage at that figure. The bonds under this mortgage are to go to the A. C. James Company and the Railroad Credit Corporation.

Q. In accordance with the plan?

A. Yes, sir.

(Testimony of Charles Elsey.)

Examiner Boyden: Let it be marked exhibit 19.

(Exhibit 19, Witness Elsey, marked for identification.)

Mr. Nicodemus: Under the provisions of the plan, one-half of the equity is placed in escrow as security for the payment of interest at a future income period. Such an instrument has been prepared and we now offer the escrow agreement.

Examiner Boyden: Let it be marked exhibit 20.

(Exhibit 20, Witness Elsey, marked for identification.) [1788]

Mr. Nicodemus: Last of all, we offer the proposed voting trust agreement.

Q. I call your attention to the fact, Mr. Elsey, that the names of the voting trustees are not inserted in the voting trust agreement. The plan of reorganization provides in substance that at or before the hearing on the plan, which is this hearing, three voting trustees shall be appointed, which will be nominated by the railroad company and acceptable to the bondholders committee; that is, the Ecker Committee.

Has the railroad company made its nominations?

A. Yes, sir.

Q. Have the voting trustees been selected?

A. Two.

Q. What has happened to the third?

A. There was disagreement as to the third.

Q. That is still in negotiation, then?

(Testimony of Charles Elsey.)

A. Yes, sir.

Mr. Nicodemus: I will pass that.

We offer the voting trust agreement with the understanding that the name of the third trustee will be supplied at the earliest practicable date. We regret very much that it has not been already.

Examiner Boyden: Let it be marked exhibit 21.

(Exhibit 21, Witness Elsey, marked for identi- [1789] fication.)

Q. (By Mr. Nicodemus) Mr. Elsey, you have already offered an exhibit showing how this plan would work if applied retroactively. Have you any exhibit now that will show how it will operate in the future, according to the best estimates?

A. Yes, sir.

Q. What have you prepared in the nature of a forecast?

A. I have prepared an estimate of revenues and income account for the five year period, 1936 to 1940, inclusive. This information that is disclosed in this estimate was prepared in the regular same manner that we prepare our ordinary estimates in preparation of our forecast.

Q. You have reviewed this personally with care?

A. Yes, sir.

Q You believe it to be reasonably conservative?

A. Yes, sir; I think it is very conservative, particularly as far as our estimates on operating revenues are concerned.

(Testimony of Charles Elsey.)

Q Witnesses are available to testify as to the details of this statement should anyone desire to analyze the estimates? A. That is correct.

Q. Who will testify as to the assumed operating revenues?

A. Mr. John F. Bon, freight traffic manager.

[1790]

Q. And another witness will testify as to the operating expenses?

A. Yes, sir. Mr. Edward W. Engelbright, consulting engineer on my staff, will testify as to the operating expenses.

Examiner Boyden: Let the forecast be marked as exhibit 22.

(Exhibit 22, Witness Elsey, marked for identification.)

Q. (By Mr. Nicodemus) In a telephone talk I had with one of the Examiners, he indicated that the Commission would like to have some information about the present condition of structures and equipment. Do you feel that the testimony you have already given covers those points, or do you wish to add anything?

A. We have referred maintenance on our way and structures, particular rail. The program of rehabilitation provides that all of that rail will be taken out of track in three years. We also have some deferred maintenance on our freight equipment. That also will be taken care of out of our rehabilitation fund.

(Testimony of Charles Elsey.)

Q. Do you think that is covered by your previous statement that at the end of the three-year period you will have a reasonably satisfactory road that can be operated without extraordinary maintenance? [1791] A. That is correct.

Mr. Nicodemus: I have finished with this witness, Mr. Examiner.

Cross Examination

Q. (By Mr. Swaine) Mr. Elsey, in exhibit 3, which is headed "The Western Pacific Railroad Company's Plan of Reorganization, Annual Fixed Charges under Plan, $1,027,036, Record of Present Company," are the figures contained in the second vertical column under the caption "Available for Interest" the figures of the Western Pacific Railroad Company as a separate entity or are they the consolidated figures of that company and all of the companies of which it owns a majority or more of the capital stock?

A. That is just the figures of the Western Pacific Railroad Company.

Q. They are the figures of the Western Pacific Railroad Company only? A. Yes, sir.

Q. Are they the figures of net railway operating income, or do they include items for interest from subsidiaries? A. Yes, sir.

Q. Which is it?

A. It includes interest received from subsidiaries.

(Testimony of Charles Elsey.)

Q. Is the interest which is there stated interest which was [1792] received in cash or interest received in obligations?

A. It was received in obligations during certain portions of the period.

Q. Will you please state the amount for each of the years which represents interest credited on the books of the Western Pacific Railroad Company to paid-in obligations, and state the companies whose obligations represent that interest?

A. Approximately $600,000 a year obligations of the Sacramento Northern Railway.

Q. Have you prepared a statement of the net railway operating income of the Sacramento Northern? A. No, sir.

Q. Can you state to the Examiner what the amount of the net railway operating income has been over this period of time?

A. No, sir, I have not the figures with me.

Q. Has it approximated this $60,000 annually of interest? A. I could not say, Mr. Swaine?

Q. How much do you think if would be?

A. I do not want to guess at the figures.

Mr. Swaine: I think, Mr. Examiner, it is rather relevant: He has now testified that in these figures "Available for Interest" is an item of $600,000 a year—is that right?

The Witness: Yes, sir. [1793]

Mr. Swaine: —is an item of interest accrued to the Western Pacific Railroad Company from the

(Testimony of Charles Elsey.)

Sacramento Northern. I think it is relevant to the Commission and certainly to the first mortgage bond holders to know how good that item is.

May we therefore ask the witness to submit as an exhibit a statement of the net railway operating income, or perhaps we had better make it the total income of the Sacramento Northern, for this period, so that we can see to what extent that $600,000 per year has been earned.

Examiner Boyden: You mean for the period covered in——

Mr. Swaine: 1929 to 1935.

Examiner Boyden: Would it not be better to have the total income account shown for that period?

Mr. Swaine: I agree. You get my point, do you not?

Mr. Nicodemus: Surely. We will do that.

Examiner Boyden: Will you have such an exhibit prepared, Mr. Nicodemus?

Mr. Nicodemus: We will be very glad to.

Q. (By Mr. Swaine) Turning to page 2 of the analysis of balance sheet, under "Investments in Affiliated Companies," the first item is those pledged under the first mortgage, and the first item under that is capital stock of the Salt Lake City Union Depot & Railroad Company.

Will you please explain what that company is?

[1794]

A. That is the depot company at Salt Lake City for our passenger terminal.

(Testimony of Charles Elsey.)

Q. Do you own all of the capital stock of that company? A. No, sir; 50 per cent.

Q. The next item is "Capital Stock of Sacramento Northern Railway, $999,500."

I notice further down, pledged under general and refunding mortgage, $500 in stock of the same company. Does that $1,000,000 aggregate represent the entire stock of that company? A. Yes, sir.

Q. What is the Sacramento Northern Railway Company?

A. The Sacramento Northern Railway is an electrically operated company property approximately 275 miles in length, operating from San Francisco to Oakland, Sacramento, Marysville, Oroville and Chico, with branch lines to Woodland, in the Holland district, and to Vacaville.

Q. When did it go into operation?

A. I could not tell you.

Q. Before the Western Pacific Railroad Company? A. Yes, a portion of it.

Q. Is it actually paying any cash return, either by way of interest or dividends to the Western Pacific Railroad Company? A. No, sir. [1795]

Q. Is the Western Pacific Railroad Company making advances to it from time to time?

A. Yes, sir, for nominal amounts.

Q. Since in exhibit 3 the item "Available for Interest" included $600,000 a year interest on advances to that company, I assume that those figures did not deduct the amount of advances to the company annually. Is that correct?

(Testimony of Charles Elsey.)

A. That is correct.

Q. Can you state the average amount of those advances? A. No, I cannot.

Q. Would it be as much as $100,000 a year?

A. Oh, it might run slightly over $100,000 a year.

Q. Does that mean, then, that this item "Available for Interest" is larger by about $700,000 than the actual amount of cash which you would have had available for interest?

A. Approximately so. Mr. Swaine, I do not consider those debts of the Sacramento Northern a bad obligation. The Sacramento Northern, as I have figured, has quite a future. In the first place, the Sacramento Northern is the only interurban railroad that will operate over the new bridge from Oakland to San Francisco. We expect that our passenger revenue will increase very materially.

The Sacramento Northern recently constructed the [1796] Holland Branch, which taps a very rich agricultural district, and is showing very large improvements in traffic.

Q. All I want to do is to bring out the facts as to what cash we would have to collect this interest out of, that is all.

Do you think that the obligations which you have received could have been sold for cash, at par, so that you would have had this amount of cash available to pay this interest? A. No, sir.

(Testimony of Charles Elsey.)

Q. Do you think they could have been placed with banks to realize this amount of cash, so that this amount that you have entitled "Available for Interest" would really have been available for interest? A. I cannot answer that question.

Q. The answer to that question will somewhat be given by the income statement of the Sacramento Northern, will it not? A. Yes, sir.

Q. What is the next company, the Deep Creek Railroad Company?

A. The Deep Creek Railroad is a road approximately 40 miles in length, running from the main line at Wendover in Utah to the point of Gold Hill.

Q. Is the company paying any dividends? [1797]

A. No, sir.

Q. Do you have to make advances to it?

A. Very small.

Q. What do you mean by "very small"?

A. $20,000 a year.

Q. Will you produce an income statement of the Deep Creek Railroad Company also?

A. We can, yes.

Q. Is that a wholly-owned company?

A. Yes, sir.

Examiner Boyden: For what years, Mr. Swaine?

Mr. Swaine: For the years 1929 to 1935, inclusive.

Q. What is the Standard Realty & Development Company?

A. The Standard Realty & Development Company is a wholly-owned subsidiary of the Western

(Testimony of Charles Elsey.)

Pacific, and is simply a convenience company for the handling of miscellaneous pieces of real estate.

Q. Does it return any dividends or interest?

A No, sir.

Q. Has its income been such as to require the making of advances to it?

A Practically nothing.

Q. There have been some?

A. Very small amounts, at times; might be two or three thousand dollars, something of that kind.

[1798]

Q. To complete the record, might it not be well similarly to produce its income statement for 1929 to 1935?

Examiner Boyden: Will you do so, Mr. Nicodemus?

Mr. Nicodemus: Yes.

Q. (By Mr. Swaine) The next item, "Sacramento Northern Railroad 5 per cent 20-year Gold Bonds, $3,975,456.13".

Were those bonds issued for additions and betterments to the Sacramento Northern?

A. Yes, sir, and the purchase of the property.

Q. What?

A. Additions and betterments, and also for the purchase of the property before the Western Pacific became interested in the property.

Q. What is the item "Notes Receivable" under that? As this is printed in this "Analysis of Bal-

(Testimony of Charles Elsey.)

ance Sheet" the words "Notes Receivable" are indented correspondingly with the "Sacramento Northern" and not correspondingly with the "5 per cent 20-year Gold Bonds." I do not know whether that is intentional or whether those notes receivable really belong to the Sacramento Northern.

A. Those notes receivable are separate, Mr. Swaine.

Q. Whose notes receivable are they?

A. In favor of the Western Pacific.

Q. I know, but are they Sacramento Northern? I do not understand from the way it is indented if those are [1799] Sacramento Northern notes receivable, or are they notes receivable of other companies?

A. No, the Sacramento Northern.

Q. They are all Sacramento Northern?

A. Yes.

Q. What were they issued for by the Sacramento Northern?

A. Oh, for various purposes, additions and betterments of the Sacramento Northern, and advances of the——

Q. Advances to incurred deficits in operation?

A. Yes, sir.

Q. Can you state what part of the $4,524,744 represents deficits in operation?

A. No, sir, I cannot.

(Testimony of Charles Elsey.)

Q. Would you get that figure and supply it for the record, please?

Examiner Boyden: Will you supply for the record, Mr. Nicodemus, an analysis of the item of "Notes Receivable" under the "Sacramento Northern" as an exhibit?

Mr. Nicodemus: We will.

Q. (By Mr. Swaine) The next items seem to be "Pledged Under General and Refunding Mortgage."

So far as the physical properties are concerned, the general and refunding mortgage is a lien junior to the first mortgage upon all the properties, is it not? A. That is correct. [1800]

Q. Are these items now listed under "Investments" only items in respect of which the general and refunding mortgage is a lien superior to the First Mortgage? A. That is correct.

Q. What is the Tidewater Southern Railway Company?

A. The Tidewater Southern Railroad is a feeder property that operates from Stockton southerly through the San Joaquin Valley for a distance of approximately 75 miles, serving the towns of Manteca, Modesto, Turlock, and Hilmar.

Q. Does it pay dividends to the Western Pacific Railroad Company? A. No, sir.

Q. Does it make any return by way of interest?

A. It is paying its interest and paying princi-

(Testimony of Charles Elsey.)

pals on the advances that have been made in the past.

Mr. Swaine: Will you produce also the income account of that road from 1929 to 1935, inclusive?

Examiner Boyden: Will you do so, Mr. Nicodemus?

Mr. Nicodemus: All that data is shown by the reports that we file annually with the Commission, which we stipulate may be referred to, so it is not necessary to offer these as exhibits, that we prepare a statement assembling the information that Mr. Swaine requests, but refer to those annual reports, if that is satisfactory.

Q. (By Mr. Swaine) As to this particular item there really [1801] is income coming in?

A. Yes, sir.

Q. That income is in the amount "Available for Interest" in exhibit No. 3?

A. No, sir. The interest on any advances that the Western Pacific has made to the Tidewater Southern will be included.

Q. The income received from the Tidewater Southern Railway Company by the Western Pacific Railroad Company is in the item "Available for interest"? in the second column of exhibit 3?

A. That is correct.

Q. Do you know how much that has been in the aggregate over that period?

A. I could not give you that.

Q. As much as $100,000?

(Testimony of Charles Elsey.)

A. No, the interest is not that much.

Q. It is a relatively small item?

A. Yes, sir.

Q. What I am trying to get at is whether the actual interest items that you have gotten in any measure offset these deficits that are also included in there as income. You think it is materially less than $100,000? A. Yes, sir.

Q. What is the Central California Traction Company? [1802]

A. The Central California Traction Company is a line operating between Stockton and Sacramento, serving a very rich agricultural district, the principal commodities being Tokay grapes. It is owned jointly by the Southern Pacific, Santa Fe, and Western Pacific in equal proportions.

Q. By the way, I think I forgot to ask you whether the Tidewater Southern was wholly owned by the Western Pacific.

A. No, sir. The Western Pacific owns approximately 98 per cent of the stock.

Q. Does the Central California Traction Company return income? A. No, sir.

Q. Do you have to make advances to it from time to time? A. Yes, sir.

Q. The advances that you have to make to it have not been deducted from the item "Available for Interest" as shown on exhibit 3?

A. That is correct.

Q. They have not been deducted?

A. No, sir.

(Testimony of Charles Elsey.)

Q. What is the Alameda Belt Line?

A. The Alameda Belt Line is property that is jointly owned by the Western Pacific, and Santa Fe, and serves the [1803] southerly arm of the estuary and reaches the larger terminals of the Encinal Terminals in Alameda.

Q. Has it paid dividends over this period, 1929 to 1935? A. No, sir.

Q. You have to make advances to it?

A. Practically none at all; very small.

Q. Such as you have made have not been deducted from the item "Available for Interest" under exhibit 3? A. No, sir.

Q. Do you have to make advances to the Salt Lake City Union Depot & Railroad Company?

A. Yes, sir.

Q. And similarly they have not been deducted?

A. No, sir.

Q. Those advances are to pay for operating expenses that the terminal itself is unable to earn?

A. Yes, sir, and they are pro rated on a wheelage basis between the two companies.

Q. What is the item of "Notes receivable" pledged under the general and refunding mortgage? A. I could not say.

Q. Could you prepare or have prepared an analysis of that item, please?

Examiner Boyden: Will you do so, Mr. Nicodemus?

(Testimony of Charles Elsey.)

Mr. Nicodemus: We will. [1804]

Mr. Swaine: I suggest, Mr. Examiner, that in the light of this testimony it would be very helpful, not only to the Commission but to the security holders if we could have a consolidated income statement of the company and all its subsidiaries prepared, so that we can see what really is available for interest.

Examiner Boyden: For how many years, Mr. Swaine?

Mr. Swaine: For 1929 to 1935. I think it ought to parallel this other exhibit. I would suggest that similarly a consolidated statement be made covering the period for which a forecast was prepared. I do not remember the number of the exhibit.

Examiner Boyden: Exhibit 22.

Mr. Swaine: 1936 to 1940.

Q. Perhaps I *may in* error. Was that forecast 1936 to 1940 prepared on the basis of the Western Pacific Railroad Company as a separate entity, or is that a consolidation? A. Separate.

Q. As a separate entity? A. Yes, sir.

Q. So you have taken in here as part of your income the accruals of interest on the Sacramento Northern? A. No, sir.

Q. You did not as to that one? [1805]

A. No, sir.

Q. Have you made any deductions for prospective advances to these subsidiaries that have not earned their way?

(Testimony of Charles Elsey.)

A. No, sir. It would not come into that kind of a statement.

Mr. Swaine: I think it might be well if we had also a forecast of the prospective operating deficits of the various subsidiaries for which the Western Pacific Railroad Company will be required to make advances during this 1936 to 1940 period.

Examiner Boyden: Mr. Elsey, do you believe you can prepare such a forecast of operating deficits?

The Witness: It is rather difficult to prepare a forecast, for instance, of the Salt Lake City Union Depot & Railroad Company, and the Alameda Belt Line, as strictly operating units. We can prepare a statement for the Sacramento Northern and Tidewater Southern.

Mr. Swaine: They are the only two really important ones, are they not? The others are comparatively small?

The Witness: Yes.

Mr. Swaine: I think it would be helpful if we could see what you estimate as the financial burden upon this property by reason of carrying these subsidiaries over the next five years.

Mr. Nicodemus: I agree with you. I think we will under- [1806] take to do that.

Mr. Swaine: I do not want to ask anything that is the least bit unreasonable, but I do think we should have it.

(Testimony of Charles Elsey.)

Mr. Nicodemus: We may have the data here in Washington. I think we have. I think we can find it in the Commission's files.

Examiner Boyden: How soon could you prepare that statement?

Mr. Nicodemus: I cannot make a forecast of that. We will get right at it. We will undertake to do that.

Examiner Boyden: Will you prepare a consolidated income account for the years 1929 to 1935 for the Western Pacific, and a forecast of the deficits?

Mr. Nicodemus: We will undertake to annex to those two exhibits, supplementary statements covering this piece of information that Mr. Swaine asks.

Examiner Boyden: Please do so.

Q. (By Mr. Swaine) I notice, continuing on the balance sheet, under the item "Unpledged," $3,338,356.42 advances to the Sacramento Northern Railway. Those are advances for operating deficits, are they? A. Not altogether.

Q. To what extent?

A. I could not say offhand. Of course, you understand, Mr. Swaine, that these various subsidiaries of ours are [1807] contributors of traffic to our main line. It is a principle on which we purchased these properties.

Q. I understand that perfectly. Of course, the revenues from the traffic which they have contrib-

(Testimony of Charles Elsey.)

uted to the main line are reflected in the amount available for interest? A. That is correct.

Q. But the deficit is not reflected?

A. No, sir.

Q. On page 4 of the balance sheet under Account No. 717 you have a total of current assets of $413,679.59. What principle did you apply in determining these interest and dividends receivable were current assets?

Let me put it another way:

Are they included in that item because they are less than six months old, or are they included in that item because you really expect to be able to collect them?

A. I could not say. The auditor is here to explain these details, Mr. Swaine.

Q. Is it an arbitrary allocation under some accounting principle, or are they really items on which you expect to be able to realize cash within the reasonably near future?

A. I cannot answer that question.

Q. The auditor is here; perhaps he could supply the answer.

Mr. DeGraff: I do not know just what item that is you [1808] refer to.

Mr. Swaine: Take the big one, for example, "Accrued Interest on Sacramento Northern Railroad Bonds," "Accrued on Sacramento Northern Railroad Notes Receivable," "Accrued Interest on Sacramento Northern Railway Advances."

(Testimony of Charles Elsey.)

Those items comprise most of the item of $413,679 current assets.

Examiner Boyden: Do you expect to have the auditor testify later on, Mr. Nicodemus?

Mr. Nicodemus: I intend to, yes.

Examiner Boyden: Can we save that question until he is on the stand?

Mr. Swaine: Yes. I thought we might have it in juxtaposition.

Q. Mr. Elsey, you stated the Reconstruction Finance Corporation had undertaken to provide $10,000,000 of new money, conditioning the undertaking upon having its present obligations receive under the plan security pari passu with the first mortgage bonds. Is that undertaking of the Reconstruction Finance Corporation evidenced by any instrument in writing?

A. That is my understanding.

Mr. Nicodemus: It is evidenced by a letter which I think is already in evidence in connection with the corporate action of the debtor. I think Mr. Jones' letter [1809] stating this undertaking is in exhibit No. 1.

Q. (By Mr. Swaine) You are referring to a letter signed "Jesse H. Jones, Chairman," under date of July 20, 1935, addressed, "Dear Mr. Schumacher"?

A. I stated it was my understanding, Mr. Swaine, that the——

Q. Is that the only commitment?

(Testimony of Charles Elsey.)

Mr. Nicodemus: That is what I have in mind.

Mr. Swaine: That is the only commitment?

Mr. Nicodemus: In other words, some other correspondence, I think, preceded that.

Examiner Boyden: Please explain, Mr. Swaine, from what paper you were reading.

Mr. Swaine: I was reading from a copy of a letter dated July 20, 1935, which appears as an exhibit to a document which is called "Extracts Minutes Meetings Board of Directors, The Western Pacific Railroad Company in re Reorganization Plan."

Mr. Nicodemus: That was part of exhibit 2.

Mr. Swaine: I think this letter speaks for itself. It makes this commitment not upon the condition stated by Mr. Elsey but upon the condition that the Reconstruction Finance Corporation shall receive for its present indebtedness, 30 per cent in first mortgage bonds and 70 per cent in income mortgage bonds.

Mr. Nicodemus: That is correct. [1810]

Mr. Swaine: There is no commitment other than this on the part of the Reconstruction Finance Corporation, is that right?

Mr. Nicodemus: No, none at all.

Mr. Swaine: I suppose, Mr. Examiner, that this would be, as a matter of technical procedure, much better stated at the time of argument on the plan, but so that you will get the point, the institutional holders which I represent, who are acting through the so-called Ecker Committee, accept or are will-

(Testimony of Charles Elsey.)

ing to accept this plan provided the plan is desired by the Reconstruction Finance Corporation and provided the Reconstruction Finance Corporation does undertake a commitment to supply the new money and accept the treatment provided in the plan.

Our committee would oppose giving the Reconstruction Finance Corporation this character of treatment independently of the covenant to supply the $10,000,000 or independently of corresponding treatment to the other securities.

The Reconstruction Finance Corporation letter does not refer either to the plan itself or to the treatment to be given to the other securities, therefore, our willingness to accept the plan is a relative matter and not an absolute one.

Examiner Boyden: Mr. Elsey, did you work out the details [1811] of this plan or were you involved in working out the details of the plan and the distribution of securities or allocation of securities to various creditors which is there proposed?

The Witness: To a certain extent, yes, sir.

Examiner Boyden: I notice that you used the term that the Reconstruction Finance Corporation's position was advanced as a result of their agreement to lend money for the reorganization. Did you mean by that that under the plan which you are presenting here the securities which they were to receive were more than they would have received if such an agreement had not been made?

The Witness: Yes, that is correct.

(Testimony of Charles Elsey.)

Mr. Swaine: Following that out, Mr. Examiner, the Reconstruction Finance Corporation's present indebtedness is secured by bonds which are wholly junior to the first mortgage bonds except for a few of these stocks. That is why I went over the balance sheet to show that those were not really earning properties. So that the Reconstruction Finance Corporation's present position is one wholly junior to that of the first mortgage bonds.

Our institutions, however, are willing that if the Reconstruction Finance Corporation supplies $10,000,000 of new money on the basis indicated in the plan, it shall in part consideration for the supplying of new money be [1812] treated in respect of its existing indebtedness on a basis pari passu with the first mortgage bonds.

It is important to state it that way rather than to state it the way that it is stated in the letter, because should the Commission change the plan as an entirety, treatment pari passu of the Reconstruction Finance Corporation's present debt with the company's first mortgage bonds might be something wholly different from the securities which are stated in the Reconstruction Finance Corporation letter of July 20th.

Examiner Boyden: Then it is the position of the creditors whom you represent, Mr. Swaine, that the action of the Reconstruction Finance Corporation in lending new money to the new company under this reorganization and taking first mortgage

(Testimony of Charles Elsey.)

bonds as security or purchasing those bonds, is such action that it justifies this advanced treatment under the plan, is that correct?

Mr. Swaine: It supplies a consideration for the new money, which is satisfactory to us. In other words, let me put in this way:

We doubt very much that anybody else would supply the money, ten million dollars, at 4 per cent. That ten million dollars is ranking pari passu with 30 per cent of our position. We get under the plan 30 per cent in new money, so as an additional consideration to the 4 per cent [1813] interest it is agreeable to us that their present position shall be advanced. The two things go together, that is, the new money has to be supplied first at 4 per cent, and secondly, for a security which ranks equal with our best 30 per cent; and the treatment of the existing debt must be pari passu.

Let me give a radical illustration to show how the thing might be changed:

Suppose that the Commission, in the light of the testimony here this morning, should decide that this property could not stand even $25,000,000 fixed charge obligation and should say that for our bonds we would have to take 20 per cent instead of 30 per cent in new first mortgage bonds.

Suppose the Commission should also say, to take an extreme illustration which I am sure the Commission will not take, for the remaining 80 per cent we would have to take common stock.

(Testimony of Charles Elsey.)

Then our understanding of the arrangement with the Reconstruction Finance Corporation—unfortunately, we have not had very much contact with the Reconstruction Finance Corporation; this has all been through Mr. Schumacher—is that under a situation where we would get 20 per cent of new bonds and 80 per cent in common stock, the Reconstruction Finance Corporation would have to advance the [1814] money against 66-2/3 per cent in bonds and 33-1/3 per cent in common stock, and would then have to take for its present position 20 per cent in bonds and 80 per cent in common stock.

I have substantial doubt—I do not know whether counsel for the Reconstruction Finance Corporation is here; they have not entered an appearance—that the Reconstruction Finance Corporation would be willing to go ahead on that kind of a basis.

Therefore, I want to make it perfectly clear that this thing is entirely relative so far as ourselves and the Reconstruction Finance Corporation are concerned.

Examiner Boyden: We will take a short recess.

(Whereupon a short recess was taken.)

Examiner Boyden: Have you any further questions, Mr. Swaine?

Mr. Swaine: No.

Examiner Boyden: Are there further questions?

Mr. Willard: Will there be another witness to go into the basis of conversion under the plan?

(Testimony of Charles Elsey.)

Mr. Nicodemus: You mean conversion of securities?

Mr. Willard: Yes, from old to new.

Mr. Nicodemus: The plan shows that, Mr. Willard.

Mr. Willard: Will you have a witness to tell how you arrived at it, whether it was by mathematics or intuition [1815] or compromise, valuation, or whatever it was?

Mr. Nicodemus: I will not, no. The plan speaks for itself on that. I do not think there is any witness that can testify as to that. That is a matter of negotiation over a long period of time. Different percentages were discussed, and the ones shown in the plan were finally arrived at. It is mathematical, however, because each creditor gets 100 per cent of his claim.

Mr. Willard: But you did not work out the values of the old obligations and allocate new securities based on those values?

Mr. Nicodemus: I have no witness that can testify how that was worked out except by a process of negotiation.

Mr. Willard: You do not intend to put in any evidence of that character?

Mr. Nicodemus: No.

Examiner Boyden: Mr. Elsey, did you prepare the estimates of future railway operating revenues which are set out in exhibit 22?

The Witness: No, sir.

(Testimony of Charles Elsey.)

Mr. Nicodemus: The next witness will testify to that.

Q. (By Examiner Boyden) Have you made a comparison of those with railway operating revenues during years prior to 1936?

A. I think you will find out that is the basis of our [1816] estimate, Mr. Examiner.

Q. On page 4 of your plan you show that total fixed and contingent charges under the plan for the new company will be $3,931,892. That is in excess of the fixed charges of the company in the past, is it not? A. That is correct.

Q. Have you reviewed the past operations of the company with a view to determining to what extent they have been able to earn their fixed charges in the past? A. Yes, sir.

Q. Have you any information you can state for the record now with respect to that?

A. I can give you the figures showing the amount available for interest from 1922 to date.

Q. Could you give us the average amount available from 1922 to 1930, inclusive?

A. The amount available for interest in 1922 was in round figures, $2,320,000.

Q. Have you an average there for the figures from 1922 to 1930?

A. No, I have not. I would say offhand it would be in excess of $2,500,000.

Q. In other words, the carrier in the past has failed on the average to earn its fixed charges,

(Testimony of Charles Elsey.)

which are less than those which you propose to have for fixed and contingent [1817] charges in the reorganized company, is that correct?

A. That is correct, but you must remember that the Northern California extension did not start to operate until the latter part of 1931.

Q. Does your forecast, exhibit 22, include revenues from the Northern California extension?

A. Yes, sir.

Q. Can you state now how much those amount to? A. No, I could not.

Q. The other witnesses will be able to give us that information? A. Yes, sir.

Mr. Coulson: Mr. Examiner, it might be helpful if in that case Mr. Elsey would prepare an exhibit when he breaks down that future forecast as Mr. Swaine suggested, which shall have also the amount allocated to new elements of earning property, like the Northern California extension, for the forecast years, the amount of gross necessary.

Examiner Boyden: Gross railway operating revenues?

Mr. Coulson: Yes.

Examiner Boyden: Will you show that separately?

Mr. Nicodemus: I think perhaps that will be shown by the next witness, to some extent.

The Witness: Yes, sir, it will.

Q. (By Mr. Swaine) In the figures which you gave to the [1818] Examiner just a minute ago,

(Testimony of Charles Elsey.)

had you included interest accrued but not paid by subsidiary lines?

A. Yes, that can be furnished.

Q. No. When you said the income had averaged about two and one-half million dollars during that ten-year period, did that include as credit to income account the interest accrued but not actually paid? A. Yes, sir.

Q. To what amount?

A. I could not say. It varies from year to year, Mr. Swaine.

Q. Could you tell us about the average? Half a million dollars? You said it was $600,000 in this period. A. That would be the maximum.

Q. You said it averaged $600,000 in the period 1929 to 1935. A. Yes.

Q. I just wondered what proportion of the $2,500,000 is represented by that.

A. No, I could not.

Q. Had you deducted advances to meet deficits of operating income of subsidiaries in that figure?

A. Your advances to subsidiaries do not come into your income account.

Q. I rather imagined it did not. That is what I wanted to [1819] bring out.

Q. How much were *you* advances to subsidiaries over that period? A. I could not say.

Q. If the figure is to be supplied, may it be supplied with a breakdown which will show what portion of the income is represented by interest ac-

(Testimony of Charles Elsey.)

crued but not paid in cash, and may there be a corresponding exhibit showing advances to subsidiaries to cover operating deficits?

Examiner Boyden: Will you furnish that information, Mr. Nicodemus, for the period 1922 to 1928, inclusive?

Mr. Nicodemus: He wants consolidated operations for that period, I take it?

Examiner Boyden: As I understand his request, it is merely to show the interest accrued but not collected, which is set out in the income account during that period.

Mr. Swaine: That is right.

Examiner Boyden: And the advances made to those companies to make up operating deficits during the same period, 1922 to 1928, inclusive.

The other exhibit which you are going to furnish will show the consolidated income account from 1929 to 1935, inclusive.

Mr. Nicodemus: Now you want to take that back to 1922?

Examiner Boyden: Not the consolidated income account, [1820] just merely the interest accrued and unpaid. Is that satisfactory?

Mr. Swaine: That is right.

Mr. Nicodemus: That is all right.

Q. (By Examiner Boyden) You stated, I believe, Mr. Elsey, that you would require $9,000,000

(Testimony of Charles Elsey.)

of cash to place the railroad, the Western Pacific, in normal operating condition. Did you use that term? A. Yes, sir.

Q. In how many years would you spend the $9,000,000? A. Three years.

Q. $3,000,000 a year?

A. Practically about that. The heaviest expenditures—it is about that. It will average about that. We have laid the program out on the basis of the most economical method of handling the rehabilitation work.

Q. Are you familiar with the underlying details of the computations by which you arrived at the figure of $9,000,000? A. Yes, sir.

Q. How did you obtain the figure?

A. From our survey made by our operating department, chief engineer and superintendent of motive power.

Q. Are the details of that survey available for us? A. Yes, sir. [1821]

Examiner Boyden: There will be a witness to present those, will there, Mr. Nicodemus?

Mr. Nicodemus: We had not intended to, but we will if you desire.

That is a breakdown of the program, the exhibit, covering the three-year period?

The Witness: Yes, sir, we have.

Mr. Nicodemus: We have one available?

The Witness: Yes, sir.

(Testimony of Charles Elsey.)

Mr. Nicodemus: It is already prepared, is it not?

The Witness: Yes, sir.

Mr. Nicodemus: We can offer it in connection with your testimony now?

The Witness: Yes, sir.

Mr. Nicodemus: We tried to reduce the number of exhibits to a minimum. This may be useful.

We offer this in evidence as a statement prepared at the request of President Elsey.

Examiner Boyden: Let the exhibit entitled "Program of Work for Rehabilitation During Approximately Three Years, 1936, 1937 and 1938," be marked exhibit No. 23.

(Exhibit 23, Witness Elsey, marked for identification.)

Q. (By Examiner Boyden) Right in that connection, does your exhibit 22, which is your forecast, reflect the [1822] amounts that you expect to spend for rehabilitation? A. No, sir.

Q As charged to operating expense?

A. No, sir. Part of the plan is to request the Commission to charge all operating expenses in connection with the rehabilitation program to profit and loss.

Q. If the Commission does not agree to that, then this exhibit would have to be readjusted?

A. That is correct.

Q. (By Mr. Swaine) Mr. Elsey, I notice that each one of the items is headed "Extraordinary—

(Testimony of Charles Elsey.)

1936, 1937 and 1938," and the total is "Three-year Total Extraordinary," $9,269,777. How much of that would you say represented deferred maintenance? Is it the difference between the $9,269,777——

A. That is the total cost of the whole program, Mr. Swaine, $9,509,777.

Q. Yes, but how much of that is deferred maintenance?

A. The maintenance of way and structures, outside of a few items such as on line No. 10, "Roadway machines and tools," $40,000, and line No. 19, "Passing track extensions," "Turn-table" on line 20, Section facilities on line 28, "Roundhouse" on line 29, and "Turntable" on line 30, all the balance of it is deferred maintenance.

Q. Those items, looked at very, very hurriedly, do not [1823] amount to a million dollars, do they, in the aggregate? A. No.

Q. Then would you say that it was upwards of eight million dollars of deferred maintenance?

A. The proposition is that included in this total proposition is your capital charges on the——

Q. There are $3,085,000 of capital charges, are there not? A. That is net, yes, sir.

Q. Does that mean that approximately $6,500,000 would, if it were not for this extraordinary arrangement that has been suggested, be chargeable to operation?

(Testimony of Charles Elsey.)

A. There would be chargeable to operation, $5,036,000.

Q. That is what I wanted to get at, $5,036,000. That is really the deferred maintenance figure that is being made up? A. Yes, sir.

Q. In this compilation from 1929 to 1935, has the $5,076,000 been deducted in determining the amount of income available for interest?

A. As I say, part of the plan is to charge those operating expenses to profit and loss.

Q. I understand; I am merely asking whether it has been deducted in the plan, or whether you deducted only actual maintenance of way and actual maintenance of equipment. I assume it is the latter.

[1824]

A. All of our expenses in the past have been chargeable to operating expenses.

Q. I have not made my point clear, I am afraid: You are now testifying that your actual expenses of maintenance of way and maintenance of equipment over some period, I do not know what it is, have been five million dollars less than it really should have been, is that right? To have kept your property in what you regard as a normal condition, you ought to expend approximately five million dollars more than you did spend? That is what you mean when you say it is deferred maintenance?

A. Certainly.

Q I want to be sure that I am correct in that as-

(Testimony of Charles Elsey.)

sumption, that the $5,000,000 has not been deducted in these figures on exhibit 3. A. No, sir.

Q. Over what period of time has that $5,000,000 accrued? A. I could not say.

Q. When did you begin to have the first maintenance?

A. We started an improvement program in 1927.

Q. When did you stop it? A. 1930.

Q. At the end of 1930?

A. Yes, sir. There might have been a few charges run [1825] over into 1931.

Q. So that means that that five million dollars of deferred maintenance has accrued over the last five years?

A. It is pretty hard to say that. The proposition is, as far as your rail is concerned,——

Q. If you had kept your property up to normal, what you are now testifying to really means that you should have spent a million dollars a year more on maintenance during those years?

A. That is correct.

Mr. Swaine: I am a little puzzled by the place we come out. If he should have spent a million dollars a year more than you did spend, and if you have in exhibit No. 3 an average of $600,000 a year of uncollectible interest from the Sacramento Northern and others, and also have failed to deduct about $100,000 a year of advances to meet operating deficits of subsidiaries, it looks to me as if you would have a red figure in every one of the five

(Testimony of Charles Elsey.)

years, and that is the thing that puzzles me. I am not arguing, I am just trying to get at the facts.

Q. (By Mr. Coulson) I am not clear, Mr. Elsey, as to this prior rehabilitation program: I understand you to say that was authorized in 1926 and discontinued in 1930. Is that correct?

A. Yes, sir. [1826]

Q. What was the total of rehabilitation expenditures contemplated by that program?

A. I could not say offhand, Mr. Coulson.

Q. You cannot tell us what part of the expenditures contemplated by that program had been completed at the time the program was discontinued at 1930? A. No, sir.

Q. Can you supply the Commission with that information in the form of a statement of the original program and a statement of the amount of work done to the date of abandonment of the program at the beginning of the depression?

A. That can be done, yes, sir.

Mr. Coulson: I would like to ask, Mr. Examiner, that that be done. I think it will clear up the point that puzzles Mr. Swaine as to the extent to which the deferred maintenance as to which expenditures are now contemplated and in part authorized by the Commission and the court accrued during the five years just past.

Examiner Boyden: Mr. Nicodemus, is it clear to you from the statement on the record just what counsel has asked for?

(Testimony of Charles Elsey.)

Mr. Nicodemus: It is.

Examiner Boyden: Will you prepare such a statement?

Mr. Nicodemus: I will undertake to prepare it.

[1827]

Q. (By Examiner Wilkinson) Mr. Elsey, to clarify my understanding of your plan, this $10,000,000 to be supplied by the Reconstruction Finance Corporation is to be used primarily for rehabilitation. $500,000 is to be put into the contingency fund, which would leave you $9,500,000.

Does not the plan also contemplate that out of the $9,500,000, any deficiency in fixed charges may be made good? A. That is correct.

Q. In other words, the $10,000,000 may not be used for rehabilitation, but may be used to pay interest?

A. That is the way the plan reads, but in view of the fact that this program is going to be finished in three years, I cannot see from our past experience that we will ever call on any portion of that $9,500,000 for anything other than the rehabilitation program.

Mr. Coulson: May I ask Mr. Elsey one question, Mr. Examiner?

Examiner Boyden: Yes.

Q. (By Mr. Coulson) Has any part of the expenditures shown by your exhibit 23 for the purpose of rehabilitation of the property already been authorized by the Commission or the court?

(Testimony of Charles Elsey.)

A. Yes, sir, all of the expenditures we propose to do, [1828] in the year 1936, have been authorized by the court, and the Commission has already authorized issuance of trustee's certificates to take care of that amount of work.

Q. Has the court acted as yet on the issuance of those trustee's certificates? A. No, sir.

Mr. Nicodemus: Not so far as we are advised. They may have entered an order, but they would not have done it yet. They may enter an order today.

The Witness: We expect the order today.

Examiner Boyden: Will you explain, please, Mr. Elsey, what treatment you propose to give the certificates issued in connection with the rehabilitation program and the plan of reorganization?

The Witness: The proposition is that the Reconstruction Finance Corporation has agreed to purchase the $3,000,000 of trustee's certificates, and exchange those trustee's certificates for the 4 per cent first mortgage bonds of which the Reconstruction Finance Corporation has agreed to purchase the $10,000,000.

Examiner Boyden: On a dollar-for-dollar basis?

The Witness: Yes, sir.

Mr. Clay: We were detained at another hearing across the hall this morning, involving an issue of the Missouri Pacific. May I enter the appearance of Mr. Alley, Gen- [1829] eral Counsel for the Reconstruction Finance Corporation; Judge McChord, Special Counsel; and myself, C. M. Clay, for the Reconstruction Finance Corporation.

(Testimony of Charles Elsey.)

I would like to ask a question at this time:

Q. Mr. Elsey, has there been any letter or other writing given, binding the Reconstruction Finance Corporation to take first mortgage bonds for any part of these trustee's certificates?

A. I could not say. I have been advised by our chairman of the executive committee that that was the arrangement.

Q. Are you not president of the road?

A. What is that?

Q. Would you not know if any had been given?

A. Not as a definite proposition.

Q. That is, it might be done in New York and therefore you would not know about it?

Mr. Nicodemus: There is such a letter.

Mr. Swaine: I would like to see the letter, too, if there is one.

Mr. Nicodemus: I do not know whether we brought it along.

Mr. Clay: I know of none.

Mr. Nicodemus: Mr. Jones wrote it.

Mr. Clay: Not to take first mortgage bonds for the trustee's certificates. [1830]

Mr. Swaine: They agreed to take the certificates. They did not agree to make the exchange. That bears on the point I made before.

Mr. Clay: That letter was not a commitment for $10,000,000 but it was a commitment to underwrite three million dollars, was it not, Mr. Elsey?

(Testimony of Charles Elsey.)

Mr. Nicodemus: He says he has not seen the letter, it was written to the trustees. But we will put that letter in evidence.

Mr. Clay: Can we call for that, to have it put in evidence?

Mr. Nicodemus: Yes, if we have if with us; otherwise you can put in a copy.

Examiner Boyden: Let us have the letter, if there is one.

Mr. Willard: Will you put in the letter of June 24th, also, that is referred to in the letter of July 20th?

Mr. Nicodemus: We will produce those original letters after lunch. It will take some time to dig them up. I think it will delay the proceedings unnecessarily.

Examiner Boyden: Shall we pass that now, Mr. Clay, until this afternoon?

Mr. Clay: Yes.

Q. (By Examiner Boyden) Mr. Elsey, I believe you made reference to approximately $30,000,000 of uncapitalized [1831] capital expenditures of the Western Pacific. Have you the computations of that figure with you? A. I think we have.

Q. Will you produce them for the record, please?

A. Yes, sir. That is $22,000,000, and the $3,000,000 is for the improvement program, and the $5,000,000 is the amount of money that the A. C. James Company put into the Northern California Extension, making a total of $30,000,000.

(Testimony of Charles Elsey.)

Mr. Swaine: That latter item was capitalized, was it not? It is the very note for which the securities are given under this plan.

The Witness: This is simply a switch, so far as the A. C. James Company is concerned.

Mr. Swaine: But it is capitalized?

The Witness: Yes.

Mr. Coulson: Only in a temporary form. It is not permanently capitalized.

Examiner Boyden: You will furnish a statement of the figure, $22,000,000, then?

The Witness: Yes, sir.

Mr. Nicodemus: If counsel are through, our next witness will be the freight traffic manager.

Examiner Boyden: Are there any further questions of Mr. Elsey? [1832]

Do counsel agree that the additional exhibits which we have requested may be presented for the record without further examination of Mr. Elsey?

Mr. Swaine: Yes, as far as I am concerned.

Mr. Willard: We may desire an opportunity to examine him on them later, after we have seen them.

Examiner Boyden: Mr. Elsey is temporarily excused, then.

(Witness temporarily excused.)

Examiner Boyden: Is there any objection to the exhibits numbered 4 to 23, inclusive, which are offered by the Debtor through Mr. Elsey?

(Testimony of Charles Elsey.)

Mr. Willard: There again, Mr. Examiner, we have not seen this material before today, and we have not had an opportunity to go through it carefully. We would like to have an opportunity to do it before the witnesses are finally excused.

Examiner Boyden: You may do that, but have you any objection to the receipt of the exhibits in evidence now?

Mr. Willard: No.

Examiner Boyden: They are received as marked.

(Exhibits 4 to 23, inclusive, Witness Elsey, received in evidence.)

Exhibit No. 22
Witness: Elsey
Filed March 23, 1936

THE WESTERN PACIFIC RAILROAD COMPANY
REORGANIZATION PLAN
A FORECAST OF REVENUES, EXPENSES AND INCOME

		1936	1937	1938	1939	1940
1	ASSUMED OPERATING REVENUES - The Western Pacific Railroad Company					
2	Freight Revenue	$12,636,000	$13,831,000	$15,037,000	$16,338,000	$17,930,000
3	Passenger Revenue	665,000	806,000	1,008,000	1,211,000	1,320,000
4	Mail, Express, Dining & Buffet and other Passenger Train Revenues	172,000	237,000	289,000	384,000	399,000
5	Miscellaneous Other Revenues - Net	166,000	180,000	194,000	210,000	227,000
6	Total Railway Operating Revenues	13,439,000	15,054,000	16,508,000	18,383,000	19,686,000
7	OPERATING EXPENSES (Excluding Operating Expense of Rehabilitation Program)					
8	Maintenance of Way & Structures (Including Operating Expense of Routine A & B Work - Note 1.)	2,180,000	2,180,000	2,250,000	2,400,000	2,575,000
9	Maintenance of Equipment (Including Depreciation and Operating Expense of Routine A & B Work - Note 1.)	2,088,000	2,226,000	2,360,000	2,700,000	3,100,000
10	Traffic Expense	663,000	685,000	715,000	750,000	780,000
11	Transportation Expense	5,063,000	5,419,000	5,778,000	6,250,000	6,990,000
12	Miscellaneous Expense	98,000	100,000	100,000	115,000	125,000
13	General Expense	450,000	478,000	500,000	525,000	550,000
14	Transportation for Investment - Credit	(75,000)	(75,000)	(75,000)	(30,000)	(80,000)
15	Total Railway Operating Expenses (As qualified above)	10,971,000	10,979,000	11,618,000	12,670,000	13,340,000
16	Railway Tax Accruals - Regular Items	446,000	650,000	750,000	850,000	1,050,000
17	Excise Taxes (Ordinary Expense Payrolls, Railroad Retirement and Social Security)	327,000	368,000	450,000	485,000	518,000
18	Excise Taxes (Rehabilitation Program Payrolls, Railroad Retirement and Social Security)	28,000	36,000	41,000	--	--
19	Hire of Equipment - Net Debit	1,030,000	1,100,000	1,180,000	1,175,000	1,200,000
20	Joint Facility Rents - Net Credit	(168,000)	(180,000)	(198,000)	(210,000)	(255,000)
21	NET RAILWAY OPERATING INCOME	1,804,000	2,114,000	2,697,000	3,423,000	3,785,000
22	OTHER INCOME (Assuming Plan of Reorganization is effective January 1, 1936)					
23	Rents from Road and Equipment (Rental on cars leased to Pacific Fruit Express Company)	322,000	287,000	229,000	184,000	171,000
24	Miscellaneous Interest and Other Rents from Road and Equipment	141,000	143,000	147,000	151,000	154,000
25	Total Other Income (Note 2)	463,000	430,000	376,000	335,000	325,000
26	TOTAL INCOME	1,747,000	2,544,000	3,073,000	3,758,000	4,110,000
27	MISCELLANEOUS DEDUCTIONS FROM INCOME					
28	All items other than interest on Funded Debt	121,000	120,000	117,000	118,000	113,000
29	Balance Available for Interest on Funded Debt	1,626,000	2,424,000	2,956,000	3,643,000	3,997,000
30	Deduct Interest on Equipment Trusts and Lease-Conditional Sale Agreement (Note 3)	121,680	92,875	45,215	24,772	17,976
31	Deduct Interest on $10,875,000 of 4% Bonds (Exchanged Series)	427,056	427,056	427,056	427,056	427,056
32	Deduct Interest at 4% on new Bonds sold to finance 3-Year Rehabilitation Program (Note 4)	65,000	190,000	330,000	400,000	400,000
33	Total Fixed Interest on Funded Debt	613,716	899,911	1,002,251	1,051,828	1,045,012
34	AVAILABLE NET INCOME AS DEFINED BY PLAN OF REORGANIZATION	812,284	1,524,089	1,953,749	2,591,192	2,951,988
35	Deduct amount required for maintenance of Contingency Reserve Fund (Note 5)	--	--	--	--	--
36	Deduct disbursements through Capital Fund (Note 6)	500,000	500,000	500,000	500,000	500,000
37	Balance Available for Interest on Income Bonds - Series "A" and Series "B"	312,284	1,024,089	1,453,749	2,091,192	2,451,988
38	Deduct for interest earned and payable on Series "A" and Series "B" Bonds (Note 7)	312,284	1,024,089	1,453,749	2,091,192	2,297,612
39	Deduct remainder available to apply against unpaid interest accumulation on Income Bonds	--	--	--	--	154,376
40	Balance Available for Sinking Fund ($104,424 required annually)	--	--	--	--	--
41	Deduct Sinking Fund Payments (1/2% on $20,887,988 Series "A" Bonds)	--	--	--	--	--
42	Balance Available for Interest on Junior Lien Bonds	--	--	--	--	--
43	Deduct Interest at 6% on $8,092,700 Junior Lien Bonds	--	--	--	--	--
44	Balance Available for Interest Fund	--	--	--	--	--
45	Deduct for Interest Fund (10% of balance shown by Line 44)	--	--	--	--	--
46	NET INCOME - Available for Dividends and General Corporate Purposes	--	--	--	--	--

Note: Figures in parentheses, viz: ( ) denote red.

Office of the President,
San Francisco, Calif.,
March 10th, 1936.

GENERAL

This estimate based on Plan of Reorganization filed with United States District Court and the Interstate Commerce Commission on February 8, 1936.

NOTE 1

Maintenance costs shown for 1936, 1937 and 1938 do not include operating charges incident to the Rehabilitation Program. Plan of Reorganization contemplates such expense will be charged to Profit and Loss during those years.

NOTE 2

"Other Income" does not include income from certain obligations issued by the Sacramento Northern Railway, Tidewater Southern Railway Company, and Deep Creek Railroad Company (subsidiaries of Western Pacific), which is currently reported by Western Pacific, since it is proposed to convert such obligations to non-interest bearing status.

NOTE 3

Interest shown for Equipment Trusts and Lease-Conditional Sale Agreement provides only for present obligations. No charges for new equipment obligations can be included herein since definite plans are not at present available.

NOTE 4

Bonds will be sold to provide funds for Rehabilitation Program as needs arise and are herein considered as shown below:

Year	Bonds Sold During Year	Outstanding End of Year	Average for the Year	4% Interest on Average
1936	$3,000,000	$ 3,000,000	$ 1,625,000	$ 65,000
1937	3,800,000	6,800,000	4,750,000	190,000
1938	3,800,000	10,000,000	8,250,000	330,000
1939 and subsequently.	None	10,000,000	10,000,000	400,000

NOTE 5

No resort to the Contingency Reserve Fund set up by the Plan of Reorganization is expected to be necessary during periods shown.

NOTE 6

Capital Fund disbursements up to limit set by Plan of Reorganization are expected to be required for payments on Equipment Trusts, advances to subsidiaries for deficits or Additions and Betterments thereon, Western Pacific routine Additions and Betterments, etc.

NOTE 7

Full 5-1/2% interest on Income Bonds Series "A" and Series "B" amounts to $2,297,612 annually on basis of no conversions of Series "B".

Such interest is to be payable each six month period in fractions of 1/4% or multiples thereof, but, for simplicity, entire amounts available have here been allocated and on an annual basis.

(Exhibit No. 22—continued)

The Western Pacific Railroad Company

PLAN OF REORGANIZATION

RATIOS OF OPERATING EXPENSES TO OPERATING REVENUES

Operating Expenses (Excluding Operating Expenses of Rehabilitation Program)	1936		1937		1938		1939		1940	
Maintenance of Way & Structures (Including Operating Expense of Routine A & B Work—Note 1.)	$2,120,000	(15.8%)	$2,150,000	(14.3%)	$2,250,000	(13.6%)	$2,400,000	(13.1%)	$2,575,000	(13.1%)
Maintenance of Equipment (Including Depreciation and Operating Expense of Routine A & B Work—Note 1.)	2,058,000	(15.3%)	2,225,000	(14.8%)	2,350,000	(14.3%)	2,700,000	(14.7%)	3,100,000	(15.8%)
Traffic Expense	663,000	(04.9%)	685,000	(04.6%)	715,000	(04.3%)	730,000	(04.0%)	750,000	(03.8%)
Transportation Expense	5,063,000	(37.7%)	5,419,000	(35.9%)	5,778,000	(35.1%)	6,250,000	(34.0%)	6,290,000	(32.1%)
Miscellaneous Expense	92,000	(00.6%)	100,000	(00.6%)	100,000	(00.6%)	115,000	(00.6%)	125,000	(00.6%)
General Expense	450,000	(03.4%)	475,000	(03.2%)	500,000	(03.0%)	525,000	(02.8%)	550,000	(02.8%)

Total Railway Operating Expenses (As qualified above)	10,371,000	(77.2%)	10,979,000	(72.9%)	11,618,000	(70.4%)	12,670,000	(68.9%)	13,340,000	(67.9%)

Note 1—Maintenance shown excludes Operating Expenses due to 3 year Rehabilitation Program which are expected to be charged to Profit and Loss.

•Denotes red figures.

[Endorsed]: F. D. 10913. Exhibit 22. Witness Elsey. Filed Mar. 23, 1936.

Examiner Boyden: We will adjourn now until 2 o'clock.

(Whereupon, at 12:25 o'clock p. m. a recess was taken until 2 o'clock p. m. of the same day.) [1833]

PROCEEDINGS

Examiner Boyden: Are there any additional appearances?

Mr. Wood: W. L. Wood for Milbrook, Tweed, Soper & Webb, New York City, representing the trustees of the first mortgage and the trustee of the general and refundnig mortgage.

Examiner Boyden: Mr. Wood, you will arrange to file application for leave to practice before the Commission?

Mr. Wood: Yes, sir.

Examiner Boyden: Are there any other appearances?

(No response.)

You may proceed, Mr. Nicodemus.

Mr. Nicodemus: I call Mr. Bon.

Upon Appeals from the District Court of the United States for the Northern District of California, Southern Division.

PARKER PRINTING COMPANY, 545 SANSOME STREET, SAN FRANCISCO

J. F. BON

was sworn and testified as follows:

Mr. Nicodemus: Mr. Examiner, counsel for the Reconstruction Finance Corporation has asked that we introduce the commitments so far as made by the Reconstruction Finance Corporation. A letter is already in evidence as part of Exhibit No. 2. That Exhibit referred to a prior letter dated June 24, 1935. Mr. Willard asked that they be introduced. I have copies but I have not got the original.

Mr. Clay: What date is that?

Mr. Nicodemus: June 24, 1935. These are offered at [1834] the request of counsel, but they are not proved as the originals; they are subject to check.

Mr. Clay: The letter I have is dated July 20th.

Mr. Nicodemus: The July 20th letter refers to this letter (indicating).

Mr. Clay: You are putting in the July 20 letter, also?

Mr. Nicodemus: It is already in; it shows the history of the transactions.

Mr. Clay: May I have a copy of your letter of June 20th?

Mr. Nicodemus: July 20.

Mr. Clay: Yes, just let me see it.

(Counsel hands letter to Mr. Clay.)

Mr. Clay: This refers to a different proposal from the July 20 letter.

Mr. Nicodemus: I agree with you; it is referred to in the July 20th letter, and for that reason counsel requests it be put in.

(Testimony of J. F. Bon.)

Mr. Clay: You are putting it in to show the background of the July 20 letter?

Mr. Nicodemus: Correct.

Mr. Clay: I don't object to this going in, but I would like to call your attention to the fact that this letter is a letter from Mr. Jones to Mr. Schumacher. It says, "With the approval of the Interstate Commerce Com-,[1835] mission and, in lieu of our proposal, that we will do so and so."

In that connection I want to say that the Reconstruction Finance Corporation is not satisfied with the treatment which is accorded it in the plan and, while we are not willing at this time to say what specific terms will be satisfactory to us, we do leave it to the discretion of the Commission to look after the interests of the Reconstruction Finance Corporation. This letter is of no binding effect without the Commission's approval.

Under this proposal we are asked to put up $10,000,000, which is practically 400 per cent assessment on the present investment that the Reconstruction Finance Corporation has in the road and, most emphatically, the proposal is not satisfactory to us.

For one thing, the letter of July 20th says that we will take 70 per cent in income bonds. It was the understanding that we would be given the income bonds of series A which carried a sinking fund; this plan calls for 35 per cent in income bonds and 35 per cent of other income bonds with a sinking fund.

That is just one feature in which the plan is not

(Testimony of J. F. Bon.)

acceptable to the Reconstruction Finance Corporation.

Mr. Nicodemus: I have the June 24, 1935, letter, Mr. Examiner. [1836]

Examiner Boyden: Is there any objection to the receipt of this letter in evidence? (No response.) It will be received in evidence as Exhibit No. 24.

(Exhibit No. 24, Counsel Nicodemus, received in evidence.)

Mr. Nicodemus: Mr. Examiner, we now have copies of the letter addressed to the Reconstruction Finance Corporation by Mr. T. M. Schumacher, and reply thereto of Mr. Jesse H. Jones, Chairman of the Reconstruction Finance Corporation, both dated March 4, 1936, embodying the commitment of the Reconstruction Finance Corporation with respect to the purchase of $3,000,000 of trustees' certificates.

Mr. Clay: May I see copies of this before it goes into the record?

Mr. Nicodemus: Surely.

Mr. Clay: With respect to these letters, Mr. Examiner, I merely call attention also to the fact that there are other commitments subject to the approval of the Interstate Commerce Commission, which I understand has been obtained, and of course, will have to be obtained before the loan can be made, and they will not be binding, of course, until the approval of the Commission is secured.

(Testimony of J. F. Bon.)

Mr. Nicodemus: This hearing is directed to that end, [1837] Mr. Clay—securing that authority.

Mr. Clay: That will have to be an application, according to my understanding of the Act,—under the Reconstruction Finance Corporation Act—because it calls for a loan on the Reconstruction Finance Corporation.

Examiner Boyden: The letter of March 4, 1936, from Mr. T. M. Schumaker to the Reconstruction Finance Corporation is offered in evidence as Exhibit No. 25; is there any objection? (No response.) It will be received in evidence.

(Exhibit No. 25, Counsel Nicodemus, received in evidence.)

Examiner Boyden: The letter of March 4, 1936, from Mr. Jesse H. Jones to the trustees of the Western Pacific Railroad is offered in evidence as Exhibit No. 26; is there any objection? (No response.) It will be received.

(Exhibit No. 26, Counsel Nicodemus, received in evidence.)

Direct Examination

Q. (By Mr. Nicodemus) Mr. Bon, will you please state your full name, your residence, and your occupation?

A. J. F. Bon, residence Oakland, California; Freight Traffic Manager of the Western Pacific Railroad [1838] Company.

Q. How long have you been identified with the Western Pacific Railroad Company?

A. Since 1910, with the exception of two years.

(Testimony of J. F. Bon.)

Q. President Elsey and the preceding witness testified that you would be prepared to support the assumed operating revenues set forth in Exhibit No. 22, which has already been received in evidence. Are you prepared to do so? A. Yes, sir.

Q. Have you, yourself, prepared an exhibit or group of exhibits designed to support that section of Exhibit No. 22? A. I have.

Q. It has already been handed to the Commission?

Examiner Boyden: Off the record.

(Discussion off the record.)

Mr. Nicodemus: I now offer a document presented by the witness, consisting of statements indicating operating revenues of the Western Pacific Railroad Company preceding the year 1936, and the forecast of those revenues for the year 1936 to 1940, inclusive, and I offer it in evidence, subject to the detailed testimony of the witness in support of the several tables which this exhibit contains. [1839]

Examiner Boyden: Mark it Exhibit No. 27.

(Exhibit No. 27, Witness Bon, was marked for identification.)

Q. (By Mr. Nicodemus) Mr. Bon, will you please proceed to explain in detail Exhibit No. 27?

A. The forecast of operating revenues of the Western Pacific Railroad Company for the years 1936, to 1940, inclusive, was made after analyzing the traffic of the railroad from 1920 to 1935, inclusive, and what we might reasonably expect in the

(Testimony of J. F. Bon.)

future if the upward trend of business continues.

The consensus of opinion of our traffic representatives and business men is that the depression from which we have suffered is definitely behind us and that we are now entering an era of prosperity.

During previous depressions or hard times the railroads have only suffered to the same extent as other business, but during the past depression the railroads have also suffered loss of traffic due to other forms of transportation entering the field and cutting rates, taking an immense volume of traffic from the railroads. I refer to highway trucking and inland water and canal transportation.

The Federal Government, through the Interstate Commerce Commission, is now endeavoring to regulate [1840] interstate highway transportation. Likewise, the state of California is now regulating practically all highway transportation agencies, and when the regulation really becomes effective, it will have the effect of eliminating some highway transportation agencies from the field and those that remain will be better organized and maintain a reasonable basis of rates, which has not been the practice in the past.

It is felt that federal and state regulation of these transportation agencies will bring about a better and more reliable rate structure, and on a higher basis than at present.

The Western Pacific Railroad and other lines with whom it has a joint freight rate structure, has water competition as follows:

(Testimony of J. F. Bon.)

1. On transcontinental traffic via the Panama Canal between the Pacific Coast and Atlantic and Gulf ports, and also in connection with canal lines and inland waterways, such as the Mississippi and Ohio Rivers and the Great Lakes.

2. Coastwise between California and Oregon and Washington.

3. Inland waterways in California.

Some time ago the canal water carriers informed us they had to have more money per ton to meet their [1841] increased operating expenses due to the San Francisco Longshoremen's Adjustment and increased wages given the seamen. Some increase in coastwise water rates has already taken place and others are in progress.

One of the large California inland waterway carriers is now before the California Railroad Commission asking that body to authorize an increase in their rates and to compel their competitors, the rail lines and the truck lines, to also increase their rates.

The transcontinental rail lines and Panama Canal water carriers meet at least four times a year to discuss changes in freight rates, the particular object being to cooperate and not unnecessarily reduce rates.

The Canal lines the latter part of last year made a blanket increase in their rates, and I think even today their rate structure is entirely too low.

The Interstate Commerce Commission and the Shipping Board have jointly interested themselves

(Testimony of J. F. Bon.)

in seeing that the rate structure is not unnecessarily reduced. I have in mind the recent conference in Washington between the Commission, the Shipping Board, the canal lines and the transcontinental carriers, which resulted in the railroads withdrawing a reduction in their rates on liquors and the water lines increasing their rates.

It is my judgment that railroad freight rates as a [1842] whole are as low today as they will be for a number of years to come, and the tendency in the immediate future will be towards a higher level of rates than today, due to conditions above indicated.

In connection with truck competition, due to good highways in California, Nevada and Utah, and in the past no regulation of those carriers, we have suffered a tremendous loss in traffic and revenue.

Prior to the advent of motor truck competition between California and Utah practically of our movement was under the class rates, the first four being between San Francisco and Utah common points $2.16½, $1.84½, $1.62½ and $1.35 per 100 pounds.

The motor truck competition made it necessary for us to publish pick-up and delivery rates of $1. and $1.25 per 100 pounds, on a great many commodities, so today at least 90 per cent of our movement, above referred to, is under these reduced rates.

When regulation becomes effective there is no doubt in my mind that the rates between Califor-

(Testimony of J. F. Bon.)

nia and Utah will be increased; in fact, the truck lines have already approached the railroads with that in view.

All of these things should result in the railroads securing a greater share of the traffic moving in the future than they have in the past five years, and at [1843] rates somewhat higher than today.

Our northern California extension from Keddie, on the main line, to Bieber, California, makes connection with the Great Northern Railway, extending south from Klamath Falls. The Hambone Line, extending westerly from Lookout, California, connects with the McCloud River Railroad.

This line was placed in operation on November 10, 1931, and the traffic has increased tremendously since the first full year of operation. For that reason I have found it necessary, so far as freight traffic is concerned, to consider separately traffic moving via the Northern California extension and that moving via the balance of the system for the years 1932 to 1935, inclusive.

I did not make any segregation of freight revenue as between the extension and the balance of the system for the one and three-quarters months the extension was in operation during 1931.

It is my belief that if business normalcy had prevailed during the year 1935 our freight revenue, exclusive of the northern California extension would have been about the average for the years 1926 and 1927, or approximately twelve and one-half million

(Testimony of J. F. Bon.)

dollars, which, plus the actual freight revenue earned on traffic [1844] transported via the northern California extension, would have made our total freight revenue approximately fourteen and three-quarter million dollars.

Examiner Boyden: Off the record.

(Discussion off the record ensued.)

The Witness: Shall I proceed?

Q. (By Mr. Nicodemus) Proceed, and if you will, explain statement No. 1.

A. Exhibit No. 27 consists of 14 statements, and are so numbered.

Statement No. 1 indicates the cars handled by the Western Pacific Railroad from Roville, California, to Weso, Nevada, for the Southern Pacific Company.

The Western Pacific Railroad and its subsidiary, the Sacramento Northern Railway, had an agreement with the Southern Pacific Company for the transportation for the Southern Pacific of certain carload traffic between Chico, California, and Weso, Nevada, for $60. per car, of which the Western Pacific received $54. per car. The statement shows the number of cars transported and the revenue the Western Pacific received therefrom. This Chico-Weso bridge revenue will be referred to later or in some of the other statements in this exhibit.

That arrangement was terminated at the end of 1929.

Q. That is when the traffic ceased to move?

[1845]

(Testimony of J. F. Bon.)

A. Yes.

Q. Will you pass to statement No. 2.

A. Statement No. 2 was prepared to indicate to the Commission why account 143 for the year 1935 showed such a marked decrease as compared with previous years.

In years prior to 1935, money received by us from the sale of ice and salt was credited to account 143, but in 1935, on instructions of the Commission, it was credited to account 402.

Q. Account No. 402 is inflated accordingly,—is that the idea? A. Yes, sir.

Q. Will you explain statement No. 3.

A. Statement No. 3 shows the population, actual and estimated, for the years 1920, 1930 and 1935, for the states of California, Nevada and Utah; also the counties and cities in those states in which we and our subsidiaries operate.

Q. What do you have in mind in offering that statement?

A. To show that the states of California, Nevada, and Utah, and especially California are increasing in population quite rapidly.

Q. Thank you. Will you please explain statement No. 4.

A. Statement No. 4 indicates the traffic which we [1846] interchanged with our subsidiaries and certain of our other connections, the other connections being the Denver & Rio Grande Western, Great Northern, Oregon Short Line and Union Pacific.

(Testimony of J. F. Bon.)

I selected the Denver & Rio Grande Western, Great Northern, Oregon Short Line and Union Pacific, because the freight we interchange with those carriers, particularly the Denver & Rio Grande Western, Oregon Short Line and Union Pacific is freight on which we secure practically our maximum haul.

It will be noted our interchange with the Denver & Rio Grande Western was greater in 1935 than in any other year shown in the exhibit; with the Oregon Short Line greater in 1935 than in 1927, but less in 1935 than some of the other years; with the Union Pacific the 1935 interchange was greater than in any other year shown, except for 1930.

Q. Statement No. 5 is the next statement.

Q. (By Examiner Boyden) What reason do you give for the statement you just made about the comparison of interchange with various roads in 1935, as compared with the present year?

A. We have more than held our own on so-called long haul traffic, and transcontinental freight; we have lost considerable short haul freight, but we maintain our [1847] position on the long haul freight; the earnings per ton mile are low, but the earnings per ton themselves are reasonably high.

Statement No. 5 shows the revenues earned for passengers, mail, express and other related accounts for the years 1923 to 1935, inclusive. There is also shown on the bottom of the statement data indicating the passenger trains operated. The greatest

(Testimony of J. F. Bon.)

revenue earned was for the year 1923 and the lowest that for the year 1933.

Mr. Nicodemus: Will you proceed with statement No. 6.

A. Statement No. 6 is the forecast for the years 1936 to 1940, inclusive, of revenues to be earned from passenger, mail, express and the other accounts indicated.

At the present time we have only one passenger train daily between San Francisco, California, and Salt Lake City, Utah. We expect to inaugurate additional passenger service effective on May 1, 1937.

During the early part of 1937, schedules between San Francisco Bay on the one hand, and Chicago, St. Louis and the Missouri River on the other, should be shortened, and this will enable us to more nearly meet the service of competing railroads. The improved [1848] service of the Denver & Rio Grande Western Railroad via the Dotsero Cut-off as it becomes better known, and the fact that the Denver & Rio Grande Western and the Western Pacific offer the most scenic trip between California and the East, will enable us to materially increase our passenger revenues.

The San Francisco Bay exposition is to be held during the year 1939. Naturally, the greatest revenue is shown for that year. That revenue, however, will be $880,000 less than the average for the years 1923 to 1927, inclusive.

Statement No. 7 indicates how revenues for pass-

(Testimony of J. F. Bon.)

enger, mail, express and other related accounts indicated in statement No. 6 were arrived at.

Q. This statement very largely speaks for itself?

A. No comments are necessary, I think.

Q. Correct. Will you take up statement No. 8?

A. Statement No. 8 indicates the freight traffic moved via the Western Pacific Railroad Northern California Extension, together with the revenue earned.

The revenue from products of the forest is greater than any other group for any of the years, and for the year 1935, represents 42 per cent of the total revenue. During the year 1934, the total traffic increased very materially due to the San Francisco Bay waterfront [1849] difficulties which prevented shippers from using the competitive water route, particularly on northbound freight. It did not seem to affect to the same extent southbound freight, particularly forest products.

During the year 1935, the movement of forest products from the Pacific Northwest was hampered due to labor troubles in sawmills and forests, which accounts for the smaller increase in the movement of products of the forest for the year 1935 over 1934.

It will be noticed the total revenue for the year 1935 increased 108½ per cent over the year 1932, which is a three-year period. I realize there is a saturation point some place, but my judgment is the

(Testimony of J. F. Bon.)

revenue which we will earn during the next five years will be about double that for 1935, but statement No. 12 will show a lesser increase.

We still have water competition, but those carriers must secure more money per ton and their rates are generally being put on a higher basis than on a lower level. If we do not advance the rail rates when the water rates are increased we can expect more traffic.

However, on the other hand if the rail rates are advanced, then we can expect about the same relative amount of traffic as we formerly handled, but will earn more revenue. [1850]

At the present time we only have a very few joint rates with the SP&S System.

Q. What is that SP&S?

A. That is the Spokane, Seattle & Portland Railway System,—and none with the Northern Pacific Railway. It now appears likely that sometime in the very near future we will have a complete line of freight rates with the SP&S System and possibly with the Northern Pacific.

Manufacturing in California is on the increase and we can look for additional traffic from California to the Northwest. There has recently been established in Southern California automobile assembling plants of General Motors and the Studebaker people, in addition to existing plants of Chrysler, Willys and Ford.

(Testimony of J. F. Bon.)

The Northern California Extension was placed in operation on November 10, 1931, at almost the bottom of the depression, which we did not begin to come out of until 1935, yet we have made a remarkable showing.

Since completion of the line we have experienced material increases in revenue each year which indicates the line is now well established in the minds of shippers and that they have confidence in our ability to render satisfactory service, hence we can expect a steady increase in that traffic and the revenue for a number of years to come. [1851]

Q. Will you explain statement No. 9, Mr. Bon?

A. Statement No. 9 is a showing by groups of commodities of Western Pacific Railroad freight traffic and revenue for the years 1923 to 1935, inclusive. It does not include any traffic moved via the Northern California extension, nor any money earned from the Chico-Weso bridge service.

Q. (By Mr. Nicodemus) What is the purpose of that statement, and what have you particularly in mind as to it?

A. I wanted the Commission to know what the Northern California extension has done since 1923 to and including 1935 and the period for the first five years above mentioned. This, together with my informed judgment, is how I computed my final forecast.

Q. What is statement No. 10?

(Testimony of J. F. Bon.)

A. Statement No. 10 indicates the freight revenues of The Western Pacific Railroad for the years 1920 to 1935, inclusive.

The average for the years 1923 to 1927, inclusive, was $11,552,481, and the average for the years 1926 and 1927 was $12,475,087, the latter being approximately $1,800,000 less than the peak calendar year of 1929.

The years 1927, 1928, 1929 and 1930, produced greater freight revenues than the average for the years 1926 [1852] and 1927.

The forecast of freight revenues for the year 1940, as shown by statement No. 12 is $17,919,621. The 1940 forecast for the Northern California extension of $4,171,625, plus the average for the years 1926 and 1927 for the balance of the system, equals $16,646,712.

The 1940 forecast for the Northern California extension, plus the 1929 actual freight revenue for the balance of the system equals $18,458,875. This is approximately ½ million dollars more than the forecast of freight revenues for the year 1940.

Q. Will you explain statement No. 11?

A. Statement No. 11 shows the freight revenue by months for the years 1928 and 1929; also the revenue earned the last six months of 1928 and the first six months of 1929. The results of the depression did not affect us until July, 1929; in August of that year we again improved our position, but from there on to the end of the year the revenues declined steadily.

(Testimony of J. F. Bon.)

Q. Statement No. 11 indicates the forecast of revenues by groups or grouped commodities for the years 1936 and 1940?

The Witness: That is exhibit No. 12, Mr. Nicodemus.

Mr. Nicodemus: Is that No. 12? [1853]

The Witness: Yes.

Mr. Nicodemus: 12; all right.

The Witness: Products of agriculture—Northern California extension—I increased our 1933 revenue by 80 per cent for the next five years. Our 1935 revenue was 128 per cent of that for 1932, or an increase of 43 per cent a year.

For the balance of system, I increased our 1935 revenue by 25 per cent for the next five years, but have shown no increase for the year 1936, because we have made a poor start during the months of January and February due to a freeze which occurred in December, partially destroying our celery crop which would have moved in January; also heavy rains during February increasing our loss due to picking, packing and shipping of California vegetables being retarded.

Q (By Examiner Boyden) Just what do you mean by increasing 25 per cent for the next five years? Is that a total of 25 per cent for the next five years divided equally?

A. Divided equally between the next five years. I did not increase 1936 any—that is, the 1940 revenue will be 125 per cent of the revenue of 1935.

(Testimony of J. F. Bon.)

Animals and products—Northern California extension—each year's revenue has been increased $2,000, [1854] which has been about our experience since the line was opened for operation.

Balance of system—I have increased the revenue for the next five years 25 per cent over the year 1935, or an average increase of 5 per cent a year. The tonnage and revenues we have enjoyed the last few years of this class of freight has been disappointing due to several drought years in the West and other conditions, but I look for an improvement.

The estimated revenue for the system (outside of Northern California extension) for the year 1940, is $600,000, and which is approximately the average of the years 1923 to 1927, inclusive, but considerably less than we earned in the years 1929, 1930 and 1931.

For the products of mines on the Northern California extension, I have increased the 1935 revenue by 50 per cent for the next five years. Our 1935 revenue was 64 per cent greater than for 1932.

For the balance of the system, an increase of 30 per cent over 1935 has been taken for the next five years. This is a larger increase than we have experienced in the past few years, but the year 1935 revenue increased 20 per cent over 1934. There is a revival of mining in our territory; two large copper mines having recently opened, the ore moving to the Utah smelters. [1855]

(Testimony of J. F. Bon.)

Products of the forest—The McCloud River Lumber Company, with a mill at McCloud, California, located on the McCloud River Railroad, with whom we have a connection, anticipate their cut of lumber for the year 1936 will be 25 per cent greater than in the year 1935, and state there will be a continued increase in future years if economic conditions keep on improving.

The Red River Lumber Company, who have the largest mill in the State of California, and which is located at Westwood, California, on our Northern California extension, make approximately the same prediction.

One of the large mill operators in the Klamath Falls District states he considered their business for the year 1928, was normal and that 1935 was 40 per cent below normal, due mostly to credit conditions. He anticipates their 1936 business will be in excess of 25 per cent better than in 1935.

In that connection the World Almanac, published by the New York World-Telegram, for the year 1936, reproduces on page 440 some statistics furnished by the U. S. Department of Labor in connection with the estimated expenditures for building construction and families provided for in 250 identical cities, that the year 1921 was 100 per cent, and the following percentages obtained for the class of buildings indicated [1856] for the year 1934:

New residential buildings	8.1%
New non-residential buildings	25.9%

(Testimony of J. F. Bon.)

Additions, alterations and repairs	48.0%
Total building operations	20.3%
Families provided for	9.8%

On the Northern California extension, I have increased the 1935 revenue by 90 per cent for the next five years. The Northern California extension has been in operation four full years, our revenue on this group of commodities in 1935 being 121 per cent of that for 1932, or an increase of 40 per cent a year.

It can be anticipated that several additional mills will be constructed on our Northern California extension because the large timber owners, due to taxes and maturity of the timber, now find it unprofitable to hold this timber much longer.

For the balance of the system, I have increased our 1935 revenue by 80 per cent for the next five years. We have on that part of our system ten lumber mills, we having lost one mill by a fire in 1927, which has not been replaced, but the owners of the timber are contemplating the construction of another mill.

The estimated revenue for the balance of the system for the year 1940, will be approximately that which we earned in 1930, and we estimate that it [1857] will be approximately $400,000 less than the average for the years 1923 to 1927, inclusive.

(Testimony of J. F. Bon.)

Manufactures and miscellaneous—Northern California extension—the revenue for the next five years has been increased 90 per cent over that for the year 1935, or an average increase per year of less than 20 per cent. Our actual increase in 1935 over 1932, was 132 per cent, or 44 per cent a year.

For the balance of the system, the revenue for the next five years has been increased 50 per cent over that for 1935, or 10 per cent a year. We have done better than that the last three years, our 1935 revenue being 153 per cent greater than 1932.

Regulation of highway trucking and the necessity of the Panama Canal steamship lines for greater revenue per ton should assure us this estimate.

For the less than carload traffic on the Northern California extension, I have taken an increase of 90 per cent of our 1935 revenue for the next five years. Our 1935 revenue was 108 per cent greater than that for the year 1932, or an increase of 35 per cent a year.

For the balance of the system, I anticipate the revenue for the next five years will be at least 25 per cent greater than in 1935, due to the improvement in general conditions, the regulation of highway trucking [1858] and the desire of the Panama Canal steamship lines to secure greater revenue per ton.

Q. (By Mr. Nicodemus) You have no comment to make on statement No. 13?

A. It is self-explanatory.

(Testimony of J. F. Bon.)

Q. Will you proceed with statement No. 14.

A. Statement No. 14 is the complete forecast of all railroad operating revenues for the years 1936 to 1940, inclusive.

Q. That is, it is based on the first five blocks on exhibit No. 22—total operating revenues?

A. Yes, sir.

Q. For the years 1936 to 1940?

A. I have already explained how the forecast was made on the principal items and will now cover the balance of them.

Accounts Nos. 110 and 143: I used the same percentage of freight revenue for the next five years as those revenues bore to the freight revenue for the year 1935.

Accounts Nos. 135, 137 and 142: I used the same revenue for the ensuing years as we earned in 1935, because the percentages of those revenues to the freight revenue in 1935, was less than one tenth of 1 per cent. [1859]

Accounts Nos. 151 and 152 (Joint Facilities-Credit): I used the same credit as is shown for the year 1927 and which was less than in the year 1925.

Q. For the reasons stated, you predict for 1936, railway operating revenues of $13,438,000?

A. Yes, sir.

Q. For 1937, $15,054,000? A. Yes, sir.

Q. For 1938, $16,508,000? A. Yes, sir.

Q. For 1939, $18,383,000? A. Yes, sir.

Q. And for 1940, $19,655,000?

(Testimony of J. F. Bon.)

A. That is correct.

Q. Do you consider those estimates conservative and reasonably to be expected for those years?

A. I do.

(Exhibit No. 27, Witness Bon, received in evidence.)

[Here follows Exhibit No. 27 continuing to page 1973.]

EXHIBIT No. 27

STATEMENTS INDICATING OPERATING REVENUES OF THE WESTERN PACIFIC RAILROAD COMPANY

Preceding the year 1936
and a
Forecast of those revenues for
the years 1936 to 1940, inclusive.

Office of Vice President-Traffic,
The Western Pacific Railroad Co.,
San Francisco, California.
March 5, 1936.

(Testimony of J. F. Bon.)

Statement No. 1

The Western Pacific Railroad Company

STATEMENT OF CARS HANDLED BY W. P. RR. FROM OROVILLE, CALIF., TO WESO, NEVADA (331 MILES), FOR SOUTHERN PACIFIC COMPANY AND REVENUE DERIVED THEREFROM

Year	Cars	W. P. Railroad Revenue
1924	7,628	$ 411,912.00
1925	11,123	600,642.00
1926	13,133	709,182.00
1927	13,452	726,408.00
1928	14,057	759,078.00
1929	11,862	640,548.00
1930	8	432.00
1931	8	432.00
Total	71,271	$3,848,634.00

Statement No. 2

The Western Pacific Railroad Company

AMOUNTS CREDITED TO ACCOUNT 143 FOR ICE AND SALT SALES

Year	Amount
1927	$ 476,637.28
1930	595,381.12
1931	413,538.10
1932	356,755.82
1933	284,321.34
1934	395,196.67
1935	
Total	$2,521,830.33
Average per year	420,305.05

For year 1935 amount is credited to Item 402.

(Testimony of J. F. Bon.)

Statement No. 7

The Western Pacific Railroad Company

BASIS FOR FORECAST OF PASSENGER, MAIL, EXPRESS AND OTHER REVENUES AS INDICATED.

It is believed there will be a substantial increase in passenger travel during the next five years because of improved economic conditions and air-conditioning and improvement in passenger equipment. Special consideration has been given to what the passenger traffic will be during the year 1939, during which year there will be an Exposition in San Francisco.

This forecast is also predicated on the inauguration by the Western Pacific Railroad of an additional passenger train in each direction between San Francisco, California, and Salt Lake City, Utah, effective May 1, 1937, scheduled through the Feather River Canyon in each direction during daylight hours.

ACCOUNT No. 102
PASSENGER REVENUE

Year	Basis for Forecast
1936	Increased 25% over year 1935.
1937	Forecast is predicated on one additional train in each direction between San Francisco and Salt Lake City effective May 1, 1937, and based on 25% increase over year 1936. Revenue, divided between trains, is as follows: Trains 1 and 2 ..... $534,169.00—8 month period Trains 3 and 4 ..... 271,846.00 Total $806,015.00

(Testimony of J. F. Bon.)

1938	25% increase over year 1937, predicated on two trains in each direction between San Francisco and Salt Lake City.
1939	San Francisco Exposition year. 50% increase over year 1938, on basis of operation of two trains in each direction between San Francisco and Salt Lake City.
1940	20% increase over year 1938, on basis of operation of two passenger trains in each direction between San Francisco and Salt Lake City.

Account No.	Item or Account	Basis for Forecast
103	Excess Baggage	Excess baggage figures based on relation of excess baggage revenue to passenger revenue, using years 1926 to 1935, incl., which was approximately .005%.
106	Mail	Year 1936 same as year 1935. Year 1937 estimate predicated on one additional train in each direction between San Francisco and Salt Lake City effective May 1, 1937. Estimate based on 1931 earnings, less revenue accruing to Trains 1 and 2 during period January to April, inclusive, 1931. Years 1938, 1939 and 1940 same as year 1931.
107	Express	Year 1936. An increase of 5% over year 1935. Year 1937. An increase of 5% over 1936, plus $11,704.00 for additional express handled on second train for eight months' period May 1 to December 31, 1937. This $11,704.00 is approximately the amount of revenue derived from express handled on Trains 1 and 2 during period May to December, inclusive, 1931. Year 1938. An increase of 5% over 1937, plus $1,357.00 for months January to April, inclusive, 1938, which was approximately the amount of revenue accruing to Trains 1 and 2 during these months in 1931, plus 5%. Year 1939. An increase of 5% over year 1938. Year 1940. An increase of 5% over year 1939.

(Testimony of J. F. Bon.)

Account No.	Item or Account	Basis for Forecast
108	Other Passenger Train Revenues	This account includes Pullman car earnings, miscellaneous revenue from tickets reported by foreign lines but not honored on our trains, and checking of baby carriages, golf bags, bicycles and other items not chargeable to other accounts. Year 1936. An increase of 25% over preceding year Year 1937. An increase of 25% over preceding year Year 1938. An increase of 25% over preceding year Year 1939. An increase of 50% over preceding year Year 1940. An increase of 20% over year 1928.
131	Dining and Buffet	Revenue figures based on relation of dining and buffet revenue to passenger revenue, using years 1926 to 1935, inclusive, which was approximately 11%.
132	Hotel and Restaurant	10% over each preceding year.
133	Station, Train and Boat Privileges	Year 1936. 25% over preceding year. Year 1937. 25% over preceding year. Year 1938. 25% over preceding year. Year 1939. 50% over preceding year. Year 1940. 20% over year 1928.
134	Parcel Room	Parcel room figures based on relation of parcel room revenue to passenger revenue, using years 1926 to 1935, inclusive, which was approximately .00036%.
136	Storage-Baggage	Storage-baggage figures based on relation of storage-baggage revenue to passenger revenue, using years 1926 to 1935, inclusive, which was approximately .0014%.

Note: Years prior to 1928 did not show any adjustments or absorptions from Gross. Absorptions and Adjustments for 1928 and subsequent years have been distributed over the various commodity groups by the ratio which the revenue for the group bears to the total revenue before absorptions. Adjustments of cars and tons accruing in 1933 have been similarly distributed on the basis of cars and tons.

(Testimony of J. F. Bon.)

May	993,742.16	1,118,626.89	+12.6
June	939,669.23	971,898.21	+ 3.4
July	1,195,890.16	1,115,538.38	— 6.7
August	1,217,129.40	1,295,733.43	+ 6.5
September	1,658,963.96	1,517,619.88	— 8.5
October	1,898,399.94	1,783,823.11	— 6.0
November	1,280,228.56	1,193,567.73	— 6.8
December	1,185,225.92	1,105,736.12	— 6.7
Year	$13,887,952.88	$14,287,249.85	+ 2.9

Period	Revenue	Percent of Change	
First six months of 1929	$ 6,275,231.20	15.1	Increase Over Same 1928 Period
Last six months of 1928	$ 8,435,837.94	5.3	Increase Over Same 1929 Period
Total	$14,711,069.14		

No revenue derived from Chico-Weso Bridge service is included in these figures.

(Testimony of J. F. Bon.)

Statement No. 12

The Western Pacific Railroad Company

FORECAST OF REVENUE TO BE DERIVED FROM FREIGHT (ACCOUNT No. 101) BY W. P. RR. FOR YEARS 1936 TO 1940, INCLUSIVE.

	Year	Traffic Moved Via	Revenue
Products of Agriculture	1936	N. C. E.	$ 476,219.00
		Remainder of System	2,975,200.00
		Total	3,451,419.00
	1937	N. C. E.	562,803.00
		Remainder of System	1,123,960.00
		Total	3,686,763.00
	1938	N. C. E.	649,389.00
		Remainder of System	3,272,720.00
		Total	3,922,109.00
	1939	N. C. E.	714,328.00
		Remainder of System	3,421,480.00
		Total	4,135,808.00
	1940	N. C. E.	779,267.00
		Remainder of System	3,719,000.00
		Total	4,498,267.00
Animals and Products	1936	N. C. E.	$ 100,367.00
		Remainder of System	480,130.00
		Total	580,497.00
	1937	N. C. E.	102,367.00
		Remainder of System	504,136.00
		Total	606,503.00
	1938	N. C. E.	104,367.00
		Remainder of System	528,142.00
		Total	632,509.00

N. C. E. means Northern California Extension of Western Pacific Railroad, extending from Keddie to Bieber, Calif., a distance of 113.5 miles.

(Testimony of J. F. Bon.)

	1939	N. C. E.	106,367.00
		Remainder of System	552,148.00
		Total	658,515.00
	1940	N. C. E.	108,367.00
		Remainder of System	600,161.00
		Total	708,528.00
Products of Mines	1936	N. C. E.	$ 179,239.00
		Remainder of System	1,088,519.00
		Total	1,267,758.00
	1937	N. C. E.	196,309.00
		Remainder of System	1,141,617.00
		Total	1,337,926.00
	1938	N. C. E.	213,379.00
		Remainder of System	1,194,715.00
		Total	1,408,094.00
	1939	N. C. E.	230,449.00
		Remainder of System	1,274,362.00
		Total	1,504,811.00
	1940	N. C. E.	256,055.00
		Remainder of System	1,380,559.00
		Total	1,636,614.00
Products of Forest	1936	N. C. E.	$ 1,105,174.00

Office of Vice Pres.—Traffic
San Francisco, California
February 27, 1936

[Endorsed]: Finance Docket 10913. Exhibit No. 27. Witness: J. F. Bon. Filed Mar. 23, 1936.

(Testimony of J. F. Bon.)

Mr. Nicodemus: The witness may be cross-examined.

Cross Examination

Mr. Swaine: I have only one question.

Q. (By Mr. Swaine) Have you prepared, or have you had prepared, an exhibit comparable to Exhibit No. 22 and statement No. 14 of this last exhibit on the consolidated basis instead of on the Western Pacific alone?

A. Eventually—— [1860]

Mr. Nicodemus: (Interposing) I think that will require some time.

Mr. Swaine: What can you do to show the real picture?

Mr. Nicodemus: To what extent would you like this—revenues from certain subsidiaries shown?

Mr. Swaine: Whatever the examiner thinks necessary; knowing much better the accounting practices, he will know what is necessary to complete the picture. My feeling is that this is only a part of the picture. We ought to have whatever is essential to the evidence as a whole. I do not see that it does much good to have a forecast of what the earnings of a part of the system will be unless you know what the rest of them will be.

Mr. Nicodemus: I will discuss that with the accounting officers, and see what can be developed.

Mr. Swaine: Very well.

Examiner Boyden: Off the record.

(Discussion off the record ensued.)

(Testimony of J. F. Bon.)

Examiner Boyden: Mr. Nicodemus, how long would it take you to prepare a system exhibit such as No. 22, and statement 14?

Mr. Nicodemus: I will have to refer that to Mr. Degraff.

Mr. Degraff: A minimum of two weeks after we return to San Francisco. [1861]

Mr. Nicodemus: A minimum of two weeks after they return to San Francisco—I was trying to avoid any delay in the submission of this to the Commission.

Mr. Swaine: I am entirely in sympathy with that proposition.

Mr. Nicodemus: If Mr. Swaine thinks the exhibit is deficient, we will have to meet his view.

Mr. Swaine: I ask you if you don't think so, too.

Mr. Nicodemus: I don't think it varies in that exhibit more than 5 per cent.

Mr. Engelbright: It would be pretty minor.

Mr. Nicodemus: It would be almost negligible.

Mr. Degraff: One of the roads would about break even, and the other would show a little profit. I honestly cannot change the thing very materially.

Mr. Nicodemus: I think the result would be negligible and the amount of delay would be considerable and undesirable.

Q. (By Examiner Boyden) Which other two properties would affect the result?

A. The Sacramento Northern and the Tidewater Southern.

(Testimony of J. F. Bon.)

Q. What is the gross, approximately, of the Sacramento Northern?

A. I don't want to guess at it.

Examiner Boyden: Off the record [1862].

(Discussion off the record ensued.)

Mr. Nicodemus: We will undertake to get that; I don't know how long it will take.

Examiner Boyden: Let us have them as soon as you can prepare them.

Q. (By Examiner Boyden) What relationship is there between your total railway operating revenues estimated for 1936 and those for 1935? In other words, what is the total increase in percentage?

A. I don't have that for the total revenues; I have it for the freight, which is the main revenue.

Q. What is it for the freight?

A. 1936, the freight revenue is 103.6 per cent of that for 1935.

Q. What is the estimate for 1937, with respect to 1935?

A. 1937 with respect to 1935, is 113.3 per cent.

Q. What is it for 1938?

A. 1938, with respect to 1935, it is 123.2 per cent.

Q. What is it for 1939?

A. 1939, with respect to 1935, it is 133.9 per cent, and for 1940, with respect to 1935, it is 146.8 per cent.

Q. What is the fundamental basis for your estimated increase in traffic each year?

(Testimony of J. F. Bon.)

A. As a whole? [1863]

Q. Yes.

A. I studied our past situation, and based the forecast on improvement in conditions and improvement in our own position.

Q. What do you mean by improvement in your own position?

A. We are bettering our position by the location of industries—the Northern California extension has helped us out in ways other than freight that moves over that line—the location of industries and plants.

Heretofore, when a plant was located on our rails, it was at a disadvantage because it could not ship to or from the northwest without the payment of an additional switching charge, whereas if it was located on one of our competitors' rails, it was that much better off. Some of the territory of our subsidiaries is coming into better production.

The Tidewater Southern Railway is delivering to us today about as many carloads of grapes going to the East as they did when the movement was approximately 70,000 cars a year. There is a movement today of about half that.

Q. Then, your estimate is based on an assumed improvement in business conditions which will develop, and a certain assumed amount of additional traffic?

A. Yes, sir; and I think business conditions will continue [1864] to improve.

Q. How much of the additional business will the railroads move?

(Testimony of J. F. Bon.)

A. I did not get that close.

Q. That is what I am trying to find out.

A. I could not do that. My forecast was made on the improvement of conditions, betterment of our position, and my informed judgment.

Q. What do you use as a basis for determining what the increase in revenues would be on a certain increase in business conditions?

A. I did this by groups of commodities. I studied our past performance and included a certain group of commodities and on that basis I concluded that we should continue to improve our revenue. On some of them I took a very nominal increase, and on the system outside of the Northern California Extension. the increase is very nominal.

Q. When you considered past performance, what years did you consider?

A. Particularly 1923 to 1935.

Q. Would you consider that in those years any more than in other years, any special consideration should be given to any particular years in that period?

A. Oh, yes. I thought that our revenue in 1935, if business conditions had been normal, should have been about [1865] the average for 1926 or 1927.

Q. (By Examiner Wilkinson) Mr. Bon, the Western Pacific say that about 30 per cent of their traffic is received and delivered to other lines—received from and delivered to other lines.

A. I have not got the figures in my mind.

(Testimony of J. F. Bon.)

Q. It is a large percentage?

A. We have a considerable amount of business that I call bridge traffic.

Q. Are you figuring that the traffic you will receive from other lines and deliver to other lines will increase in the same proportion as your total increases as given here?

A. Some of it will; our transcontinental business, all of which we receive from or deliver to another line, will increase.

Q. Do you contemplate that the traffic which you will originate on your own line will increase a greater proportion than what you receive from connecting lines?

A. I think in about the same ratio.

Q. That is what I thought.

A. Yes. I have here the percentage increase for the system outside of the Northern California Extension. The Northern California Extension showed a greater percentage increase than for the balance of the system.

For example, the increase on the balance of the sys- [1866] tem in 1940 over 1935 is 38.7 per cent —a great increase.

Q. (By Examiner Boyden) Now, you say that you estimate that if business conditions had been normal in 1935, your traffic would have been the same as in 1926 and 1927—did I understand that correctly?

(Testimony of J. F. Bon.)

A. About that average; that is my judgment.

Q. Did you take into consideration the fact that there have been other forms of transportation which have taken some traffic? A. Yes.

Q. From your system?

A. Oh; we have had those other forms of transportation, particularly water, since 1921, via the Canal and, all the time, via the coastwise steamers and the California inland waterways. Of course, boat competition has been no more severe since 1930 than it was prior to that time.

Q. (By Examiner Wilkinson) The Western Pacific has not suffered as much competition from water carriers as other railroads generally, have they?

A. No, I do not think they have; we have been able to watch and keep our traffic better than some of them.

Q. The topography of the country affects the motor carrier transportation?

A. No, sir. Take the San Joaquin and Sacramento Valleys, they are a fine place for motor carriers; they were operat- [1867] ing between California and Utah common points, and are now.

Q. (By Mr. Nicodemus) You suspect they have been operating at a loss in the past? A. Yes.

Q. But that will be corrected by regulation?

A. Yes.

Q. (By Examiner Boyden) Is it correct to say that in your estimates you have not considered com-

(Testimony of J. F. Bon.)

petition from other forms of transportation—that they have not reduced your revenues to any extent?

A. Oh, they have, Mr. Examiner—yes, indeed; in my opening statement I said that in previous depressions we had suffered only like other business, but in this depression we have lost a tremendous amount of traffic because of competing forms of transportation.

The truck lines get pretty hungry for business, and they cut the life out of us.

Q (By Examiner Wilkinson) It is not based upon increased rates, is it?

A. In some instances, yes.

Q. Will you make any statement as to how much they have decreased it?

A. In a general way, the truck lines operating between California and Utah, of which there were about six differ- [1868] ent companies, met with the railroads about seven weeks ago and asked us to increase our rates, effective with the date they had to file their tariffs with the Commission.

We said no, we preferred to see those tariffs in operation before we would do it, but they wanted to increase those rates right away, and we would like to get more money, too, but we wanted to see the tariffs in operation first.

I think we have reached the bottom of lower rates due to those competing forms of transportation.

Examiner Boyden: Any further questions?

(No response.)

(Testimony of J. F. Bon.)

You will arrange to have Mr. Bon return for further cross examination at a later date?

Mr. Nicodemus: We will be glad to.

Examiner Boyden: All right.

Mr. Nicodemus: I call Mr. Engelbright.

EDWARD W. ENGELBRIGHT

was sworn and testified as follows:

Direct Examination

Q. (By Mr. Nicodemus) Mr. Engelbright, will you please give your name to the reporter?

A. Edward W. Engelbright.

Q. You are consulting engineer on the staff of the Western [1869] Pacific? A. I am.

P. President Elsey testified that you would be available to support the estimated operating expenses shown on exhibit No. 22. A. Yes, sir.

Q. I will simply ask you whether or not you believe those estimates to be sound and reasonably accurate, and ask you to state briefly the process by which those estimates were made.

A. The estimates for maintenance of way and maintenance of equipment, first, should be qualified by a statement previously made on the record, that the operating expenses in connection with the three-year program of rehabilitation from 1936 to 1938, inclusive, are expected to be charged off to profit and loss.

(Testimony of Edward W. Engelbright.)

Q. Let me interrupt you to ask at this point—I am just reminded of it—President Elsey was unable to state the extent to which the former rehabilitation program remained uncompleted at the beginning of the depression? Have you refreshed your recollection or examined the records to determine that? A. Yes.

Q. What is the amount of the original program?

A. The original program in 1927 contemplated the expendi- [1870] ture of $18,000,000, and during the years 1927 to 1932, inclusive, a total of $7,791,261 was expended on that program.

Q. So that approximately ten million dollars remained uncompleted? A. Yes, sir.

Examiner Wilkinson: Let me ask you this:

Q. (By Examiner Wilkinson) Was that for maintenance, or was that for improvement?

A. It was both. There was in that period expended for way and structures and maintenance, $2,335,093, and for equipment maintenance, $1,511,617, or a total of $3,846,710 on maintenance.

The charges to investment account in that same period were $3,944,551.

Q. (By Mr. Nicodemus) At approximately what date did Mr. Arthur Curtis James and Mr. T. M. Schumacher, at the present time, respectively, Chairman of the Board and Chairman of the Executive Committee, come into the management?

A. I am not personally aware of that, Mr. Nicodemus—exactly when.

(Testimony of Edward W. Engelbright.)

Q. It is a matter of corporate history, though?

A. Yes.

Q. 1927—would that be about the time?

A. I was not here at that time, so I cannot say.

[1871]

Q. All right. That information is shown by the annual reports on file with the Commission, is it not? A. Yes.

Q. Now, will you take up this exhibit and go forward with the estimates that led you to believe that it would cost $10,371,000 to operate the property in 1936?

A. Well, the estimates for the regular operating expenses have been made on the same general basis that we commonly make our estimates, in connection with current operations, with the exception previously mentioned, representing the judgment of our engineering and mechanical and operating offices, as to the requirements of the property under the level of revenues indicated on the statement.

Q. This statement was prepared on the basis of representations made by those different offices, and assembled?

A. Discussions with those offices, yes.

Q. You are constantly doing that work—making estimates of operating costs for the future?

A. I am. In preparing the figures, it was necessary to give due thought to the effect of the expenditures being made on the three-year program; that is, there would necessarily be a good effect from the

(Testimony of Edward W. Engelbright.)

laying of such a large amount of rail in the three-year period, and the doing of considerable ballasting; the reconstruction of box cars with steel sides; the replacement of arch bar [1872] trucks with cast steel trucks, and other items of that character would necessarily have a beneficial effect on our maintenance period immediately following the execution of the program.

The estimate for transportation expenses has been prepared after discussion with the vice president and general manager, and has been arrived at on a transportation ratio basis; it represents an estimate based on judgment as to what the expenses for transportation would be under the level of revenues shown.

Q. What you have said for 1936 applies equally to the four subsequent years shown on exhibit No. 22?

A. It does. I think that the statement and the notes on the statement at the right, which bring out some of the points involved, together with the rest of the figures, are probably self-explanatory, but if they are not, I am prepared to furnish further information in connection with it.

Mr. Nicodemus: You may cross examine this witness; that is all I wish to ask him.

Q. (By Examiner Boyden) In estimating your transportation expenses, did you go into the details of the various items making up the expenses, or just how did you estimate it?

(Testimony of Edward W. Engelbright.)

A. Mr. Bon has stated that he expected to have another [1873] passenger train on in May of next year. We gave consideration to that, and consideration to the fact that at the present time we have some unused train capacity in which a certain amount of additional business, if offered, would be handled without any additional train miles, but generally speaking, other than those adjustments, it had to be arrived at on a percentage basis, based on judgment.

Q. Do you have in exhibit form the details of your estimate for transportation expenses for 1936?

A. No; I have not got it in exhibit form.

Q. (By Mr. Nicodemus) You have it in work sheets?

A. We have the work sheets used in the preparation of this estimate.

Q. (By Examiner Boyden) Will you give us for the record the details of that estimate, please?

A. For 1936?

Q. Yes, sir. A. Yes, sir.

Q With respect to the other items—maintenance of way and structures—have you the details of those?

A. I have work sheets that can be furnished, yes. Necessarily, the estimate of maintenance of way, and also maintenance of equipment—much of that represents the informed judgment of our maintenance of way officers, [1874] and the equipment represents the informed judgment of the superin-

(Testimony of Edward W. Engelbright.)

tendent of motive power, for the simple reason that those figures are largely under control They can be held down in one year, but the inevitable result is that they will go up in some other year, so that they are based more or less on judgment.

Q. You don't have any of those figures with you now?

A We have them in Washington here, but not here in the room.

Examiner Boyden: Off the record.

(Discussion off the record ensued.)

Examiner Boyden: Now, on the record: Mr. Nicodemus, will you have Mr. Engelbright prepare for the record a detailed statement of his computations of operating expenses for the years 1936 to 1940, inclusive?

Mr. Nicodemus: I will do that.

Examiner Boyden: And furnish it for the record?

Mr. Nicodeums: Yes. We can get that together rather quickly.

Q. (By Examiner Boyden) Did you have anything to do with the preparation of the figures for railway track materials?

A. I secured the figures after consultation with our tax department; it represents the estimate of the tax department because they are thoroughly familiar with all the matters, and we showed them the basis of the estimated [1875] revenues, and they went over the whole matter, and it really represents their estimate.

(Testimony of Edward W. Engelbright.)

Q. Is there anything included there for taxes under the Railroad Retirement Act and the Social Security Act?

A. No. If you will look at the next two lines immediately below that, you will see that we have set those items out separate; the excise taxes or the Retirement and Social Security Acts; that is, for the ordinary operation of the property, and, separately the excise taxes for the rehabilitation program.

Q. Does that mean that in 1936, the $237,000 relates entirely to the Railroad Retirement Act and the Social Security Act? A. That is right.

Q. And so on through all the years up to 1940?

A. Yes. It might be well to state for the record, in case any question should be raised about the next item—the hire of equipment item—that that does not represent the debits of this company from the accrual of per diem wholly: the per diem is in that figure, but a large proportion of it represents the car mileage payments due to our heavy use of mileage cars for the shipment of perishables.

Q. Do you have a breakdown of that figure,

A. Yes, I can show you that; that is, for past years. The estimated figures for the car hire item are purely estim- [1876] ates For instance, the year 1935, out of the total payments for per diem and other equipment hire, the total payments of $1,430,000—$855,000 of it represents payments for mileage cars.

(Testimony of Edward W. Engelbright.)

Q. What was the total charge for that year?

A. The total payments?

Q. Yes.

A. They were $1,430,000 and, included in that, was $855,000 for mileage.

Q. The total payments are larger than anything included in the estimate?

A. Well, because the figure of the estimate represents net. If you will notice on the left hand side, it is a net figure; that is, after taking the credits on the other side.

Examiner Boyden: Are there any further questions?

(No response.)

Cross Examination

Q. (By Mr. Swaine) I notice that in this forecast your charges for maintenance of way and structures applies on charges for maintenance of equipment run from between 28 and 30 per cent of your total railway operating revenue.

I assume that is your estimate of proper maintenance charges, assuming that you start with the road in normal [1877] condition.

A. Yes; that is correct.

Q Now, have you got the percentages of your expenditures for maintenance of way and structures and maintenance of equipment as compared with your total railway operating revenues for the period 1929 to 1935, inclusive?

(Testimony of Edward W. Engelbright.)

A. Yes, I have it here; not in the form of an exhibit, but I have the information.

Mr. Swaine: I think it might be helpful to read the figures of your total railway operating revenues for those years into the record, and also the figures for maintenance of way and structures.

I will say to the Examiner that I suspect Mr. Elsey overstated a little the amount of deferred maintenance. I doubt very much, in giving those figures, that it was overstated by as much as $1,000,000 a year for that period.

The Witness: Mr. Swaine, what do you want me to read?

Mr. Swaine: For each year from 1929 to 1935, inclusive, give the total railway operating revenues, maintenance of way and structures, and maintenance of equipment.

The Witness: And the percentage?

Mr. Swaine: If you have it, by way of percentage.

The Witness: I have it both ways.

Q. (By Mr. Swaine) Give us both ways; it will save us making the computations. [1878]

A. It will be quite a tedious reading, and if you wish, we can prepare this in exhibit form.

Mr. Swaine: I don't care; I thought if you had the figures you could give them more quickly if you read them into the record.

Examiner Boyden: I suggest you read them into the record.

(Testimony of Edward W. Engelbright.)

The Witness: Total operating revenues for the Western Pacific Railway Company: 1921; Revenues, $12,104,000; Way, $2,157,000; 17.83 per cent; Equipment, $2,338,000; 19.3 per cent.

1922: Revenues, $12,505,000; Way, $1,970,000; 15.76 per cent; Equipment, $2,219,000; 17.7 per cent.

1923: Revenues, $14,138,000; Way, $2,293,000; 16.22 per cent; Equipment, $2,371,000; 16.78 per cent.

1924: Revenues, $14,370,000; Structures, $2,760,000; 19.2 per cent; Equipment, $2,519,000; 17.5 per cent.

1925: Revenues, $15,569,000; Structures, $2,238,000; 14.4 per cent; Equipment, $2,456,000; 15.8 per cent.

1926: Revenues, $16,057,000; Way, $2,272,000; 14.1 per cent; Equipment, $2,520,000; 15.7 per cent.

1927: Revenues, $16,433,000; Way & Structures, $3,084,000; 18.7 per cent; Equipment, $2,949,000; 17.9 per cent.

1928: Revenues, $17,594,000; Way, $3,345,000; 19 per [1879] cent; Equipment, $3,011,000; 17.1 per cent.

1929: Revenues, $17,688,000; Way & Structures, $3,173,000; 17.9 per cent; Equipment, $3,262,000; 18.44 per cent.

1930: Revenues, $16,298,000; Way & Structures, $2,609,000; 16 per cent; Equipment, $2,641,000; 16.2 per cent.

1931: Revenue, $12,914,000; Way, $2,118,000; 16.4 per cent; Equipment, $2,226,000; 17.2 per cent.

(Testimony of Edward W. Engelbright.)

1932: $10,768,000 Revenues; Way & Structures, $1,332,000; 12.4 per cent; Equipment, $1,867,000; 17.3 per cent.

1933: Revenues, $10,868,000; Way, $1,659,000; 15.3 per cent; Equipment, $1,896,000; 17.4 per cent.

1934: Revenues, $12,303,000; Way, $1,898,000; per cent, 15.4; Equipment, $1,907,000; 15.5 per cent.

1935: Revenues, $12,907,000; Way, $2,369,000; the percentage is 18.3; Equipment, $2,147,000, and the percentage is 16.6.

That is all of the years. It must be remembered that the period from 1927 to 1931, inclusive, which we have previously discussed, was the period of the so-called improvement program, and during that period all of the maintenance expense incidental to that program was included in regular operating expense figures, which have [1880] just been quoted.

So, to that extent, the figures in that period are accentuated.

Q. (By Mr. Swaine) "Distorted" is a better word.

A. Distorted, yes. The figures in that period were bearing some of the expense that should have been borne by previous years.

Q. As I remember your figures, they were above 30 per cent, even when you had a gross in excess of the prognosticated gross.

A. The figures prior to the program, Mr. Swaine,—that they totaled more than 30 per cent?

Q. Yes. A. That is true.

(Testimony of Edward W. Engelbright.)

Q. But you are piling up a tremendous amount of deferred maintenance and had more than 30 per cent gross revenues charged to maintenance of way and equipment, and yet your gross revenues were larger than you estimate for 1936.

Are the totals comparable to 30 per cent for maintenance of way?

A. Yes, because the improvements that are being made—that were made in the previous improvement program, and the improvements in the weight of rail and additional tie plates, improved ballast, and the improvements to rolling stock are such that they will produce less or require less [1881] maintenance in the future than was true in this earlier period, prior to the other improvement program.

There were a great many miles of the track in those days that had no tie plates whatever, in which the ties failed rather rapidly, not due to rot, but to mechanical wear, so that they had a very short life, whereas today the life of our ties is increasing due to the use of heavier rail and larger tie plates and better drainage of the track structure.

Q. Now, while the figures which you read for the period 1931 to 1935, as I remember them, would be pretty nearly one million dollars a year under the figure which you gave for maintenance of way and equipment for 1936, what is your own estimate of the amount of deferred maintenance for the years 1931 to 1935, inclusive, which ought to be deducted

(Testimony of Edward W. Engelbright.)

from the net railway operating income in order to afford a real picture of what the real revenues for the real net railway operating income for that period was?

A. I could not answer that offhand, Mr. Swaine.

Q. This morning Mr. Elsey gave a figure of five million dollars as deferred maintenance, and I understand that produces an astounding result; when he ended up with the other items, he had a red ink figure.

Mr. Nicodemus: It is attributed to that period, as I [1882] understand it.

Mr. Swaine: We misunderstood each other, but I want some facts. How much was the net maintenance for the railroad in the period from 1931 to 1935?

The Witness: I don't think anyone could give an adequate answer to that question. [1883]

Q. (By Mr. Swaine) What is your best judgment?

A. I could not give it in money; I don't believe anybody could arrive at it. If you look at a freight car in a yard and it is in bad order, it would be very difficult for you to say today how much of that bad order condition accumulated prior to this period —how many and how much during that period.

Q. You have been expending quite a lot of money up to 1936; you had high figures for maintenance of way and equipment, more than for 1936, so, presumably, you have been maintaining normal maintenance, or doing a little better than that, making

(Testimony of Edward W. Engelbright.)

up a considerable amount of your past under-maintenance.

A. We certainly did during the period of the improvement program.

Q. Now, beginning in 1931, if I understand you, you not only failed to continue to cut down the theretofore accrued under-maintenance, but you actually added to your under-maintenance.

A. That is true.

Q. I would like your best guess as to what that additional accrued under-maintenance was between 1931 and 1935.

A. I could not give it because of the under-maintenance that might exist at this moment; I do not believe anybody could say what proportion of that represents under- [1884] maintenance that accrued before the other program was in effect, and subsequently; for instance, the rail has been in the track for the entire period; a lot of the ballast has been in the track for the entire period; a lot of it since the road was constructed, and how can we ever arrive at any sort of a money figure which would show how much of the present accrued under-maintenance, or lack of maintenance, is represented, or has accrued in the past five years, as compared with ten years prior to that or fifteen years prior to that. I dont' believe a figure could be arrived at by any logical process.

Q. The question is suggested—how much would it take to put the property back in the condition it was in on January 1, 1931? You would have the

(Testimony of Edward W. Engelbright.)

same exact difficulty in getting at what I ask?

A. Yes, because in 1931, the program was only half completed,—the previous program was only a half completed project.

Q. (By Mr. Nicodemus) In other words, $10,000,000?

A. Our present program, of course, goes a little ahead of that because time has been running since then; our present program is 9½ million dollars.

Q. (By Mr. Swaine) You might get at it this way: How much track do you think you ought to relay annually, as- [1885] suming you had the track in normal condition?

A. It is very difficult to say because it all depends on when the rail was put in the road; if has been in operation for 25 or 30 years. It is possible to lay out, with a fair degree of accuracy, the proper percentage of rail to be laid each year, say, at 12½ per cent, or 10 per cent, or something of that sort, depending on the conditions, so that you gradually rotate around and get your whole road rerailed.

Q. How much have you laid during the period from 1931 to 1935?

A. I will have to refer to my papers. (Witness consults papers.) Let's see—1931 to 1935—103 miles.

Q. What is the total mileage for the system?

A. The total mileage of the system is 1,217 miles of road, but there has been some rail laid prior to that.

Q. In five years, you lay about 80 per cent of the track? A. Yes.

(Testimony of Edward W. Engelbright.)

Q. That clearly indicates that on that item there has been some accruing deferred maintenance during the period.

A. Yes, it does. Of course, the five-year period we have just passed through—it was not a question of what you wanted to do; it was a question of what it was pos- [1886] sible to do under the conditions existing—the financial conditions.

Q. I quite understand that. I do not make the slightest criticism; everything was done that could reasonably be expected, but I would like to find out what the real earnings from the property have been in the past and what they can be expected to be in the future. I don't think the figures on the past performance are very indicative of what the property really earned, and I know my clients would like to have some assurance of what the income will be in the future—give us your best guess.

A. My best guess as to income in the future is represented by exhibit No. 22. We had a great many conferences with everybody concerned—Mr. Elsey and everyone who could shed any light on the matter, and it represents the best judgment of several men as to what can be hoped for in the future, on the assumption that revenues outlined thereon may be realized.

Q. On the assumption that you have spent ten million dollars for the period? A. Yes.

Mr. Swaine: That is all.

Examiner Boyden: Any further questions?

(No response.)

Mr. Nicodemus: I call Mr. DeGraff. [1887]

D. C. DeGRAFF

was sworn and testified as follows:

Direct Examination

Q. (By Mr. Nicodemus) Please give your name to the reporter. A. D. C. DeGraff.

Q. Mr. DeGraff, you are general auditor of the Western Pacific Railway Company?

A. Yes, sir.

Q. And auditor of the Tidewater Southern Railway Company? A. Yes.

Q. President Elsey testified regarding certain exhibits—exhibit No. 11—the balance sheet as of December 31, 1935, and exhibit No. 12—an analysis of the property account shown by that balance sheet, and a pro forma exhibit—I think No. 16—were prepared under your direction? A. Yes, sir.

Q. You believe them to be correct and accurate in all respects? A. Yes.

Mr. Nicodemus: Counsel may cross examine; I believe Mr. Swaine would like to ask a question about the balance sheet. The debtor has no questions to ask this witness. [1888]

Cross Examination

Q. (By Mr. Swaine) I asked Mr. Elsey this morning whether or not the items appearing under "Current assets" in account No. 717, aggregating $413,679.25, were items which you believe were readily convertible into cash. Why are you now putting them under the item of current assets?

(Testimony of D. C. DeGraff.)

Mr. Nicodemus: Whether you went in on the judgment of the Commission, or on your own judgment.

Mr. Swaine: These items of the Sacramento Northern include an item of accrued interest on Sacramento Northern Railway Company notes receivable of $200,347, and then another item of accrued interest on Sacramento Northern Railway Advances, $69,549, and over under "Investments" I discovered there was an item of $4,525,000 of notes receivable from the Sacramento Northern, and an item of $3,338,356.42 under "Sacramento Northern Railway advances".

It was testified that that represented unpledged obligations given to refund the interest and, in part, advanced to the operating deficits. My query was whether or not those items were really realizable items.

A. This $130,336.86 represents the interest accrued on the Sacramento Northern Bonds owned by the Western Pacific Railroad Company for the six months period ending [1889] December 31, 1935.

Q. Put there solely for that reason—it had not run more than six months?

A. I won't say that particularly, but prior to this time all of those interest items due from the Sacramento Northern Railway had been paid to the Western Pacific Railroad Company.

Q. Paid in cash?

(Testimony of D. C. DeGraff.)

A. Paid in cash, yes, sir, and if the Sacramento Northern Railway Company did not have the money to pay them, it was advanced to them by the Western Pacific Railway Company, and, consequently, this current asset was cancelled, and that brought it up in the amount as advanced to the Sacramento Northern Railway.

Q. Yes. So the regular course of accounting here, as I understand it, is that the six months' interest goes into the current asset item account No. 717; that some time after the expiration of the six months' period the Sacramento Northern pays that item in cash, but it gets the cash by an advance from the Western Pacific Railway Company, which turns up in the investment account—is that right? A. That is right.

Q. Therefore, this current asset is not, from a realistic approach to the consolidated picture anything that is re- [1890] alizable in cash, is it?

A. No.

Mr. Swaine: I suggest, Mr. Examiner, that in addition to the income statements that we requested this morning, with respect to the Sacramento Northern, and in respect to the Tidewater Southern—two of the important subsidiaries—that we have the latest two available balance sheets of those two companies as well.

Examiner Boyden: Will you furnish those balance sheets, Mr. Nicodemus?

(Testimony of D. C. DeGraff.)

Mr. Nicodemus: Yes, sir; I will make a note of it.

Examiner Boyden: Any further questions?

Q. (By Mr. Wilkinson) It is exhibit No. 16 your pro forma general balance sheet of 1936?

A. Yes.

Q. You show there "Investment in Road Equipment, $13,689,000." What is the basis for that figure?

A. That is taken from our general ledger.

Q. In other words, that is a continuation of the present investment in road and equipment?

A. Yes, sir.

Q. And you are not contemplating changing the investment in road and equipment item as a result of the reorganization? A. No, sir. [1891]

Examiner Boyden: No further questions. The witness is excused. Have you any further witnesses?

Mr. Nicodemus: No further witnesses; the debtor rests, subject to the additional testimony that has been requested in exhibit form. I should like to have another hearing if I could.

Mr. Willard: Mr. Examiner, we have heard something here about earnings in connection with fixed charges under the plan, as covered by a requirement of section 77, and there may be some doubt as to whether or not that requirement is met, but I am now more concerned about another requirement in section 77 to the effect that the provisions of the plan must give fair and equitable treatment to all classes of creditors and afford due recognition to

(Testimony of D. C. DeGraff.)

the right of each class of creditors and stockholders and not discriminate unfairly in favor of any class of creditor or stockholder.

The Railroad Credit Corporation has said to the Commission and to the debtor on two occasions that it feels that the plan submitted to you is inequitable and does discriminate unfairly.

The Railroad Credit Corporation appears to be the only creditor that has not been consulted or advised in the course of the preparation of this plan, and it had hoped that at this hearing there would be introduced [1892] some evidence justifying the basis of conversion referred to in the plan. The record so far seems to be quite barren of any evidence of that character, and we know of no presumption in favor of the debtor. The justification must be established by the debtor.

Of course, if no evidence is put in, and you think there is evidence on the face of the plan itself, as well as some to be inferred from the evidence to be introduced here today, showing conclusivly, to our minds, at least, that the plan is inequitable and does discriminate unfairly against the Railroad Credit Corporation.

I say in that connection that we do not regard the treatment accorded the Reconstruction Finance Corporation as being inequitable in giving them equality with the mortgage bondholders, at least, based on such information as we now have, and I think they are entitled, not because of the new

(Testimony of D. C. DeGraff.)

money or on other grounds to be given equality with the first mortgage bondholders, but if there is no evidence introduced by the debtor in justification of the basis of conversion, particularly with respect to the Railroad Credit Corporation in relation to the other debtors, then, of course, feeling as we do, we must ask the Commission on the record to refuse to approve the plan submitted.

It may be that after we have had an opportunity to [1893] study the evidence that has been put in here today and to study the record, that we will desire to make a statement, perhaps through a witness—I am not prepared yet to say whether we would want to do that or not, but I assume we would be given that opportunity at a later date. We will be prepared to go ahead within a few days after we have a copy of the record.

Examiner Boyden: Let me ask you one question, Mr. Willard.

Mr. Willard: Yes.

Examiner Boyden: Supposing the debtor's plan is not supported by adequate or suitable evidence as to the equitability of the exchange of securities which it suggests, what is your view as to whether or not the Commission should approve that plan as being impotent?

Mr. Willard: Well, I expect the Commission could, if the Commission felt it was equitable.

Examiner Boyden: Regardless of the evidence or lack of evidence?

(Testimony of D. C. DeGraff.)

Mr. Willard: Regardless—if there were evidence establishing that it was not equitable, I would not expect the Commission to approve it, but if there were merely a want of evidence, in that event I would suppose the Commission had authority to approve it. We feel that there is affirmative evidence of inequality already in [1894] the record, and if that seems inadequate, then we shall desire to produce more evidence of the same character. The Railroad Credit Corporation is in a separate class.

Examiner Boyden: You will be given an opportunity to be heard from later on, Mr. Willard.

Mr. Willard: Thank you.

Mr. Swaine: Mr. Examiner, I will state the position of the holders of the first mortgage bonds, whom I represent. We were consulted and consulted at considerable length in working out the best plan, not only by counsel for the debtor, but we had some consultation with Mr. Jones, and at one meeting I think Mr. Clay was also present.

It was represented to us that the Reconstruction Finance Corporation desired a plan along these lines and would meet the commitments involved in the plan.

We have stated, and state now again that the Reconstruction Finance Corporation desires a plan along these lines, and is willing to make the commitments contemplated by the plan, and if the plan is acceptable to our bondholders, we will simply recommend acceptance to such other bondholders as may consult us.

(Testimony of D. C. DeGraff.)

That is subject, however, to two conditions to which Mr. Nicodemus has already adverted, and one which he has not mentioned and which has been thrown into promin- [1895] ence by what Mr. Willard has just said.

The two conditions that Mr. Nicodemus referred to are first that the forms of paper shall be satisfactory to us. We had never seen them until they were submitted here this morning. I question whether or not it is worth while spending a great deal of time going over those documents in detail until the general principles of the plan have been somewhat crystallized.

The second thing is the approval of the voting trustees, and two of the three voting trustees have agreed, and the other one has not.

Now, the other element of the plan, as to which our acceptance would be conditional, is this: We do not believe that section 77 as it now stands in respect of the provision that the Commission can enforce the plan on the dissenting classes of creditors is constitutional in the light of a recent decision of the Kentucky Supreme Court on the provisions of section 77-B, which is certainly less onerous than other paragraphs of the section.

I don't believe that if there were any class of which more than 33⅓ per cent dissented, this plan would be adequate to pass a good title to the successor company, and we would not want to take securities of that company if we did not believe it had good title. [1896]

(Testimony of D. C. DeGraff.)

Therefore, unless the debtor can secure 66⅔ per cent of each class of creditors—and that includes the Railroad Credit Corporation, which I believe is separately classified, and the Reconstruction Finance Corporation, which is separately classified, we ask that the plan be amended as contemplated by section 77, by the insertion of the provision that the rights of any class of creditors of which less than 66⅔ per cent assent, shall be protected by the sale of the property free of the lien of that class of creditors and the substitution of the proceeds of the sale for property in respect of that class.

In other words, unless the statutory two-thirds of each class is released, the dissenting classes shall have what we regard as a constitutional method of releasing their rights in the property in order that the new company shall be assured of the validity of the title to the property.

With those changes, and on the assumption that the Railroad Credit Corporation will accept the plan, we will accede to it ourselves. If those conditions are not met, our view is that the first mortgage bondholders have an absolute first lien upon the property, and that no other creditors, other than the holders of the equipment obligations, which I understand no one suggests be [1897] disturbed, are entitled to receive securities either superior to or on a par with the holders of the first mortgage bonds.

Putting it another way, as far as the present debt is concerned, the Railroad Credit Corporation, the

(Testimony of D. C. DeGraff.)

Reconstruction Finance Corporation, and the A. C. James Corporation holdings are secured by mortgage bonds which are junior entirely to the first mortgage bonds save for certain collateral, which this record shows is substantially valueless, they are required as a matter of law, which Mr. Willard read from section 77, to receive junior securities; that is, securities junior to those given to the first mortgage bondholders.

As I said this morning, in respect to the Railroad Credit Corporation, if it cares to buy ten million dollars worth of securities on a basis more favorable than any one else would provide, that then any market rate or market price at which it furnishes the money, would furnish a consideration for advancing its position.

We do not believe that the apparent discrimination in favor of the Reconstruction Finance Corporation on its old debt, upon analysis, is a real discrimination against anybody else because the Reconstruction Finance Corporation, under the plan, does furnish a very substantial additional consideration for that better treatment. [1898]

Therefore, as to the Reconstruction Finance Corporation, its position under the plan has got to be looked at as an entirety, whereas, as to the Railroad Credit Corporation and the A. C. James Corporation, their positions can be looked at only in the light of the collateral that they hold.

(Testimony of D. C. DeGraff.)

That is a practical matter. It means that unless the Commission is prepared to adopt this plan substantially as it is written, subject to modification with respect to the technically dissenting classes of security holders in any new plan, our committee would like to be consulted as to the terms upon which the new money shall be put up, because unless the new money is to be put up on our terms, or on terms which will not adversely affect our interests, I think the first mortgage bondholders will be prepared to put up the new money themselves.

Examiner Boyden: Your decision would be acceptable to consideration by the Commission and approval of the plan which was submitted to the various groups of creditors for consideration and acceptance, would it not? In other words, that would give your creditors their opportunity to accept or reject the plan—is that not right?

Mr. Swaine: I am afraid I don't follow your question. [1899]

Examiner Boyden: You have stated that if there is any modification of the plan, your group of creditors desire to be consulted as to the terms *upon the* money will be furnished by the Reconstruction Finance Corporation. Now, approval by the Commission of the plan and submission of that plan to the creditors would afford your group their statutory opportunity, would it not, to accept or reject the terms upon which the Reconstruction Finance Corporation would supply the money, provided, of

(Testimony of D. C. DeGraff.)

course, that the plan contemplated such procedure.

Mr. Swaine: Entirely so; except, under those circumstances, we might be the dissenting class, and, again, we would like to have a modification providing for protecting the interests of the dissenting class, and we ask for that modification of the plan.

We are asking here that the plan be modified to protect the interests of any class of which less than 66⅔ per cent shall assent by providing for the sale of the property upon which that class has a lien.

Examiner Boyden: Approval of the plan for submission to the creditors to determine which groups would accept it to the extent of 66⅔ per cent, of course.

Mr. Swaine: My own view is that that should be in the plan right now—whatever plan is put up.

Examiner Wilkinson: Mr. Nicodemus, I don't think the [1900] plan is specific as to whether or not a new corporate entity is contemplated.

Mr. Nicodemus: A new corporate entity is not contemplated.

Examiner Wilkinson: Is not contemplated?

Mr. Nicodemus: It is contemplated if the court affirming this plan will make it effective retroactively to December 31, 1935, and will cancel as of midnight of that date all of the securities of the former company, the new one to be effective January 1, 1936.

Examiner Wilkinson: In other words, only such modifications as would be necessary to the debtors.

(Testimony of D. C. DeGraff.)

Mr. Nicodemus: Any amendment would be in the character of the securities.

Examiner Wilkinson: And no sale is contemplated?

Mr. Nicodemus: No; unless there is an unnecessary expense under this application.

Mr. Coulson: Mr. Examiner, am I correct in understanding that the Commission will, when these various exhibits come in, fix a time for some discussion of the plan as a plan on its legal side?

I would like, on behalf of the A. C. James Company, to make some comment about some phases of the plan, but I would much rather do it after the exhibits are in, and we have had a chance to look at the record as made [1901] today.

I differ a little with Mr. Swaine—or, perhaps, I misunderstood his position—I think the Commission has a very large power of rejection under subsection d of section 77, and I would like to say that while the A. C. James Corporation is in a position of a junior creditor, of approving the basic principle of the plan in the attempt to reorganize this property by keeping alive the principal debt of the creditors, but transferring to an income basis so much of that principal, debt as is necessary to relieve the road of a reasonable probability of a similar experience under conditions we can reasonably anticipate.

Yet, there are some features of the plan on which we would like to comment, and if the first mort-

(Testimony of D. C. DeGraff.)

gage bondholders do have a hearing, we urge that a clause be put in the plan to be approved by the Commission as a modified plan, which would provide for sale—we would like also to be heard on that question of whether the Commission or the court is clothed with that sort of power under section o of section 77, so I would suggest that the Commission permit the various creditors to have a chance to see this record and see these additional exhibits, and then fix a date when there might be a general hearing on the plan, and from our point of view, we would [1902] like it to be a hearing in which the Commission is considering the plan in the light, not of whether the plan as filed is final and is to be approved or disapproved, but in the light of the Commission's clear power under subsection (d) to originate a plan itself.

Examiner Boyden: As I understand Mr. Swaine's position, he has already stated that the group which he represents suggests that modification of the plan—is that correct?

Mr. Swaine: We suggest that, or that we be assured that all classes of creditors assent to the plan. We don't care—if the Railroad Credit Corporation and the A. C. James Corporation and the Reconstruction Finance Corporation assent to the plan, that becomes wholly academic, because you have got the consent of every class of creditors—that is, the statutory amount—but failing that, we don't believe that the provision which purports to

(Testimony of D. C. DeGraff.)

permit the court and the Commission to force a provision on a class of creditors is a valid provision, and I therefore do not believe that you would have a valid plan for reorganization if you should do that.

Examiner Boyden: You think the plan should contain a provision that if it was not acceptable to all classes of creditors or the requisite percentage of the creditors, that then it should be sold under the conditions [1903] to which you referred?

Mr. Swaine: That is right; in other words, we think the plan should contain a provision which would permit its being carried out in the manner which would be beyond any attack as to its constitutionality, so that the securities which will eventually be put out, will be valid security.

Mr. Nicodemus: I would like very much for Mr. Swaine to submit an amendment to carry out what he has in mind.

Mr. Swaine: I did submit it to you in the preamble to that plan.

Mr. Nicodemus: Will you re-submit it to the Commission? I don't think it was authorized by section 77.

Mr. Swaine: No.

Mr. Nicodemus: I would like to state that we are very hopeful of having this plan accepted by 66⅔ per cent of each class of creditors, and I think after Mr. Willard has studied the record, he will

(Testimony of D. C. DeGraff.)

find it an equitable plan.

Mr. Swaine: I think I can read a provision into the record to convey what I have in mind. I suggest the insertion on page 18 as a separate heading —probably being headed "Paragraph 9"—Roman nine—and that would change paragraph IX to paragraph X, and would change [1904] paragraph X to paragraph XI—a section entitled "Provision for Dissenting Creditors and Stockholders," reading as follows:

"If more than one-third of any class of creditors or stockholders of the railroad company, as they may be classified by the court in the reorganization proceeding, shall not accept the plan within the period hereinbefore provided, the property of the railroad company shall be sold at public auction at a fair upset price, as determined by the court in the reorganization proceeding, and the non-assenting creditors of such class, or the non-assenting stockholders, as the case may be, shall be entitled to receive their aliquot portion of the proceeds of sale of such property after deducting therefrom all expenses of such sale, and the amount which would be required to pay in full the principal and interest to the date of such sale of all creditors whose claims are prior in lien or superior in equity to the class of such non-assenting creditors, or the rights of such non-assenting stockholders.

"Upon any such sale, the committee representing the first mortgage bondholders under the plan, or its

(Testimony of D. C. DeGraff.)

nominees, may act as purchasers of the property for the benefit of the reorganization, and may apply on account of the purchase price, the distributive share of the pro- [1905] ceeds of such sale of all securities and holders which have assented to the plan and the securities, though not assenting to the plan, of all classes, two-thirds or more in amount, which have assented to the plan."

I will say that I have no great desire to have the committee which I represent act as a purchaser, but I am perfectly willing that the Board of Directors of the debtor shall have the same power so long as it is perfectly clear that the power is to be exercised for the benefit of the reorganization.

Mr. Coulson: If the Commission please, I would like to reaffirm, on behalf of one of the junior creditors, the statement I previously made that if the Commission inserted that clause, we would oppose it. I think the time to decide whether or not there is a dissenting interest is after the plan is approved and reported to the court by the Commission and submitted to the creditors, but I think the clause Mr. Swaine has just read into the record as a suggestion for inclusion by the Commission, is quite outside the scope of Section 77 of the Bankruptcy Act, and we would like an opportunity at the appropriate time to be heard in regard to it.

Mr. Swaine: Section 77 contains a clear affirmation that any plan may provide for sale of the property. You will remember that before the last amend-

(Testimony of D. C. DeGraff.)

ment, that [1906] was a mandatory provision; under the new amendments, it is permissive but not mandatory.

Mr. Coulson: I defer to Mr. Swaine's wisdom as to section 77, but I am unable to apply it to the sale of the whole property, and that is a power ordinarily lodged in a foreclosure court.

Mr. Nicodemus: Colonel Coulson's suggestion of terminating this hearing with the understanding that we get together within a reasonably short time is satisfactory to the debtor.

Examiner Boyden: How soon will you be able to complete the preparation of the additional exhibits?

Mr. Nicodemus: How long will it take, Mr. Degraff?

Mr. Degraff: We are a long ways from home, Mr. Nicodemus; I think we ought to have a month.

Mr. Nicodemus: I would hate to have a month go by for the preparation of the exhibits, but it seems we will not be able to get along without them, so there seems to be no alternative—one month.

Examiner Boyden: I think we should adjourn —this is off the record.

(Discussion off the record ensued.)

Examiner Boyden: We will adjourn until April 21, 1936.

(Whereupon, at 4:20 o'clock p. m. of the same day, March 23, 1936, an adjournment was taken until April 21, 1936.) [1907]

April 21, 1936

PROCEEDINGS

Examiner Wilkinson: Come to order, gentlemen.

Mr. Nicodemus: Recall Mr. Elsey.

CHARLES ELSEY

was recalled and testified further as follows:

Direct Examination

Q. (By Mr. Nicodemus) At the last hearing I asked Mr. Englebright if he could give us the date of the election of Mr. James, Mr. Schumacher, and Mr. Adams as directors and officers of the debtor. He was unable to do it. Can you supply those dates?

A. Yes, sir. Mr. Arthur Curtiss James and Mr. C. M. Schumacher were elected directors on July 6, 1926. Mr. H. M. Adams was elected director and president at the annual meeting on March 30, 1927.

Q. At that time did they to your knowledge make an inspection of the property of the Western Pacific Railroad Company? A. Yes, sir.

Q. Following that inspection, did they issue a circular to the stockholders of the Western Pacific Corporation, that is, the holding corporation owning the preferred and common stock of the debtor?

A. Yes, sir.

Q. Have you a copy of that circular? [1911]

A. Yes, sir.

Q. Is that the circular? A. Yes, sir.

Mr. Nicodemus: I offer the circular in evidence

(Testimony of Charles Elsey.)

and ask that it be marked as exhibit No. 28, which is the next consecutive number.

Examiner Wilkinson: The circular which is referred to will be marked as Exhibit No. 28.

(Exhibit No. 28, Witness Elsey, received in evidence.)

Q. (By Mr. Nicodemus) At the last hearing, were you requested by certain counsel and by the examiners to prepare or arrange for the preparation of certain additional exhibits?

A. Yes, sir.

Q. Has this been done? A. Yes, sir.

Q. Have the new exhibits which you stated you have prepared in accordance with those requests already been distributed to counsel?

A. That is correct.

Q. How many exhibits have been prepared?

A. 36.

Q. I have three separate exhibits, one of which consists of 36 statements.

A. That is correct. [1912]

Q. When you refer to the 36 exhibits, you really mean that the first exhibit that we have to offer contains 36 separate statements?

A. That is correct.

Q. At the last hearing Mr. J. F. Bon, the traffic manager, testified in support of the operating revenues shown on the exhibits which we introduced at that hearing. Mr. Englebright testified as to the operating expenses, and the auditor, Mr. D. C. DeGraff, testified as to certain of the financial ex-

(Testimony of Charles Elsey.)

hibits. Do you propose to have the same witnesses support similar statements in these new exhibits?

A. Yes, sir.

Q. That is, excepting Mr. Bon. Will you state to the examiner the situation as to Mr. Bon?

A. Mr. Bon was taken quite ill on return to San Francisco and was unable to make this trip. Mr. Henry Poulterer, the assistant freight traffic manager, cooperated with Mr. Bon in preparing the original statements and also the earnings statements on our subsidiaries. Mr. Poulterer is here to testify here in place of Mr. Bon.

Q. Mr. Poulterer collaborated with him in the preparation of the exhibit used at the last hearing, as well as those that we offer at this hearing?

A. That is correct. [1913]

Q. And is, as you understand it, prepared to testify and be cross examined as to all the exhibits?

A. Yes, sir.

Mr. Nicodemus: I should like, Mr. Examiner, to offer as exhibit No. 29, the compilation of 36 individual statements referred to by Mr. Elsey, subject, of course, to the testimony to be offered by Messrs. Poulterer, Englebright, and DeGraff.

Examiner Wilkinson: The documents just referred to by counsel will be marked Exhibit No. 29.

(Exhibit No. 29, Witness Elsey, received in evidence.)

[Here follows Exhibit No. 29 continuing to page 2092.]

(Testimony of Charles Elsey.)

Statement No. 1
Notes

The Western Pacific Railroad System

Comprised of
The Western Pacific Railroad Company
Sacramento Northern Railway
Tidewater Southern Railway Company
Deep Creek Railroad Company

A FORECAST OF CONSOLIDATED REVENUES, EXPENSES AND INCOME
Years 1936 - 1940
(Statements 1 to 7, both inclusive)

NOTE 1

This estimate has been prepared in connection with proceedings on a Plan of Reorganization of The Western Pacific Railroad Company filed with the United States District Court and the Interstate Commerce Commission on February 8, 1936.

Statement No. 2 sets forth an estimated consolidated Income Account for the years 1936 to 1940, both inclusive, on an assumed basis of revenues (with estimated operating expenses corresponding to such revenue levels) for The Western Pacific Railroad Company and its three subsidiary railroad lines.

The figures shown on Statement No. 2 represent a consolidated income estimate with all inter-company transactions eliminated.

NOTE 2

Maintenance costs shown for 1936, 1937 and 1938 do not include operating charges incident to the Re-

(Testimony of Charles Elsey.)

habilitation Program of The Western Pacific Railroad Company. Similarly, no estimated Operating Expenses are included for any extraordinary rehabilitation which may be required on subsidiary lines. Plan of Reorganization for The Western Pacific Railroad Company contemplates, subject to approval of the Interstate Commerce Commission, that such expense will be charged to Profit and Loss during those years.

NOTE 3

Sacramento Northern Railway accounts are maintained in conformity with the Interstate Commerce Commission Classification of Accounts for Electric Railways, which includes hire of Equipment charges with "General and Miscellaneous." In the consolidated figures, all hire of equipment has been included under that account, as shown on Line 21.

NOTE 4

Western Pacific currently reports, under "Other Income," interest on obligations of the subsidiary companies to the parent company, i. e., interest on bonds, notes and advances on open account. Such interest income has been eliminated from estimates of the Western Pacific's "Other Income" on Statements Nos. 3, 4, 5, 6 and 7, with the exception of interest on a note of the Tidewater Southern since it is proposed to convert all other such subsidiary obligations to "Advances on Open Account" without interest.

(Testimony of Charles Elsey.)

NOTE 5

In comparing estimated "Hire of Equipment" estimates with past records, consideration must be given to the fact that effective January 1, 1936, rentals from lease of Western Pacific refrigerator cars must be included as an item of "Other Income," whereas prior years' rentals were credited to Hire of Equipment Account.

NOTE 6

Interest shown for Western Pacific's Equipment Trusts and Lease-Conditional Sale Agreement provides only for present obligations. No charges for new equipment obligations are included herein since definite plans are not at present available.

NOTE 7

Bonds will be sold to provide funds for the Rehabilitation Program as needs arise, and interest is herein considered as shown below:

Year	Bonds Sold During Year	Outstanding End of Year	Average for the Year	4% Interest on Average
1936	$3,000,000	$ 3,000,000	$ 1,625,000	$ 65,000
1937	3,500,000	6,500,000	4,750,000	190,000
1938	3,500,000	10,000,000	8,250,000	330,000
1939	None	10,000,000	10,000,000	400,000

and subsequently.

(Testimony of Charles Elsey.)

NOTE 8

Bonded debt of the Tidewater Southern Railway was wholly extinguished by the Sinking Fund as of March 31, 1935, and all Advances on Open Account repaid as of December 31, 1935 leaving no debt to the parent Western Pacific except a note in amount of $508,278.61 dated June 26, 1933, and due March 1, 1945, on which current interest has been and is expected to be paid currently.

Office of the President,
San Francisco, Calif.,
April 7th, 1936.

A FORECAST OF CONSOLIDATED REVENUES, EXPENSES AND INCOME

		1936	1937	1938	1939	1940
1	Assumed Operating Revenues (Note 1)					
2	Freight Revenue	$13,775,700	$15,048,700	$16,332,700	$17,672,700	$19,293,700
3	Passenger Revenue (Including City Line revenues of Sacramento Northern Railway)	841,100	1,200,100	1,434,100	1,986,100	1,717,100
4	Mail, Express, Dining & Buffet and Other Passenger Train Revenues	212,500	277,500	309,500	364,500	339,500
5	Miscellaneous Other Revenues—Net	220,900	234,900	248,900	264,900	281,900
6	Total Railway Operating Revenues	15,050,200	16,761,200	18,325,200	20,288,200	21,632,200
7	Operating Expenses (Excluding Operating Expense of WP RR Rehabilitation Program—See Note 1)					
8	Maintenance of Way & Structures (Including Operating Expense of Routine A & B Work—Note 2)	2,463,800	2,509,800	2,608,800	2,767,800	2,940,800
9	Maintenance of Equipment (Including Depreciation and Operating Expense of Routine A & B Work—Note 2)	2,229,300	2,403,800	2,531,300	2,887,800	3,290,300
10	Power (Electric power used on Sacramento Northern Railway)	164,000	171,000	181,000	190,000	194,000
11	Traffic Expense	712,600	735,600	766,600	782,600	803,600
12	Transportation—Rail Line	5,682,600	6,061,900	6,444,900	6,934,900	6,985,900
13	Miscellaneous Operations	92,000	100,000	100,000	115,000	125,000
14	General and Miscellaneous Operations (Note 3)	198,400	204,500	209,600	212,600	215,600
15	General Expense	464,900	489,900	514,900	539,900	564,900
16	Transportation for Investment—Credit	76,000*	76,000*	77,000*	52,000*	52,000*
17	Total Railway Operating Expenses (As qualified above)	11,931,600	12,600,500	13,280,100	14,378,600	15,068,100
18	Railway Tax Accruals—Regular Items	717,300	722,500	824,700	926,900	1,129,100
19	Excise Taxes—Ordinary Expense Payrolls (Railroad Retirement and Social Security)	279,400	408,400	514,200	552,200	582,200
20	Excise Taxes—WP RR Rehabilitation Program Payrolls (Railroad Retirement and Social Security)	28,000	36,000	41,000	—	—
21	Hire of Equipment—Net Debit (Notes 3 and 5)	1,064,600	1,136,500	1,188,400	1,214,400	1,240,400
22	Joint Facility Rents—Net	148,000*	170,000*	188,000*	210,000*	225,000*
23	Net Railway Operating Income	1,177,300	2,027,300	2,664,800	3,426,100	3,837,400
24	Other Income (Assuming WP RR Plan of Reorganization is effective January 1, 1936—Note 4)					
25	Rents from Road and Equipment (Rental on cars leased to Pacific Fruit Express Company—Note 5)	322,000	287,000	229,000	184,000	171,000
26	Miscellaneous Interest and Other Rents from Road and Equipment	148,636	150,936	155,336	159,736	163,336
27	Total Other Income	470,636	437,936	384,336	343,736	334,336
28	Total Income	1,647,936	2,465,236	3,049,136	3,769,836	4,171,736
29	Miscellaneous Deductions from Income					
30	All items other than interest on Funded Debt	123,850	122,650	119,550	117,350	115,250

2	Freight Revenue	$13,775,700	$15,048,700	$16,332,700	$17,672,700	$19,293,700
3	Passenger Revenue (Including City Line revenues of Sacramento Northern Railway)	841,100	1,200,100	1,434,100	1,986,100	1,717,100
4	Mail, Express, Dining & Buffet and Other Passenger Train Revenues	212,500	277,500	309,500	364,500	339,500
5	Miscellaneous Other Revenues—Net	220,900	234,900	248,900	264,900	281,900
6	Total Railway Operating Revenues	15,050,200	16,761,200	18,325,200	20,288,200	21,632,200
7	Operating Expenses (Excluding Operating Expense of WP RR Rehabilitation Program—See Note 1)					
8	Maintenance of Way & Structures (Including Operating Expense of Routine A & B Work—Note 2)	2,463,800	2,509,800	2,608,800	2,767,800	2,940,800
9	Maintenance of Equipment (Including Depreciation and Operating Expense of Routine A & B Work—Note 2)	2,229,300	2,403,800	2,531,300	2,887,800	3,290,300
10	Power (Electric power used on Sacramento Northern Railway)	164,000	171,000	181,000	190,000	194,000
11	Traffic Expense	712,600	735,600	766,600	782,600	803,600

(Testimony of Charles Elsey.)

Statement No. 8
Page No. 1

The Western Pacific Railroad Company
Sacramento Northern Railway
Tidewater Southern Railway Company
Deep Creek Railroad Company

INCOME ACCOUNT—COMBINED 1922 to 1935, INCLUSIVE
Inter-Company Accounts Eliminated

NOTES

1. Accounts of the Sacramento Northern Railway do not appear until 1926 and this subsidiary was further enlarged by acquisition of the San Francisco-Sacramento Railroad in 1929.

2. Northern California Extension from Keddie to Bieber—112 miles—was not placed in revenue service until Nov. 10, 1931. Revenues accruing to the System lines on traffic to and from this new line are included after that date, but the portion of such revenues earned on the new line itself were not included until after May 31, 1932. Such revenues were credited to Construction Account, which was also charged with operations. Subsequently these revenues and expenses were cleared through Profit and Loss by authority of the Interstate Commerce Commission.

3. Review of Maintenance of Way expenses should be considered in connection with the growth of the property. This is outlined for the component lines and the System by Statement No. 17. Increased intensity of use is indicated by increases in locomotive and car miles shown by Statement No. 18.

4. Maintenance of Way & Structures accounts for 1934 include Operating Expenses approximating

(Testimony of Charles Elsey.)

$107,286 incidental to laying 43 track miles of new rail as emergency renewals in 1934. Similarly approximately $353,036 Operating Expense is included in 1935 incident to laying of 100 track miles of necessary new rail and completion of the 1934 rail work.

Statement No. 8
Page No. 2

5. Included in the Maintenance of Way & Structures and Maintenance of Equipment expenses are Operating Expenses incident to the Improvement Program of the Western Pacific Railroad, which are separately shown, and of the Sacramento Northern Railway and Tidewater Southern Railway, which programs are described more specifically in Statements Nos. 21, 24 and 27.

6. Review of Maintenance of Equipment expenses should be considered in connection with the increased units of equipment to be maintained as shown by Statement No. 19, and also with reference to increased use of equipment as generally shown by increasd car and locomotive miles indicated by Statement No. 18.

7. Operating Expense approximating $54,000 in 1934 and $83,000 in 1935 are included as a result of rehabilitation of 134 box cars and 207 box cars, respectively.

8. Hire of Equipment for period shown has been Net after taking credit for rentals from lease of Western Pacific owned refrigerator cars to the Pacific Fruit Express Company, which rentals have been as follows:

(Testimony of Charles Elsey.)

1922	$	1929	$497,708
1923	159,334	1930	472,169
1924	600,526	1931	445,862
1925	654,100	1932	421,362
1926	629,473	1933	396,927
1927	547,947	1934	371,777
1928	522,390	1935	346,712

Effective January 1, 1936, such rentals will no longer be credited to Hire of Equipment but will be credited to Non-Operating Income.

By reason of having handled heavy movement of perishables, Western Pacific's Hire of Equipment account has always reflected substantial charges for mileage car rentals which are shown below for the period covered by the attached records:

1922	$138,323	1929	$561,471
1923	286,201	1930	850,711
1924	328,933	1931	731,656
1925	426,284	1932	683,235
1926	495,126	1933	693,624
1927	560,487	1934	841,745
1928	630,778	1935	855,053

The above figures are also indicative of the growth of the Company's perishable fruit and vegetable traffic.

Statement No. 8
Page No. 3

9. Traffic value of subsidiaries is indicated by Statement No. 10, showing Western Pacific's revenues on traffic interchanged with such subsidiaries.

NOTES

*Sacramento Northern Railway was acquired by The Western Pacific Railroad Company as of November 5, 1925, and increased by acquisition of San Francisco-Sacramento Railroad as of January 1, 1929.

†Western Pacific's interest in Central California Traction Co. was acquired as of January 1, 1928.

‡Information on Deep Creek contributions of traffic not available 1922 through 1927.

(Testimony of Charles Elsey.)

§Included in revenues accruing to The Western Pacific Railroad Company from Sacramento Northern Railway interchange for 6 months of 1929 and the years thereafter are revenues on business to and from the Holland Branch of the Sacramento Northern Railway, which branch was placed in service in June, 1929.

Office of the President,
San Francisco, Calif.,
April 4th, 1936.

Statement No. 11

Notes for Statements on Advances to Subsidiaries

1. Sacramento Northern Railway:
Tidewater Southern Railway Company:

Prior to September, 1935, advances made to the Sacramento Northern Railway and Tidewater Southern Railway Company were added to the principal of "Advances on Open Account" and interest at 5% on the accumulated total was accrued and paid monthly.

The Tidewater Southern Railway Company has repaid all previous advances and on which interest was accrued at 5% and paid.

2. Deep Creek Railroad Company:

Advances to Deep Creek Railroad Company during 1932 represent bills and interline accounts which had been rendered against the Deep Creek by Western Pacific over a considerable period. In 1932 these were offset by journal entries and an equal amount set up

(Testimony of Charles Elsey.)

as "Advances on Open Account" WITHOUT INTEREST.

Interest at 5% was accrued and paid monthly by the Deep Creek on principal of other advances shown.

3. Standard Realty & Development Company:
Advances shown are non-interest bearing.

Sacramento Northern Railway

DISPOSITION OF ADVANCES MADE BY THE WESTERN PACIFIC RAILROAD COMPANY

The Western Pacific Railroad Company

INCOME ACCOUNT, 1922 TO 1935, BOTH INCLUSIVE

NOTES

1. Northern California Extension. Refer to Note 2 on Statement No. 8.

2. Maintenance of Way & Structures and Maintenance of Equipment. Refer to Notes 3, 4, 5, 6 and 7 on Statement No. 8, Page 2.

3. Hire of Equipment-Net. Refer to Note 8 on Statement No. 8.

4. For details of accruals to Non-Operating Income and Deductions from Gross Income see Statement No. 23.

5. For information as to cash advances made subsidiaries each year, see Statements Nos. 11 to 15, both inclusive.

6. Western Pacific Improvement Program: An improvement program which contemplated the expenditure of $18,000,000 over a 5-year period was initiated in 1927 and partially carried out with the resultant expenditures shown below:

	Maintenance				
	Way and Structures	Equipment	Total	Investment Accounts	Total
1927	$ 324.218	$ 363,386	$ 687,604	$ 707,110	$1,394,714
1928	931,336	374,345	1,305,681	988,123	2,293,804
1929	488,024	587,306	1,075,330	836,575	1,911,905
1930	537,421	174,040	711,462	808,331	1,519,793
1931	110,339	12,396	122,735	534,339	657,074
1932	Cr. 56,246	144	Cr. 56,102	70,073	13,971
	$2,335,092	$1,511,617	$3,846,710	$3,944,551	$7,791,261

Note: Of the originally contemplated $18,000,000 program, $8,000,000 was estimated as Operating Expense.

Statement No. 21
Page No. 2

The more important items of work accomplished under this Improvement Program are indicated below by years:

PRINCIPAL IMPROVEMENTS IN ROADWAY AND STRUCTURES

YEAR 1927

New 85-pound rail was laid for 50 miles south from Oroville, California, and 25 miles was laid in the Feather River Canyon between Oroville and Portola, California.

Banks were widened to the total extent of 96 miles, and the track between Wendover and Clive, Utah, was fully gravel ballasted.

A bridge consisting of four 150-foot and two 100-foot steel truss spans was constructed across the Yuba

(Testimony of Charles Elsey.)

River at Marysville, California, and 1400 feet of timber trestles between Winnemucca and Wells, Nevada, were replaced with steel and concrete structures.

About 8½ miles of new passing tracks, side tracks and extensions to such existing tracks were constructed.

YEAR 1928

10 miles of new 85-pound rail was laid in the Feather River Canyon, 16 miles from Sacramento north, and 82 miles between Melrose, California (near Oakland) and Stockton—a total of 108 miles; and 412,000 rail anchors and 225,000 new tie plates were applied at various points.

Banks were widened in the Feather River Canyon for 39 miles and between Oakland and Sacramento for 131.5 miles.

The track between Stockton and Niles, California, for a distance of 63 miles was fully ballasted with crushed rock, and similar work was done on 10.5 miles of track in the Feather River Canyon.

1455 feet of timber trestles between Weso, Nevada, and Alazon, Nevada, were replaced with steel and concrete structures, including four 120-foot and one 160-foot steel bridges. At various other points 1005 feet of timber trestles were replaced with concrete structures.

New passing tracks, side tracks and extensions to such tracks aggregating 11½ miles were constructed, and new section quarters were built at 13 points between Shafter, Nevada, and Salt Lake City.

(Testimony of Charles Elsey.)

Statement No. 21
Page No. 3

YEAR 1929

New 85-pound rail was laid at various points in the Feather River Canyon to the extent of 11.9 miles, and 91,350 rail anchors and 80,056 new tie plates were applied at various points during the year.

Banks were widened at various points to the total extent of 137.81 miles.

Track was fully ballasted with crushed rock between Oakland and Niles, 24.97 miles, and in the Feather River Canyon, 14.87 miles. The track between Burmester and Salt Lake City, 31.50 miles, was fully gravel ballasted.

Timber bridges aggregating 415 feet were replaced by two 120-foot and one 62-foot steel span bridges, and six single-span timber trestles aggregating 90 feet in length were replaced with concrete structures.

New passing tracks, side tracks and extensions to such tracks totalling 2 miles were constructed.

An extension to the Portola Depot and Hotel building was completed, providing 25 additional sleeping rooms and additional office and depot space, and a new modern commissary building was constructed at Oakland.

YEAR 1930

Rail between Ellerbeck and Salt Lake City, 37 miles, was renewed with new 85-pound section.

Banks were widened at various points to the extent of 177.9 miles, and 45.72 miles of track between

(Testimony of Charles Elsey.)

Stockton and Sacramento was fully ballasted with crushed rock, and, similarly, 20.99 miles of track in the Feather River Canyon. Gravel ballast was used on 19 miles of track between Delle and Burmester, Utah.

285 feet of timber trestles were replaced with concrete structures, and the portals of 3 tunnels and 262 lineal feet of timber lining in tunnels were replaced with concrete.

There was constructed 1.24 miles of passing track extensions.

A new freight depot at Blairsden, California, was constructed, and the passenger station was enlarged and modernized, and a new agent's dwelling was constructed.

YEAR 1931

Track between Cluro and Tonka, Nevada, and between Elburz and Alazon, Nevada, aggregating 60 miles, was relayed with new 110-pound rail.

Bank widening of 70 miles of track was completed between Reno Junction and Floka, Nevada, and 27 miles of gravel ballast was applied between Knolls and Delle, Utah.

Two concrete portals and 96 feet of concrete lining was placed at Tunnel 36, and 18 feet of concrete lining was placed at Tunnel 31.

Filling of certain low lands owned in San Francisco was completed, providing 40 acres of desirable industrial property adjoining rail and deep water shipping facilities.

(Testimony of Charles Elsey.)

PRINCIPAL IMPROVEMENTS IN EQUIPMENT

As indicated in the following statement, various classes of freight cars were rehabilitated and improved:

	1927	1928	1929	1930	1931	Total
Box cars rebuilt	622	345	542	210	—	1719
Box cars converted to Stock cars	20	180	—	—	—	200
Flats, new steel center sills	7	93	75	68	—	243
Tank cars, heavy repairs	35	20	—	—	—	55
Gondolas, heavy repairs and doors	—	207	500	71	—	778
Stock cars, heavy repairs	—	36	182	—	—	218
TOTAL	684	881	1299	349	—	3213

In addition to work on freight cars outlined above, important improvements were made to locomotives by installation of thermic syphons, feedwater heaters, superheaters, and various other economy devices. The operating expense of such work is included in Maintenance of Equipment for the period 1927 to 1931, inclusive.

THE WESTERN PACIFIC RAILROAD COMPANY

INCOME ACCOUNT - YEARS 1932 TO 1936, BOTH INCLUSIVE

Statement No. 24
Page No. 1

Sacramento Northern Railway

INCOME ACCOUNT, 1922 TO 1935, BOTH INCLUSIVE

NOTES

1. Sacramento Northern Railway is an electrically operated, standard gauge, freight and passenger railroad serving and connecting San Francisco and Oakland with Pittsburg, Vacaville, Sacramento, Woodland, Marysville, Colusa, Oroville, Chico and other Sacramento Valley points. Street railway service is also operated in Sacramento, Marysville, Yuba City and Chico. Revenues from city lines are included in "Miscellaneous" on Statement No. 25.

2. Sacramento Northern Railway was acquired by The Western Pacific Railroad Company as of November 5, 1925. That portion of the present road between Oakland and Sacramento (88.21 miles) was acquired as of January 1, 1929, from the San Francisco-Sacramento Railroad. The Holland Branch, 15.77 miles, and the Vacaville connecting line, 9.56 miles, were constructed and placed in service in June, 1929, and August, 1930, respectively.

3. Improvement Program: During the years 1928 to 1932, inclusive, a program of rehabilitation and extension and improvement was under way on this road, which resulted in the following charges:

	Total	Operating	Capital
Road	$2,146,956	$189,545	$1,957,411
Equipment	62,938	13,174	49,764
TOTAL	$2,209,894	$202,719	$2,007,175

(Testimony of Charles Elsey.)

The Operating Expense shown in the foregoing tabulation is included in appropriate maintenance accounts, principally in 1930, and is largely due to improvements on the line between Oakland and Sacramento consisting of bank restoration, rail renewals and ballasting with gravel and crushed rock. Capital charges reflect, in part, the construction of the Holland Branch, Vacaville connecting line, Pittsburg Branch, and other added facilities.

4. Heavy tie renewals, with consequent increased material and labor accounts, were made during 1929, 1930 and 1931 to eliminate then accumulated deferred maintenance of this character.

5. Western Pacific revenues on traffic interchanged with Sacramento Northern Railway are shown on Statement No. 10.

Sacramento Northern Railway

STATEMENT SHOWING CHARACTER OF NOTES EXECUTED BY SACRAMENTO NORTHERN RAILWAY PAYABLE TO THE WESTERN PACIFIC RAILROAD COMPANY

Date of Note—December 29, 1928.

Due—March 1, 1943.

Interest rate—5¾% per annum.

Amount of note—$1,372,733.95.

Authority for issue—Interstate Commerce Commission order dated November 21, 1928, Finance Docket 7124.

Date of Note—September 2, 1930.

Due—March 1, 1945.

Interest rate—5¼% per annum.

Amount of note—$1,553,742.77.

Authority for issue—Interstate Commerce Commission order dated August 21, 1930, Finance Docket 8415.

Date of Note—June 26, 1933.

Due—March 1, 1945.

Interest rate—5% per annum.

Amount of note—$1,598,267.66.

Authority for issue—Interstate Commerce Commission order dated June 12, 1933, Finance Docket 9997.

The aggregate amount of these three notes, $4,524,744.38, cover that portion of $5,645,733.95 cash

(Testimony of Charles Elsey.)

advanced by The Western Pacific Railroad Company prior to June 1, 1932, and represents the net charges of the Sacramento Northern Railway to its investment in Road and Equipment for the period January 1, 1928, to May 31, 1932, aggregating $4,309,952.13 as stated in the following detail by primary accounts.

501	Engineering	$ 51,484.06
502	Right of way	613,518.55
503	Other land used in operation	61,470.00
504	Grading	336,639.24
505	Ballast	288,938.16
506	Ties	123,753.80
507	Rails, fastenings and joints	468,818.38
508	Special work	55,594.42
510	Track and roadway labor	205,884.71
511	Paving	11,718.13
512	Roadway machinery and tools	8,330.50
513	Tunnels and subways	117,716.66
515	Bridges, trestles and culverts	274,032.35
516	Crossings, fences and signs	75,203.48
517	Signals and interlocking apparatus	84,677.57
518	Telephone and telegraph lines	15,478.02
519	Poles and fixtures	124,831.99
521	Distribution system	173,006.59
522	General office buildings	885.52
523	Shops and car houses	6,552.39
524	Stations, miscellaneous buildings and structures	151,563.99
525	Wharves and docks	37,476.28
526	Park and resort property	1,606.95
529	Other expenditures—Way and structures	29.37
	Total Way and Structures	$3,289,211.11
530	Passenger and combination cars	185,376.76
531	Freight express and mail cars	25,147.06
532	Service equipment	15,864.40

(Testimony of Charles Elsey.)

533	Electric equipment of cars	173,565.63
534	Locomotives	213,658.98
535	Floating equipment	129,943.03
536	Shop equipment	8,047.88
537	Furniture	2,654.34
538	Miscellaneous equipment	7,818.43
	Total Equipment	$ 762,076.51
540	Substation buildings	16,270.54
543	Substation equipment	198,440.70
544	Transmission system	1,846.38
	Total Power	$ 216,557.62
545	Franchises	600.65
546	Law expenditures	4,982.48
547	Interest during construction	33,692.36
549	Taxes	2,349.75
550	Miscellaneous	481.65
	Total General and Miscellaneous	$ 42,106.89
	Grand Total	$4,309,952.13
	Miscellaneous Physical Property	$ 214,792.25

Also net charges for the same period to investment in Miscellaneous Physical Property aggregating $214,792.25.

The expenditures for road and equipment were principally applied to acquisition of the San Francisco, Sacramento Railroad Company, construction of the Holland, Pittsburg and Vacaville branches, and main line improvement at various points.

Expenditures for Miscellaneous Physical Property were principally for non-operative facilities at various points leased to outside parties.

Accounting Department,
San Francisco, California,
April 8th, 1936.

(Testimony of Charles Elsey.)

Statement No. 27

Tidewater Southern Railway Company
INCOME ACCOUNT, 1922 TO 1935, BOTH INCLUSIVE

NOTES

1. Tidewater Southern Railway Company owns and operates a standard gauge steam railroad (formerly operated in part electrically) connecting Stockton, California, with Manteca, Escalon, Modesto and Turlock in the San Joaquin Valley. Passenger service was abandoned in 1932.

2. Improvement Program: During the years 1927 to 1932, inclusive, improvements to roadway and structures were made, such as rail renewals, ballasting, bank widening, bridge and trestle work, and other improvements which resulted in the following charges:

	Total	Operating	Capital
Roadway	$203,983	$68,516	$135,467

All of the Operating Expenses involved are included in Maintenance of Way & Structures and principally in 1929, 1930 and 1931.

3. Bonded debt of the Tidewater Southern Railway Company was wholly extinguished through the Sinking Fund on March 31, 1935. Its only funded debt is a note in the amount of $508,278.61 due The Western Pacific Railroad Company.

4. Western Pacific's revenues on traffic interchanged with Tidewater Southern are shown by Statement No. 10.

Tidewater Southern Railway Company

STATEMENT SHOWING CHARACTER OF NOTE EXECUTED BY TIDEWATER SOUTHERN RAILWAY COMPANY PAYABLE TO THE WESTERN PACIFIC RAILROAD COMPANY.

Authority for Issue—Interstate Commerce Commission order dated June 12, 1933, Finance Docket 9998.

Date of Note—June 26, 1933.

Due—March 1, 1945.

Interest rate—5% per annum.

Amount of note—$508,278.61.

The principal of the note covers that portion of $619,000.00 cash advanced by The Western Pacific Railroad Company prior to June 1, 1932, and represents the net charges of the Tidewater Southern Railway Company to its investment in Road and Equipment, for the period January 1, 1927, to May 31, 1932, aggregating $405,223.71, as stated in the following detail by primary accounts.

501	Engineering	$ 5,695.01
502	Right of Way	16,150.24
503	Other land used in operation	13,943.94
504	Grading	12,204.33
505	Ballast	23,946.56
506	Ties	10,781.69
507	Rails, rail fastenings and joints	74,957.84
508	Special work	14,746.47
510	Track and roadway labor	28,608.34
511	Paving	10,687.97
512	Roadway machinery and tools	594.89

(Testimony of Charles Elsey.)

515	Bridges, trestles and culverts		27,391.13
516	Crossings, fences and signs		21,407.56

STANDARD REALTY AND DEVELOPMENT COMPANY
INCOME ACCOUNT—YEARS 1922 to 1935—BOTH INCLUSIVE

s red figures.

[End of Exhibit No. 29.]

ed]: F. D. 10913. Exhibit No. 29. (Consisting of 36 Statements.) Witness: Elsey. Filed April 21, 1936.

(Testimony of Charles Elsey.)

Q. (By Mr. Nicodemus) The next exhibit marked on my memorandum is an analysis of balance sheets of certain subsidiary companies. Have you that exhibit? A. Yes, sir.

Q. Will you describe them more in detail?

A. It is an analysis of the balance sheet of our subsidiary companies as of December 31, 1935, Sacramento Northern Railway Company, Tidewater Southern Railway Company, Deep Creek Railroad Company, and Standard Realty and Development Company.

Mr. Nicodemus: We offer that and ask that it be numbered exhibit 30, and received subject to further examination of Mr. DeGraff.

Examiner Wilkinson: The analysis of balance sheet of the [1914] Sacramento Northern Railway Company, Tidewater Southern Railway Company, Deep Creek Railroad Company, and the Standard Realty & Development Company, will be marked as exhibit No. 30.

(Exhibit No. 30, Witness Elsey, received in evidence.)

Q. (By Mr. Nicodemus) The third exhibit, I understand, is the statement of the Form A prescribed by the Interstate Commerce Commission of net capital expenditures, covering a certain period. I think it is the period from the organization of the present company up to January 1, 1936.

A. Correct.

(Testimony of Charles Elsey.)

Mr. Nicodemus. We offer this as exhibit No. 31, subject to further examination of Mr. DeGraff if desired.

Examiner Wilkinson. The document containing the details of uncapitalized net expenditures will be marked as Exhibit No. 31.

(Exhibit No. 31, Witness Elsey, received in evidence.)

Q. (By Mr. Nicodemus) Exhibit No. 29, Mr. Elsey, which has just been received in evidence, relates very largely to the system accounts as distinguished from the railroad company accounts, the latter being the exhibits being offered at the last hearing.

Have you made a comparison as to the differences between the results for the system and the results for [1915] the railroad company, to determine whether or not there is any substantial variation, or whether the variation is relatively negligible?

A. Yes, sir.

Q. What has been the result?

A. There is very little difference in the compilation of the original statement we filed at the last hearing, which was solely of the Western Pacific Railroad Company, in comparison with this statement taking in the Western Pacific and its various subsidiaries.

Q. Are you willing that this plan be tested by either set of studies? A. Yes, sir.

(Testimony of Charles Elsey.)

Q. Will those variations that you have mentioned and which you state are relatively negligible be explained by the other witnesses or certain of the witnesses you have already named?

A. Yes, sir.

Q. Statement No. 9, forming part of exhibit 29, shows that for the years 1931, 1932, and 1933, the system accounts kept in accordance with the Interstate Commerce Commission's regulations show that less than $1,027,000 was earned in each of these years. Have you any reason to submit as to why you believe that the accounts for these years do not truly reflect the earning power of the [1916] company or what the earning power would be in a future depression? A. Yes, sir.

Q. At least as severe as the one we have just passed through, assuming that we are through it? Will you give those reasons?

A. The operating revenues of the Western Pacific System which consists of the Western Pacific Railroad Company, Sacramento Northern Railway, Tidewater Southern Railway Company, and Deep Creek Railroad Company, reached a low point for the past thirteen years in the years 1932 to 1934, inclusive

The earnings derived from the Northern California Extension during the years 1932 to 1934, are not a fair criterion as to what this property could earn in the future during a similar period of depression as existed during 1932 to 1934.

(Testimony of Charles Elsey.)

The line was placed in operation in November, 1931, and, in addition to commencing operations in the midst of the depression, it had all of the handicaps of any new property, such as the route not being generally known to a large number of shippers throughout the country, and, also, the doubt in the shippers' minds as to whether satisfactory schedules could be maintained over this new mountain route. [1917]

The operating revenues of the Western Pacific System for the years 1932 to 1934, inclusive, were $38,232,797, or an average of $12,744,266 per annum. The operating revenues for the System, for the same period, less the earnings from the Northern California Extension were $33,523,889, or an average of $11,174,629 per annum. The freight revenues for the System for the same period, less the earnings from the Northern California Extension, were $29,242,553, or an average of $9,747,517 per annum.

For the reason that the Sacramento Northern did not become a part of the Western Pacific System until 1926, we have used the years 1926-1927, less earnings from the Chico-Weso bridge traffic, as a "normal" period of freight earnings for the System prior to the construction of the Northern California Extension.

The average freight revenues of the System, less earnings from Chico-Weso bridge traffic, for these two years were $13,714,620 per annum and the av-

(Testimony of Charles Elsey.)

erage freight revenues for the System for the years 1932 to 1934, less Northern California Extension earnings, were 71 per cent of the normal period.

The Traffic Department estimates that our freight revenues for the Northern California Extension for 1940 will be $4,171,625, and if at some time after that year [1918] general business conditions recede to the level existing in 1932 to 1934, and assuming that the revenues for the Northern California Extension decline in the same proportion as our System freight earnings decreased in the present depression, our earnings from this line would then amount to 71 per cent of the above estimate, or $2,961,853.

In arriving at the approximate gross revenues of the Western Pacific System during a depression period after the Northern California Extension is on a normal earning basis we have the following results:

Average annual system operating revenues for the years 1932 to 1934, inclusive, but not including Northern California Extension earnings, $11,174,629.

Estimated operating revenues for the Northern California Extension, $2,961,853.

Total estimated annual operating revenues for the System during a future depression period, $14,136,482.

The foregoing estimated depression operating revenues for the System of $14,136,482 compared

(Testimony of Charles Elsey.)

with System operating revenue of $13,779,237 for the year 1934, in which year, disregarding amortization of discount on first mortgage bonds, there was available for interest, $1,218,000 as compared with interest charges under the Plan of $1,027,000. [1919]

It is assumed that in a future depression year operating expenses will be no higher than in 1934, in which year there was charged to operating expenses, $107,286. account laying 43.5 miles of rail and approximately $54,000 account rebuilding of 134 box cars, as well as the restoration during the last seven months of $92,000, representing the first one-quarter of the 10 per cent general wage reduction which had been placed in effect during February, 1932.

It is my opinion that if, in a future depression, general business conditions recede to the level existing in the years 1932 to 1934, inclusive, our System earnings will not fall to the level of those years for the reason that just prior to the depression we constructed several branches, which, like the Northern California Extension, have proven their value during a depression period but have not as yet had the benefits of being in operation during normal times and, consequently, have not been able to demonstrate their real worth as feeders to our main line.

I refer to the Terminous Branch, which was placed in operation in January, 1928, and produced operating revenues to the System in 1934, of $321,380; the Connection with the Oregon Short Line at Wells, Nevada, was completed in June, 1929, and

(Testimony of Charles Elsey.)

produced revenues of [1920] $180,000 in 1933; the Holland Line of the Sacramento Northern Railway was placed in service in 1929, and produced revenues of $222,000 in 1935. In addition to the foregoing we purchased a one-third interest in the Central California Traction Company on January 1, 1928, and during the depression years the business from this connection has given us revenues in excess of $200,000 per annum.

On January 1, 1929, we purchased the San Francisco-Sacramento Railroad, which was merged with the Sacramento Northern Railway. The acquisition of this property has given us an opportunity to serve some very desirable agricultural territory and also some highly developed industrial districts, the principal industrial point being Pittsburg, California, at which point is located the Columbia Steel Company plant, a subsidiary of the United States Steel Corporation.

The completion, in May, 1934, of the Dotsero Cutoff by the Denver & Rio Grande Western Railroad strengthened the position of the Western Pacific by making available to it a route 175 miles shorter than the route via the old line on traffic moving via our friendly connections, i. e., the Burlington and Rock Island Railroads; thus affording to the Western Pacific a better opportunity of securing competitive traffic moving between points in [1921] California, on the one hand, and territory Denver and east thereof, on the other.

(Testimony of Charles Elsey.)

As business resumes normalcy, the vast gathering power of the Burlington and Rock Island will, without doubt, be reflected to a very marked degree in increased freight and passenger traffic and revenue to the Western Pacific.

Q. In view of those considerations, do you believe that the proposed fixed charge of $1,027,000 under the plan is a figure safely within the System's power to earn even under depression conditions as serious as those through which we have passed?

A. I do.

Mr. Nicodemus. You may cross examine, Mr. Swaine, if you wish.

Cross Examination

Q. (By Mr. Swaine) Mr. Elsey, would you regard it as of value to your company to have your fixed interest obligations eligible for investment by savings banks and insurance companies?

A. Yes.

Q. Under the laws of New York?

A. I am not familiar with the laws of New York.

Q. I am just saying, would you regard it as of value to the credit of the company to have your fixed interest- [1922] bearing obligations eligible for investment by New York savings banks or New York insurance companies. A. Yes, sir.

Q. Do you think that your record of earnings or your estimate of earnings is apt to show over the next few years the fixed interest 1½ times earned?

A. I am quite certain of that, but there will be

(Testimony of Charles Elsey.)

another witness that will give that in detail, Mr. Swaine, and will have the figures.

Q. You said that the differences between the figures which you produced at the last hearing and the figures you have produced at this hearing with reference to the amount available for interest show no substantial difference between the company figures produced last time and the consolidated figures produced this time, is that right? A. Yes, sir.

Q. The figure produced last time for the year 1929—I do not remember the number of the exhibit, but it was the exhibit which is headed, "Annual fixed charges under Plan, $1,027,036. Record of present company," and a series of years beginning with 1929, and "Available for Interest,"—the year 1929; it is a one-page exhibit that you have had before.

Mr. Nicodemus. You mean statement 22 in this exhibit? [1923]

Mr. Swaine. No. no. I want the little one-page exhibit that you introduced before. What was the number?

The Witness. Exhibit 3.

Q (By Mr. Swaine) Exhibit 3 showed for 1929, available for interest, $2,919,056. The exhibit which you have produced this morning shows $2,520,000. I will use round figures. That difference of $400,000 you do not regard as substantial, then?

A. Yes, but the proposition is, as I have just explained, our credit is going to be judged by our new set-up.

(Testimony of Charles Elsey.)

Q. That is not the question I asked you, Mr. Elsey. You made the statement that there was no substantial difference between the figures you produced last time and the figures you produced today.

Mr. Nicodemus. Except—

Mr. Swaine. Listen to me. I asked you just one question:

Q. Do you regard the difference between $2,500,000 and $2,900,000 as not substantial? I just want to get the witness' ideas as to the amount he regards as substantial. That can be a yes or no answer. Your figure before for the year was $2,919,000, and your figure now is $2,520,000.

Mr. Nicodemus. I think you ask the question a little too broadly. [1924]

Mr. Swaine. No, that is all I want to know: Does he regard that difference of $400,000 as a non-substantial difference?

Mr. Nicodemus. Those figures were explained at the last hearing. He meant that the new exhibits—

Mr. Swaine. Oh, I am not examining you Mr. Nicodemus. I am asking Mr. Elsey.

Q. The identical figure under this item "Available for Interest" on Exhibit 3 is $2,900,000, and it is $2,520,000 now. Do you regard that as substantial or not in railroad earnings?

A. That was not the proposition, Mr. Swaine.

Q. I did not ask you what the proposition was when I asked you that question.

(Testimony of Charles Elsey.)

A. I made the statement that the substantial difference was negligible. That was on the proposition of our forecast for 1936 to 1940.

Q. I am not talking about the future; that is speculative. I am trying to develop the past.

A. I am talking about the future.

Q. Would you say the difference between $2,90,000 and $2,500,000 was substantial in the past?

A. I was not referring to the past, Mr. Swaine.

Examiner Wilkinson. Mr. Elsey, suppose you just answer the question and then explain it as you see fit [1925]

Q. (By Mr. Swaine) The figure that you introduced before as "Available for Interest," was $2,300.000 in 1930. You have now produced a figure of $1,500,000, $1,552,000, to be exact.

A. It is in 1930?.

Q. That is 1930 A. Yes.

Q. Do you not think that anybody judging the plan in respect of the past record—I am not assuming that anybody would be so foolish as to judge this plan in the light of the past earnings, but if anybody were so foolish as to do that, would that not be a very substantial difference?

A That would, if they simply took that one situation into consideration.

Q. That makes a substantial difference, does it not? A. Yes, sir.

Q. The year 1931, the figure which you produced last time was $665,000 available for interest, and the

(Testimony of Charles Elsey.)

figure that you have now produced is a deficit of $186,000. If anyone tries to look at this in the light of the past, that makes a very serious difference, does it not?

A. If they simply confine themselves to that one year, yes.

Q. If that is a factor, so far as that factor enters into [1926] it, it is a serious adverse difference, is it not? A. That is correct.

Q. Take the year 1932. The figure which you produced before was $972,000. The figure which you produce today, is $252,000. Now, we will omit the factor of the speculative future, but the factor in the past involves a substantial change in appearance, does it not, from what we had before?

A. Yes, sir.

Q. In 1933, the figure which you produced before was $1,367,000. The figure which you produced this morning is $674,000. That again produces a substantial adverse comparison, does it not?

A. It does, yes. The proposition is that—

Q. I did not ask you what the proposition is, I am confining it to this one factor. I know there are other factors.

In 1934, the figure you produced before was $1,700,000. The figure which you produced this morning is $1,084,000. That again gives a substantial adverse appearance, does it not?

A. Yes, sir.

(Testimony of Charles Elsey.)

Q. The figure that you produced before for 1935 was $1,547,000. The figure which you produced this morning is $805,000. Looking at just that one factor now, that [1927] again is a substantial adverse comparison, is it not? A. Yes, sir.

Q. The figure that you produced for 1934 before was, as I said, $1,761,000, and for 1935, $1,547,000, a decline of $200,000. Again, the figures that you produced this morning show for 1934, $1,084,000, and for 1935, $805,000, a decline of nearly $300,000. The indication of a declining trend from 1934 to 1935, looking at just that one factor, is itself an adverse factor, is it not, that anybody has to take into account in considering what kind of a plan one ought to have?

A. No, not necessarily.

Q. Why not?

A. The proposition is, if you are going to make a comparison of two particular years, you have to analyze what are the results of the figures in those two years. I will be prepared upon that.

Q. Yes, but that evidences a declining trend in net, does it not?

A. It is on the face of it, but after you take into consideration, as I said, what has happened in those two years as to revenues and expenses, it will change the complexion of the figures.

Q. How did you treat the Railroad Retirement Act charges and credits as between 1934 and 1935, in these two figures [1928] that you have just given us?

(Testimony of Charles Elsey.)

A. 1935, I show as a deduction.

Q. You charge it out in 1935?

A. Yes, sir.

Q. How much?

A. I do not have the figures. Mr. Engelbright will be prepared to discuss those figures.

Mr. Swaine: So as to have the continuity of the record, I wonder if he will supply those.

Examiner Wilkinson: Will you supply those?

Mr. Nicodemus: I think part of it went in one year and part in another.

Mr. Engelbright: In 1934, there were charged for five months pension charges of $97,683, and, to complete the thing, in 1935, there were charged for four months, $51,593. In that same year, there was a credit taken for the refund of the entire pension collections of $149,267, which is the sum of those other two figures.

Q. (By Mr. Swaine) With that set of figures given, Mr. Elsey, I ask you whether the 1934 earnings as compared with the 1935 earnings are not distorted by $97,000; that is, if you disregard the pension in both periods, your 1934 earnings would be $97,000 higher than are revealed here, and if you disregard the pension figures in 1935, the 1935 figure will be $97,000 lower. In other [1929] words, eliminating the Railroad Retirement Act entirely from both accounts, you would have $1,181,000 for 1934, and you would have $708,000 for 1935. Is that not correct?

(Testimony of Charles Elsey.)

A. That is about right, but in making a comparison you cannot pick out one particular item that is going to suit your case without going into the whole comparison as to the two-year period.

Q. I understand all that, Mr. Elsey. All I am trying to do is get the facts. A. I know.

Q. And see whether these are not facts, that anybody interested in the credit of the property in the future has to take into account.

A. That is correct, but they want to take into account the whole picture.

Q. Oh, I understand that, there are other things to be taken into account, but I want to be sure we have all the things.

I would like to ask you also how you treated, in arriving at these figures, the amounts which you advanced in the years 1928 to 1935, inclusive, to the Central California Traction Company, and in the years 1932 to 1935, inclusive, the amounts which you advanced to the Alameda Belt Line.

A. That is deducted from our income before taking into [1930] consideration the amount available for interest.

Q. All advances? A. Yes, sir.

Q. Whether for sinking fund or not?

A. Yes, sir.

Mr. Swaine: Is that correct, Mr. Englebright, all advances, whether for sinking fund or not?

Mr. Englebright: I would rather have you ask Mr. DeGraff, Mr. Swaine.

(Testimony of Charles Elsey.)

Mr. DeGraff, all advances for the Central California Traction and the Alameda Belt Line come out of our income before available for interest, do they not?

Mr. DeGraff: The advances for sinking fund do not affect the income. They are charged up to the Central California Traction Company as advances.

Mr. Swaine: That is what I thought. In other words, how much of this income here that you have reported has to go, as a practical matter, to these two companies, to keep them going before any amount is really available cash-wise to pay interest on your own bonds?

Mr. DeGraff: The amount shown in those statements there is in the Western Pacific's income deductions as "Loss from separate operating properties." That will indicate the amount that the Western Pacific has assumed on account of the Central California Traction Company [1931] and the Alameda Belt Lines' income.

Mr. Swaine: Does that include the sinking fund?

Mr. DeGraff: No. The sinking fund is a separate item.

Mr. Swaine: Does it include advances for additions and betterments to those properties?

Mr. DeGraff: No.

Mr. Swaine: Have you a statement here of the amount of the advances that you had to make to those two properties for sinking fund and additions

(Testimony of Charles Elsey.)

and betterments? You tell me that the advances for bond interest are already out.

Mr. DeGraff: Yes.

Mr. Swaine: And any advances for operating loss are already out.

Mr. DeGraff: Yes.

Mr. Swaine: But not the advances for sinking fund or additions or betterments.

Mr. DeGraff: No.

Mr. Swaine: Do you know how much that is?

Mr. DeGraff: There are statements in that exhibit that show it.

Q. (By Mr. Swaine) You would agree, Mr. Elsey, would you not, that if your commitments to these two properties require you to put up cash for such purposes and additions and betterments and for sinking fund, that amount of cash [1932] really is not available in any practical sense for the payment of interest on Western Pacific obligations?

A. Not at the present time.

Q. Would you say that in any one of these years, 1931 to 1935, inclusive, to which I have been referring, there was either any extraordinary undermaintenance or any extraordinary over-maintenance? That is, are the accounts distorted either way? I just want the facts.

A. I would want to make an analysis of the accounts, Mr. Swaine, before I answer that question.

Q. I thought that was one of the reasons why we took the four weeks' adjournment, so that we

(Testimony of Charles Elsey.)

would know about that. I asked you before, and Mr. Nicodemus thinks that I owe you an apology for misleading you. I certainly did not intend to mislead you, and I want now to know what the fact is.

Is there any under-maintenance or is there any over-maintenance in producing the figures that you have now produced from 1931 to 1935, inclusive?

A. I am not prepared to state, Mr. Swaine.

Q Do you not think that is a relevant fact which any one questioning the soundness of the plan or considering the soundness of a plan ought to have before him?

A. If you wish those figures, we will prepare them for you. [1933]

Q. I am just asking you whether you do not think that is a relevant thing. A. Yes, I do.

Mr. Nicodemus: Is that not covered by Mr. Englebright's proposed testimony?

Mr. Swaine: Oh, it is here?

Mr. Nicodemus: Yes, sir. We explained that the detail of these statements would be supported by certain individual witnesses.

Q (By Mr. Swaine) Looking to the future, what have you done with reference to fuel costs; first, you operate your locomotives with coal?

A. Partly coal and partly oil.

Q. What have you done about coal costs?

A. That matter will be gone into in detail on those operating expenses by Mr. Englebright.

Q. You do not know?

(Testimony of Charles Elsey.)

A. No, sir, I have not gone into the detail of it.

Q. Have you a statement of your earnings for the first three months of 1936, on a consolidated basis?

A. I could not say. I hardly think so.

Q. A statement of your consolidated income account for the three months of 1936?

Mr. Englebright: No, we have not computed the third month yet. [1934]

Mr. Swaine: Can you tell me how it compares with the first three months of 1935?

Mr. Englebright: Consolidated?

Mr. Swaine: Yes.

Mr. Englebright: No, I could not offhand. I could ascertain it for you

Mr. Swaine: Could you tell me approximately?

Mr. Englebright: I do not like to give an approximate figure.

Mr. Nicodemus: Mr. Bon testified at the last hearing that we got off to a bad start in 1936.

Q. (By Mr. Swaine) The reason I ask is that your estimate for 1936, is $1,600,000, whereas your actual last year was $805,000. In other words, you are estimating that you will make twice as much in 1936 as you made in 1935. I would like to know just how well you are approximating that.

A. As I say, I could not answer that question without having a statement prepared.

Q. You mean you do not know how your property is doing?

(Testimony of Charles Elsey.)

A. I am not going to quote any figures that I am not prepared to give an accurate answer to.

Q. You are the operating manager of the property, are you not? A. Yes, sir. [1935]

Q. Is it doing better this year or worse this year than it did last year?

A. So far as gross is concerned, this year it is doing better.

Q. I mean net.

A. I have not checked it up.

Q. How did it do in January?

A. I could not say.

Q. Or February?

A. I could not say as far as the net is concerned. I do not have the figure here, and I am not going to quote—

Q. You mean you have no impression whether it is better or worse?

A. I am not to quote any figures. If you want any statement prepared, we will prepare a statement.

Q. I am not anxious to have a detailed, penny statement.

A. We will give you an approximate figure, if that is what you wish.

Q. I would like to know how your property is doing, as to whether it is doing better this year or not. You have estimated it is going to do twice as well That would be a very happy result to the bondholders.

(Testimony of Charles Elsey.)

Mr. Nicodemus: I do not know of any such estimate.

The Witness: The proposition of a three-months statement at the beginning of the year to me would not be a [1936] conclusive answer to the proposition of what we propose to do for the twelve months' period.

Q. (By Examiner Wilkinson) Mr. Elsey, did the results of operation this year influence your estimates for 1936 to 1940, in any way?

A. I did not quite get your question.

Q. Did your actual results of operation this year influence your estimate for 1936 to 1940, in any way?

A. Why, yes. Our traffic witness stated that the first two months of the year we did not do so well, and of course he has used that as his basis for his 1936 statement, but only 1936. It would have no effect in the years 1937 to 1940, inclusive.

Q. Then do I infer from that that your operations so far this year show a worse result than for 1935?

A. The first two months do. Our preliminary figures for March, show a very material pick-up so far as gross is concerned.

Q. (By Mr. Swaine) But you do not know as to the net? A. No, sir.

Q. So you are relying on the last nine months of the year to make the difference between $805,000 and $1,524,000? I was wrong in saying $1,600,000; $1,524,000 for this year.

(Testimony of Charles Elsey.)

A. That is correct. [1937]

Q. The present plan, Mr. Elsey, provides for a capital fund immediately following fixed interest, does it not? A. Correct.

Q. If I remember the negotiations, you were the one that was very insistent upon that capital fund. Why do you think you have to have that capital fund?

A. A certain class of expenditures I do not believe should be capitalized.

Q. Although charged to capital under the Interstate Commerce Commission rules? A. Yes.

Q. Your estimate is you should have at least a half a million dollars during the years 1936 to 1940?

A. Yes, sir.

Q. As a matter of fact, you thought it ought to be more than that, did you not?

A. Yes, sir.

Q. And this was a compromise?

A. Yes, sir.

Q. The plan provides for a million dollars for the five years following that, does it not?

A. Correct.

Q. Which was your idea of what it really ought to be? A. Yes, sir.

Q. Would you be willing as the officer responsible for the [1938] operation of this property and its duty to the public to have any part of that capital fund either come out proportionately with some return upon income bonds, or after some return

(Testimony of Charles Elsey.)

on income bonds? The way your plan now is drawn, the whole capital fund comes out after interest charges and before contingent interest charges. Would you be willing as the responsible officer to have it provided that half of the available net income or one-fourth of the available net income after fixed charges up to the amount of $500,000, or a million dollars, whatever your figure is, should be applied to the capital fund? A. No, sir.

Q. Why not?

A. As I have said before, I think there is a certain class of expenditures that should not be capitalized.

Q. But if you are going to have all this income that you estimated, then if you took out half of the income after fixed charges until you got up to $500,000, that being your estimate, you would amply provide for it, and in the meantime you would be providing some return to the existing mortgage bondholders.

A. I have taken the position right along, Mr. Swaine, that this matter of our capital fund should come out before any contingent interest is paid.

[1939]

Q. That is really because you are not at all sure the earnings are going to be there, is it not?

A. No.

Q. If you were sure the earnings would be there, you would be willing to divide the earnings as between a capital fund and interest, would you not?

(Testimony of Charles Elsey.)

A. No, sir, not on a contingent interest.

Q. It has been so provided in various other systems; why not here?

A. I do not know about your other systems.

Q. You want the capital fund sure, do you not?

A. Absolutely.

Q. You want it sure, and you do not believe that if you divided the income after fixed charges you would be sure of this capital fund?

A. No, I am not taking that position, Mr. Swaine. I am taking the position that——

Q. Would you be sure of it?

A. I could not say.

Q. You are very uncertain as to whether——

A. You never can tell the future. The proposition is, there are certain capital charges that come on a railroad every year that are not revenue-producing expenditures, and that money should certainly come ahead of your interest on your income bonds. [1940]

Q. You would not be willing to rely upon your estimates of earnings in determining whether or not you would be sure of your capital fund?

A. It is not a matter of relying on the estimates. This is the policy that I think is the correct policy to pursue in the matter of financing.

Q. That is because you want to be sure of it, is it not?

A. Not only sure, but I say it is a policy.

Mr. Swaine: That is all.

(Testimony of Charles Elsey.)

Q. (By Mr. Wilkinson) Mr. Elsey, in connection with your exhibit 22, which shows your forecast for 1936 to 1940, of the Western Pacific, as to the amount which you show in line 30, interest on equipment trust and lease conditional sale agreement for 1936, $121,680, is there any provision made in this forecast here for payment of principal on these equipment trusts?

A. That comes out of your capital fund, Mr. Examiner.

Q. You mean that is going to come out of the ten million dollars new money?

A. No, that is out of the capital fund of the $500,000 a year for the first five years and a million dollars for the second three years thereafter.

Q. What is the total amount of payments on the equipment trusts for 1936?

Mr. Englebright: You mean the principal, Mr. Wilkinson? [1941]

Examiner Wilkinson: Yes, payment on the principal.

The Witness: $717,933. Of course, we have our depreciation also that is charged out of our income account.

Examiner Wilkinson: Certainly, and do you have it readily available for the future years?

The Witness: Yes, sir.

Examiner Wilkinson: Will you read it into the record, please?

(Testimony of Charles Elsey.)

Mr. Englebright: I can give you that, Mr. Elsey, direct. You have to figure it from that statement, do you not?

The Witness: I was just going to figure it out. The equipment trust of March 1, 1923, is a payment of $375,000 a year, and the last payment is in 1938. The equipment trust of March 15, 1934, an annual of $207,000 a year, and the last payment is in 1938. Equipment trust of May 1, 1929, $73,000 per year, and the last payment is in 1943.

The contract with the Baldwin Locomotive Works dated June 5, 1931, is a payment of $62,933, and the last payment is in 1941.

(Witness excused.) [1942]

H. E. POULTERER

was sworn and testified as follows:

Direct Examination

Q. (By Mr. Nicodemus) Your occupation, Mr. Poulterer, is what?

A. Assistant freight traffic manager of the Western Pacific Railroad, Sacramento Northern Railway, and Tidewater Southern Railroad.

Q. How long have you been connected with the Western Pacific System?

A. Since April 20, 1931.

Q. Prior to that time, what experience have you had in traffic?

(Testimony of H. E. Poulterer.)

A. I have had approximately 30 years railroad experience, all in the traffic department. I was assistant general freight agent of the Union Pacific System at Omaha prior to going with the Western Pacific.

Q. Did you collaborate with Mr. J. F. Bon in the preparation of Exhibit 22?

A. Yes, I did.

Q. Insofar as the same relates to operating revenues, that is?

A. Yes, operating revenues.

Q. Have you read Mr. Bon's testimony at the hearing on March 23rd? [1943] A. Yes.

Q. Do you adopt that? A. Yes.

Q. You are prepared to stand cross examination on his testimony? A. Yes.

Q. Did you collaborate with Mr. Bon in the preparation of Exhibit 28, the exhibit received this morning, which has the 36 individual statements?

A. Insofar as the operating revenues are shown on that statement, yes.

Q. Have you prepared a separate exhibit, a new exhibit dealing with certain phases of the operating forecasts of revenues? A. Yes, I have.

Q. Will you describe that?

A. It is an exhibit consisting of five pages, entitled "Statements indicating revenues of Sacramento Northern Railway, Tidewater Southern Railway Company, and Deep Creek Railroad Company,

(Testimony of H. E. Poulterer.)

for the years 1929 to 1935, inclusive, and a forecast of revenues for the years 1936 to 1940, inclusive."

Q. Have you any comments to make on the exhibits I have already mentioned, Exhibit 22, Exhibit 29, and this new exhibit which you have prepared, which I now offer as [1944] Exhibit 32?

A. Yes. I would like to make some remarks about this new exhibit.

Mr. Nicodemus: I offer this subject to the further testimony of the witness.

Examiner Wilkinson: The statement indicating revenues of the Sacramento Northern Railway, the Tidewater Southern Railway Company, and the Deep Creek Railroad Company for the years 1929 to 1935, inclusive, and a forecast of revenues for the years 1936 to 1940, will be marked Exhibit 32.

(Exhibit No. 32 Witness Poulterer, received in evidence.)

(Testimony of H. E. Poulterer.)

The Western Pacific RR. Co.,
San Francisco, California,
April 3, 1936.

[Endorsed]: F. D. 10913. Exhibit No. 32. Witness Poulterer. Filed April 21, 1936.

The Witness: Shall I proceed?

Examiner Wilkinson: Yes.

The Witness: The Sacramento Northern Railway main line extends from Oakland to Chico 176.51 miles, and both freight and passenger service is

(Testimony of H. E. Poulterer.)

operated over the main line and the following branches:

Pittsburgh Branch—West Pittsburgh to Pittsburgh, 2.17 miles;

Woodland Branch—Sacramento to Woodland 16.96 miles;

Colusa Branch—Colusa Junction to Colusa, 21.74 miles; [1945]

Oroville Branch—Oroville Junction to Oroville, 5.49 miles;

Freight service only is operated over the following branches:

Willotta Branch—Creek to Willotta, 17.16 miles;

Vacaville Branch—Vacaville Junction to Vacaville, 4.58 miles;

Rolland Branch—Riverview to Oxford, 15.77 miles;

Swanston Branch—Globe to Swanston, 1.4 miles.

These distances are short operating mileages for passenger trains; freight distances in some cases are slightly longer due to necessity of routing freight trains around the congested urban areas.

It operates passenger street car service in Sacramento 2.57 miles; Marysville and Yuba City 2.19 miles and in Chico 2.68 miles.

The Sacramento Northern Railway does not operate directly into San Francisco on its own rails. Its passenger trains do, however, operate over Key System tracks 4.89 miles to the Key Route Pier in

(Testimony of H. E. Poulterer.)

Oakland, where direct ferry connection is made to San Francisco.

Statement No. 1, Exhibit No. 32 shows the freight traffic and freight revenues of the Sacramento Northern Railway for the years 1929 to 1935, inclusive As is shown by this statement, its freight traffic while [1946] diversified, consists largely of the products of agriculture, manufactures and miscellaneous.

Its agricultural traffic is largely deciduous fruits, vegetables, dried fruit, grain, chiefly barley, grain products, rice and sugar beets.

In addition to losses on unregulated trucks, the decline in the traffic classed as products of agriculture was due primarily to two reasons:

First was the unsatisfactory market conditions prevailing throughout the East for fruits and vegetables during the past few years, the effect of which was that all of these commodities produced in the territory served by this railroad were not marketed; and second, the abandonment of some production because of competition of other growing districts.

As an example, there formerly was a large area contiguous to Sacramento that produced a substantial quantity of lettuce. It was found that there were other sections in California, chiefly in the Salinas district, that were better adapted to the growing of this particular vegetable, resulting in the abandonment and production around Sacramento,

(Testimony of H. E. Poulterer.)

and while the acreage abandoned consists chiefly of productive soil adapted to the growing of other vegetables, other crops have not been substituted, because of the unsatisfactory market demand.

[1947]

Livestock traffic, as evidenced by the cars, tonnage and earnings, on animals and products, has largely held its own.

The severe decline shown in the products of mines is due to the decrease in coal, sand and gravel, etc. Coal handled by the Sacramento Northern Railway, while not heavy, consists mainly of Utah coal. Its consumption has steadily declined due to its displacement by oil and natural gas. The decline in sand, gravel, etc., is wholly attributable to its loss to unregulated truck competition, but shows some recovery for the year 1935 over 1933 and 1934.

The general decline in the traffic of products of forests has been because of lack of new building and the loss of box shooks tonnage to the unregulated trucks.

Traffic handled by the Sacramento Northern Railway classed as manufactures and miscellaneous consists largely of petroleum products, iron and steel articles, cement and canned goods. This traffic reached its lowest level in 1932 and 1933, due both to the depression and to losses to trucks, but there was some recovery in 1935 over the four previous years.

(Testimony of H. E. Poulterer.)

The less-carload traffic handled by the Sacramento Northern Railway is mainly short-haul. This is particularly attractive truck traffic and the losses sustained [1948] by the Sacramento Northern Railway are largely due to unregulated truck competition.

Statement No. 3—we will skip No. 2 for the time being—of Exhibit No. 32 is a forecast of revenue of transportation and other railway operations for the years 1936 to 1940, inclusive.

In our opinion the increases in passenger and baggage revenue starting in 1934, and continuing through 1935, justify the increases forecast for the next five years. We have reduced passenger rates to a level that is attractive to the traveling public, and with the growing objection of motorists to the hazardous condition on the highways, due to the increase in the accident ratio, we find more and more of them are using the trains for inter-city trips. We also expect to be operating over the San Francisco Oakland Bay Bridge in about October 1937, and it appears at present that we will be the only line at that time in position to render through service without change of equipment, between Sacramento Valley points and San Francisco.

It will also reduce our present running time, both of which should have a decided advantage in attracting additional passenger traffic. The World's Fair to be held in San Francisco in 1939 will, no

(Testimony of H. E. Poulterer.)

doubt, substantially stimulate passenger traffic during that period. [1949]

There is a large population that works in San Francisco that, because of climatic conditions, commutes from and to the surrounding area. While many people commute from and to Berkeley and Oakland, this development never, to any extent, reached the area back of or east of Berkeley and Oakland. The chief reasons for this have been the long transit time in commuting and the inconvenience in reaching that territory by automobile.

The latter is being removed by the construction of street level tunnels under the hills, and with the inauguration of through car service by the Sacramento Northern Railway over the new trans-bay bridge the commuting time will be materially reduced and we look for a substantial commuter traffic. This should develop to a large degree by 1940.

The earnings shown for mail, express and milk, are substantially the same as 1934 earnings on these classes of traffic. We have not shown any increase for the subsequent years to 1940, and while we reasonably expect that this traffic will return some increased earnings, the amount will not have any substantial effect on the total earnings of the property.

Sacramento Northern Railway earnings for 1934 showed an increase of 6.4 per cent over 1933. The 1935 earnings increased but 1.2 per cent over 1934, a greater in- [1950] crease being restricted by freez-

(Testimony of H. E. Poulterer.)

ing weather in the early part of that year, materially cutting down the asparagus crop. These increases, however, indicate that with the upturn in traffic, which has already taken place, plus a reasonably anticipated continued improvement, our freight earnings in the future should increase quite materially.

Various reasons for this are:

It is certainly reasonable to expect an improvement in the market demand in California fruits and vegetables.

The Sacramento Northern serves a territory particularly adapted to this class of agriculture. The Holland Branch, especially, serves a very fertile acreage, particularly adapted to the growing of vegetables, already producing substantially but capable of further increase.

Three new warehouses have recently been constructed at points on this line, one each at Chico, Yuba City and Millar, for the handling of grain and rice, all representing new tonnage.

New bulk loading facilities have been built at Colusa and Millar which will handle bulk grain and rice, tonnage formerly moving by highway truck or by truck and barge.

We are encouraged in the hope for additional sand and gravel tonnage by the fact we now find that due to [1951] increasing truck costs, we are better able to compete with that form of transportation in the handling of this class of traffic.

(Testimony of H. E. Poulterer.)

One of the principal industries served by the Sacramento Northern Railway is the Columbia Steel Company, a subsidiary of the United States Steel Corporation, at Pittsburgh, California. This company is constantly expanding its facilities for the production of various iron and steel articles, all of which should reflect in additional revenue, both in inbound pig iron and coke as well as in the outbound manufactured articles.

The varied traffic consisting of manufactured articles, moving chiefly from the East San Francisco Bay area, is increasing and should continue to increase, all of the industries being reached by the Sacramento Northern Railway through switching arrangements at Oakland:

I have already referred to loss of petroleum products, consisting largely of gasoline. In past years trucks have made serious inroads on this traffic, which formerly moved by rail. We have endeavored to keep our rates on a competitive basis, but as these trucks were unregulated, they had various ways open to them to take this traffic which, under our regulations, we could not meet. [1952]

Increased trucking costs have resulted in some of this traffic coming back to the rails.

As a further indication of this, bulk facilities for the handling of gasoline have recently been installed on our lines to accommodate traffic which heretofore has moved exclusively by truck. The California Railroad Commission is now investigat-

(Testimony of H. E. Poulterer.)

ing rates on gasoline and other petroleum products by both rail and truck. We confidently expect that out of this investigation will come increased revenue for our lines, either through a general increase in the rate level or by placing us in position to better compete at the present level.

In July 1935 a new sugar factory was constructed at Tasco, California, an exclusive station on the Sacramento Northern Holland Branch. The plans of this company call for a material increase in sugar production during the next few years, as compared with the 1935 output. There was a large proportion of the 1935 pack which did not move prior to January 1, 1936, so that the increased earnings from this operation are not wholly reflected in the 1935 earnings.

The revenue shown for switching and miscellaneous transportation is approximately what we earned in 1934. We have not forecast an increase for the subsequent years, but naturally with an increased freight traffic, there no [1953] doubt will be an increase in these two items; the amounts, however, will not have any great effect on the total earnings of the property.

The revenue shown from other railway operations, Accounts 110 to 119, inclusive, for the year 1936, is approximately an average of the earnings for the years 1934 and 1935. Some of these items will no doubt increase, but the total of the earnings is not of any great importance.

(Testimony of H. E. Poulterer.)

The effect of the use of the private automobile has largely been discounted in city line revenues, resulting from street car operations. This class of revenue should more nearly reflect fluctuations in local business conditions and the forecast is based on a nominal increase each year to 1940. If increases we have obtained in these street car operations for the early part of 1936, up to and including April 7th, can be used as any indicator, the foremost we have shown for the years 1936 to 1940 may be considered ultra conservative. For the early part of 1936 these revenues have shown an increase of 9.62 per cent in Sacramento, 11.87 per cent in Marysville-Yuba City, and 7.08 per cent in Chico.

Based on what I have already stated, our forecast reflects the following percentage increases:

Account 101 (Passenger), Account 102 (Baggage), [1954] Account 103 (Parlor, Dining and Special Car revenues), an increase over 1935 to 1940 of 45 per cent spread over the years, 5 per cent in each year 1936 and 1937, 10 per cent in 1938, 15 per cent in 1939, and 10 per cent in 1940. The ultimate forecast earnings for 1940 of $446,300 is approximately $19,000 less than the actual 1931 earnings.

Account 107 (Freight Revenue); the forecast earnings for 1940 reaches a 40 per cent increase over those of 1935, spread over 10 per cent each for the years 1936, 1937 and 1938, and 5 per cent each for the years 1939 and 1940. The forecast 1940 earn-

(Testimony of H. E. Poulterer.)

ings are approximately $106,500 more than the actual 1931 earnings, and $137,200 less than those in 1930.

Total city line revenues for 1940 is 10 per cent greater than the actual earnings for 1935 at an average of 2 per cent for each of the five years. The amount for 1940 of $41,585 is approximately $2800 more than was actually earned in 1932, but $4,250 less than the 1931 earnings.

The gross revenue of $1,689,038 is 38.3 per cent increase over 1935, this total increase being spread over the years, 8.3 per cent in 1936, 6.9 per cent in 1937, 9.9 per cent in 1938, 7.3 per cent in 1939 and 5.9 per cent in 1940. [1955]

The forecast gross revenue of $1,689,038 in 1940 is approximately $40,775 greater than the actual gross revenue for the year 1931, but is approximately $394,000 less than the actual revenue in the year 1930.

The Tidewater Southern Railway operates its main line from Stockton to Hillmar, a distance of 51.7 miles, with branches from Manteca Junction to South Manteca, 6.6 miles, and from Hatch to Turlock 6.1 miles. The territory served is essentially agricultural.

Statement No. 2, Exhibit No. 32, shows freight traffic and freight revenues of the Tidewater Southern Railway for the years 1929 to 1935, inclusive. The revenues of this company are largely from the products of agriculture. In addition to the fruit and

(Testimony of H. E. Poulterer.)

vegetable loading sheds served by the line, the principal industries are a sugar factory at Manteca and a cannery at McHenry.

Traffic other than agricultural, consists largely of sugar, canned goods, petroleum products and box shooks.

Statement No. 4 is a forecast of railway operating and other revenue for the Tidewater Southern Railway, for the years 1936 to 1940, inclusive.

The forecast for 1936 is slightly higher earnings than those of 1935. We anticipate that there will be some fluctuations in this revenue for the subsequent years to 1940, but as the small area served by this line [1956] does not afford much opportunity for increased acreage production, we have forecast earnings for each of the remaining five years the same as for the year 1936.

The Deep Creek Railroad Company operates 44.6 miles south from Wendover, Utah, serving substantially a mining territory. Its freight revenues are largely dependent on mining activities in the Gold Hill District at the southerly terminus of the line, although some revenue is derived from sheep moving to winter ranges in the fall and out in the spring.

The revenues of this line have in the past few years been nominal, but with a revival in mining, especially a demand for ore that would warrant the smelting of arsenical ores, which predominate in the district served by this line, it is possible for

(Testimony of H. E. Poulterer.)

a traffic to develop that would substantially increase the revenue; for instance, in the year 1923 the revenues were $42,385; in 1924 they were $71,670, and in 1925 they were $40,268.

In our forecast of earnings for this line, shown on Statement No. 5, we have shown substantially the same revenue for the years 1936 to 1940 as was earned for the year 1935. This was not because we thought there may be no increase—on the contrary, we think there will be—but as this district will probably be the last of any part of the System to benefit from advancing metal [1957] prices or demand by reason of the nature of the ores, and prompted by our desire to keep our forecasts on a conservative basis, we would rather forecast no increase than to over estimate.

We do, however, hold the opinion that it is reasonable to expect that the earnings of this line during the next five years will show some stimulation as mining and metal conditions improve.

In conclusion let me say that all these estimates for the Western Pacific Railroad Company and its subsidiaries have been primarily prepared for the purpose of testing the soundness of the proposed Plan of Reorganization and for that reason we have estimated on a thoroughly conservative basis in order to avoid, if possible, the reaching of misleading conclusions.

Mr. Bon referred to prospects for a general rate level higher than at present. The California Rail-

(Testimony of H. E. Poulterer.)

road Commission has already launched an investigation into the rail and truck rates in California on:

Petroleum and its products,

Household Goods and Furniture,

Rock, Sand and Gravel,

Less-than-Carload and Less-than-Truckload Freight,

Beer and Beverages,

Oil Well Supplies, [1958]

Fruits and Vegetables from and to certain points,

Pickup and Delivery Rates between San Francisco Bay, on the one hand, and Stockton and Sacramento, on the other,

Grain and Grain Products,

and have stated that they will shortly institute one on livestock.

The object of all these investigations is to determine trucking costs and whether, in consideration of those costs, the rail rates should be raised. It is very reasonable to anticipate that some increases in our rates will be ordered. Surely we have nothing to lose. If our rates remain stationary we are certain that because of rising truck costs we will gain in tonnage, resulting in greater revenue; and if our rail rates are increased, our revenue should increase. The question is not so much whether there will be an increase in revenue but, rather, to what extent.

There are vast deposits of minerals, both metallic and non-metallic, in our territory. Development of these has in many cases been retarded by their re-

(Testimony of H. E. Poulterer.)

moteness from markets that could not be reached in competition with imports or sources of supply more advantageously located. A revival in general business conditions will stimulate the development of these resources. [1959]

As an indication of these possibilities: We will in a few days commence to move iron pyrites from Palisade, Nevada, to Garfield Smelter, Utah.

We are now publishing a rate under which we are assured there will be a new movement of crude graphite from Carson City, Nevada, to Oakland.

We also have a very encouraging prospect of moving a large tonnage of volcanic ash from Bed Rock, California, to San Francisco for use in making household cleanser.

There are other developments that, so far, have not passed the promotion stage and cannot yet be classed as prospects. Doubtless many will fail to materialize but some of them may, and no doubt will develop into actual tonnage.

The State of California, the principal state served by the Western Pacific, has not by any means reached its maximum in development and production. Statement No. 3 of Exhibit No. 27 shows the population increase since 1920. It no doubt will steadily increase for many years to come and, naturally, tonnage on the railroad is bound to reflect it. The San Francisco Bay area is very favorably situated as a location for manufacturing and distribution, and as expansion along these lines takes place our tonnage will increase.

(Testimony of H. E. Poulterer.)

In our forecasts we have not been materially [1960] influenced by these probable developments and have tried to keep them within reasonable and conservative limits.

Q. Do you conclude the estimates of operating revenues for the railroad company as presented in Exhibit 22 and for the syster as set forth in Exhibit 29 are conservative and may with reasonable certainty be used as a safe basis for a sound plan of reorganization?

A. Yes, I do.

Mr. Nicodemus: You may cross examine him, Mr. Swaine, if you wish.

Mr. Swaine: There is no cross examination. I do not think it will be profitable to cross examine on speculations. We all realize what the future prognostications are.

Examiner Wilkinson: Is Mr. Poulterer the only man that you are going to put on now for the traffic studies?

Mr. Nicodemus: Yes, sir.

Examiner Wilkinson: Does any one of the other parties desire to cross examine?

Mr. Poulterer, you will be here this afternoon, will you not?

The Witness: Yes.

Examiner Wilkinson: All right. You will be excused temporarily. We might want to ask a few questions, our- [1961] selves.

(Witness excused.)

(Whereupon, a short recess was taken.)

Mr. Nicodemus: Call Mr. Englebright. [1962]

E. W. ENGLEBRIGHT

testified further as follows:

Direct Examination

Q (By Mr. Nicodemus) Mr. Englebright, you testified at the last hearing in support of the operating expenses presented in Exhibit 22. Are you now prepared to support the corresponding estimates in Exhibit 29?

A. Yes. I have prepared an exhibit in response to Examiner Boyden's question as to the details of operating expense estimate for 1936 and the other operating expense estimates that were shown in Exhibit 22, filed at that time.

Q. I did not understand he asked for an exhibit, he simply said he would like to have your work sheets, or something to support it, and this is what?

A. I had to prepare it.

Q. And this is what you supply?

A. I supply this in response to Examiner Boyden's request for further details in connection with the operating expenses as estimated and shown on Exhibit 22.

Mr. Nicodemus: This will be Exhibit 33, I believe.

Examiner Wilkinson: The statement entitled "Additional Information requested by Examiner

(Testimony of E. W. Englebright.)

Boyden relating to estimates of operating expenses" will be marked as Exhibit No. 33. [1963]

(Exhibit No. 33, Witness Englebright, received in evidence.)

EXHIBIT NO. 33

ADDITIONAL INFORMATION REQUESTED BY EXAMINER BOYDEN RELATING TO ESTIMATES OF OPERATING EXPENSES OF THE WESTERN PACIFIC RAILROAD COMPANY AS SHOWN BY EXHIBIT 22.

Maintenance of Way and Structures:

Owing to the collateral benefits and effect on Maintenance of Way and Structures expense of the 183 miles of rail renewal and the 110 miles of ballast work being carried out in 1936, as shown by Exhibit 23, the Operating Expense of which is expected to be charged to Profit and Loss (if the Interstate Commerce Commission approves), the estimate for "Ordinary" maintenance for 1936 has not been materially increased over that of 1935 as will be shown below. The estimate for 1936 represents an increase of about $165,000 for "Ordinary" maintenance over the similar actual expenditures for 1935.

Reported Maintenance of Way & Structures expenses for 1935 were $2,369,169. Deducting $453,075 operating charges due to 1935 Budget work (in which is included $345,896 relative to laying 100 miles of new rail in 1935 and $7,140 carried over from 1934

(Testimony of E. W. Englebright.)

in connection with renewal of 43 miles of rail in that year) and $73,000 expended due to unusual 1935 storm conditions, leaves a balance of $1,843,094 for 1935 "Ordinary" Maintenance of Way & Structures.

The estimated 1936 "Ordinary" Maintenance of Way & Structures expense of $2,008,565 plus the 1936 routine budget and carryover operating expenses of $111,435, make up the $2,120,000 shown by Exhibit 22.

From above:

1936 "Ordinary" M. W. & S.	$2,008,565
1935 "Ordinary" M. W. & S.	1,843,094
An increase for 1936 "Ordinary" of	$ 165,471

This increase is expected to be necessary for:

Increased tie renewals, labor and material	$ 70,000
Ordinary bridge and culvert work	45,000
Painting buildings, etc.	15,000
Wage restoration increase	15,000
Water service and miscellaneous	20,471
Total increase for 1936 "Ordinary"	$ 165,471

The estimates for Maintenance of Way & Structures for 1937 and 1938 (during which years the Rehabilitation Program will be in progress) represent flat estimates based on the expected increased use due to the assumed increase in traffic and also on the

(Testimony of E. W. Englebright.)

continued assumption that Operating Expenses of the Program will be charged to Profit and Loss.

The estimates for 1939 and 1940 represent similar flat estimates with due regard to the continued benefits resulting from the rail renewal and ballast work to be accomplished under the Rehabilitation Program during 1936, 1937 and 1938. The placement of nearly 300 miles of ballast and approximately 500 miles of new 100-pound and 112-pound rail with improved joints, tie plates, and appurtenances will result in permanent benefit to track maintenance expense.

Maintenance of Equipment:

Owing to the improvements under way during 1936, as shown by Exhibit 23, the Operating Expenses of which are expected to be charged to Profit and Loss (if the Interstate Commerce Commission approves), the total direct operating expenses chargeable to Maintenance of Equipment for 1936 are estimated at about $143,000 LESS than actual similar expenses accrued in 1935.

This reduction occurs principally in the estimated requirements for Freight Car Repairs, as shown below:

(Testimony of E. W. Englebright.)

MAINTENANCE OF EQUIPMENT
Comparison of 1935 Actual and 1936 Estimated

	Actual 1935	Estimated 1936	Increase or Decrease
Superintendence	$ 62,219	$ 65,000	$ 2,781 Inc.
Steam Loco.—Repairs	712,872	768,000	55,128 Inc.
Frt. Train Cars—Repairs	564,855	400,000	164,855 Dec.
Pasr. Train Cars—Repairs	87,414	60,000	27,414 Dec.
Float. Equip.—Repairs	58,240	30,000	28,240 Dec.
Work Equip.—Repairs	29,705	55,000	25,295 Inc.
Miscel. Equip.—Repairs	65,911	60,000	5,911 Dec.
Total Direct	$1,581,216	$1,438,000	$143,216 Dec.
Depr. & Retirements	566,242	620,000	53,758 Inc.
Total M. of E.	$2,147,458	$2,058,000	$ 89,458 Dec.

The estimated Maintenance of Equipment Operating Expenses for 1937 and 1938 (during both of which years the Rehabilitation Program will be in progress) represent flat estimates based on the increased estimated revenue and on an assumed depreciation of $620,000 annually, and the continued assumption that Operating Expenses of the Rehabilitation Program will be charged to Profit and Loss in those years.

The estimates for 1939 and 1940 represent similar flat estimates with due regard to the continued benefits resulting from the large amount of freight car work to be done under the Rehabilitation Program during 1936, 1937 and 1938 and the necessary increases incident to the estimated level of revenues for such years.

(Testimony of E. W. Englebright.)

Traffic Expense:

Traffic Expense for 1935 was $666,457 and is estimated by that department at $663,000 for 1936.

Estimates for four subsequent years are flat estimates with provision for increased solicitation and other necessary expenses believed to be necessary for increased volume of traffic assumed by the estimate.

Transportation Expense:

It has been assumed that Transportation Expenses for 1936 will not be substantially increased over such expenses for 1935, since the assumed increase in traffic can be handled without increased freight or passenger train miles.

Wages had not been fully restored to present levels for the first three months of 1935 but if they had been so restored, the increase in 1935 would have approximated $32,000 in Transportation accounts. Additional fuel costs have been assumed at approximately $40,000 with a resulting aggregate increase in estimated Transportation Expense for 1936 amounting to approximately $72,000 over such costs for 1935.

A comparison of such estimated Transportation Expense for 1936 with actual figures for 1935 is shown below:

(Testimony of E. W. Englebright.)

Accounts	Actual 1935	Estimated 1936	Increase
Total Operating Revs.	$12,907,071	$13,438,000	$530,929
Transportation:			
Supervision and Dispatching	$ 249,939	$ 252,000	$ 2,061
Station Service	688,674	694,000	5,326
Yards and Terminals	776,668	782,000	5,332
Engine Service	1,958,030	2,007,000	48,970
Train Service	831,917	838,000	6,083
Miscellaneous	288,412	290,000	1,588
Casualties	197,682	200,000	2,318
Total Transportation	$ 4,991,322	$ 5,063,000	$ 71,678
Transportation Ratio	38.7%	37.7%	Dec. 1.0%

Transportation Expense for years 1937 to 1940, inclusive, has been estimated primarily as a ratio to revenues, such ratio being based on our best judgment as to what such ratio would be with traffic of the volume represented by the assumed level of revenues set forth. No attempt has been made to break the expense figure thus found down to different groups of expense.

Miscellaneous Expense:

Estimated expenses for Dining and Buffet service, Hotels, and Other Miscellaneous Operations for 1936 to 1940, inclusive, are flat estimates. In comparing these estimates with the record of this account for past years it must be remembered that prior to 1935 cost of production or purchase of ice and salt used for refrigerator cars was included but is now charged through other accounts.

(Testimony of E. W. Englebright.)

For convenience, there is shown below the amount of such ice and salt expense included under this heading for the years 1924 to 1934, inclusive.

Expenses Covering Cost of Ice and Salt Sold

1924	$217,027.96	1930	$412,417.34
1925	253,625.86	1931	274,755.36
1926	287,130.37	1932	267,484.33
1927	342,474.30	1933	237,192.44
1928	369,300.21	1934	311,244.93
1929	280,872.89		

General Expense:

Estimates shown for 1936 to 1940, inclusive, are flat with gradual increase to cover expenses incident to the added business expected.

Transportation for Investment—Credit:

Figures shown represent flat estimates covering principally the effect of the work being carried forward under the Rehabilitation Program.

Railway Tax Accruals—Ordinary:

Figures shown for 1936 to 1940, inclusive, represent estimate of Tax Department based on the assumption that present methods of assessment now in use in California, Nevada and Utah will continue during the ensuing five years.

Excise Taxes:

Estimates for Excise Taxes are shown separately for "Ordinary" Maintenance and Operations and for the expense of the Rehabilitation Program.

In estimating the labor proportion of ordinary operating expenses, labor has been estimated at 60%

(Testimony of E. W. Englebright.)

of the total. Direct departmental estimates for labor of the Rehabilitation Program were used for estimating excise taxes thereon.

Hire of Equipment—Net Debit:

Figures shown for years 1936 to 1940, inclusive, represent flat estimates based on a review of past experience. Comparison with previous years must consider that, effective January 1st, 1935, rentals received for Western Pacific owned refrigerator cars leased to Pacific Fruit Express Company can no longer be credited to this account.

It must also be remembered that Western Pacific's payments for car hire are largely represented by payments for use of refrigerator cars on a mileage basis, which payments amounted to $855,053 in 1935. Payments in connection with other private line cars amounted to $67,812 for 1935.

Credits for lease of Western Pacific refrigerator cars to Pacific Fruit Express Company and charges for mileage on refrigerator cars used by the Western Pacific are more particularly set forth on Page 2 of Statement No. 8 of an exhibit subsequently to be offered and which will be entitled "Additional Exhibits as Requested by Counsel for Creditors or Examiners for Interstate Commerce Commission at Hearing Held March 23, 1936, together with Supplementary Explanatory Memoranda."

Joint Facility Rents—Net Credit:

Amounts shown by estimates for 1936 to 1940, inclusive, represent estimates arrived at by applying

(Testimony of E. W. Englebright.)

an average percentage of revenues based on past performance.

[Endorsed]: F. D. 10913. Exhibit No. 33. Witness E. W. Englebright. Filed April 21, 1936.

Q. (By Mr. Nicodemus) Referring to statement No. 9 in Exhibit No. 29, System Income Account for the years 1922 to 1935, do you consider the figures indicate the amount available for interest in the years 1934 and 1935, to be fairly representative for the level of revenues received in those years?

A. I think the earnings as represented by "Available for Interest" in 1934 and 1935 must be viewed with respect to certain charges that entered into the accounts in both of those years, which had a distorting effect.

For example, in 1934, statement 9 shows available for interest as $1,084,243. In viewing this figure in respect to our proposed Reorganization Plan, we could with propriety add back to that figure $133,766, which in the accounts for 1932 represented amortization of discount on our first mortgage bonds.

We could also add back $97,683, representing the five months' pension expenses included in that year.

We also laid 43 miles of rail that year, which involved operating expenses of $107,286.

I think that all of those items were more or less special as far as 1934 is concerned, and after they

(Testimony of E. W. Englebright.)

are all charged back we would have what might be called 1934 [1964] available adjusted for these abnormalities of $1,422,978.

Similarly, in 1935 statement 9 shows available for interest as $805,589.

Similarly we would add back amortization of discount on bonds, which in that year was $135,401.

Operating charges on 100 miles of rail plus a slight carry over from the 1934 job amounted to $353,036.

We had a very disastrous slide situation in April in the Feather River Canyon which tied the road up for a considerable period and which involved the necessity of detouring passenger and freight trains over the Southern Pacific Lines from Sacramento to Flanigan, and in some cases from Sacramento to Weso. The detour expenses involved in that operation in part were charged against revenues as prescribed by the Commission to the extent of $65,306. The extraordinary expenses in connection with the maintenance of way and structures account having to do with that slide amounted to $29,324.

The transportation account, due to some details of the manner in which the Commission has these things taken care of, also is charged with a certain amount of the detour expense, and that figure amounted to $23,171.

There were pension charges in 1935 for four months of $51,593, but during 1935 there was also

(Testimony of E. W. Englebright.)

a credit taken into other income of $149,267, which will adjust out the [1965] pension items in the two years.

Adding all of those figures back and deducting the pension refund, we would have what might be called 1935 with abnormalities removed, showing the available for interest as $1,314,153.

Q. Were there any unusual conditions affecting operating revenues during the years 1934 and 1935 to which you wish to refer?

A. Yes. In 1934 the company received the benefit of a rather artificial situation created by the port strike in San Francisco and other Pacific Coast cities, which resulted in considerable additional business, and particularly north and south via the Northern California Line; whereas in 1935 practically at the same time of year we suffered from the bad effects of the serious lumber mill strike which continued for about three months among the lumber mills in the northwest territory which supplies much of our northern California traffic.

Q. Have you any general comments to make on Exhibit 29?

A. Yes, I have, but before leaving this subject I think that there is another factor of distortion between 1934 and 1935 that must be considered.

Q. Put it in.

A. That is that in 1934 the wage deduction was largely in effect throughout the entire year, whereas in 1935 the [1966] restoration had been made for

(Testimony of E. W. Englebright.)

the latter nine months, which had a tendency to improve the available for interest for 1934 as reported and changed its relationship as to 1935.

Q. That explains why you had a lower net and higher gross in 1935 as against 1934?

A. Yes.

Q. All right.

A. Taking up exhibit 29 in more detail, it is necessary to call attention to certain factors to aid in its interpretation.

Exhibit 29 consists of 36 statements of one or more pages each and having to do with various estimates or records relating to The Western Pacific Railroad Company and its subsidiaries.

Statements 1 to 7, inclusive, set forth an estimated consolidated income account for The Western Pacific Railroad Company and rail line subsidiaries for the years 1936 to 1940, inclusive.

The estimates for The Western Pacific Railroad Company shown on Statements 3 to 7, inclusive, are the same as those shown on Exhibit 22 heretofore filed. The estimated revenues for subsidiary railroad companies are based on estimates filed by Mr. Poulterer in this proceeding.

Particular attention is directed to Notes 1, 2, 4 and 6 on Statement No. 1, which sets forth important conditions bearing on the estimate.

Statement No. 2 is a recapitulation showing the estimated consolidated income account for The Western Pa- [1968] cific Railroad Company and its three subsidiary railroad companies shown in the

(Testimony of E. W. Englebright.)

title. but with all inter-company transactions eliminated.

Attention is called to the comparison of estimated "Available Net Income After Fixed Interest Charges," set forth on Line 37 of this statement, with the comparable figures for The Western Pacific Railroad Company only, as set forth by Line 34 on Exhibit 22, filed March 23rd in this proceeding.

Such a comparison shows that the consolidated income estimate produces available net income after fixed charges which is not materially different from that found by consideration of The Western Pacific Railroad Company only.

In 1936 the consolidated statement when compared with Exhibit 22 shows a reduction of such income by $104,854; in 1937 a reduction of $83,994; in 1938 a reduction of $28,634; in 1939 an increase of $7626; in 1940 an increase of $57,986.

The consolidated statement estimates that the fixed charges contemplated by the Plan of Reorganization would be earned 1.87 times in 1936; 2.59 times in 1937; 2.92 times in 1938; 3.47 times in 1939 and 3.88 times in 1940.

Operating expenses of the Sacramento Northern Railway and Tidewater Southern Railway Company have been estimated in collaboration with the operating officers of [1969] those companies, and the various eliminations of inter-company accounts were carried out with the assistance of the General Auditor's staff.

(Testimony of E. W. Englebright.)

The fixed charges set forth are those contemplated by the Reorganization Plan filed with this Commission February 8, 1936.

Statements 3 to 7, inclusive, are the detailed estimates for each year for the constituent roads of the System and a consolidation thereof for each year under consideration.

Statement 8 consisting of 3 pages, contains pertinent explanatory data to aid in reviewing Statement 9.

Particular attention is directed to the information given by Statement 8 with respect to the periods when certain additional road mileage became part of the System and to further information in connection with such acquisitions as set forth more in detail by Statement 20.

Much of this increase in System mileage was acquired or constructed just prior to or during the depression period and has not yet had an opportunity of contributing earnings up to the level expected in a period of normal business activity.

Statement 9 is a consolidated income account record of the System lines with all inter-company transactions eliminated. Review of this statement must be con- [1970] sidered concurrently with information given in Statement 8 if misleading interpretations are to be avoided.

Especially important is the information with respect to the Improvement Programs in effect during the period 1927 to 1931, inclusive, as set forth more specifically in Statements 21, 24 and 27.

(Testimony of E. W. Englebright.)

Much of the pick-up of deferred maintenance accomplished during that period was charged to ordinary maintenance and not included in the Operating Expenses of the programs as separately set forth by the various statements submitted.

Reference to exhibit 23 will show that the operating expenses incident to the 3-year rehabilitation program are estimated at approximately $5,000,000, which may be taken as representative of the amount of deferred maintenance existing January 1, 1936.

It is apparent that if such deferment had not accumulated, the amounts available for interest in past years would have been lessened by $5,000,000, but it is not possible to allocate with any accuracy the particular years which would have been affected.

For example, physical depreciation of rail and equipment commences at once with initial use.

However, even if the $5,000,000 in deferred maintenance should be considered to have accrued entirely during [1971] the 14 year period shown by Statement 9, the average amount available for interest annually would have been approximately $1,800,000 or 1.7 times the maximum fixed charges indicated by the Plan of Reorganization.

Attention is called to the inclusion of "Amortization of discount on first mortgage bonds" as a deduction prior to setting forth amounts "Available for interest." If the present bond issue is retired and replaced with other bonds exchanged or sold at par, this deduction would be eliminated except

to the small extent necessary to amortize the expense of issuing the new securities.

Various changes in accounting procedure prescribed by the Interstate Commerce Commission must also be considered.

Statement No. 10 shows The Western Pacific Railroad Company's revenues on business interchanged with certain subsidiary or affiliated lines. Attention is called to the unusual record of sustained revenues contributed by these roads during the depression period—a record that demonstrates the worth of these lines as traffic producers even under adverse conditions.

Statement 11 requires no comment.

Statements 12, 13, 14 and 15 show a record of advances made, respectively, to the Sacramento Northern Railway, Tidewater Southern Railway Company, Deep Creek Railroad Company and Standard Realty & Development Company. [1972]

Particular attention is called to the column headed "Total Returned to The W. P. R. R. Co." on statement 12 relating to the Sacramento Northern Railway, and also to the fact that Statement 13 shows that the Tidewater Southern Railway Company has repaid all advances made by the parent company except the portion expended for additions and betterments and converted to a long-term note on which interest is being earned and paid.

Statement 16 and supporting details on pages 2, 3, 4 and 5 thereof are presented to show an ap-

(Testimony of E. W. Englebright.)

proximate value of the physical properties of the system.

Statements 17, 18, 19 and 20 are presented as information intended to be helpful in connection with the historical record of revenues and maintenance accounts of the system companies.

Statement 21 is largely self-explanatory but particular attention is directed to Section 6, which relates to the Western Pacific Improvement Program under way from 1927 to 1931, inclusive. It will be noted that only approximately $8,000,000 of the contemplated $18,000,000 program was accomplished and further progress halted due to depression conditions.

All rail laid in the Feather River Canyon during 1927, 1928 and 1929 was for curve renewals only—not out of face renewals. As has been previously stated, much [1973] operating expense in connection with elimination of deferred maintenance was not accounted for as part of the improvement program but charged out through ordinary maintenance accounts.

Statement 22 is a record of the income account of The Western Pacific Railroad Company for the period 1922 to 1935, and is self-explanatory.

Testimony concerning statement 23 can be given by Mr. DeGraff, if desired.

Statement 24 contains supplementary data to aid in review of the income record of the Sacramento Northern Railway shown by statement 25.

(Testimony of E. W. Englebright.)

While the improvement program of the Sacramento Northern Railway carried only $202,719 of charges to maintenance expenses, there was also a large amount of deferred maintenance eliminated during the years 1929, 1930 and 1931 with consequent increase in such charges. The increase in mileage due to acquisition of the San Francisco-Sacramento Railroad on January 1, 1929, also required an increase in May and structures and equipment maintenance.

Testimony concerning statement 26 can be given by Mr. DeGraff, if desired.

Statements 27 and 28, relating to Tidewater Southern Railway Company, are self-explanatory, but the same remarks [1974] apply concerning improvements in 1929, 1930 and 1931 as were made in connection with similar elimination of deferred maintenance on the Western Pacific and Sacramento Northern.

Testimony concerning statement 28.1 can be given by Mr. DeGraff if desired.

Statements 29 and 30, relating to Deep Creek Railroad Company, are self-explanatory.

Testimony concerning statements 31 to 36, inclusive, can be given by Mr. DeGraff if desired. [1975]

Q. Have you in your notes, Mr. Englebright, a statement of the total amount earned and available for interest in the years 1922 to 1935 for the system? You have given certain percentages but you have not given the figures.

(Testimony of E. W. Englebright.)

A. The total for the 14 years is $30,322,881.

Q. Or a yearly average of what, in dollars?

A. $2,165,920.

Q. The same as on statement 22? A. Yes.

Q. Total available for interest for the years 1922 to 1935, inclusive?

A. $34,568,184. I do not have my figures here, but if it is all right to take Mr. Nicodemus' figures I will read them.

Q. Well, it is mathematical.

A. It is a matter of arithmetic. Total for 14 years, $34,568,184; yearly average, $2,469,156.

Mr. Nicodemus: That is all for Mr. Englebright.

Cross Examination

Q. (By Mr. Swaine) Those figures you just last mentioned are before deducting that $5,000,000 of under maintenance, are they not?

Mr. Nicodemus: They are.

The Witness: Yes, that is right. [1976]

Mr. Swaine: Have you made the mathematical computation to indicate what the average would have been?

Mr. Nicodemus: No, I have not made it, but it would be $5,000,000 divided by 14.

Mr. Swaine: It would be a little less than $400,000 a year; and what did you say the average was for your whole period down to date?

Mr. Nicodemus: 1.7.

Mr. Swaine: No, no, I am not talking about the percentage.

(Testimony of E. W. Englebright.)

The Witness: Money, you mean; for the system, Mr. Swayne, or the railroad?

Mr. Swayne: For the system. You had the average.

Mr. Nicodemus: $30,322,881.

Mr. Swaine: Oh, I know but what was the average?

Mr. Nicodemus: The average is $2,165,920.

Mr. Swaine: For the whole period?

Mr. Nicodemus: For the whole period including the depression years.

Q. (By Mr. Swaine) Now, take off your $400,000 and that gives you what? That will give you $1,700,000.

A. That is your average.

Q. I am trying to find out what the average was on a basis of normal maintenance.

A. Let us take the $5,000,000 off the $30,000,000 and [1977] then divide it. It is $25,322,881 divided by 14, is not that right?

Q. All right.

A. We will see if we can get that. That would be about $1,820,000, something in that neighborhood.

Q. Now, Mr. Englebright, as I understand the plan it takes about $1,650,000 before you begin to pay any interest at all on the income bonds, so that on the average the income bonds would have earned but 10 per cent of their interest during that entire period, is that right?

(Testimony of E. W. Englebright.)

A. You are looking at that original estimate that we had?

Q. No, I am talking your average figure then I am applying it to the plan. A. Yes.

Mr. Nicodemus: Of course, a great part of that period the northern California extension was not in operation.

Q. (By Mr. Swaine) Your computation had not put the capital fund in. On page 4 of the plan you show fixed charges of $1,148,000. Now, add your $500,000 capital fund even during the low stage and you get $1,600,000, which would have left——

A. About $172,000.

Q. And that is less than the amount of your advances to the various subsidiaries for amounts not charged to [1978] income.

A. It is less than those amounts have been in the past, yes.

Q. So that taking the average you would have paid no interest on any of your income bonds, is not that so?

A. I thought that we just agreed that in the plan $1,148,000 was the fixed charges.

Q Yes, and with the capital fund of $500,000, which Mr. Elsey says is too low and ought to be a million, on the average you would not have earned any interest on your income bonds? Is not that correct? I just want a factual statement.

A. Let me ask a question. This average that we

(Testimony of E. W. Englebright.)

were working with here, is that the system average?

Mr. Nicodemus: Yes.

The Witness: I just want to be sure that I understand this before I answer it.

Our $72,000 would have been what there would have been available for the income bonds, that is correct.

Q. (By Mr. Swaine) But you would have to use it really to make advances, you would have needed it for advances to these other subsidiaries; so that if you had had to pay it as interest, you would have had to have gone out and borrowed money, or else you would have had to trim the capital fund from what Mr. Elsey said it ought to have [1979] been. Of course, if your fund had been a million instead of five hundred thousand dollars, you would have been just $500,000 short of what Mr. Elsey thinks you ought to have.

Mr. Nicodemus: Mr. Elsey did not say he expected to spend that fund every year. That is the difficulty of putting a statement like that on the record.

Mr. Swaine: I am only taking what the plan says.

Mr. Nicodemus: I would like to answer Mr. Swayne on that, that Statement 12 shows a record of the advances to the Sacramento Northern, and after we take up the monies that immediately returned to the Western Pacific's pocket. In other words, you will find a column over here headed "To reimburse general cash." There is only one year,

(Testimony of E. W. Englebright.)

and that was the year 1932—and 1935—which were over the $72,000. In fact, there is only one other advance, and that is a minor amount of $15,094. I might say that in the 273,000 which shows "To reimburse general cash" during 1935, it must be considered that at the end of the year the Sacramento Northern had $137,000 of that money still on hand.

Q. (By Mr. Swaine). All right, we will say there is $75,000 applicable to $2,300,000 of income bond interest. That does not make the income bond very good, does it?

A. He would not get very much interest on that basis, no.

Q. You would have some doubt, would you not, as to the soundness of a plan which put $41,000,000 of indebtedness out which showed an average return of $75,000 a year?

I will waive the answer to the question. I think it is obvious.

Mr. Nicodemus: I do not think you should waive it. I think he should answer it and answer it fully.

The Witness: I was endeavoring to frame and answer. Stated in the way that Mr. Swaine states the question, in that simple manner, the answer is, of course, as you said, obvious. But I think that we get immediately back to the situation of interpreting what has happened in this income period, I mean in the way of extraordinary expenditures and things of that character.

(Testimony of E. W. Englebright.)

Q. (By Mr. Swaine). Those have been taken out, have they not?

A. The operating expenses and improvement program.

Q. I am not sure we have. From what period did we start? A. 1922 to 1935.

Q. A substantial part of that under maintenance occurred during that period, did it not?

A. Yes, some part of it.

Q. You get into a fairly speculative realm, then, if you [1981] try to figure out how much of it had occurred prior to 1922? A. Yes.

Q. So the figure is not very substantially distorted after all, is it?

A. Your thought being that the operating expenses of the program were working on deferments that had occurred at some previous period?

Q. Yes, that is right. That becomes aggravated when you add an additional $485,000 for a junior lien income interest, does it not? So you have some $2,763.000 of contingent interest here with an average of $75,000 a year to meet it.

Mr. Nicodemus: On the basis of the roads whose earnings are covered by that statement, is that correct?

The Witness: Yes.

Mr. Nicodemus: Which does not include the northern California extension except for the past few years.

The Witness: That is true. That is a very im-

(Testimony of E. W. Englebright.)

portant point, that the northern California extension did not come into the picture until November, 1931, and as I mentioned in my prepared testimony, there are a number of other branch lines with very substantial earning capacity which came into the picture late in that period. [1982]

Q. (By Mr. Swaine). Of course, so far as the past is any criterion, if you took the average from the time those particular properties were acquired or came into operation, your result would be worse instead of better?

A. I did not follow you, Mr. Swaine.

Q. Mr. Nicodemus' implication was that my inference was unfair, because a great number of lines were not being operated which have not been operated through the period for which the average was taken.

A. That is right.

Q. I agreed that that is an entirely fair comment on that. On the other hand, if you take the average for the period since these lines were acquired, you will get an even worse result on the fact.

A. But that would be a very unfair period to take, due to the fact that many of these lines were completed just before the beginning of the depression, and of course we got into a situation that was hardly a gauge for estimating what we hope will be the future.

(Testimony of E. W. Englebright.)

Q. I agree. I do not dissent from that. But so far as the actual record is concerned, it does not show any interest on any of these contingent obligations. That is correct, is it not?

A. I would have to look at that to be sure. That is, you say, this average—— [1983]

Q. An average since the acquisition. It is very obvious that it is, because all that it has done has been to earn—indeed, it has not earned the fixed charges under the plan in any year.

A. That is right.

Q. In the last five years, let alone anything toward the capital fund. A. That is correct.

Q. A little while ago you gave some adjusted figures for 1934 and 1935. A. Yes.

Q. I have forgotten your final adjustment. Would you give that again?

A. In 1934, it was reported——

Q. Do not give the detail, just give the total.

A. The adjusted total?

Q. That is right.

A. $1,422,000, in round numbers. And in 1935, $1,314,000, in round numbers.

Q. Would you say that after making that adjustment you had left an adequate charge for maintenance, an adequate, normal maintenance charge?

A. You mean that having made these changes—

Q. Having made these adjustments, is your remaining charge for maintenance of way and equip-

(Testimony of E. W. Englebright.)

ment a reasonable, [1984] normal, charge, adequate to keep the property in good condition?

A. I think it was for the level of revenues experienced in those two years.

Q. It would not be for what you regard as normal revenues?

A. No, it would not.

Q. Also, that would have resulted in the laying of no rail at all in either of the two years, would it not? A. That is correct.

Q. Do you regard it as normal not to lay any rail for a two year period? A. No.

Q. Therefore, how can you say it does leave a normal charge?

A. Because we feel that if the fiscal situation had been such that we could have programmed our rail in the way that it should be programmed for a proper financial handling of the matter, or in other words, if we had some sort of an equalization account that we could have resorted to, or something of that sort, I do not believe that we would have had 143 miles of rail to lay in a period only 24 months long. It would have been something less.

Q. How much would it have been?

A. On a 20-year life, the length of our principal mileage [1985] possibly something in the neighborhood of 50 miles.

Q. 25 miles a year?

A. No, no. I mean to say 50 miles in one year.

(Testimony of E. W. Englebright.)

Q. 50 miles a year. So you would really have had 100 miles under normal conditions?

A. That would be true.

Q. And you have taken out 140? A. Yes.

Q. Of what you have taken out, two-thirds is really normal and should not be taken out?

A. That is true. In the case of preparing these figures last night I do not believe that phase of the situation was fully considered.

Q. You also have not taken out anything for the capital expenditures, have you? I mean the kind that Mr. Elsey thinks ought to be covered by a fund of a million dollars a year.

A. No, because they do not get into the income account.

Q. Yes, I understand that, but they are out before any contingent interest.

A. They would be under the plan.

Q. They are under the plan, and Mr. Elsey definitely recommends that they should be in any plan affecting the property. A. Yes. [1986]

Q. In your prognostications for the future, can you answer the question that Mr. Elsey did not answer as to how you figure your coal costs? What have you done with reference to a possible increase by reason of the Guffey Act?

A. In estimating transportation costs, as is more fully explained in this exhibit 33, aside from the year 1936, the only practicable way to estimate transportation costs is on the basis of a ratio to

(Testimony of E. W. Englebright.)

revenues, and endeavoring in arriving at that ratio to take as best you can the various factors that exist, that is, increased fuel costs or increased wage costs or other things of that character.

I do not believe it practicable to attempt to prognosticate or break down the transportation account into wages and fuel and all these other factors for a period so far in advance, because transportation to a certain point depends on the characteristics of your traffic.

If a very large percentage of it consisted of fruit, for instance, it would require more trains, more train miles, and there would be a different level of revenues from that business as compared with hauling pig iron or some other different sort of a commodity. In other words, the average makeup of your business for the [1987] year would largely determine your revenues, but you cannot always determine the amount of cars and locomotives that will be required to handle that.

Q. In making this forecast you had to estimate some sort of a composition to that traffic, did you not? A. And that is lumped.

Q. Then you took an arbitrary percentage for transportation?

A. An arbitrary percentage.

Q. Therefore, that arbitrary percentage was based upon present prices for commodities of all sorts? A. Yes.

(Testimony of E. W. Englebright.)

Q. So that if there were any increase in commodity prices of any sort——

A. It would affect it.

Q. ——it would adversely affect your estimates?

A. It would. Of course, if there were any decrease it would be beneficial.

Q. Are you willing to be a prophet on the course of commodity prices?

A. No, not any more than you.

Q. Landslides and strikes have to be taken into account, have they not, in fixing any capital structure for a property of this sort?

A. You do not understand that the strike that I referred [1988] to had to do anything with our employees? You understand that?

Q. Oh, no, strikes in industries on your property

A. But the port strike on the Pacific Coast was certainly an unprecedented thing.

Q. That was a favorable effect, but you talked about a lumber mill strike having adversely affected you?

A. Yes, but that situation, which tied up almost a complete industry in the northwest, which was such a large part of our business on the northern California line, was also a very unusual thing. I do not recall any such situation in many, many years.

Q. But does not a plan have to take into account the possibility or, indeed, the probability of labor disturbances?

(Testimony of E. W. Englebright.)

Mr. Nicodemus: That is done by working capital, is it not, reserves?

Mr. Swaine: No, I am talking about the ability to earn interest on your securities.

The Witness: I think we have gone pretty far in an attempt to prognosticate revenues without endeavoring to prognosticate industrial conditions in other industries and things like that.

Q. (By Mr Swaine). So do I.

A. We have to assume that if everything goes along on [1989] an even keel and with reasonable expectations for improvement in business we would get a certain amount of that improvement due to the growth of the coast and the other favorable factors in our territory. All of those things have been taken into account in our estimates.

Q This landslide in the Feather River Canyon that you thought distorted income for one year—you have had landslides before, have you not?

A. Yes, but not for many years anything as serious as that. In fact, I imagine it is possibly ten years or more, maybe more—I cannot say accurately because I was not with the property at that time, but I have been with the property since 1929 and nothing of the character of that slide has happened before. We have had small slides that interrupted service for 12, 14, maybe 20 hours, but nothing of this character.

I do not recall the exact period—maybe Mr. Elsey can. Do you remember, Mr. Elsey, how long the road was tied up with the Isaiah slide?

(Testimony of E. W. Englebright.)

Mr. Elsey: Portions of it were tied up for about 12 days.

Mr. Swaine: I have no further cross examination.

Q. (By Examiner Wilkinson) Mr. Englebright, you read into the record the ratio between your maintenance [1990] expenditures and your revenues for the past years, and of course your exhibits in this case given for your forecast 1936 to 1940. Do you have those ratios before you?

A. Yes. I can put my hand on them here in just a minute.

Q. Will you say that during the period 1921 to 1926, inclusive, your maintenance on the property was normal?

A. Was normal? I am a little out of my depth in endeavoring to answer the question because I was not here. I was not with the property at that time.

Q. I thought perhaps you had studied the past records.

A. I have, but I am not familiar with the physical condition of the property at that time. All I can look at is the records.

Q. Just as a question of your judgment, then, during that period the total would be 33, 36, the average?

A. That is that five year average, but you have taken to 1926?

Q. Yes, 1921 to 1926. The average ratio would be 33.36?

A. Yes.

(Testimony of E. W. Englebright.)

Q. Do you consider that as a rule of thumb, I might say, a normal or average ratio?

A. I think that that ratio applied to the property as it will be during the carrying out of the program and as a result of the work done in this improvement program—by that I mean new rail, tie plates, which the original [1991] property did not have, which resulted in very high tie renewals due to cutting, improved ballast, and now during this three year program the laying of 100 and 112 pound rail will result, for instance, in very material benefit to our maintenance accounts, so that I think that a ratio of 33 per cent could be shaded quite materially for future years.

Q. Although as a matter of fact during that same period it is reasonable to assume that a certain amount of deferred maintenance was being incurred? A. Yes, that is true.

Q. During your period 1927 to 1931, which I understand was your rehabilitation program, your average was 34.56? A. Yes.

Q. Then from the period 1932 to 1935 your average was 32.05, and even with the extraordinary expenditures during your rehabilitation program your average for the period 1921 to 1935 is far in excess of the average which you have estimated for 1936 to 1940, is it not? A. Yes.

Mr. Nicodemus: Do you attribute that to advances in the art?

The Witness: I attribute the fact that we have

(Testimony of E. W. Englebright.)

used a lower ratio in the five year period facing us to the things that I have just mentioned to Mr. Wilkinson, that [1992] is, the improved property and the ease with which it can be maintained or the lessened expense at which it can be maintained.

Q. (By Examiner Wilkinson). I mentioned once before the fact that you charged these proposed rehabilitation expenses to operating expenses, so far as your plan is concerned, that is, in the future. Are you aware that the Commission has ruled that such expenditures must be charged to operations?

A. You mean the operating expenses of this rehabilitation program?

Q. Yes.

A. I understood that the matter was before them for decision, but I did not know what the answer had been. [1993]

Examiner Wilkinson: Mr. Elsey, can you answer that? Do you know what the Commission has done on that?

Mr. Nicodemus: Still under advisement.

Q. (By Examiner Wilkinson). And that if they do permit you to charge it to profit and loss, then your estimates for 1936 and 1940 will be materially changed, will they not?

A. Very much. You mean the estimated amounts available for interest?

Q. Yes.

(Testimony of E. W. Englebright.)

A. Very materially. They would be decreased by the amount of the program charges to operating.

Q. You show on your exhibit 22 for a so-called normal maintenance in 1940, $5,675,000.

A. Yes.

Q. For 1939, $5,100,000. That is supposed to be after your rehabilitation program.

A. That is correct, but immediately after, you might say.

Q. Immediately after? A. Yes.

Q. It would be reasonable to expect that in the future, then, that would increase rather than remain the same or decrease?

A. That is correct. As time passed on, and the effect [1994] of the renewal of box cars and the other work that is contemplated under the program and the improvements to track and other things commenced to depreciate, eventually, there would have to be some increase in that amount. But for the two years shown, 1939 and 1940, with such a large amount of track work done, and so much work done to freight cars, we feel that those amounts are more than ample to take care of that particular period.

Q. You feel that taking into consideration the past history of this property, the amount of deferred maintenance which has been incurred pretty regularly over certain periods, that the expenditures of around $5,000,000 would be sufficient for maintenance in the future, normal maintenance?

(Testimony of E. W. Englebright.)

A. That is the five million dollars chargeable to operating?

Q. Yes.

A. Of course, we would get some benefit from capital expense that goes into the heavier rail, which would affect operating expenses. We feel that the expenditure of the five million dollars on operating expenses of the program would bring the property up to what might be called a normal condition to give the service which it should give, economically, and for the level of revenues that are expected in the future, and the character of [1995] railroad that we operate.

Q. Have you ever computed from a percentage standpoint your transportation cost for the exhibit 22?

A. Yes, I think you have it, Mr. Wilkinson. It was submitted. It is the sheet immediately underneath, that photostat.

Q. You start out in 1937 and 1936 with transportation expenses of 37.7, and you drop down in 1940, to 32.1 per cent. Has it been your experience that a road such as the Western Pacific could operate with a ratio of 32.1 per cent transportation expenses as a rule?

A. Not as a rule, but I can show instances when it has operated at 32 per cent.

Q. Would you care to say offhand what you consider to be the average ratio or percentage of that figure?

(Testimony of E. W. Englebright.)

A. I cannot say the average, Mr. Wilkinson. Just how do you use that. for what level of revenues?

Q. Take so-called normal revenues.

A. If we consider normal revenues as something in the neighborhood of that shown by the 1940 estimate, I think the 32 per cent is reasonably attainable with careful management, because we have in the past. For instance, in 1926, on the level of revenues of $16,057,000, we had transportation expenses of $5,093,000, or a ratio of 31.72.

[1996]

In the subsequent year, 1927, we had revenues of $16,433,000, a transportation ratio of 32.82. I refer now wholly to the Western Pacific Railroad Company.

Q. Would you mind reading those into the record for the period 1922 to 1935? I do not think they are in the record.

A. Yes, I can. This is a compilation, this statement at which I am looking, an analysis of the operating expense accounts which have been filed with the Commission. I have a supply of those, and I can offer it as an exhibit, if you wish.

Examiner Wilkinson: Would you mind putting that in the record, please?

Mr. Nicodemus: Would you describe that document so I can offer it? Identify it on the record.

The Witness: The statement which is offered is an analysis of the Western Pacific Railroad

(Testimony of E. W. Englebright.)

Company's operating expenses and the ratio of those expenses to operating revenues for the years 1916 to 1935.

Examiner Wilkinson: Let the statement which is referred to be marked Exhibit 34.

(Exhibit No. 34, Witness Englebright, received in evidence.)

The Witness: The figures shown both as to revenues and expenses, are the figures reported to the Interstate Commerce Commission on the annual reports. However, this [1997] statement was actually prepared from a file of the annual reports to the company's stockholders, in case there are any minor discrepancies.

Q. (By Examiner Wilkinson). I also note that for your operating ratio for the period 1936 to 1940, you start out with 77.20 and gradually decrease it to 67.90 in 1940. A. Yes.

Q. With the exception of the years 1925 and 1926, the Western Pacific never operated at such a ratio since 1921, did it, or such a low ratio as that?

A. You are talking about the total operating ratio?

Q. Yes, the total operating ratio now.

A. 1921 was higher than that.

Q. 1921, you had operating ratio of 85.85.

A. That is correct. In 1916, the operating ratio was 59.86. In 1917, it was 62.54. In 1918, it was 71.25, or higher than the estimated ratio for 1940.

(Testimony of E. W. Englebright.)

Q. But I am speaking about for the period 1921 to 1935, it was only in the years 1925 and 1926 that you operated at a comparable ratio with what you estimate you will operate in the future.

A. That is true, but that was on a level of revenues, of course, of $15,569,000 for 1925, and $16,057,000 for 1926. When our revenues go up our ratio ought to drop

Q. I think you stated that in so far as you were concerned, [1998] it would be very difficult to allocate any of your deferred maintenance incurred during that year.

A. Yes, I believe that to be true. I have given it a good deal of thought and cannot arrive at any logical process by which we could ascertain or allocate a portion of that deferred maintenance in any specific year, for the reason that, for instance, on rail, the wearing out of that rail has been going on since the day it was first applied. Similarly with freight cars or other sorts of equipment, we feel that the repairs to freight cars have had to go during this depression period because there was no other alternative. The renewal of rail, which was commenced under the old improvement program in 1926, and had to be abandoned in 1931, we feel that that is overdue; but I do not see how any portion of that could be specifically allocated to any one or two years in the back period.

Q. Are you familiar with the formulas used

(Testimony of E. W. Englebright.)

by the Commission in Finance Docket 1606, in the matter of the final settlement under section 209 of the Transportation Act of 1920?

A. No, I do not recognize the formulas, that is, by that designation.

Q. At that time, when it came to a question of settling with the railroads, the question of deferred maintenance, [1999] under maintenance, and so forth, formulas were used by the Commission.

A. Yes.

Q You are not familiar with those formulas at all? A. No, I am not.

Q. Do you think it would be possible to take the period 1921 to 1930, and take the average during that period as being the normal amount of maintenance for the Western Pacific?

A. Do you mean on a ratio basis, Mr. Wilkinson?

Q. Yes.

A. For the reason that I have previously stated, I think that those figures were possibly higher than they would be on the property after the completion of our new program, for the reason that we still have many miles of track with no tie plates on it whatever, with 85 pound rail, which has always had a tendency to cut into the ties severely and cause adzing. Many ties have been removed from the track in the past, not due to decay wholly, but primarily due to cutting and mechanical wear. With the completion of our program, our entire

(Testimony of E. W. Englebright.)

main line road mileage will be tie-plated adequately, and there will be a large percentage of new ties inserted in connection with the ballast work.

For a period of years now we have been improving our [2000] bridges, trestles, and culverts, with permanent structures. We are improving our water supply and other facilities of that character. I feel that when that work has been accomplished, our maintenance must necessarily be reduced over what it was in some of this earlier period.

Examiner Wilkinson: That is all the questions I have, Mr. Englebright.

The Witness: Thank you.

Mr. Nicodemus: We have no questions to ask Mr. DeGraff ourselves. If any counsel or the Examiner wishes to cross examine the auditor, he is available. Otherwise we are finished.

Examiner Wilkinson: Mr. Swaine, do you have any questions?

Mr. Swaine: I have no cross examination.

Mr. Willard: Perhaps he is the right one to put in, Mr. Nicodemus, the use that was made of the money borrowed from the Railroad Credit Corporation.

The Witness: I think I have that here, if I may refer to another book.

The first note of the Railroad Credit Corporation was dated June 29, 1932. The original amount was $1,303,000. It was disposed of $1,231,500 at semi-annual interest due March 1, 1932, on out-

(Testimony of E. W. Englebright.)

standing first mortgage bonds, and $71,500, the semi-annual interest due [2001] March 1, 1932, on outstanding equipment trust certificates series B.

Note dated March 25, 1933, in the amount of $1,293,439, was disposed of $1,232,252 semi-annual interest due March 1, 1933, on outstanding first mortgage bonds, and $61,187 semi-annual interest due March 1, 1933, on outstanding equipment trust certificates.

As of January 31, 1936, distributions had been made by the Railroad Credit Corporation in the form of credits to the first note, the credits being due the Western Pacific Railroad Company and its subsidiary companies to a total amount of $71.532; so that the net amount of the notes still owed the Railroad Credit Corporation January 31, 1936, amounted to $2,524,907 in even figures.

Mr. Willard: Thank you.

Mr. Coulson: May I ask the witness whether the statement from which he was reading included similar information as to the application of the funds received from the other junior creditors?

The Witness: That particular statement, Mr. Coulson, was wholly the Railroad Credit Corporation.

Q. Have similar statements been prepared for the other junior creditors?

A. Just a moment, I will see if I have that.

Mr. Coulson: I would suggest that, Mr. Examiner, for the [2002] purpose of the record, if they

(Testimony of E. W. Englebright.)

have not been prepared they be prepared and made exhibits in the record for what signficance they have.

Mr. Swaine: I think that is a good suggestion, so we will not have any element of fact in dispute.

Examiner Wilkinson: Will you furnish that for the record, Mr. Englebright and Mr. Nicodemus?

Mr. Nicodemus: I understand that the A. C. James note, or the proceeds of that note or the debenture which was issued, were exclusively used for constructing the Northern California extension.

Mr. Coulson: That is correct; but I think so far as the information is placed of record as to one junior creditor, it ought to cover also the Reconstruction Finance Corporation advances.

Mr. Nicodemus: The Reconstruction Finance Corporation I cannot give from memory.

Mr. Coulson: It might as well be covered by an exhibit.

Mr. Nicodemus: There are some capital expenditures out of the Reconstruction Finance Corporation fund, are there not?

The Witness: The statements are quite lengthy, and it would be a difficult thing to read them into the record. I have no other extra copies, but the information is here if you wish it. [2003]

Mr. Nicodemus: We will undertake to file a single exhibit and give the information as to the disposition of the proceeds of all of the notes held by the junior creditors.

(Testimony of E. W. Englebright.)

Mr. Coulson: Can that be assigned an exhibit number now?

Examiner Wilkinson: No, I am sorry, we cannot do that until we receive it.

Mr. Nicodemus: We can reserve a number for it, however.

Examiner Wilkinson: We will give it a number when it is received. At the time it is put into the record, each party will be notified. If you will send us a sufficient number of copies to serve on counsel, we will serve it numbered.

Mr. Nicodemus: All right, I will do that.

The Witness: You mean to distribute them the way we did the last time, through Mr. Nicodemus?

Mr. Nicodemus: I distributed them direct the last time, and I will do it this time.

Examiner Wilkinson: Of course, if you have a future hearing it will be received at that time.

(Witness excused.)

Mr. Nicodemus: I understand that certain counsel want another hearing. Is that correct?

Mr. Swaine: I suggest this procedure, if the Examiner [2004] please. As I stated at the last hearing, our committee has accepted this plan. I think, however, that the testimony has developed several problems in which respect of which we will want modifications of the plan, at least in form. I have a feeling after hearing all this testimony that

the definitions of available net income and provisions for application need clarification. I have also discovered in the plan certain mathematical errors to which I would like to call Mr. Nicodemus' attention at the proper time and have them corrected.

So that apart from any substantive questions we have suggestions to make in respect of the plan.

Our acceptance of the plan was both predicated and conditioned upon its acceptance by the Reconstruction Finance Corporation, and its acceptance by the Railroad Corporation without modification which we would regard as material. In view of the opposition to the plan by the Reconstruction Finance Corporation and the Railroad Credit Corporation at the last hearing, and because of certain questions that the evidence raised in the minds of our committee, we had contemplated suggesting a modified plan. I think, however, and I understand certain other creditors feel that it would be preferable not to present the plan as merely the plan of one group of creditors but to see whether or not the creditors cannot [2005] agree before something is actually formally submitted before the Commission by any one group.

Therefore, my own feeling is that we should take about a three weeks' adjournment in order first that we can call to Mr. Nicodemus' attention the changes that we want in this plan—we have already suggested one modification at the last hearing, and I will have several more to suggest—and second, that in the interim the junior creditors can confer with

the first mortgage bondholders and see whether or not the creditors can agree upon any plan which might be substituted in case the Commission should feel that this plan was not sustained on the record.

Mr. Nicodemus: We are reconciled to a three weeks' adjournment, although we are very anxious to press this for submission to the Commission. I think perhaps it should be a month. Our witnesses all live on the Coast, Mr. Examiner.

Mr. Swaine: I doubt that we will need witnesses at the next hearing. Frankly, I think that we got all the statistical material in the record that we need to test out any plan.

Mr. Nicodemus: I agree with you.

Mr. Swaine: I wish there were some way of getting a preliminary indication from the Commission as to whether on this record it would be willing to sustain a plan which [2006] has charges of four and one-half million dollars before common stock.

Examiner Wilkinson: I do not think the Commission would care to indicate its decision on the plan other than in the ordinary, formal way.

Suppose we recess until two o'clock, and at that time all parties can come back and know pretty definitely as to what witnesses, if any, will be needed. Then we can agree upon a date for the next hearing. Will that be agreeable?

Mr. Nicodemus: I can say now that we need no further witnesses. I am perfectly willing to submit this on the record as it exists.

Mr. Swaine: I do not think we will, either. I think that if a substitute plan is brought forward it will be a plan which will be much more drastic than the one which is before the Commission now, and therefore if the record supports the present plan, a fortiori it will support the other one.

(Discussion off the record.)

H. E. POULTERER

was recalled and testified further as follows:

Cross Examination

Q. (By Examiner Wilkinson). Exhibit 27 is offered in support of the forecast contained in exhibit 22, is it not? A. Yes. [2007]

Q. Would you mind stating for the record in a general way in what way Exhibit 27 supports Exhibit 22?

A. The forecasted figures obtained in Exhibit 27 are the figures that are used as estimated or forecasted revenues in exhibit number 22.

Q. In preparing your forecast for freight revenues, did you analyze each commodity handled by the Western Pacific over a period of years?

A. We analyzed by a classification of commodities and the principal traffic movements contained within those classifications.

Q Did you give any consideration to the length of haul? A. Yes.

[Testimony of H. E. Poulterer.]

Q. As I recall, one of the things that Mr. Bon talked about a good deal was the possible change in freight rates. In just what way did that influence your forecast?

A. Very slightly. We do feel that the general level of freight rates is probably as low as it will go. If there is any change in that as to specific rates, we feel that the reduction in those specific rates is going to be productive of greater tonnage and will reflect a greater revenue.

I referred in my testimony to the action that has been taken by the California Commission. We carry a very [2008] large traffic in trucks in California. Of course, the conditions there with respect to regulation of other forms of transportation are somewhat different than they are interstate.

With that prospect of a possible increase in some rates that have been forced down to what we have considered an abnormally low level by reason of competition with other forms of transportation, that is probably going to increase these revenues that we have forecasted, and we feel on that basis that that represents a fairly conservative forecast.

Q. In connection with your estimate for passenger revenues, what rates did you have in mind, the prevailing rates? A. Yes.

Q What are they in that particular territory at the present time?

[Testimony of H. E. Poulterer.]

A. Our prevailing rates are, generally speaking, I believe, two cents a mile in coaches and slightly higher in Pullmans.

Q. Is that the same rate as the Commission's recent decision in the Passenger Fares Case?

A. I am not sufficiently familiar with the passenger fares to be able to state. I do know that it is no higher.

Q. Would you say that your forecast is largely a judgment figure giving weight to your analysis of the past revenues [2009] of the Western Pacific?

A. Yes, I think that is what a forecast necessarily consists of.

Q. An arbitrary increase for each year in the future until you arrive at your maximum in 1940?

A. Rather arbitrary, but still based on what you might call informed judgment.

Mr. Wilkinson: That is all the questions we have.

(Witness excused.)

Mr. Willard: The Railroad Credit Corporation had intended to put on a witness. We have tried to avoid it. But I think if we may put in evidence a copy of the Marshalling and Distributing Plan, with which almost everyone here is familiar to some extent, it may not be necessary to put on a witness.

Mr. Nicodemus: We will agree that that goes in.

Mr. Swaine: That is all right.

Mr. Coulson: I would like to state for the record that I appeared at a prior hearing and entered

an appearance on behalf of A. C. James Company. The A. C. James Company is a junior creditor in the principal amount of approximately five million dollars advanced in 1931 and 1932 for the building of the northern California extension.

The presiding Examiner at the last hearing directed me to file a formal petition of intervention to preserve [2010] my status as a party, although the A. C. James Company have been classified by the courts in California as a separate class of creditor. I have prepared such a petition of intervention in compliance with the direction of the Commission, and if the Examiner feels that this is an appropriate time, I will file it with the Commission at this time.

Mr. Wilkinson: We can receive it right here.

Mr. Coulson: I may say that the position of this junior creditor, as stated in the petition of intervention, is in support of the basic principle of the company's plan, if we understand it, but we do suggest to the Commission that in the exercise of its power under Section 77 it may make modifications in certain substantial features of the plan as framed and presented.

Mr. Nicodemus: If the Examiner please, I think there is one question that I neglected to ask Mr. Elsey, which I would like to ask him now, if it is not too late.

Examiner Wilkinson: Very good.

CHARLES ELSEY

was recalled and testified further as follows:

Direct Examination

Q (By Mr. Nicodemus) Assuming a four million dollar revenue from the Northern California Extension, in determining what part of that would be net, you would not apply [2011] the system ratio? A. No, sir.

Q. What is the cost now to operate the Northern California Extension?

A. Between $350,000 and $400,000.

Q. So that there would be $3,500,000 saved out of the four million dollars?

A. As far as the operation of the branch is concerned.

Mr. Nicodemus: That is all I wanted to ask.

(Witness excused.)

Mr. Nicodemus: I wonder whether the clients represented by Mr. Swaine should not also file separate petitions of intervention.

Mr. Swaine: I will have a petition of intervention at the next hearing.

Mr. Nicodemus: That will be a separate one for each creditor?

Mr. Swaine: No it will be an intervention for the group. I understand that in the other proceedings these fiduciaries have intervened as a group. That is what they did in the St. Paul, I know.

Examiner Wilkinson: Of course, I am not familiar with what they did in the St. Paul. When the petition comes in we can see then what it represents

Mr. Nicodemus: All right. [2012]

Examiner Wilkinson: The petition of A. C. James Company for leave to intervene, filed by the A. C. James Company by Robert E. Coulson, attorney for the petitioner, is received in the record.

(The petition of intervention of A. C. James Company was received.)

Mr. Nicodemus: Has Mr. Willard filed a similar petition of intervention?

Mr. Willard: Yes.

Examiner Wilkinson: Mr. Willard has already filed his and it has been passed on by the Commission.

We will adjourn at this time until May 13th.

(Whereupon, at 12:55 o'clock p. m., an adjournment herein was taken until May 13, 1936.)

[2013]

Hearing Room B, I.C.C. Building,
Washington, D. C.,
Wednesday, May 13, 1936.

The hearing was resumed at 10 o'clock a.m., pursuant to adjournment.

Before:

Harvey Wilkinson, Examiner.

Appearances:

Same as heretofore noted, and

J. R. Turney, appearing for J. R. Nicodemus, Jr., Western Pacific Railroad Company.

H. C. Kilpatrick, appearing for Robert E. Coulson, A. C. James Company. [2015]

PROCEEDINGS

Examiner Wilkinson: The Interstate Commerce Commission has assigned for further hearing at this time and place the matter of the reorganization of the Western Pacific Railroad Company, which is Finance Docket No. 10913.

Are there any additional appearances?

Mr. Turney. J. R. Turney is appearing merely by courtesy for Mr. Nicodemus, who is compelled to attend a session of the Court of Appeals of New York.

Mr. Kilpatrick. H. C. Kilpatrick, appearing for Mr. Coulson, who represents the A. C. James Company.

Examiner Wilkinson. I believe you gentlemen should fill out the appearance blanks furnished by the reporter.

You may proceed, Mr. Turney.

Mr. Turney. If the Examiner please, Mr. Nicodemus, who is counsel for the debtor was unable to be here today. He was called to New York by a case which was advanced in the Court of Appeals. Matters have arisen which led the various parties in the case to enter into a stipulation, or, rather, an agreement, whereby the Reconstruction Finance Corporation will make an engineering investigation of the costs which will be necessary for certain improvements to the property. Mr. Jones of that organization estimates that it will require sixty days to complete that investigation. Mr. Nicodemus asked me to state that [2017] all of the counsel of record, that is, Mr. Coulson, Mr. Alley, Mr. Swaine, Mr. Wood, and Mr. Willard had agreed upon the continuance or resetting of this case at least sixty days distant to enable that investigation by the Reconstruction Finance Corporation to be completed.

Examiner Wilkinson. We have before us, of course, a plan of reorganization which contemplates the expenditure of about $10,000,000 for rehabilitation of the property. Is it your understanding that the Commission is going to be given the benefit of whatever study is made and some form of exhibit showing the study which will be made as a basis for any modification of plan?

Mr. Turney. Mr. Examiner, I cannot answer that: I assume so. But that matter was not discussed with Mr. Nicodemus. As a matter of fact, my conversation with Mr. Nicodemus occurred in a taxicab between my office and the station while he was catching a train yesterday afternoon. But I can see no reason why it should not. If you wish to postpone the hearing while I get Mr. Nicodemus on the 'phone, I shall be glad to give you a definite answer.

Examiner Wilkinson: I do not believe that is necessary.

It appears to the examiner that any modification of the plan should have supporting exhibits indicating what is the basis for the modification.

The Bureau of Finance is in receipt of information [2018] in the form of an exhibit submitted pursuant to a provision on page 245 of the record. The information shows the use of funds borrowed by the debtor from the Reconstruction Finance Corporation. from the Railroad Credit Corporation and from the A. C. James Company. I assume copies of these exhibits have been transmitted to all of the parties of record. These statements will be received in evidence as exhibit No. 36 subject to any motion to strike which may be offered by parties of record. I take it there is no objection on the part of any one here to their receipt.

Mr. Kilpatrick. Mr. Examiner, I feel I have not authority to either consent or object. I did not anticipate this and am not familiar with the issues. I hope, so far as the A. C. James Company is

concerned, counsel may have an opportunity to make any motion to strike he deems advisable.

Examiner Wilkinson. You may do so.

Off the record.

(Discussion off the record.)

(Exhibit No. 36, received in evidence.)

Examiner Wilkinson. Pursuant to the request of counsel, this hearing is adjourned until July 1, 1936, at 10 o'clock in the morning.

(Whereupon, at 10 o'clock a.m., adjourned until 10 o'clock a.m., July 1, 1936.) [2019]

Before the Interstate Commerce Commission

Finance Docket 10913

WESTERN PACIFIC RAILROAD COMPANY
REORGANIZATION

Room 5230, I.C.C. Building,
Washington, D. C.,
Wednesday, July 1, 1936

Met pursuant to adjournment at 10 o'clock, a.m.

Before:

Examiner R. T. Boyden, and
Examiner Harvey H. Wilkinson.

Appearances:

The same as heretofore noted.

Additional appearance:

W. Meade Fletcher, Jr., Attorney, and John Barriger, Chief Examiner, Railroad Division, appearing for the Reconstruction Finance Corporation, Washington, D. C. [2021]

PROCEEDINGS

Examiner Boyden: Are you ready to proceed, gentlemen?

Mr. Nicodemus: On behalf of the Debtor, we are obliged to inform the Examiners that it will be necessary to have a further extension. We suggest an adjournment until approximately the middle of August. The reason for the adjournment is that the experts in the Railroad Division of the Reconstruction Finance Corporation have not yet filed their final report, and considerable time will be required to study the report, and when we have reached our own conclusions we have to prepare further evidence in the light of the facts as developed.

Examiner Boyden: Has the report been made available to you yet for study?

Mr. Nicodemus: I have not seen a report. I was uptown in New York yesterday afternoon attending the Railway Express meeting and did not go back to my office afterwards, but Colonel Coulsen indicates that perhaps some data were sent. That would have been in late yesterday afternoon.

Mr. Coulsen: I believe that is so, but not a complete report, as I understand it, only some basic charts and data.

Mr. Willard: We have received nothing yet.

Mr. Nicodemus: The bondholders are not here, but my [2022] understanding is that they have appointed an expert who has been out over the road, and he is to comment on the report of the Railroad

Division. I presume it will take some time for him to make a study of the Railroad Division's report.

Examiner Boyden: Is any representative of the bondholders' committee here this morning?

Mr. Fletcher, could you advise us when the report of the Reconstruction Finance Corporation will be complete, so that the various parties can institute study of it?

Mr. Fletcher: I was advised about ten days ago that they expected it to be ready before the hearing of July 1st. As to when it will be ready I am not sure.

Examiner Boyden: It has not been presented yet to the parties, has it?

Mr. Fletcher: I do not believe so.

Examiner Boyden: Have any other parties any suggestions with respect to when we should proceed further with this hearing?

Mr. Willard: It all depends on when the report will come in from the Reconstruction Finance Corporation. If we could get something more definite from the Reconstruction Finance Corporation we could tell better how much time will be required.

(Discussion off the record.) [2023]

(A short recess was taken.)

Mr. Fletcher: The report prepared by the Reconstruction Finance Corporation is here and can be presented. The Reconstruction Finance Corporation has no objection to the continuance of this hearing to a date not later than 30 days from now.

Examiner Boyden: If the report is here ready

to be submitted, have you witnesses to submit the report?

Mr. Barriger: I have one witness here. The man principally in charge is not here, primarily because I understood that the bondholders were going to request an adjournment, and the Reconstruction Finance Corporation would have no objection thereto, which I supposed was proof positive that the adjournment would be granted. Therefore, there was no occasion to bring one of our men all the way from California to Washington, since there was some other work in California which he could advantageously do.

Our principal witness is in California, but one man is here, and we could get the other one on by airplane tomorrow.

Mr. Nicodemus: Is the man in California still engaged on this job?

Mr. Barriger: No, on another job.

Examiner Boyden: What is the desire of the parties? [2024] Do they wish to have the testimony taken as far as possible this morning, or copies of the report distributed and the report not be presented for the record until they have had an opportunity to review it?

Mr. Nicodemus: We think the latter is the only course that is practicable. The bond holders are not here. They relied upon an adjournment.

Examiner Boyden: There was no indication that there would be an adjournment.

Mr. Coulsen: If the Commission please, on behalf of A. C. James Company I would like to join in the suggestion made by Mr. Nicodemus on behalf of the company that a substantial adjournment be made, and at the same time urge that the parties to the proceeding be given an opportunity to look over the data that has been worked out by the Railroad Division of the Reconstruction Finance Corporation and give a careful study prior to the hearing at which it is brought up.

It seems to me that this study which Mr. Barriger's forces have made goes to the heart of the whole problem of readjusting the capital structure of the company, because until there is a sound determination as to the amount of new money required, you do not even have a starting point for a definitive plan, whatever talk we may have about the general scope. [2025]

I feel that under the circumstances here, with Mr. Barriger's report possibly and even presumably, from such indications as we have had, taking a position somewhat at variance with the proposals of the actual operating organization of the Western Pacific Railroad, and taking that in connection with the fact that that operating organization is in California, I think if we try to get along with an adjournment for the shorter period than the middle of August we are merely going to put the burden on the Commission of having another hearing at which all the parties will be forced to ask further adjournment.

Taking the necessity of bringing men on from California in conjunction with the fact that we are in the summer months, where so many people are not available for one reason or another for different periods, it seems to me that we will save time in the long run if we take an adjournment until the second half of August, which will give us all time to study these reports, and to contact with this expert whom the insurance companies have employed, as I understand the situation, and to endeavor to come before the Commission with some agreement on that one basic question that we need to start from, how much new money this property is going to require.

Examiner Boyden: If we adjourn now without having the Reconstruction Finance Corporation report formally [2026] presented for the record, is it going to be necessary for us to have a further adjournment to examine the testimony and the report when it is formally presented, or will the parties be able to go ahead from their study of the report at a later date when it is presented?

Mr. Coulsen: It seems to me that it would be quite feasible for us to proceed promptly at an adjourned hearing. The number of parties here is relatively small. There is no reason why we cannot all get together and make more rapid progress in informal consideration of the data that the Reconstruction Finance Corporation is going to present, and be ready, all of us, to present to the Commission such facts as seem necessary and proper for the formal record for consideration by the Commission,

all at one hearing, provided time enough is given for full consideration of these data and of the possibly conflicting viewpoints of the actual operating organization of the road, Mr. Barriger's organization, and this expert who I understand has been hired by the insurance companies who hold a substantial block of bonds in the property.

Mr. Willard: Perhaps Mr. Barriger can tell us whether his witnesses will go beyond the report.

Mr. Barriger: No, I think the report will speak for itself in its entirety. [2027]

Mr. Willard: The witnesses will just support the report?

Mr. Barriger: Yes.

Mr. Nicodemus: Why can you not file the report?

Mr. Barriger: We will do that and send you copies.

Might I ask one indulgence? If you had proceeded this morning we would have talked from our manuscript copy. I would like to have your indulgence to mail to you tonight or tomorrow the duplicate copies which are being prepared. Because we were working under considerable pressure to have everything done this morning, we would have talked from our manuscript copy today and asked permission to give you all the extra copies in 24 hours.

But I have the complete report here, and I think it says everything that any of our witnesses will say. If you want to develop the report further on cross examination, the witnesses will be available.

Mr. Nicodemus: Necessarily we would have to study it before we could do that.

(Discussion off the record.)

Examiner Boyden: Our calendar will require that this be set about August 25th. Is that acceptable to the parties?

Mr. Coulsen: It is acceptable.

Mr. Nicodemus: That is satisfactory. [2028]

Examiner Boyden: If we continue the hearing to that date, we should be able to proceed to a conclusion at that session?

Mr. Nicodemus: Yes.

Mr. Coulsen: Yes.

Examiner Boyden: I believe I should correct the statement I made to Mr. Nicodemus. There was a letter from the Director to the effect that if extension was asked for a date somewhere about the one I have suggested would have to be set.

Mr. Coulsen: Mr. Examiner, in connection with this matter of proceeding to a conclusion if possible on August 25th, which I think seems desirable to all parties here, I would like to ask whether there is any information as to whether there will be before the Commission at that time this plan which was referred to at the last extended hearing as a plan contemplated to be proposed by the insurance companies as an alternative to the company plan.

If that plan is to be before the Commission for consideration at the hearing on August 25th, I think we might save time by knowing about it before hand. I understand there was a certain informal fil-

ing with the Commission of that plan, but no formal presentation.

Examiner Boyden: Was there an informal submission of [2029] that plan to the other parties?

Mr. Coulsen: I think we have all seen proofs of the plan.

Examiner Boyden: Then if the plan is presented at that time, probably all of the parties will be ready to offer their objections to it at that time, do you not think so?

Mr. Coulsen: I think it would be helpful in preparing for the hearing if one knew more definitely whether it would be presented.

I think we could probably save time at that hearing.

Mr. Nicodemus: Mr. Examiner, in that connection, when the hearing on the Debtor's plan is under way, as I understand Section 77, no right exists to file another or different plan without leave.

Examiner Boyden: That is correct.

Mr. Nicodemus: So I think if there is any proponent of a new plan, he should be warned to apply to the Commission for leave to file it, then we will know who the proponents of the plan are and what the plan is.

Mr. Coulsen: I think Mr. Nicodemus has answered my question, Mr. Examiner.

Examiner Boyden: With respect to that, we are in receipt of a petition by Frederick H. Ecker, John W. Stedman, and Reeve Schley, as a committee representing [2030] certain institutional holders of

first mortgage bonds of the Western Pacific Railroad Company, and that petition has not as yet been acted upon by the Commission. It will be submitted to the Division and parties will be advised of the Commission's action.

We are also in receipt of a motion filed by counsel for the Western Pacific Railroad Company for an order striking from the files the petition to which I have just referred, or in the alternative for an order denying said petition, for reasons set forth in the motion. Have copies for this petition for leave to intervene and the motion with respect thereto been delivered to the parties?

Mr. Nicodemus: Copies have been delivered to Mr. Swaine. We understood that the Commission would distribute the extra copies under their own rule. If not, I will undertake to have the copies distributed.

Examiner Boyden: I believe you are correct in that. The Commission will distribute them.

This petition and the motion will be submitted to the Division and appropriate action taken and the parties advised. That will be attended to immediately, so that parties will have notice of what the situation will be when the hearing reconvenes.

Mr. Nicodemus: I furnished a copy to Colonel Coulsen. I am not sure that it was a final copy. [2031]

Mr. Coulsen: I do not believe so. I saw it yesterday or the day before. You furnished it rather tentatively.

Examiner Boyden: Is there anything further to come before this hearing?

If not, we will adjourn until August 25th at 10 o'clock, a. m.

(Whereupon, at 10:30 o'clock, a. m., an adjournment was taken until August 25, 1936, at 10 o'clock, a. m.) [2032]

Before the
Interstate Commerce Commission.

Finance Docket 10913

WESTERN PACIFIC RAILROAD COMPANY REORGANIZATION.

Anteroom B, I. C. C. Building,
Washington, D. C.,
Monday, September 28, 1936.

Met pursuant to adjournment at 10:00 o'clock a. m.

Before:

Examiner R. T. Boyden and
Examiner Harvey H. Wilkinson.

Appearances:

The same as heretofore noted.

Additional Appearances:

J. W. Barriger, III, T. A. Hamilton, and C. H. Halsper, Washington, D. C., appearing for Reconstruction Finance Corporation.

Orville W. Wood, (of counsel, Milbank, Tweed, Hope & Webb), 15 Broad Street, New York City, appearing for Trustees under Debtor's Mortgages. [2034]

PROCEEDINGS

Examiner Boyden: The Commission has assigned for further hearing this morning the matter of the Western Pacific Railroad Company Reorganization, Finance Docket No. 10913.

Are there any additional appearances?

Mr. Hamilton: Our appearance has already been entered, Mr. Boyden. Mr. Halsper and I are here. Mr. Barriger will be along in a little while.

Examiner Boyden: Are there any petitions of intervention to be filed?

(No response.)

Will you proceed, gentlemen?

Mr. Nicodemus: The Debtor is prepared to go forward. May counsel proceed?

Examiner Boyden: Yes.

Mr. Nicodemus: As the Examiners will recall, some months back an adjournment was taken to enable the Railroad Division of the Reconstruction Finance Corporation to make a survey of the property, and to analyze and consider the Debtor's rehabilitation program, and report whether in the judgment of its experts the program was sound and adequate.

At the same time the Institutional Bondholders' Committee designated Mr. E. P. Bracken to make a similar [2036] survey and report to them.

The experts of both the Reconstruction Finance Corporation and the Committee have completed their surveys and submitted reports.

We are very pleased to offer as one of the Debtor's exhibits the report submitted by the Railroad Division under date of July 1, 1936. We offer that without putting on any witnesses, believing that the report speaks for itself.

I do note that Mr. Barriger is present, and Mr. Hamilton, who participated in the work, is also present. If either of those gentlemen would like to submit any statement, we would be very glad to have them submit it at this time.

The Debtor has no comment to make other than to commend the report as an admirable document, and one that entirely confirms the judgment that had previously been reached by the management of the railroad company.

Unless those gentlemen have some statement to make, we offer the report as an exhibit. I should state that Mr. Swaine, counsel for the Institutional Bondholders Committee, has also requested that this report be filed as an exhibit.

Examiner Boyden: Has the Debtor any assurance or has the Commission any assurance that if there are any ques- [2037] tions that anyone wants to ask with respect to the report or its method of preparation, witnesses will be available to answer those questions?

Mr. Barriger: I think we may answer "Yes" to that question, Mr. Examiner.

Mr. Nicodemus: We make the same answer.

Mr. Barriger: I do not think that any statement is required now. Witnesses will be available at any time to answer questions about that report.

Mr. Swaine: I think it is only fair that I should state for the record that Mr. Bracken's report is substantially identical with the Reconstruction Finance Corporation report. It is my understanding that the report really was the composite work of Mr. Bracken and Mr. Hamilton, working together.

There is no substantial difference between the report as rendered by Mr. Bracken and that which has been introduced in evidence.

Mr. Boyden: Have you any witness that can identify the report? I mean, the Reconstruction Finance Corporation report.

Mr. Nicodemus: Mr. Hamilton is present.

Mr. Barriger: Mr. Hamilton will identify the report and answer any questions.

Mr. Nicodemus: I have one or two questions I would like [2038] to ask Mr. Hamilton, if he could be sworn as a witness and identified.

T. A. HAMILTON

was sworn and testified as follows:

Direct Examination

Q. (By Mr. Nicodemus) Mr. Hamilton, I hand you a document mimeographed in two volumes, entitled "Reconstruction Finance Corporation, Railroad Division, Report, Western Pacific Railroad."

(Testimony of T. A. Hamilton.)

This bears the facsimile signature of T. A. Hamilton and F. E. Lyford. I ask you if you are the Hamilton mentioned in that document.

A. Yes, sir.

Q. Do you identify that report in two volumes as a counterpart of the report which you submitted to the Railroad Division of the date which the report bears? I think it is July 1, 1936.

A. Yes, sir.

Q. Have you supplied copies of that to the Commission and interested counsel?

A. We have them here now, if they are desired, and we will see that they are supplied.

Mr. Nicodemus: We offer that in evidence.

Examiner Boyden: That will be marked Debtor's exhibit No. 37.

(Exhibit 37, Witness Hamilton, received in evidence.) [2039]

Examiner Boyden: Have you any further questions, Mr. Nicodemus?

Mr. Nicodemus: No, sir.

Examiner Boyden: Is there any cross examination?

Cross Examination

Q. (By Mr. Swaine) Mr. Hamilton, with reference to the estimated gross revenues of the property from January 1, 1936 through 1940, did you or your associates make any analysis of the estimates which had been supplied to you by the Debtor and

(Testimony of T. A. Hamilton.)

which I understand are the same estimates that have been introduced in evidence in this record?

A. No, sir, we made no such analysis. What we did was to take the revenues estimated for the future and their ton mile counterpart, turn that into the job of work which would be required of the plant, and we accepted those estimates for that purpose.

We did not analyze them or in any way compute them.

Q. Is it fair to say that the chart which follows page 38 of volume 1 and contains a projection of total operating revenues and freight revenues, with the word "estimate" in the upper right hand corner, does not represent your estimate but represents only the Debtor's estimate that we have heretofore had?

A. That is correct, sir.

Q. I do not understand that you are passing any opinion [2040] one way or the other on that estimate? A. No, sir.

Mr. Swaine: That is all.

Mr. Nicodemus: Thank you very much.

Examiner Wilkinson: I should like to ask one question, Mr. Hamilton:

Q. Would your report have been any different in the event that the revenues estimated for the future had been less than the amount estimated by the Debtor?

A. That would depend on how much less.

(Testimony of T. A. Hamilton.)

May I perhaps answer the question by telling you what use we made of those revenue estimates in our compilation?

Accepting them, we had them reduced by the officers of the company who made the revenue estimates to terms of ton miles. The freight movement of the property, of course, is by far the major basis of the earnings. We reduced those to terms of net ton miles. That is, they had computed the revenue based on those net ton miles spread over the years. We converted those into gross ton miles based upon their past relationship of net and gross, empty car haul, and all that sort of thing, and in doing that job of work by gross ton miles, by train districts, and operating divisions, we based our judgment of the physicial plant that would be required to economic- [2041] ally handle that volume of work, the weight of rail based on the gross ton miles expected to pass over it, the new engines that we recommended based upon the number of ton miles to be hauled; so that unless the reduction had been substantial or the increase in the revenues substantial, our figures would not have been much affected by them.

Does that make it quite clear?

Mr. Wilkinson: Yes.

Examiner Boyden: Are there any further questions?

Witness excused.

(Witness excused.)

Examiner Boyden: Have you anything further, Mr. Nicodemus?

Mr. Nicodemus: We have received from counsel for the Institutional Bondholders Committee a counterpart of the report submitted to them by Mr. E. P. Bracken. We should like to introduce as supplementary to the Reconstruction Finance Corporation's report the Bracken report. I recognize that to some extent, at least, it overlaps; certain of the exhibits are the same, and those have been omitted. But we would like to have this offered and accepted as the Debtor's exhibit.

In that connection, counsel for the Institutional Bondholders Committee have requested us to introduce one [2042] of the principal exhibits embodied in the Bracken report. They have not asked for the whole report, but as it seems to be logical to file with and as complementary and supplementary to the Reconstruction Finance Corporation report, I should like to offer it.

I have no way here to identify it. It is a photostat, but it is taken from the negative supplied by counsel for the Institutional Bondholders Committee.

Examiner Boyden: This is not the whole of the Bracken report, then?

Mr. Nicodemus: It is the whole of the Bracken report except the exhibits that also appear in the Reconstruction Finance Corporation's report.

Examiner Boyden: With this exhibit which you offered, the Reconstruction Finance Corporation re-

port, all of the Bracken report will be part of the record?

Mr. Nicodemus: Yes.

Examiner Boyden: But we do not know which of the Reconstruction Finance Corporation exhibits are part of the Bracken report.

Mr. Swaine: I think you can tell by the identification.

Mr. Nicodemus: They are identified in the body of this report.

Mr. Swaine: The references indicate which they were. In fact, my recollection is that they are numbered iden- [2043] tically as they are in the Reconstruction Finance Corporation report.

Mr. Nicodemus: I think they are.

Mr. Swaine: My recollection is that there are only two sentences in the entire report that differ from the Reconstruction Finance Corporation report.

Mr. Nicodemus: No, I think this exhibit 1 is entirely different.

Mr. Swaine: The supplemental letter?

Mr. Nicodemus: This exhibit 1 is different, the one that you asked to be put in.

Mr. Swaine: You mean, the revised estimate?

Mr. Nicodemus: The revised estimate dated June 24, 1936.

Mr. Swaine: Yes. I think it would be perhaps helpful if the Examiners knew what that was.

As a result of changes in the rehabilitation program, not very substantial, but some changes, the estimates of earnings made by the management were

changed, and Mr. Bracken supplied an exhibit showing the changes which would be required in the management's estimates of future earnings by reason of changes in the rehabilitation program. That is the exhibit to which Mr. Nicodemus referred.

Mr. Nicodemus: That would be exhibit 38. [2044]

Examiner Boyden: If any of the parties require it or if the Commission asks it, will you present a witness who will identify the exhibit and answer any questions with respect to it?

Mr. Swaine: We will assume that obligation; if either the Commission or any party wants Mr. Bracken, we will produce him.

Mr. Nicodemus: We could produce Mr. Bracken, but we could not produce him today.

Examiner Boyden: You have seen this exhibit, Mr. Swaine?

Mr. Swaine: Yes.

Examiner Boyden: Is there any objection to the receipt of exhibit 38?

Mr. Willard: May I see a copy of it? I have not yet seen it.

Mr. Swaine: I think in order to avoid any confusion it should be stated at this point that Mr. Bracken, like Mr. Hamilton, accepted the management's estimates of future earnings.

Mr. Nicodemus: The report so states, I believe. If it does not, it is a fact

Mr. Swaine: So that it should not be deemed to be his estimate?

Mr. Wilkinson: Mr. Swaine, when you say Mr. Bracken accepted the estimates, do you mean that he adopted them [2045] or that he agrees that the estimates as to the future are correct?

Mr. Swaine: No, I mean that, just as Mr. Hamilton stated, he assumed those estimates, and then from those computed the capital expenditures that might be necessary to do that volume of business. He made no independent analysis of future earnings or future operating expenses.

Examiner Boyden: Have you anything further to offer, Mr. Nicodemus? We will pass for the time being the ruling on this exhibit, until Mr. Willard has had an opportunity to look it over.

Mr. Willard: I notice that the letter dated July 1st on Mr. Hamilton's report states that the report has not been analyzed or examined with care by the directors of the Reconstruction Finance Corporation.

Has the Reconstruction Finance Corporation, since that time, had an opportunity to study it and to take any position with reference to it?

Mr. Barriger: You may recall that the chairman left Washington very early in July, and only returned last week. While he was away I do not believe that he had any opportunity to study this report.

Mr. Willard: It is still to be regarded as an individual report?

Mr. Barriger: Yes. [2046]

Mr. Willard: I have no objection to these going in as exhibits, then.

Examiner Boyden: Both exhibits 37 and 38 are received in evidence.

(Exhibit 38 was received in evidence.)

[Here follows Exhibit No. 38 continuing to page 2233.]

EXHIBIT NO. 38

E. P. BRACKEN
547 West Jackson Blvd.
Chicago

July 1, 1936.

Frederick H. Ecker, Esq.,
Chairman of the Board,
Metropolitan Life Insurance Co.,
New York, N. Y.

Robert T. Swaine,
15 Broad Street,
New York, N. Y.

Gentlemen:

I attach herewith to each of you, copy of report I have prepared in connection with the rehabilitation of the Western Pacific Railroad Company, the funds for which it is proposed to secure from the Reconstruction Finance Corporation in an amount not to exceed $10,000,000. The report is explanatory in itself, and was prepared after having spent a month's time on the property.

I shall hold myself in readiness to render any further service that may be desired in answering in detail any questions that may arise, or attending whatever conferences may be called where my presence is desired.

Very truly yours,

E. P. BRACKEN.

REPORT TO

Frederick H. Ecker, Esq.,
Chairman of the Board,
Metropolitan Life Insurance Co.,
New York, N. Y.

In the matter of a reorganization of the Western Pacific Railroad Company. Submitted by Mr. E. P. Bracken.

The adequacy of the proposed $10,000,000 loan to properly rehabilitate the road and furnish necessary additional facilities having been questioned by the Reconstruction Finance Corporation, it assigned a party to make an exhaustive study and report of the Railway's present and future requirements.

The party, consisting of representatives of the Reconstruction Finance Corporation, Bondholder's Committee, and the Railway Management, left Salt Lake City June 8, 1936 on inspection special, reaching San Francisco June 10, 1936. Inasmuch as the leaders of the RFC party had inspected the property in 1935 they, together with the officers of the Western Pacific and representative of the Bondholder's Committee, immediately considered the situation.

The recommendations contained in the report of the Reconstruction Finance Corporation are those finally agreed upon by the three interests, i. e., Reconstruction Finance Corporation, Bondholder's Committee and Western Pacific Railroad Company, as being necessary. (See Exhibits 1 to 4, inclusive, attached.)

Items requiring an additional expenditure approximating $600,000 were considered essential, but the inclusion of that sum will still make it possible to keep well within the proposed loan of $10,000,000.

The installation of treated ties will be started in 1937, the cost of which will be assumed by the Railway and currently charged to operating expenses.

The acquisition of new freight engines and cars, and a wrecking derrick will be handled by the Railway through an Equipment Trust, thus eliminating the necessity of any new money for these items.

Ruling of the Interstate Commerce Commission that operating charges incident to the rehabilitation program cannot be charged to Profit and Loss, will result in distortion of the Income Account. It is hoped that a modification of this ruling may be secured, in connection with which the attached Revised Forecast of Consolidated Income (Exhibit 1), which includes the additional expenditures involved, has been prepared showing the charges in each of the three years under review, i. e., 1936, 1937 and 1938.

This report does not deal with the financial status of the property, past or present.

The purpose of the report and exhibits attached, is to set forth, as determined by the studies under-

lying it, the needs of the property in improvement of fixed plant, existing motive power and cars, and the acquisition of additional motive power, other rolling stock, and appurtenances.

No improvements of any importance are needed on the branch line mileage, or on the Keddie-Bieber line. This report covers the Salt Lake-Oakland main line only.

Respectfully submitted,

E. P. BRACKEN.

Chicago, Illinois,
July 1, 1936.

2	7 Simple Articulated 4-6-6-4 Locomotives	140,000 each	980,000	———
3	Total Locomotives		$1,580,000	$ ———
	FREIGHT CARS AND MISCELLANEOUS			
4	400 Box Cars—all steel, 40-foot, 50-ton	$ 3,000 each	$ 600,000	$600,000
5	100 Flat Cars—all steel, 50-foot, 50-ton	2,000 each	100,000	100,000
6	50 Gondolas—all steel, 50-foot, 50-ton	2,200 each	———	110,000
7	100 Hopper Cars—All steel, selective dump	2,400 each	240,000	———
8	1 Wrecking Crane—200 ton capacity	85,000 each	85,000	———
9	Total Freight Cars and Miscellaneous		$1,025,000	$810,000
10	TOTAL NEW EQUIPMENT PURCHASES—1937, 1938		$2,605,000	$810,000

NOTE: If forecasts of revenues for 1936 to 1940, inclusive, are realized, additional motive power and cars will be required in addition to that shown above to properly handle such traffic in 1939 and 1940, but such requirements cannot be accurately forecast at this time. Two of the Company's present Equipment Trusts will be retired in 1938, another in 1941 and the last in 1943, and charges for future new equipment required in next 5 years can be expected after 1938 to total less than present charges.

Office of the President,
San Francisco, June 24, 1936.

48	105.44 Miles Ballast—Gravel (Eastern Division)	445,421	—	252,371	193,050	382,759
49	125.00 Miles Ballast—Gravel (In Paired Track District)	410,917(A)	—	105,840(A)	305,077	309,722(A)
50	294.48 Miles Total New Ballast	1,207,863(A)	—	581,776(A)	626,087	1,019,602(A)
51	Miscellaneous Items 10, 20-27, incl., 37, 38 and 39 above	671,608	4,369	29,859	637,380	643,098
52	Total Extraordinary Maintenance of Way & Structures—1936, 1937, 1938	$7,444,105(A)	$1,363,817	$3,326,506(A)	$2,753,782	$6,969,580(A)

Note A: Southern Pacific proportion of Paired Track expense is not included.

Note B: Cash required includes amounts equal to salvage of which a part will be subsequently sold as scrap, thus reimbursing cash to extent realized at time of sale.

Note C: Present plans contemplate passing track extensions at Bidwell, David, Blairsden and Merlin.

Note D: Program for 1936 now under way as shown above, but work proposed for the years 1937 and 1938 may eventually be modified as to order of precedence by changed requirements.

1940	286,649	27,559	314,208
1941	286,649	27,559	314,208
1942	286,649	27,559	314,208
1943	286,649	27,559	314,208
1944	286,649	30,968*	255,681
Total	$2,059,894	$161,945	$2,221,839
1945	142,118*	30,968*	173,086*
1946	202,118*	30,968*	233,086*
1947	502,208*	30,968*	533,176*
1948 to 1955—Same savings annually as for Year 1947.			

*Denotes red figures.

Red figures denote reduction in yearly expense as compared with present expense.

Note: The above additional expense for treated ties is based on continuing the use of untreated ties under that portion of the main line laid with old rail until the old rail has been replaced with new, a part of which will be done in 1937 and the balance completed in 1938.

Office of Chief Engineer,
San Francisco, California,
June 18, 1936.

[Endorsed]: Finance Docket No. 10913. Exhibit No. 38. Witness ..... Filed Sept. 28, 1936.

[End of Exhibit No. 38]

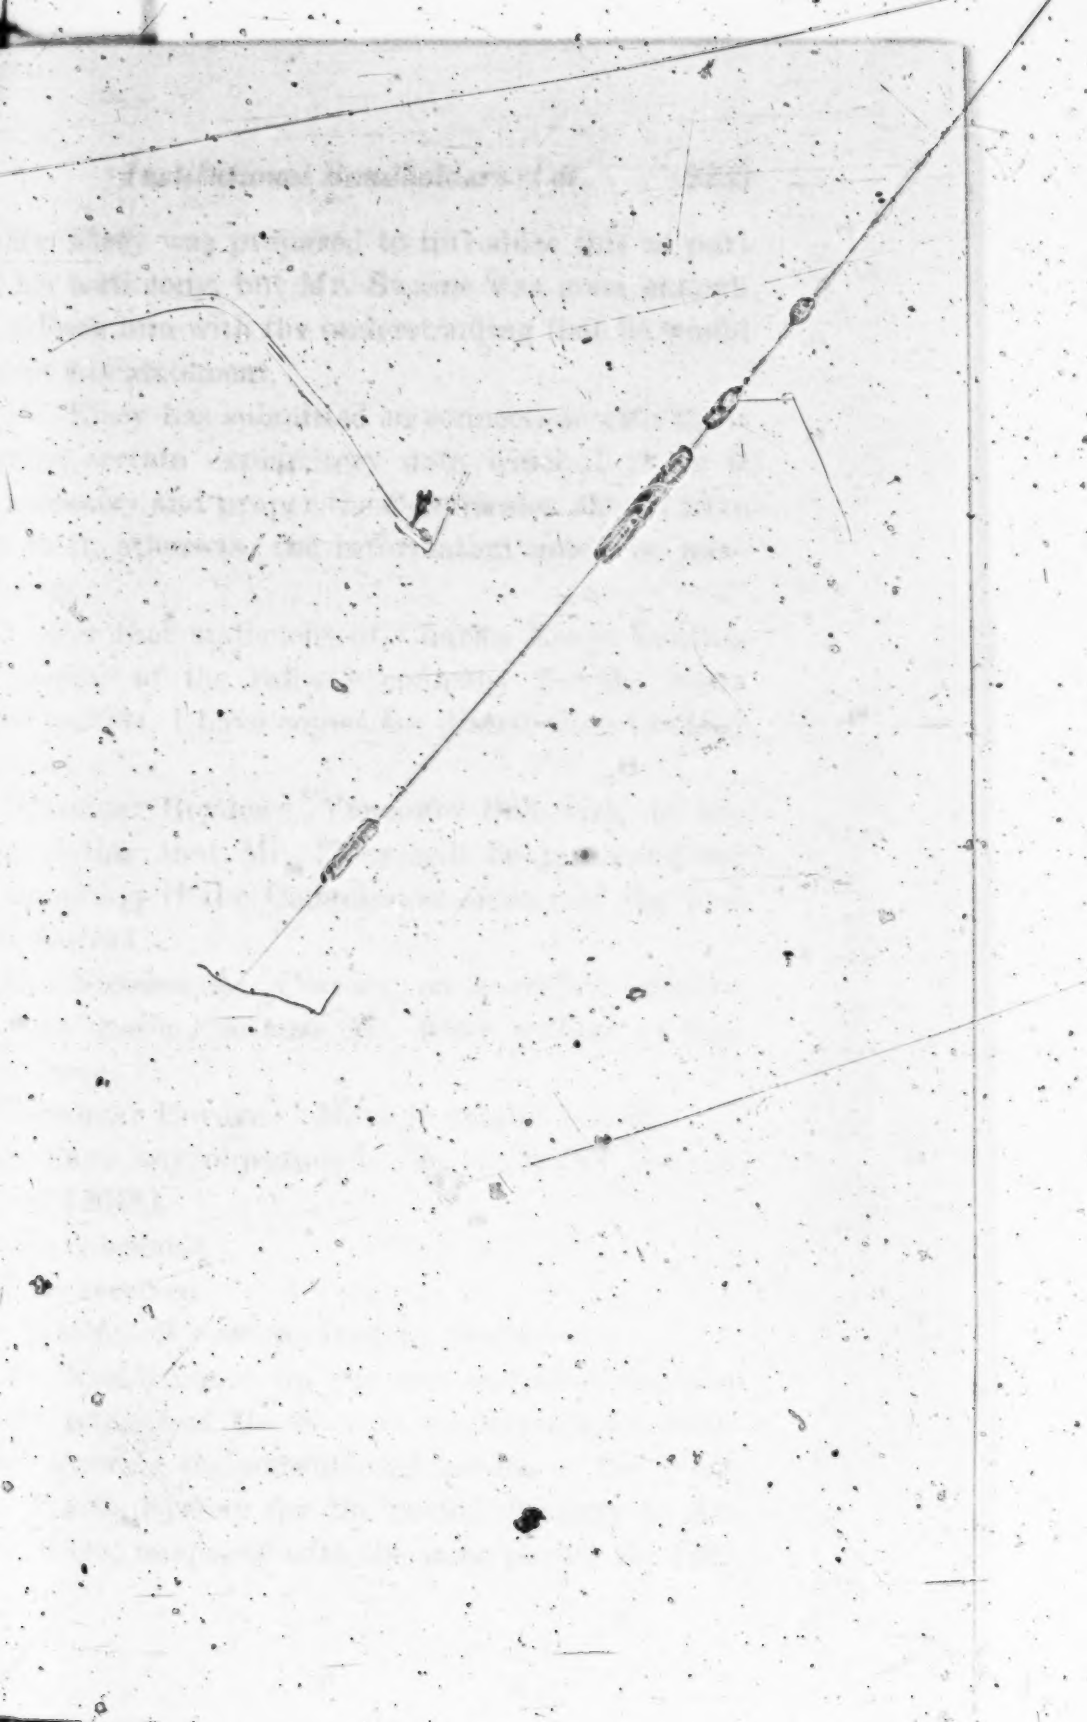
Mr. Nicodemus: Under date of August 25, 1936, the Interstate Commerce Commission, Division 4, filed in this proceeding a report of an accounting investigation of net income of the Western Pacific Railroad Company for the years 1930 to 1934, inclusive.

This was filed pursuant to paragraph 11 of subsection C of Section 77 of the Amended Bankruptcy Act.

Attached to this report is a theoretical income account of the Western Pacific Railroad Company for the years 1930 to 1934, that is, an income account restated so as to project backwards certain new items of expense and other adjustments.

Included in the income of the railroad company for each of these years was certain income accrued on the books and representing interest paid by or due from subsidiary companies. Certain of that interest was not earned, and counsel for the Institutional Bondholders Committee has requested that we submit to the Commission a statement showing the amounts of those respective items.

Incidentally, I wish to state that in this entire [2047] proceeding the carrier is relying upon the system accounts and not upon the accounts of the railroad company. That is to say, it is relying upon the consolidated income accounts while all intercompany items are eliminated; so it is not material from our standpoint, but we do wish to submit this statement pursuant to the request of counsel for the committee.



Mr. Elsey was prepared to introduce this as part of his testimony, but Mr. Swaine was good enough to release him with the understanding that he would accept his statement.

Mr. Elsey has submitted in connection with these figures certain explanatory data which I think it is necessary and proper the Commission should have before it, otherwise the information might be misleading.

I offer that statement of Charles Elsey, relating to income of the railway company for the years 1930 to 1934. I have copies for distribution to other counsel.

Examiner Boyden: You offer that with the understanding that Mr. Elsey will be presented for examination if the Commission or any of the parties desire?

Mr. Nicodemus: Correct, on a certain number of days' notice, because Mr. Elsey resides in San Francisco.

Examiner Boyden: Mark it exhibit No. 39.

Is there any objection to the receipt of this exhibit? [2048]

(No response.)

It is received.

(Exhibit 39 was received in evidence.)

Mr. Nicodemus: On our own initiative and also at the request of Mr. Swaine, we introduce a statement showing the consolidated income of the Western Pacific System for the period January to August, 1936, compared with the same period for 1935.

In that connection I should like to state that for many, many years, all of the net railway income of the carrier has been earned in the last quarter, so an eight months' statement is necessarily misleading unless it is made comparative, and unless you have some reasonably accurate estimate for what the next four months will be.

In offering this I should like to ask leave, after the case is closed, if practicable, to supply all of the counsel and the Commission from month to month with the actual results, so that if this case is held over until January 1st, you will have the actual for that 12 months.

Examiner Boyden: For what period do you want to figure those monthly statements?

Mr. Nicodemus: I would like to put them in as rapidly as they come in. It will be available each successive month on the 24th day of the following month. The information will ultimately be filed with the Commission, but [2049] it may be later.

Mr. Swaine: I think it would be very helpful to do that, to have the consolidated system income account sent down each month and by stipulation among counsel made part of the record, as long as the case is under advisement by the Commission.

Mr. Willard: I think so, too.

Examiner Boyden: Perhaps it would be helpful, too, Mr. Nicodemus, if you could give us the monthly figures for 1935 for the purpose of comparison.

Mr. Nicodemus: I will do that.

Mr. Swaine: They are on that.

Mr. Nicodemus: He means the subsequent statements.

Mr. Swaine: They can be in the same form as this one. This is a comparison of 1936 with 1935. Then if we ever get into 1937, I suppose you could make the same comparison as against 1936.

Mr. Nicodemus: Correct.

Examiner Boyden: My suggestion would be that you supplement this exhibit which your are now offering at this time as soon as possible with the monthly figures for the rest of 1935, which is not shown in that exhibit.

Mr. Nicodemus: Correct.

The next statement will be a nine months' statement, which will be compared as against September of 1935. [2050]

I offer this exhibit in evidence.

Examiner Boyden: Is there any objection?

(No response.)

Who prepared this exhibit?

Mr. Nicodemus: This was prepared by the president on the basis of data supplied him by the auditor.

Examiner Boyden: If necessary, you will present a witness to identify it and answer questions with respect to it?

Mr. Nicodemus: We will, with pleasure.

Examiner Boyden: Any objection?

(No response.)

It is received in evidence.

(Exhibit No. 40 was received in evidence.)

Examiner Boyden: As I understand it, counsel has stipulated that after the close of the record in this proceeding you may furnish monthly income system statements.

Mr. Swaine: Which will be part of the record?

Examiner Boyden: Which will be part of the record.

Mr. Nicodemus: That is very nice. Thank you.

Examiner Boyden: You may furnish those statements.

This exhibit No. 40, Mr. Nicodemus, sets forth information which was contained in your previous exhibits?

Mr. Nicodemus: Correct.

Examiner Boyden: And was prepared and represents the [2051] same information continued forward?

Mr. Nicodemus: Correct.

Accounting Department
San Francisco, California

September 9, 1938

(Endorsed) FILED
Oct 3, 1939

If you will permit me to go one step further, we made an estimate for the year 1936 in exhibit 29. I should now like to offer a comparison of the actual for the eight months with the estimate for the eight months as set forth in exhibit 29. That is similarly prepared. It was not requested by Mr. Swaine, but I am quite confident it is desired by Mr. Swaine.

Mr. Swaine: That is all right.

Mr. Wilkinson: Mr. Nicodemus, your estimate for 1936, which is already in the record, has not been broken down by months, has it? It was not broken down by months.

Mr. Nicodemus: My impression is that it was. I would have to check back.

Examiner Wilkinson: And this that you show here as exhibit 29 is your own computation of what you estimated for the eight months in exhibit 29, which has not been in the record heretofore?

Mr. Nicodemus: I think that is correct. Of course, it was necessarily a monthly breakdown for his work sheets.

Examiner Boyden: Is there any objection?

(No response.)

Examiner Boyden: It will be received, with the understanding that if witnesses are desired to be presented, the [2052] Debtor will present them.

(Exhibit 41 was received in evidence.)

Mr. Nicodemus: The Debtor's plan provides for a voting trust. This provision in the plan was insisted upon by the Institutional Bondholders Committee. We assented to it with great reluctance.

The condition upon which we accepted the voting trust was that the voting trustees should be nominated by the railroad company and approved by the bondholders' committee. The right of original selection was expressly reserved to the railroad company.

We have made nominations and the Committee has approved two. They have approved Mr. Albert G. Milbank and Mr. Frank L. Polk, but we have been unable to secure their approval of any other voting trustee.

We have refrained from offering any evidence as to the reason for that deadlock, but the fact is we have been unable to get their approval of a third trustee. In that situation we have no alternative but to submit to the Commission suitable names from which the Commission, if it approves our plan in its present form or in its modified form, may select a third voting trustee, if it goes forward with the voting idea.

We expect to submit four names.

First, Mr. Edward D. Duffield, president of Prudential Life Insurance Company. We have not consulted Mr. [2053] Duffield, but we are quite hopeful that if he is selected by the Commission, he will be willing to serve.

Mr. Swaine: I think I should say that we have already told you that Mr. Duffield will not serve, and cannot serve.

Mr. Nicodemus: We never received any such information.

Mr. Swaine: I told you that last summer when the name was first suggested, in April, long before we came down here, because his other engagements are such that he does not feel that he should serve. He would be an entirely acceptable person, of course.

Mr. Nicodemus: We are quite unaware of that communication.

Mr. Swaine: I told you or Mr. Schumacher at the time when the name came up.

Mr. Nicodemus: The second name we mention is the name of Mr. William Morgan Kingsley. Mr. Kingsley is president of the United States Trust Company, which is the trustee of the income mortgage, and he is the most logical person, it seems to us, to be on the voting trust that is primarily responsible to the income bondholders.

We also suggest Mr. William Church Osborn, and Mr. James H. Perkins.

Any one of those four men would be equally agreeable to us. [2054]

Examiner Boyden: Who are the two last mentioned gentlemen?

Mr. Nicodemus: Mr. William Church Osborn is a member of the New York bar, and very well known to a very large number of our security holders.

Mr. Perkins is president of the City Bank Farmers Trust Company.

Examiner Boyden: Can you give us the same information about the two nominees of the Debtor whom you first mentioned?

Mr. Nicodemus: Taking them in reserve order, Mr. Frank L. Polk was former Undersecretary of State, and he is a member of the firm of Davis, Polk, Wardwell, Gardner & Reed.

Mr. Milbank is, I think, president of the Milbank Foundation, and he is also head of the firm of Milbank, Tweed, Pope & Webb.

Examiner Bowden: A law firm?

Mr. Nicodemus: The Debtor rests, and is prepared to submit the case to the Commission.

Mr. Swaine: If the Examiners please, the persons who now constitute the formal Institutional Bondholders Committee, at a time before they were formerly organized as a Committee but were acting not only for their own three respective institutions, namely, the Metropolitan Life In- [2055] surance Company, the Prudential Life Insurance Company of America, and the Chase National Bank of the City of New York, but also informally for various institutions which subsequently constituted them a formal committee, participated in the negotiation of the Debtor's plan, and a number of the provisions of the Debtor's Plan as offered by the Debtor were the suggestions of that committee.

The plan as finally prepared by the Debtor and proposed by the Debtor in this proceeding was accepted by the three members of the then informal committee in behalf of their own institutional holdings, and in the sense that they had agreed that they would recommend it to other institutional holders, but conditioned on the acceptance of the plan by

the principal creditors of the other classes, particularly the acceptance of the commitment by the Reconstruction Finance Corporation and also acceptance by the Railroad Credit Corporation.

In connection with the matter of the Railroad Credit Corporation, certain legal questions were pointed out by counsel to the Committee to counsel for the Debtor, and a statement was made that certain modifications within defined limits might be made in the treatment accorded Railroad Credit Corporation as a condition of getting its acceptance to the plan. [2056]

At the hearings which we have thus far had in the reorganization proceeding, every class of creditors or every important creditor other than the institutional bondholders, being particularly Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company, have appeared and objected to the plan and stated it was unacceptable to them.

The evidence introduced has also raised great questions in the minds of the Committee as to whether it would be wise to proceed with a capitalization of this character, particular whether the debt structure that is contemplated would be regarded as in the public interest by the Interstate Commerce Commission, quite apart from the question as to whether it was wise from the standpoint of the investors in the property.

In order, therefore, that the Commission might not be left without any alternative suggestion or

any plan based upon a different approach to the problem, the committee has prepared, and I now desire to propose on behalf of Metropolitan Life Insurance Company as the holder of $6,852,400 principal amount of first mortgage bonds of the Debtor; the Prudential Insurance Company of America, as the holder of $3,000,000 of the principal amount of said bonds; Travelers Insurance Company, as the holder of $200,000 principal amount of said bonds; New York Life [2057] Insurance Company, as the holder of $1,300,000 of said bonds; the Mutual Benefit Life Insurance Company, as the holder of $500,000 of said bonds; Home Life Insurance Company as the holder of $300,000 of said bonds; John Hancock Mutual Life Insurance Company, as the holder of $300,000 of said bonds, and the Chase National Bank of the City of New York as the owner of $25,000 of said bonds, and so far as it has an interest therein, as pledgee of $4,464,000 principal amount of said bonds which are pledged with it to secure obligations of the Western Pacific Corporation which are now in default, a plan of reorganization of the Western Pacific Railroad Company, which I now offer.

Mr. Nicodemus: The Debtor objects to the filing of the plan and asks permission to state its grounds in the record.

Examiner Boyden: Proceed with the statement.

Mr. Nicodemus: By the terms of Section 77 (d) of the Bankruptcy Act, no plan of reorganization may be filed during the hearings provided for by

that section, except with the consent of the Commission.

The Commission should decline to permit the Institutional Bondholders Committee or any group of bondholders represented by said Committee, to file a plan of reorganization, for each and all of the following reasons: [2058]

First, that said Committee and the two principal bondholders represented by said Committee, namely, the Metropolitan Life Insurance Company and the Prudential Insurance Company, prepared, promulgated, and procured the filing by the Debtor as its plan, to which they agreed to give their unconditional support, the plan filed herein on February 7, 1936, and these same interests cannot now file a new plan consistently with the principles of good faith to the Debtor.

Second, that the Debtor's plan filed herein on February 7, 1936, was a compromise plan which involved substantial concessions to such Committee and the said institutions, which would not have been made except for the unconditional commitment of said Committee and said institutions to support said plan and to cooperate with the Debtor in bringing about an early and economical reorganization of the Debtor, and the Commission should not aid the Committee in withholding their part of the bargain and thereby hindering and delaying an early reorganization of the property.

Third, that the Debtor's plan filed herein on February 7, 1936, is based upon sound principles and

may readily be modified in detail to meet any new views consistent therewith which said Committee may now desire to submit to the Commission. [2059]

Fourth, that there are more than 4500 individual and corporate holders of First Mortgage Bonds of the Debtor, only 9 of whom are represented by this Committee. In many respects, the interests of these small individual and corporate bondholders are different from and in conflict with the interests and objectives of the nine institutions represented by said Committee.

The individual and small corporate bondholders as a class need their income currently, whereas the nine institutions represented by said Committee not only do not need their income currently, but may for many reasons find it greatly to their interest to delay reorganization and take their income five or ten years hence in the form of an increment to capital.

The Debtor submits that the filing of a new plan by said Committee before the Commission has acted upon the pending plan is not necessary and will invite long and costly litigation.

If however, a new plan is to be filed on behalf of first mortgage bondholders, the Commission should not permit it to be filed by said Committee, but should require the organization under Section 77 (p) of a representative committee that will sponsor an early reorganization on terms fair and equitable to junior creditors and stockholders. [2060]

Examiner Boyden: Referring to your last statement there, you do not, as I understand it, take the position that this Committee cannot legally present the plan?

Mr. Nicodemus: I think it is very misleading to the public to have a committee that under the law cannot represent the small bondholders.

Examiner Boyden: But your answer to my question is "No", is that correct?

Mr. Nicodemus: No.

Mr. Swaine: In that connection, it should be pointed out that this plan provides that if the plan is approved by the Commission, the Committee will qualify to represent all bondholders as a general committee. It is my understanding that in the other proceedings, plans have been proposed by such committees.

Mr. Nicodemus: With reference to the conditions, I am obliged to state that at no conference at which I was present—and I have been present at all of them—was any condition ever imposed by this Committee on its approval of our plan. At the very last conference, which immediately preceded the filing of the plan, counsel for the Committee asked that the Committee impose as a condition that the Debtor first obtain the approval of the plan by the Reconstruction Finance Corporation. We protested, and counsel was overruled, and the Committee [2061] agreed that the plan might be filed without any such condition as was asked by their own counsel.

Therefore, I am at a loss to understand how counsel for the Committee has repeatedly reasserted that there was a condition imposed. The approval of this plan by the Debtor, its submission by these Institutional Bondholders to the Debtor, took place on June 23, 1935, and the minutes clearly show that no condition was imposed.

These bondholders submitted the plan to the Debtor and the Debtor was the interest that accepted the plan.

So for all the reasons that we have outlined above, we ask that the Commission refuse to exercise its discretionary authority to permit this new plan to be filed.

Mr. Swaine: I think it is unfortunate a perhaps irrelevant question of personal veracity should be introduced. All I can say is that I, too, attended every one of the conferences except one, and the members of the Committee agreed with me, first, that this plan was not promulgated at any time by this Committee.

As I stated in introducing our own plan, we participated in the negotiations, and many things in the Debtor's plan were the result of concessions to the Committee.

But the plan was not prepared by the Committee. As its counsel I had absolutely nothing to do with the [2062] printing of the plan. The printing was entirely in the hands of Mr. Nicodemus, and many suggestions which I made were rejected.

The Committee is also entirely in accord with me in the view that our commitment has at all times been conditioned on, first, that the plan proceed promptly; second, that it be accepted by the Reconstruction Finance Corporation; third, that it be made acceptable to the Railroad Credit Corporation; and fourth, that the modification which I proposed at the first hearing with regard to insuring dissenting classes of creditors a cash alternative, should be embodied in the plan.

I do not believe, however, that that is relevant. Let us assume for the sake of the argument that the Committee did accept this plan unconditionally in the summer of 1935. I submit that there is nothing, either in law or morals, which prevents the Committee in the face of all the evidence in this record, in the face of the additional evidence that we have of the Commission's point of view through statements that have been made in the hearings, not only in this proceeding but in many other reorganization proceedings.

At this time, from coming forward and saying that it perhaps was mistaken before, and that it feels that in the interest, not only of the bondholders but of the [2063] public a plan more along some other lines to be suggested

For that reason I will adhere to the proposal of the plan and ask the Commission's leave to propose it.

Examiner Boyden: The objections of counsel for the Debtor with respect to the proposing of this

plan are overruled, and the plan received for the purposes of this hearing.

In order that the record may be clear, I believe it should be assigned exhibit No. 42.

(Exhibit No. 42 was received in evidence.)

[Printer's Note: Exhibit No. 42 is here omitted as same is identical with "Suggested Plan of Reorganization of the Western Pacific Railroad Company. Effective Date January 1, 1937" set out at page 48 of this printed record.]

Mr. Swaine: The Institutional Bondholders Committee desires to introduce no additional evidence. It rests the plan upon the evidence introduced by the Debtor.

I want to make, however, one statement in respect to a provision of the plan:

The plan contemplates that the new money shall be raised by the issue of ten million dollars of new first mortgage bonds.

The plan states that it is hoped that those can be 4 per cent bonds, maturing in 1967, redeemable at par and accrued interest.

Inasmuch, however, as the time at which the new bonds will be offered to raise the new money cannot now be definitely foretold, and the conditions that may exist in [2064] the money market at that time cannot now be known, the plan provides that with the approval of the Commission and the court, the interest rate on those bonds may be increased to not more than 5 per cent, the period of their

maturity may be shortened to not earlier than February 1, 1952, and a premium for redemption may be granted not exceeding 5 per cent.

The plan contemplates that these bonds, together with blocks of stock, shall be offered to raise the new money, first, to the sole stockholder and junior creditor of the Debtor, namely, the Western Pacific Corporation.

To the extent that the offer is not availed of by that corporation, the right is granted to the holders of the junior mortgage bonds of the Debtor as collateral, namely, the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Corporation, in the proportions in which they held those junior bonds as collateral, with the right in any one of them to take any part of the new bonds and stock not taken by the other holders of those bonds as collateral; and to the extent that they do not take the new bonds and stock and provide the new money, the right is afforded to the first mortgage bondholders to take the new bonds with blocks of stock.

The plan contemplates the possibility of underwriting. No underwriting agreement has been made as yet, because [2065] you cannot tell either what the terms of the bonds will be, if they are offered some time in the next year, or what a proper underwriting commission would then be, it being felt that that is a detail which should be passed upon by the Commission and the court at the time the plan is ready to go forward.

The Institutional First Mortgage Bondholders, were the plan to be promulgated today, authorize me to state that they do not believe any underwriting would be necessary, as the bonds upon the terms provided in the plan, namely 4 per cent bonds maturing in 1967, together with the stock which goes with them, would in their judgment be sufficiently attractive that they themselves would be willing not only to take the bonds which are attributable to their own bonds, but to arrange for taking up the balance of the ten million dollars.

They ask that that assurance be given in the light of present conditions, and with the understanding that as conditions change, it might be necessary to make modifications within the framework provided in this plan.

Examiner Boyden: Was this plan worked out, Mr. Swaine, in the light of the reports which we have now in the record as to the probable amount of money which it would take to restore the property of the Debtor?

Mr. Swaine: Yes. [2066]

Mr. Coulson: Is it proper, in view of the fact that this plan is not presented by a witness, to ask counsel for the Committee of Institutional Bondholders a question or two about it for information?

Examiner Boyden: Yes, indeed.

Mr. Coulson: Mr. Swaine, in the original plan which was presented as the Company plan, as I understand it the new money came in on an equal footing as to security with a part of the first mortgage

bond money. I understood the justification for that to be that it was expected the Reconstruction Finance Corporation would furnish that new money and would receive as part compensation therefor the advance of their existing debt to a higher rank as a creditor than it would otherwise have.

In a hasty examination of your plan today, I note that you still have the new money come in with an equal footing as to security with a part of your first mortgage debt and without the feature of it being provided by the Reconstruction Finance Corporation, with the resultant acceleration of part of the debt.

What are the factors which lead your Committee to suggest making this new money, which is to be offered initially to stockholders and then to junior debtors, take equal rank with a part of your first mortgage debt, instead of being prior to it, as would normally be the [2067] situation?

Mr. Swaine: I object to your statement, "as would normally be the situation."

Mr. Coulson: I do not know of any instances where that would be the fact.

Mr. Swaine: I could go to most of the reorganizations of recent years and show you many, the last St. Paul reorganization, for instance.

Mr. Coulson: I should be glad to.

Mr. Swaine: There the assessment was over sixty millions of dollars. The bond was not a first mortgage bond, indeed, it was a third mortgage bond on part of the property.

As I understand the ruling principle, it is that the bonds should be sufficiently good to attract the new money but not so good as to do any unnecessary damage to any other interest in the situation.

It is the view of our Committee that with the reduced amount of first mortgage bonds which this plan contemplates—in that connection, let me interpolate the Debtor's plan gives the first mortgage bondholders 30 per cent of the fixed charge obligations.

We doubted that we could get that good treatment in the light of the earnings record and have our bonds really good, and therefore, ourselves suggested that we be cut to 20 per cent. That means that there is a total issue [2068] under this plan of twenty million dollars of first mortgage bonds.

It is the view of our Committee that those bonds are absolutely good, that the probability is that their interest will be earned twice over within a few years, so that they can very quickly become legal investments, and ought to stay legal investments; and they are, therefore, good enough to provide the new money, and the best evidence of that is that we are prepared to take them ourselves on the terms on which the plan proposes to offer them, to provide the new money.

We therefore do not think it either advisable or necessary that the bonds to be issued to provide the new money should be the sole first lien, that is, should be so issued that there would be only ten million dollars instead of twenty million dollars

of first mortgage bonds, as our plan contemplates, for by so doing the position of the first mortgage bondholders would be unnecessarily depressed.

Mr. Coulson: I still think it is proper to suggest to counsel for the Institutional Bondholders that if this failure to make new a prior lien on the property is to be pressed by his Committee, the Commission might well be furnished with instances of reorganizations other than the St. Paul reorganization, which, for obvious reasons, [2069] both because it was Mr. Swaine's workmanship and because it has not been particularly successful, ought not to be an example.

I would like to know of instances where new money comes in.

Mr. Swaine: Has there been any successful reorganization over the last twenty years?

Mr. Coulson: Oh, there have been many. History has not changed much.

Mr. Swaine: No, there have not.

Mr. Coulson: I think it would be proper to ask, and I would like to know for my own information whether there are justifications for this new money coming in, if it is to be offered to the equity and then the junior debt, except as prior lien money.

Examiner Boyden: I think this is a matter that might well be discussed on brief.

Mr. Coulson: I think it is, but I would be glad to have the information as to other instances, if I could get that pertinent information.

Mr. Swaine: We will supply for the Commission a statement of the securities that have been issued

for new money in all the railroad reorganizations in the last say 25 years.

Mr. Coulson: I would like to ask one further question [2070] about it, whether your Committee has considered and determined whether the securities issued to the first mortgage bondholders and other creditors for accrued and unpaid interest, unearned interest, will constitute taxable income to the security holders receiving such securities.

Mr. Swaine: We have considered the problem, and if you will note, it is not stated that these securities are received in respect of interest, it is merely stated that the first mortgage bondholders, and, similarly, the three junior creditors, the Reconstruction Finance Corporation, the Railroad Credit Corporation and A. C. James Company, will receive something which is equal to the aggregate value of their present obligations, plus all interest accrued to January 1, 1937.

It is not stated that they are receiving it specifically for interest.

Mr. Coulson: Was there any determination by your Committee as to its taxable character?

Mr. Swaine: No. Indeed, I understand that there is a certain lack of unanimity among lawyers on that question.

Mr. Coulson: Has any estimate been made by your Committee as to the taxable burdens involved in accumulating the capital fund contemplated by this plan?

Mr. Swaine: Yes, we have, and they are substantially the same as the tax burdens which would re-

sult from the [2071] Debtor's plan. We have made computations under both plans, and there is no substantial difference in that respect.

Mr. Coulson: I may say to the Commission that, of course, as representing the A. C. James Company, I am very much interested in the feature that I note in this plan of putting the A. C. James Company in a relative status in its class of junior creditors based not on the debt, not on its advances, but on the gross amount of security by way of collateral held by that creditor and other creditors.

However, that is a matter which is perhaps, as the Examiner suggested, one that may be dealt with better by brief than by an attempt to find out the theory or basis of such classification of junior creditors at this time.

Examiner Boyden: Of course, that may be a matter considering which counsel could present expert testimony, if you desire to do so. I am not trying to foreclose you at this time from doing that if you desire to.

Mr. Coulson: I make this suggestion, Mr. Examiner: If we are to have before the Commission in this proceeding not one plan, but with suggestions for modification, which is the theory on which I had hoped these proceedings would go forward, but a number of plans, I think it might be well and desirable for the Commission to bear in [2072] mind that ample time after today's hearing ought to be given to other creditors to present plans, if the pres-

entation of ideas as to the plan is to be in that fashion.

I was not entirely happy with Mr. Swaine's statement that the A. C. James Company objected to the company plan. It did object strenuously to certain features of that plan, which it outlined in its petition of intervention, which seemed to make this attempted plan of reorganization unnecessarily complicated and be undesirable in many respects.

It did state, however, an adherence to the general principle of the plan.

As to the plan which Mr. Swaine has now presented, it seems to me so far as the creditor I represent is concerned, equally objectionable, not merely from the standpoint of that creditor's interest as a junior debtor, but objectionable in many many respects that run to the public interest and are matters which will be considered before the Commission.

I would like, myself, opportunity to consider the question whether those factors and those conditions are best presented to the Commission through briefs submitted which comment on the features which seem to us clearly undesirable as to both the plans, or whether it would be better to make the attempt to further complicate the [2073] target here by putting in the third suggested plan, which might be somewhat simpler—at least, I hope it would be somewhat simpler—in structure than either of those now before the Commission.

I do ask, therefore, that the parties be given ample time to consider and determine that question.

Mr. Swaine: As far as I am concerned, of course, I would expect ample time, which I would say would be about thirty days, but I want in that connection to point out to the Examiners that Mr. Coulson as well as all the other counsel have had proofs of this plan substantially as it is ever since back in March or April, and that it was, as they knew, the intention to propose this plan in April but at their request it was withheld in the hope that as the result of meetings that we might have an agreement could be reached.

We have spent all the time without any agreement having been reached, and therefore there should not be any surprise on the part of anybody, and we ought to be able to move with reasonable expedition.

Mr. Coulson: Let me just a moment correct on the record the implication, which I do not like, that I have been riding on my oars here. I wrote Mr. Swaine early in the summer and asked him whether there was any intention of presenting this plan, when I first received a [2074] copy, and was told no determination had been made at all. I talked to Mr. Stedman of his Committee, Mr. Ecker being in England, more than three weeks ago and asked him the specific question whether the plan was going to be presented, as, if it was to be presented, I wanted to study it.

He said no decision had been made. I have not been resting on my oars here.

Mr. Swaine: The absence of decision was looking toward a possible agreement.

Mr. Coulson: I did not request that you not file the plan.

Mr. Swaine: No, you did not.

Mr. Nicodemus: We certainly never made any such request.

Examiner Boyden: If any of the parties desire a witness to be put on the stand with respect to your plan, you will present such a witness?

Mr. Swaine: I am wiling to be the witness, myself, right here and now.

Mr. Nicodemus: The 30-day period that Mr. Swaine mentioned is for filing briefs or to give creditors an opportunity to file a third plan? I did not quite understand. The thirty days is not an adequate time for us to prepare a brief in support of our plan and to analyze his. [2075]

Mr. Coulson: I do not think it is adequate for either purpose. With two plans before us, we then are faced with equal complications, wholly aside from this controversy as to the voice of Jacob and the hand of Esau, and vice versa. But they both are complicated, they both need to be studied in the light of the record, and I think that thirty days is a quite inadequate period to put in a brief. It is certainly inadequate if any of us undertake the labors of preparing a plan which does strive for some simplicity.

Examiner Boyden: Could you not advise the Commission within thirty days whether or not you desire to present a plan, Mr. Coulson?

Mr. Coulson: I could not prepare either an

adequate brief or a plan within thirty days. I might very well arrive at a conclusion then, but it seems to me thirty days is a short period for the problem that is presented by this double target that has been set up for us, if we are going to be genuinely helpful to the Commission in its consideration.

Mr. Swaine: The A. C. James Company intervening petition specified in great detail the modifications, I will call them, instead of objections, in order to be more euphonious, Mr. Coulson, which the A. C. James Company desire to have made in the Debtor's plan. That was filed [2076] in April, so that Mr. Coulson had fairly well matured his ideas as early as April. And with cogitation interrupted only by a short vacation, perhaps he can do this in less time than he anticipates.

Mr. Coulson: That was not at all in the light of the record, that was merely an attempt to specify for the Commission some of the incidents of the Company plan which we thought deserved consideration in the hearings, and it was the purpose of the summary specification in the intervention petition.

Mr. Swaine: All counsel should, of course, have adequate opportunity to analyze and attempt to solve any problem that lies in this record. On the other hand, this is a comparatively simple situation, and I think we ought to strive to make good on the statements that were given out by the Debtor's management in the summer of the 1936 that this was going to be one of the earliest reorganized railroads.

Mr. Nicodemus: It would have been.

Mr. Swaine: We would like to move ahead with as great expedition as is consistent with giving all parties reasonable opportunity to present their views.

Mr. Nicodemus: We came down here at the first hearing and found that we had a bitter adversary that we had not anticipated. [2077]

Examiner Boyden: Mr. Nicodemus, with respect to my request that you furnish monthly income statements for the last part of 1935, I was under the impression at that time that you had in the record, in your exhibit 40, monthly figures for the first part of 1936.

Since you do not have those, may I ask that you furnish those with the other?

Mr. Nicodemus: I will be glad to. You want a monthly breakdown of exhibit 40?

Examiner Boyden: Yes, for the first eight months of 1936, as well as of the monthly figures for all of 1935.

Mr. Nicodemus: I will have that within ten days.

Examiner Boyden: It seems advisable that this proceeding be adjourned in order to give counsel an opportunity to review the record and determine the course of action that they desire to follow.

For that reason, the hearing is adjourned until October 26th. In the meantime, counsel for the Debtor will furnish the information that has been requested.

Mr. Swaine: Is the purpose of this adjustment

to have oral argument if counsel decides not to present another plan?

Examiner Boyden: If counsel desires not to present another plan, it would seem that the hearing could be closed and a date set for briefs by order of the Commission [2072] without calling the hearing again.

Mr. Nicodemus: That is what we would like to have.

Examiner Boyden: If Mr. Coulson or other parties will advise the Commission of their conclusions as to whether or not anything further will be presented, that will facilitate a decision in that matter. Otherwise, the Commission will have to call the hearing on that date.

Mr. Swaine: That is, on the 26th?

Examiner Boyden: On the 26th.

Mr. Swaine: Otherwise we will get a notice fixing the date for the filing of briefs and argument before the Commission?

Examiner Boyden: If the Commission is advised that no further proceedings are necessary sufficiently in advance of October 26th so that the order can be issued and the parties notified, the proceeding will be terminated in that way.

Mr. Coulson: Do I understand, Mr. Examiner, that if it is desired to have further testimony introduced at that time, because of questions that are suggested by careful examination of Mr. Swaine's plan as presented today, it will be possible to do that

by timely notice at that adjourned hearing on the 26th of October?

Examiner Boyden: That will be perfectly proper, but I believe that any party should notify the other parties [2079] sufficiently in advance of the hearing so that the parties can have the witnesses here on that date.

Mr. Coulson: Yes.

Mr. Nicodemus: If no witnesses are required, then what happens? The Commission closes the case and fixes a date for filing briefs?

Examiner Boyden: If the parties decide that no hearing is necessary on that date, the Commission will close the case and set a date for filing briefs.

Mr. Nicodemus: We could shorten up that time if we started to work on the briefs right away on the theory that there would be no hearing on the 26th.

Mr. Swaine: That is a very happy suggestion.

(Whereupon, at 11:30 o'clock a. m, an adjournment was taken until 10:00 o'clock a. m., Monday, October 26, 1936.) [2080]

Before the
Interstate Commerce Commission
Finance Docket 10913
WESTERN PACIFIC RAILROAD
COMPANY REORGANIZATION.

Anteroom A, I. C. C. Building,
Washington, D. C.,
Monday, October 26, 1936.

Met pursuant to adjournment at 10 o'clock a. m.
Before:

Examiner Harvey H. Wilkinson.

Appearances:
Same as heretofore noted, and
James L. Homire, Washington, D. C. appearing for Reconstruction Finance Corporation. [2082]

Proceedings

Examiner Wilkinson: Are you ready to proceed with the hearing in Finance Docket No. 10913?

Mr. Nicodemus: The Debtor is prepared to go forward.

Mr. Wood: Before we proceed, Mr. Examiner, I would like to file a petition of the trustees of the Western Pacific Company first mortgage for leave to intervene.

Mr. Nicodemus: No objection on the part of the Debtor.

Mr. Swaine: No objection on the part of the bondholders.

Examiner Wilkinson: The petition of trustees of the Western Pacific Railroad Company First Mortgage, dated June 26, 1916, for leave to intervene is received and granted.

(The petition for leave to intervene of the trustees of the Western Pacific Railroad Company First Mortgage, dated June 26, 1916, was received and granted.)

Examiner Wilkinson: Will you supply copies to the parties to the proceeding, please?

Mr. Wood: I have as many copies as you will need here.

Examiner Wilkinson: In that connection I note from the record that while the petition of the A. C. James Company for leave to intervene was received, the record does not show that it was granted. [2085]

Let the record show that it is granted on the date that it was filed.

Mr. Coulson: Thank you.

Mr. Nicodemus: There are one or two things that we would like to clear up first this morning.

Examiner Boyden asked for an exhibit which I would like to get in. We offer, pursuant to the request of the Examiner, a new exhibit which is the "Consolidated Revenues, Expenses and Income" of the Western Pacific System for the months January to August, 1936, broken down by months, and a similar statement for the calendar year 1935.

Examiner Wilkinson: Are they two separate statements?

Mr. Nicodemus: No. They are separate, but we will offer them as a single exhibit. We have enough copies for distribution to counsel.

Examiner Wilkinson: The two statements just referred to by counsel will be received as Exhibit No. 43, if there are no objections.

(Exhibit No. 43, by counsel, received in evidence.)

Mr. Nicodemus: Section 8 of the Debtor's plan, in subdivision A and subdivision C refers to certain unsecured claims against the Debtor.

Since the last hearing counsel for the Institutional Bondholders has requested a statement showing the [2086] amount of those claims. I have received such a statement from the general auditor, and introduce it as our exhibit tendered at the request of Mr. Swaine. That is also in sufficient numbers for distribution.

Examiner Wilkinson: Is there any objection to the receipt of this statement in evidence?

(No response.)

Statement entitled "Estimate of the Probable Payments after October 24, 1936 on claims incurred Prior to August 2, 1935," is received as Exhibit No. 44.

(Exhibit No. 44 received in evidence.)

Mr. Nicodemus: That concludes the Debtor's case on direct.

Mr. Swaine: The plan proposed by the Institutional Bondholders' Committee on page 3 in the introductory statement makes this statement:

"Since all other classes of securities of the railroad company other than the equipment obligations are entirely junior in lien to the first mortgage, obviously any stock so allotted to the present first mortgage bondholders should have rights as to both assets and income prior to those stocks allotted to such other creditors and stockholders of the railroad company."

In correspondence since the last hearing Mr. Willard, representing the Railroad Credit Corporation, [2087] has indicated that he questions the accuracy of the statement upon which the conclusion is based, namely, that all other classes of securities other than equipment obligations are entirely junior in lien to the first mortgage.

When I drew that I honestly believe it was so, because it so stated in the manuals and in all the documents which I had ever read describing the bonds.

I have just checked, and I find that there are certain stocks of certain subsidiary companies as to which there is a record indicating whether or not they have value in this proceeding. At this hearing I would like to have the trustee bring more precise proof as to the exact lien of the first mortgage and the securities that are pledged under the General and Refunding Mortgage.

Also since the last hearing there has been a question raised by some bondholders as to the exact meaning of Clause 3 on page 8 of the Bondholders' Plan. That clause provides that "any then remain-

ing available net income"—that is, after the capital fund—"shall be applied to the payment on October 1st and April 1st in each year commencing October 1, 1937, of interest on the then outstanding new income mortgage bonds, * * * accrued during the income period ending on the next preceding June 30 or December 31, respectively, and to the [2088] extent unpaid any interest which shall be accrued on said bonds in respect of six income periods next preceding such income period."

The question that has been raised is whether the income is applied in order of seniority of those various unpaid income coupons, or in reverse order or pari passu.

The same question would apply to a corresponding provision in the Debtor's plan.

The thing that would have been intended is perfectly obvious, and to that end I wish to add to that provision these words:

", such payments to be applied first to unpaid interest for the earliest of such income periods for which interest remains unpaid in whole or in part."

Examiner Wilkinson: This last statement of yours is in the nature of an amendment to your plan?

Mr. Swaine: It is a clarification of the plan, yes.

Similarly, on page 17 of the Institutional Bondholders' Committee Plan, the first full paragraph, the question has been raised by certain of the Institutional Bondholders as to what would happen if the court should fix a prohibitively high upset price. The provision is that upon such sale the property

shall be purchased for the benefit of the new company in the reorganization.

It was pointed out that if the court should set an [2089] upset price of $100,000,000 this seemed to make it mandatory to go and pay it, and of course there would be no way the committee could raise the cash to pay it. It has to pay with securities.

Therefore, to clear that point up, I want to make this modification of that paragraph, after the word "shall," being the seventh word of the paragraph, inserting this clause, "if the upset price shall not exceed the amount at the time of sale due for principal and interest on first mortgage bonds, and otherwise if the Committee shall so determine, may," so that it makes it mandatory up to the full payment of the first mortgage bonds and permissive in respect of any upset price fixed by the court above that amount.

At the last hearing, page 311 of the record indicates this colloquy:

"Mr. Coulson: I think it would be proper to ask, and I would like to know for my own information, whether there are justifications for this new money coming in, if it is to be offered to the equity and then the junior debt, except as prior lien money.

"Examiner Boyden: I think this is a matter that might well be discussed on brief.

"Mr. Coulson: I think it is, but I would be glad to have the information as to other instances, if I could [2090] get that pertinent information.

"Mr. Swaine: We will supply for the Commis-

sion a statement of the securities that have been issued for new money in all the railroad reorganizations in the last, say, twenty-five years."

Pursuant to that agreement on my part, Mr. Groome, my associate, has examined all the plans of reorganization of railroads of any size commencing with the Richmond & Danville, now the Southern Railway, in 1892, down to date. I have prepared an exhibit which shows under the first column the name of the railroad, under the second column the date of its reorganization, under the third column the amount of the money received in the reorganization, under the fourth column the source of new money, under the fifth column the securities issued in exchange for the new money, and under the sixth column the total capital structure of the reorganized company, from which can be determined, of course, the relative position of the new money in the new capital structure.

Pursuant to Mr. Coulson's request that that be furnished, I now furnish it, and Mr. Groome, who prepared it from the original sources, is here for cross examination if anybody would like to cross examine him.

Mr. Nicodemus: Debtor objects to it on the specific ground that none of those reorganizations was affected [2091] under Section 77 of the Bankruptcy Act, and therefore this entire statement is irrelevant.

Mr. Coulson: And I object, Mr. Examiner, not only because this is incompetent, irrelevant, and im-

material, as we say in the courts of law, but it is clearly not the best evidence or even any evidence. I agree entirely with Examiner Boyden that any such material belongs in the briefs and not cluttering up this record. Mr. Swaine took quite too seriously my inquiry, which was designed to bring out whether his draftsman here was using the St. Paul as a model. I did not mean to clutter up this record by that innocent question after it had served its purpose. I certainly had no desire to have an exhibit here in this record.

Examiner Wilkinson: As I understand it, then, if you have made such a request you now withdraw that request?

Mr. Coulson: My request was that I personally would be glad to see it, but I quite agree with Examiner Boyden it ought not to be in the record. I think it is purely historical, Mr. Examiner.

Examiner Wilkinson: In the light of that, do you care to pursue that?

Mr. Swaine: The tender was a tender made pursuant to his request. That seemed to satisfy Mr. Coulson at the time. If the objection is that the analysis is not the [2092] best evidence, I think we have all of the original plans here, and we would be very glad to introduce all of those plans of reorganization.

Mr. Nicodemus: Our objection did not go to that point. Our objection was fundamental.

Examiner Wilkinson: In view of Mr. Coulson's

statement and the objection, do you still wish to offer it as an exhibit?

Mr. Swaine: Yes.

Mr. Clay: We object also that it is incompetent, irrelevant, and immaterial.

Examiner Wilkinson: The objection is sustained.

Mr. Swaine: We will put it in our brief, as Mr. Coulson suggests.

Examiner Wilkinson: Are you through, Mr. Swaine?

Mr. Swaine: Yes. I want the First Mortgage Trustee to make further proof as to that matter.

Examiner Wilkinson: Are you in a position to comply with that request at the present time?

Mr. Wood: If I understand Mr. Swaine, you are not speaking now of the pledged securities? I am not prepared to introduce evidence on that.

Mr. Nicodemus: Do I understand that you amended page 3 of your plan?

Mr. Swaine: No, I have not amended it. There is a [2093] technical error there. I want the exact proof. The statement on page 3, I said, was that the other creditors were in all respect junior to the first mortgage bonds. On inquiry I find there are a few stocks under the junior mortgage that perhaps are not pledged under the senior mortgage. I think there may be some question about that.

Mr. Coulson: Yes; there is a further question also as to the relative liens as to the Northern Extension, which at an appropriate time might be called to the attention of the Commission.

Mr. Swaine: That is the point which the trustee will proceed on with proof.

Mr. Wood: I am prepared to go ahead on that.

On this question of the securities, Mr. Swaine, I was not anticipating that the point would be raised. Mr. Groome has handed me this, which is the Debtor's annual report, but of course that may or may not be the same as the trustee's records under the two indentures. I offer this for what it is worth.

Mr. Swaine: I am perfectly willing to accept Mr. Curry's statement as to where those pledged stocks are.

Mr. Nicodemus: Let me clarify the record to find out whether this proof is going in in support of the intervention of the first mortgage, or is it a part of the plan? [2094]

Mr. Swaine: It is a fact upon which the Commission will draw every one of the plans here or adopt its own plan. The record is rather unsatisfactory on the question of the relative liens. Mr. Elsey on the stand made the statement that the first mortgage was a first lien upon all the property. That is all there is. Mr. Willard in a letter to me has disputed that. On investigation I find that he may be right as to certain stocks, and I therefore think that the Commission ought to have the facts.

For that reason I asked the first mortgage trustee to establish before the Commission——

Mr. Nicodemus: Is this part of your proof, that is what I am trying to ascertain.

Mr. Swaine: Yes, it is part of our proof.

Mr. Clay: I would like to remark that if it is a dispute between the first mortgage trustee and the second mortgage trustee, the holders of the General and Refunding Bonds would want the trustee of the General and Refunding Mortgage to state its position also.

Mr. Wood: I think perhaps I ought to make perfectly clear the relative positions of the trustees here.

Mr. Nicodemus asked whether we were putting this in in support of Mr. Swaine's Committee's plan. Of course, the first mortgage trustees represent not only the bonds [2095] that are held by the committee but all of the outstanding bonds, many of which are not represented by the committee, so that we are not taking a position as to one plan or the other.

We are here prepared to put in evidence to sustain the priority of the lien of the first mortgage.

We filed a petition of intervention on behalf of the first mortgage trustees. One of those trustees is Mr. Samuel Armstrong, who is a vice president of the Chase National Bank. The Chase National Bank as a bank is trustee under the General and Refunding Mortgage. There is a clear conflict of interest indicated by these questions that the General and Refunding Mortgage Bondholders I understand are going to raise as to the priority of the lien.

We learned that only last week and in view of that conflict, last Friday the General and Refunding

Mortgage Trustee, the Chase National Bank, sent out notices of resignation as trustee under the General and Refunding Mortgage, and wrote letters to each of the holders of those bonds telling them of its position. Therefore, the General and Refunding Mortgage Trustee is not participating in this hearing as trustee, and as counsel I am not participating, although my appearance has heretofore been included under both mortgages, as counsel for the [2096] General and Refunding Mortgage Trustee.

I believe that that will not prejudice the General and Refunding Mortgage Bondholders because I think they are all represented here individually by their own counsel, but I think that ought to be made clear on the record.

Mr. Clay: We have not as yet been able to obtain a statement from the General Mortgage Trustee of what it claims a first lien on. You see, the first mortgage trustee and the General and Refunding Mortgage trustee are represented by the same counsel, or have been until today.

Mr. Wood: They have been until today.

Mr. Clay: Yes.

Mr. Wood: But in view of the shortness of time the most we could do was to send out these letters and notices of resignation. There has not been time to substitute trustees, and we cannot appear here in two capacities with a conflict of interest.

Mr. Nicodemus: What is the procedure for substituting a trustee?

Mr. Wood: Under the General and Refunding Mortgage?.

Mr. Nicodemus: Yes.

Mr. Wood: There is a notice to the railroad company which has gone out last Friday and a publication in two newspapers, one in San Francisco and one in New York. [2097] That I understand is being made I think Wednesday. Then 30 to 60 days have to elapse after the notice unless a substitution is made prior to that time, in which case it takes effect immediately.

Mr. Groome: Who can make the substitution?

Mr. Wood: A majority of the bondholders have the right to appoint and the railroad company has the right to make an interim appointment by resolution of its board or, I think, its executive committee.

Mr. Clay: When does the resignation of the General Mortgage trustee become effective?

Mr. Wood: The provision of the mortgage is thirty to sixty days from the date of the publication of the notice, but if a substitution and appointment of a new trustee is made before that time it becomes effective immediately. In other words, you can substitute a trustee immediately without waiting for the period to elapse. I think the date fixed in the resignation is December 23. I am not sure; some time in December.

Mr. Swaine: I would like to say that I agree entirely with Mr. Wood's statement that this testimony is not offered in support of any plan, it is offered to give the Commission the facts as to the lien. It bears equally upon the Debtor's plan.

Mr. Clay: If the second mortgage trustee does not agree [2098] with the first mortgage trustee, there will be a dispute, and it will have to be determined which has the superior lien.

Mr. Swaine: Oh, quite.

Examiner Wilkinson: Proceed, Mr. Wood.

Mr. Wood: On the question of the pledged securities I will ask Mr. Curry to take the stand, please.

M. J. CURRY

testified further as follows

Direct Examination

Examiner Wilkinson: Mr. Curry, you were sworn before in this proceeding?

The Witness: I was sworn at the first hearing.

Q. (By Mr. Wood) Mr. Curry, you are a vice president and assistant secretary of the Western Pacific Railroad Company?

A. Vice president, assistant secretary, and assistant treasurer of the Western Pacific Railroad Company, yes.

Q. You are familiar with the annual reports published by the railroad company? A. Yes.

Q. I show you what purports to be a copy of the report for the year ending December 31, 1935. Is that a copy of the annual report as published?

A. Yes, sir. [2099]

Q. I wish to call attention to the list of investments in affiliated companies under date of December 31, 1935, appearing on page 15 of the report.

(Testimony of M. J. Curry.)

It is marked Table No. 5. It contains first a list of securities, which are described as pledged under the first mortgage, then a list of securities which are described as pledged under the General and Refunding Mortgage, then a list of unpledged securities, and then a list of other investments.

Mr. Curry, are you able to say from your knowledge of the records of the railroad company that the list of securities appearing under the heading "Pledged under the first mortgage", and the list headed "Pledged under the General and Refunding Mortgage", are correct as indicating the securities actually pledged?

A. To the best of my knowledge and belief, yes. This annual report is prepared in our San Francisco headquarters.

Mr. Wood: I offer this in evidence.

Examiner Wilkinson: Do you want to offer the whole report, or do you just want to offer that schedule?

Mr. Wood: I think I will offer the whole report, since it may have some bearing.

Mr. Nicodemus: Did we not stipulate in at the first hearing the annual report of the carrier to the Interstate Commerce Commission, which has the same information? [2100]

The Witness: Yes, reported on form A to the Commission.

Examiner Wilkinson: That is what I thought.

The Witness: It has already been in their possession.

(Testimony of M. J. Curry.)

Mr. Nicodemus: I do not think we should reintroduce the same document.

Examiner Wilkinson: Did you hear Mr. Nicodemus say that? You understand that there is already a stipulation incorporating by reference the Debtor's annual report, which contains that same information to which you have referred? That is, I presume it is the same information. It is the same character of information.

The Witness: Yes.

Mr. Nicodemus: Except it is more in detail, that is all.

The Witness: That is true. I say that statement is correct.

Mr. Wood: That is satisfactory.

The Witness: It is the report on Form A to this Commission, which is more in detail than this published report.

Mr. Wood: But it contains the same list of securities?

The Witness: It contains the same list of securities to the best of my knowledge, yes.

Mr. Nicodemus: You adopt that list as an accurate statement of the securities pledged under that mortgage?

The Witness: As an accurate statement of the facts.

Mr. Wood: I withdraw that exhibit, then.

[2101]

Mr. Swaine, unless you have objection, I think I will prefer to withhold the other evidence until

(Testimony of M. J. Curry.)

we have heard from the General and Refunding Mortgage bondholders.

Mr. Swaine: I think we should go ahead. I think it is part of the affirmative case to show what the lien is.

Q. (By Mr. Wood) Mr. Curry, will you please produce from the railroad company's files the application to the Interstate Commerce Commission for authority to construct the Northern California Extension? That is dated about February 14, 1929.

Mr. Nicodemus: In that connection, Mr. Examiner, request was made on the Debtor late last week for a large number of documents. Mr. Curry is in a position to produce one of each document, but we have not had an opportunity to have them reproduced.

The Witness: They were taken from the files.

Mr. Nicodemus: They are the file copies. I do not want to introduce them or have Mr. Curry introduce them and surrender dominion over them, because they are the only ones we have.

(Discussion off the record.)

The Witness: In that connection I feel that I should say, too, that with the short space of time given us to assemble this—we did not get it until about 4 o'clock Friday afternoon, and Saturday we spent assembling it—I have [2102] not had an opportunity to examine these papers to see if they are absolutely the correct papers that were asked to be produced at this hearing. Some of them are, but as to all of them I cannot say at this time.

(Testimony of M. J. Curry.)

Examiner Wilkinson: If the statement would be made here identifying the papers that are to be produced, then we will have something in the record as the basis for the introduction of them later on.

The Witness: That is all right; I understand.

(Discussion off the record.)

Mr. Wood: I am requesting Mr. Curry to produce this application to the Interstate Commerce Commission. It is headed,

"In the Matter of Application of the Western Pacific Railroad Company under Paragraphs 18 to 21, Inclusive, of Section 1 of the Interstate Commerce Act for a Certificate of Public Convenience and Necessity for the Construction and/or Acquisition of a New Line of Railroad in the Counties of Plumas, Lassen, and Modoc, California."

That was the original application relating to the Northern California Extension. It is dated February 8, 1929, signed in the name of the railroad company by H. M. Adams, president, and verified by him.

Mr. Swaine: I want to say that if there is any objection on the part of any party here to putting in that copy on [2103] the ground that it is not the best evidence, I want to insist on the original document being put in evidence. Therefore, as a condition to the substitution of copies, I would like a waiver on the record from all the other parties of the best evidence rule.

Mr. Coulson: I do not think that is likely to be

(Testimony of M. J. Curry.)

inserted on behalf of the client I represent, because this hearing here has been conducted like all hearings on the basis of putting in copies of different schedules.

Mr. Wood: Mr. Curry, would you please produce the answer of the railroad company to the questionnaire which the Interstate Commerce Commission sent out after this application was filed in connection with the Northern California Extension financing?

The Witness: Finance Docket No. 7440, "In the Matter of Application of the Western Pacific Railroad Company under Paragraphs 18 to 21, Inclusive, of Section 1 of the Interstate Commerce Act for a Certificate of Public Convenience and Necessity for the Construction and/or Acquisition of a new line of railroad in the Counties of Plumas, Lassen, and Modoc, California."

Return to the questionnaire is herewith presented.

Mr. Nicodemus: It is a big order to reproduce some of these things.

The Witness: Yes, it is. [2104]

Mr. Nicodemus: Would it be sufficient for your purposes to put in the pertinent extracts from these documents that you wish, or do you have to have the whole document?

Mr. Wood: I think in most cases we would like the whole document.

Mr. Nicodemus: That covers a big territory, that one there (indicating).

(Testimony of M. J. Curry.)

Mr. Wood: It might be that by going over them we could eliminate some of the parts.

The Witness: This bears date of September 11, 1929.

(Discussion off the record.)

Mr. Wood: This document is one of the documents that we are asking Mr. Curry to produce. I think he has already described it. It is the return of the railroad company to the questionnaire in Finance Docket No. 7440.

Q. Mr. Curry, will you please produce a letter from A. C. James Company to the Western Pacific Railroad Company dated May 14, 1929?

A. I have here a copy of such a letter.

Q. You identify the original, Mr. Curry?

A. The original is in our files in New York. We brought this copy along.

Q. Are you prepared to testify that that is a true copy of the original? [2105]

A. A true copy; I am, yes.

Mr. Wood: Is there any objection to putting that in as an exhibit without putting in the original?

Examiner Wilkinson: There is no objection on the part of the Commission if there is no objection on the part of the parties here.

Mr. Wood: I am asking whether the parties are objecting.

This is a letter dated May 14, 1929, A. C. James Company, signed by W. W. Carman, treasurer, and

(Testimony of M. J. Curry.)

it refers to the proposed Northern Extension from your main line at a point near Paxton or Keddie to connect with a line to be built by the Great Northern Railway Company from Klamath Falls southerly, for which extension application was made to the Interstate Commerce Commission under date of February 8, 1929.

"In the event your application for a certificate of public convenience and necessity is granted by the Interstate Commerce Commission, this company is prepared to advance to you, from time to time, as requested by you, all moneys required for the construction of the proposed Northern Extension."

Then follow details as to securities to be issued, then this statement,

"In view of the fact that Mr. A. C. James, a direc- [2106] tor of your company, is substantially interested in this company, we are advised that this offer on our part necessarily takes the form of an offer to bid at par for the securities mentioned above upon a public sale."

This statement appears after describing the securities that are to be issued:

"Said bonds or notes are to be secured by a trust indenture creating a first lien upon the proposed Northern Extension as security for said bonds or notes."

Q. Mr. Curry, was that financing done on the basis indicated in this letter?

A. It is my recollection that it was not. A sub-

(Testimony of M. J. Curry.)

sequent letter was delivered by the A. C. James Co. modifying that proposal.

Mr. Wood: I wish to offer this copy in evidence as an exhibit.

Mr. Coulson: I of course object to that since it is obvious that it refers to the arrangement which was not made effective. If it could have any significance in this proceeding it would be solely as an admission against interest on the part of A. C. James Company. It does not seem to me we have any issue here which makes it competent or relevant on any such point at the present time.

Mr. Wood: Mr. Examiner, I am offering this because it does have a bearing in interpreting the terms of the later [2107] offer which I am going to ask Mr. Curry to produce. The part that I read I think is quite significant when it is read with the terms of the later offer.

Mr. Swaine: To be specific, we understand that it is now contended that because the A. C. James Company furnished five million dollars that went with five million dollars of money provided by the proceeds of the first mortgage bonds, they got some kind of a pari passu lien upon the Northern California Extension. The purpose of this letter is to show that they started out, that is, the A. C. James Company, with the express intention of having a lien upon the Northern California lines. Now, as Mr. Curry has testified, that transaction was abandoned, and the next letter—I assume it is the next

(Testimony of M. J. Curry.)

one Mr. Wood is *call* for—will show the changed transaction. This letter is of evidentiary value in showing the intent to abandon the lien upon the property. In other words, they started out asking a lien and now come to a second letter which does not mention a lien. Our point is that by the two letters it is perfectly clear that it was not the intention of A. C. James Company to take a lien in respect of its five million dollar advance, but to take a junior position.

Mr. Coulson: If your Honor please, the necessary basis for the admission of such correspondence is an admission [2108] that the documents which set out the relative liens of the parties are ambiguous. Otherwise, this collateral evidence by prior correspondence as to incompleted transactions cannot have any significance.

If counsel for the mortgage bond trustee and counsel for the Committee of Institutional Bondholders are prepared to concede that on the documentary record there is ambiguity as to the relative liens of the various creditors here as to the Northern Extension, I am quite prepared to see all correspondence go in and see it fully supplemented. But I do not think we have reached that point yet.

As a matter of fact, I find it quite hard to see that all of this is not just for the present tilting at windmills. We have before the Commission the record as to liens of the first mortgage bondholders. The first mortgage has been filed. The General and

(Testimony of M. J. Curry.)

Refunding Mortgage has been filed. We have on the record the application of the funds secured from each series. I think the Commission already has before it all the factual data it needs on which any of us can array in a brief, if we desire, contentions that can be taken into account by the Commission in determining what is a fair and reasonable plan as to all the creditors and security holders in the property. [2109]

I think this building up of data that may or may not be interesting some day to a court if this property is not reorganized under Section 77 is quite unsound. It will create a record, if we follow this practice, which will be quite unworkable if the parties do not ultimately by a two-thirds vote of each class of creditor and security holder arrive at an agreement here. Our record will be quite unworkable if we are going to meet each contention that may come up in the course of the proceeding now by piling in a lot of documents which can hardly serve a useful purpose for the Commission's consideration.

Mr. Swaine: Mr. Examiner, the state of the record is this:

The first mortgage is in the record. Its granting clauses describe only the line as it existed before the building of the Northern California Extension. It has an after-acquired clause dealing with extensions. It has also a clause in the granting clauses covering property any part of which is constructed with the proceeds of the first mortgage bonds.

(Testimony of M. J. Curry.)

There is no evidence in the record at the present time as to the taking down of money under the first mortgage or the bonds under the first mortgage for the building of this line. There is not even any evidence in the record showing the precise time at which the Northern [2110] California line was built. Then the record contains the General and Refunding Mortgage, and the record shows it was executed on February 29, 1932. It in its granting clauses expressly describes the Northern California Extension.

I say that it is perfectly clear that that record is inadequate and that the first mortgage trustee on that state of the record, when the only thing that is here as to the first lien of the first mortgage on the Northern California Extension is Mr. Elsey's statement that it was a first lien, and in the light of the dispute that has arisen—it is perfectly clear that dispute is here—should go ahead and establish the facts as to the time that extension was built and the facts as to the taking down of the money under the first mortgage, so as to bring it within that clause.

Now, that is not an ambiguity. It is simply demonstrating that this property was within the after-acquired clause of the first mortgage. It is not a fact that has to be put in in order to tie up the complete story.

Mr. Clay: Mr. Examiner, may I make a suggestion, that the record might be shortened if the first

(Testimony of M. J. Curry.)

mortgage trustee merely put in the supplemental indenture subjecting the California extension to the first mortgage?

Mr. Swaine: There is no supplemental indenture and none [2111] was necessary. The Board of Directors of the Railroad Company adopted a resolution to the effect that this was subject to the first mortgage, and the first mortgage trustee, as I understand it, is proving that it is within the after-acquired clause without a supplemental indenture. It would have been merely a matter of further assurance.

Mr. Clay: That is a matter of a question of law.

Mr. Swaine: That is a question of law, yes.

Mr. Coulson: Conceding the full force of what Mr. Swaine says, Mr. Examiner, it leaves us, *to* seems to me, with the Commission in a position of needing for this record only two facts of testimony, one, if it be true that this record does not show when the money was taken down under the first mortgage, and applied to the Northern Extension and the amounts thereof, as it does to the application of the money of the so-called junior creditors to the Northern Extension,—if this record is incomplete as to the application of money, then that is a fact and a fact of the type the Commission properly takes into account.

If it is also a fact, conceded, but we might perhaps show it on the record by the testimony of this witness, that there was no supplemental indenture

(Testimony of M. J. Curry.)

subordinating the Northern Extension to the lien of the first mortgage [2112] by express language, then all this other testimony is utterly unimportant to the Commission at this stage of the proceeding. It might be important in a foreclosure proceeding if the property is not reorganized, but is utterly unimportant now, and could only be admissible, if we are going to apply any rules of evidence at this proceeding, if it be conceded that the indentures are ambiguous as to the lien on the Northern Extension.

On the basis of that concession I would withdraw any objection to the admissibility of these data. Otherwise, I object strongly to the admissibility of anything further than the two items I have referred to.

Examiner Wilkinson: It seems to the Examiner that the question has been raised of record here——

Mr. Coulson: Only by Mr. Swaine.

Examiner Wilkinson: —as to the conflict between the first mortgage and the General and Refunding Mortgage as a question of priorities. As much as the Commission would be loath to attempt to pass on that, under Section 77, the question of priorities, a plan cannot be approved unless those priorities are in accordance with the law. The issue is before us, and since it is here we want to get all the evidence in the record that we can that would help the Commission to decide that question, if it ultimately has to decide it, as it looks as if it is going to, on the [2113] state of this record.

(Testimony of M. J. Curry.)

I might make a statement here, that there is a question as to whether there is a supplemental indenture or not.

Mr. Swaine: No, there is no question.

Examiner Wilkinson: It was my understanding that all of the indentures concerning this property were in the record. At least, we asked for that.

Mr. Nicodemus, do we have all the indentures here concerning this property?

Mr. Nicodemus: So far as I am aware, everything has been introduced.

Mr. Coulson: I suggest that question be asked of the witness, Mr. Examiner.

Examiner Wilkinson: All right. Mr. Curry, are you aware of any additional debenture which has not been placed in this record, assuming that you know what has been placed in this record?

The Witness: According to my recollection they have all been introduced, all indentures, with the possible exception, perhaps, of the issuance of five million dollars of indentures. Whether that is in the record or not I do not recall at this moment.

Mr. Clay: According to your best recollection, there are no supplemental indentures to the first mortgage? [2114]

The Witness: According to my best recollection there was no supplemental indenture to the first mortgage.

Mr. Clay: Indentures, plural.

The Witness: Indenture or indentures, yes.

(Testimony of M. J. Curry.)

Mr. Nicodemus: My understanding is the indenture mortgage has been released and discharged.

The Witness: Yes.

Mr. Wood: Not formally released. The indenture was retired, but I think there was no formal satisfaction executed.

The Witness: I do not recall that.

Mr. Coulson: Mr. Curry, would you recollect if a supplemental indenture had been drawn subjecting the Northern Extension by direct language to the lien of the first mortgage?

The Witness: I would recollect that, yes, sir.

Mr. Coulson: And there has been to your knowledge no such supplemental indenture drawn?

The Witness: There has not.

Mr. Coulson: Or executed?

The Witness: That is right; they have not.

Mr. Swaine: Mr. Examiner, that affords the most full basis for going into the whole question of whether or not that fell within the after acquired clause. It also raises the question as to whether when it came in under the after- [2115] acquired clause it came in subject to anybody's vendor's lien. The purpose of this letter was to show that the A. C. James Company initially intended to get a vendor's lien, and the purpose of the next letter would be to show that it abandoned the vendor's lien and allowed the property to go into the first mortgage instead. So there is no question of ambiguity. It is purely a question of whether it fell

(Testimony of M. J. Curry.)

within the after-acquired clause, and if so, whether it came in subject to a vendor's lien.

Examiner Wilkinson: The letter will be received.

Mr. Coulson: Subject to the objection I have stated?

Examiner Wilkinson: Subject to the objection, yes.

You have only this one copy?

The Witness: Yes.

Examiner Wilkinson: That will go into the record and you will get the extra copies here for counsel and for the Commission.

Mr. Wood, you will supply sufficient copies?

Mr. Wood: Mr. Curry, can you do that, please?

The Witness: I will undertake to do that, yes, sir.

Examiner Wilkinson: The letter of May 14, 1929, just referred to, will be received as Exhibit No. 45.

(Exhibit No. 45, Witness Curry, received in evidence.)

Q. (By Mr. Wood) Mr. Curry, will you please produce the amended application of the railroad company to the Inter- [2116] state Commerce Commission for authority to construct the Northern California Extension, that was dated about August 1, 1929?

A. I find in my papers here a copy of application in Finance Docket No. 7440 for amendment

(Testimony of M. J. Curry.)

of certificate of public convenience and necessity granted under date of June 9, 1930, such amendment being necessary to permit of joint use of Southern Pacific Company's line 5.27 miles northward from Westwood.

Q. That does not relate to the Northern California Extension, I take it?

A. 7440 is the docket number on the Northern California Extension, is it not?

Q. I believe that is right, but the description you have just read of the line does not seem to correspond with the——

A. Well, it is part of that proposal.

Q. Oh, it is part of the same proposal?

A. It is part of the same construction, as I understand it.

Q. Pardon me. Does this involve a change in the method of financing the new extension, this one that you are reading?

A. I cannot answer that. I do not know. I have not read it. [2117]

Mr. Nicodemus: I think this is germane. This relates to a certain part of the Northern Extension that was not constructed, and trackage substituted. I am not sure that is what you asked for.

The Witness: As I say, I did not have time to go carefully through the papers. There may be some things here that you asked for that are not complete. I cannot complete them until I have an opportunity to search the records and see.

(Testimony of M. J. Curry.)

Q. (By Mr. Wood) Mr Curry, the application that I am asking for is an amendment to the first application, which involves a change in the route and a change of the method of financing the Northern California Extension. It was an amended application asking for authority to construct the line and finance in a different way.

A. I regret I seem to have no such document with me.

Q. Filed with the Commission, I think, on August 12, 1929. A. August 12, 1929?

Q. Will you produce that from your files later, Mr. Curry, if you can locate it? A. I will.

Q. Mr. Curry: will you please produce a letter from the A. C. James Company to the Western Pacific Railroad Company dated June 19, 1929? That is the letter which contains [2118] the new offer in connection with the financing of the Northern California Extension.

A. I submit copy of such letter.

Q. You have the original in your files?

A. I have the original in my files.

Q. Is that a true copy?

A. This is a true copy, yes.

Mr. Nicodemus: Dated what?

The Witness: Dated June 19, 1929, signed by the A. C. James Company, by E. H. Ferry, vice president.

Mr. Wood: Mr. Examiner, this letter is a revision of the previous offer made by the A. C. James Com-

(Testimony of M. J. Curry.)

pany in connection with the financing of the Northern California Extension, and it states that 50 per cent of the money up to five million dollars is to be advanced against the debentures which were later issued. This letter says nothing about a first lien being given to the A. C. James Company for the money that it advanced. It states:

"It is further understood that this offer is in lieu of and in substitution for our offer of May 14, 1929, which contemplated the issue to us of bonds or notes secured by a first lien on the Northern Extension as then proposed and described in the original application for a certificate of public convenience and necessity filed February 8, 1929." [2119]

I would like to offer this in evidence.

Examiner Wilkinson: Letter of June 19, 1929, just referred to by counsel, will be received by Exhibit No. 46.

(Exhibit No. 46, Witness Curry, received in evidence.)

The Witness: I will see that copies are furnished to all interested counsel.

Q. (By Mr. Wood) Mr. Curry, will you please produce the application of the railroad company to the Interstate Commerce Commission dated October 28, 1930, for authority to issue and sell the five million dollars of debentures?

A. I submit copy of such application in the matter of the Western Pacific Railroad Company for authority to issue securities, five million dollars

(Testimony of M. J. Curry.)

of 5 per cent gold debentures, dated October 28, 1930, which contains as an exhibit copy of the indenture referred to.

Mr. Nicodemus: This is your file copy, is it?

The Witness: That is my file copy.

Mr. Nicodemus: You have no copies available for distribution?

The Witness: No.

Mr. Wood: This is one of the documents which we are asking be produced subject to the understanding that you will produce it later and it will be offered as an exhibit when you have copies.

I wish to call attention to Exhibit VII in this ap-
[2120] plication, which is an extract from the minutes of the Executive Committee of the railroad company at the meeting on Wednesday, June 19, 1929:

"The chairman called attention to the fact that at the May 14 meeting of the Executive Committee, a letter was submitted from the A. C. James Company offering to finance the cost of constructing the proposed new line of railroad to extend from this Company's main line at or near Paxton, or Keddie, Plumas County, California, to a connection with the line of the Great Northern Railway at Lookout, California, through the purchase of notes or bonds of the company secured by a first mortgage on such new line, and that such proposal was accepted by the Committee.

"The Chairman then stated that the negotiations

(Testimony of M. J. Curry.)

between this Company and the A. C. James Company leading up to the proposal by the A. C. James Co. were based upon the understanding on both sides that the proposed new line could be constructed for approximately $5,000,000; but that it now developed that if the route proposed in the Company's application to the Interstate Commerce Commission for permission to build the new line is followed the cost will be very greatly in excess of $5,000,000. The Chairman also stated that a study was now being made to adopt a somewhat different route with the view to greatly reduc- [2121] ing the estimated cost and that if it seemed desirable to adopt a different location it would be necessary for the Company to amend such pending application to the Interstate Commerce Commission.

"The Chairman said that in view of these facts the A. C. James Co. very properly desire to modify their previous offer, and to that end had written a letter reading as follows:"

Then follows the letter of June 19, 1929, which has already been offered.

"The letter of June 19, 1929, from the A. C. James Co. was then discussed, and thereupon the following resolution was adopted, Mr. A. C. James not voting:

"Resolved, That the offer of the A. C. James Co. set forth in their letter of June 19, 1929, submitted at this meeting to purchase, under certain conditions, up to $5,000,000 principal amount of the 5 per

(Testimony of M. J. Curry.)

cent debenture of this company be and the same is hereby approved, and the Chairman is authorized to advise the A. C. James Co. of the acceptance by this company of such offer.

"Further Resolved that the offer so made by the A. C. James Co. to this Company dated June 19, 1929, presented at this meeting, be accepted in place of the offer of the A. C. James Co. contained in its letter of May 14, 1929, and submitted to the Executive Committee of this [2122] Company at its meeting on May 14, 1929."

Then follows a resolution directing the amendment of the reply to the questionnaire of the Commission, which I shall not read.

Q. Mr. Curry, you certified these resolutions in this application. Can you say who were present at the meeting of that Executive Committee?

A. What was the date, please?

Q. The date of the meeting is Wednesday, June 19, 1929.

A. I cannot at this time. It was not listed in your memo as being information you desired at this hearing. The minute books are in New York. I cannot answer that question.

Q. Will you supply that, please, Mr. Curry?

A. I will, yes.

Q. In the portion of the minute which I read it is stated, "Mr. A. C. James not voting." Mr. James was a director of the Western Pacific at that time?

A. Yes.

(Testimony of M. J. Curry.)

Q. And a member of the Executive Committee?

A. Yes.

Mr. Nicodemus: He must have been present, must he not?

The Witness: He was present, but not voting.

Mr. Nicodemus: That is all you want to know, whether he was present? [2123]

The Witness: He would not be listed as present.

Mr. Wood: I think that answers my question, yes.

I offer in evidence a certified copy of the order of the Interstate Commerce Commission in Finance Docket No. 8548, which is a report and order entered November 20, 1930, authorizing the issue of the five million dollars principal amount of debentures.

Examiner Wilkinson: Is this the order to which Mr. Clay has been referring?

Mr. Homire: One of them, yes.

Mr. Swaine: I do not think it is the one.

Mr. Homire: He may not have referred to it yet, but he would refer to it later if it was brought up.

Mr. Swaine: This is one of a series of orders.

Examiner Wilkinson: Is there any objection to the receipt of this order?

Mr. Coulson: Except the objection that I made to the receipt of this material of course applies to all this data, that it is hardly relevant unless we have the basis for it also by showing that there is ambiguity in the documents before the Commission. That is the only objection to the receipt of any of this material.

(Testimony of M. J. Curry.)

Examiner Wilkinson: Objection over-ruled. The document will be received as Exhibit No. 47.

(Exhibit No. 47, Witness Curry, received in evidence.) [2124]

Q. (By Mr. Wood) Will you next produce an affidavit which you made under date of March 2, 1931, having attached copy of the published notice calling for bids, copy of the specifications, and copy of the formal bid on the proposed issue?

A. I submit affidavit of mine re bids for five million dollars 5 per cent gold debentures of the Western Pacific Railroad Company, dated March 2, 1931, with copy of notice and copy of specifications of securities offered for sale, No. 2935, dated January 7, 1931.

This happens to be an extra copy and can be offered.

Mr. Wood: I will offer it in evidence, if your Honor please.

This has a notice attached to it requesting bids for the five million dollars principal amount of the debentures and also this notice was published in the New York Times on January 8 and 9 and 15th and 16th, 1931.

Under the specifications of the securities offered for sale I would like to call attention to certain provisions in these specifications.

These specifications state, among other things, that

(Testimony of M. J. Curry.)

"The main line of railroad of the Company extends from San Francisco, California to Salt Lake City, Utah with branches, and aggregates 1050.5 miles, more or less, [2125] of first track. Upon the completion of the Company's 'Northern California Extension' its main line of railroad will aggregate 1198.5 miles, more or less. A map of the Company's railroad system is hereto annexed."

Then it states: "The first mortgage of this company dated June 26, 1916, securing this Company's first mortgage bonds, whereunder not more than $50,000,000 thereof may be outstanding at any one time, is a first lien on said main line of railroad."

You will notice that the main line is described as including the extension when the extension is completed.

Then follows the bid.

The Witness: The bid is not included with those papers.

Mr. Wood: That is right.

Q. I ask you, Mr. Curry, to produce the bid of the A. C. James Company, dated January 22, 1931.

A. It is submitted. That is an extra copy, a true copy of the bid.

Mr. Wood: I will offer this in evidence.

Examiner Wilkinson: Just a moment. As to the other document you had right before that——

Mr. Swaine: That was the published notice calling for bids, prescribing the securities.

Examiner Wilkinson: —do you want to put that physically into the record? [2126]

(Testimony of M. J. Curry.)

Mr. Wood: I understand these are extra copies. I will offer them in evidence.

Mr. Coulson: I would like to register an objection to this putting in of published notices in an attempt to prove that the Northern Extension is a part of the main line by a characterization of the Northern Extension as such. At best it could be but an admission as against the Debtor company. I fail to see its propriety in a proceeding as factual data on which the Commission could base a judgment, even if it ever needed to base a judgment on this technical law point that Mr. Swaine is tilting at.

Mr. Swaine: The notice described the securities on which the A. C. James Company was to bid. That was the notice pursuant to which they bid, and their bid refers to the notice, so that you have to have the notice in order to describe the things that they were bidding on.

Examiner Wilkinson: The objection is over-ruled and the statement, consisting of five sheets, will be received as Exhibit No. 48.

(Ex. No. 48, Witness Curry, received in evidence.)

Mr. Coulson: May the record show an exception?

Examiner Wilkinson: Yes.

Q. (By Mr. Wood) Have you a copy of the map that is annexed to the specifications?

A. I can furnish that later. I do not have it with me. [2127]

Q. I think to make the exhibit complete we ought to do that. A. All right.

(Testimony of M. J. Curry.)

Mr. Wood: I now offer in evidence the bid of the A. C. James Company, dated January 22, 1931. I would like to read it in part:

"In accordance with and subject to all the terms of the notice dated January 8, 1931, published by your Company in newspapers of New York and San Francisco, and in accordance with the specifications referred to in said notice, which notice and specifications have been examined by the undersigned, the price of $5,000,000, 100 percentum of the face amount thereof and accrued interest to the date of delivery is hereby bid by the undersigned for the five million dollar face amount of 5 per cent gold debentures of your company offered for sale."

Then follows a list of the names and addresses of the officers, directors, and general manager, and the purchasing officer or agent of the A. C. James Company, including Arthur Curtiss James, president and director.

Examiner Wilkinson: Any objection?

Mr. Coulson: I take it, Mr. Examiner, I have a running objection to this line of testimony?

Examiner Wilkinson: Yes.

The bid dated January 22, 1931 will be received as [2128] Exhibit No. 49.

(Exhibit No. 49, Witness Curry, received in evidence.)

Mr. Wood: I offer in evidence copy of the debenture agreement under which the five million dollars of debentures were issued.

(Testimony of M. J. Curry.)

Mr. Coulson: I think that statement ought to be corrected to some extent. There were not five million dollars of debentures issued, and I think the record already shows what debentures were issued.

Mr. Wood: I am willing to have my statement corrected to the extent that the debentures were actually issued.

Mr. Coulson: Yes. Just so there cannot be any misapprehension, there were not five million dollars. A part of the advance of the A. C. James Company was, as I think the record shows, made under the terms of the debenture agreement, and part, the final part, something like half a million dollars, was made under the secured notes, secured by the General and Refunding Mortgage.

Mr. Swaine: No, I think you are mistaken. I think it was $200.

Mr. Coulson: No.

Mr. Swaine: Let us get the facts.

Mr. Wood: I think what took place was this, Mr. Coulson:

After the General and Refunding Mortgage was execu- [2129] ted, or at the time that was executed, all the outstanding debentures, some four million and a half dollars, were cancelled in order not to violate the covenant in the debenture agreement against placing a mortgage on the property of the railroad company. Then there were two subsequent take-downs of debentures. I believe that the procedure was the debentures were authenticated and de-

(Testimony of M. J. Curry.)

livered, stamped with a legend, and immediately exchanged for a note secured by the General and Refunding Mortgage bonds, and they were cancelled and re-delivered to the trustee.

Mr. Coulson: Your record as you are making it here shows that as a simultaneous transaction. I did not recollect, if I ever knew, about this technical issue of debentures for the last half million, so I would be glad if your record is complete as to that.

I dare say, Mr. Examiner, we will have a chance to complete this record if upon examining this lengthy mass of documents we see that there are omissions or lacuna of any sort in it.

Mr. Wood: On that point, Mr. Coulson, I am not putting in documentary evidence, I am merely stating what my understanding is of what took place. The files of the first mortgage trustee of course do not contain it.

Examiner Wilkinson: I do not understand. You say you [2130] are not putting in documentary evidence. What do you call this that has been going in?

Mr. Wood: I mean as to this statement of what happened on the debentures.

Mr. Coulson: But if that statement is to be taken as evidence by the Commission we ought to have it documented.

Mr. Swaine: I think it would be well if we had all the documents. I agree with Mr. Coulson that we want all the documents. I would be very happy to

(Testimony of M. J. Curry.)

have the debenture trustee produce all the documents.

Examiner Wilkinson. It is taken for granted that the Commission wants a complete record. That is what we want.

Mr. Coulson: It has been my impression, Mr. Examiner, and I think the record to this date shows it, that only a part of the moneys advanced for the Northern Extension by the A. C. James Company were advanced under this debenture agreement, and that so far as the balance of those amounts, which I understood were something like half a million dollars, were concerned, they were advanced under the secured notes.

If that is not the case let us have the full facts, and also the full facts as to the moneys advanced by the Reconstruction Finance Corporation for the Northern Extension, which were clearly advanced under the secured notes [2131] and secured by the General and Refunding Mortgage bonds.

Mr. Wood: Mr. Coulson, I believe the A. C. James Company took all of the debentures. Is that right?

Mr. Coulson: All that were issued; not the whole five million dollars, as I understood it, but that seems to be an issue here. Nobody else took any.

Mr. Wood: What I was getting at was this:

The Chase National Bank of course was trustee under the debenture agreement, but I was considering the propriety of their producing the files from

(Testimony of M. J. Curry.)

another trust. But since your client held all of the debentures, if you are willing, I think there is no objection to our putting all of that in. We have them here.

Mr. Coulson: Before we get through, if we are going to conduct this lengthy excursion into the question of whether the after-acquired property clause is ambiguous, I think the Chase Bank in its many capacities of trustees under all the situations ought not only to put in the documents which Mr. Swaine as counsel for the Institutional Bondholders' Committee thinks it ought to put in, to support the first mortgage bondholders' position, but I think it ought to be prepared to come in in its capacity as trustee in this emergency as a resigning but unresigned trustee of the General and Refunding Mortgage, and put in the documents that bear on the lien of that mortgage, and then [2132] go a step further, if we are still dealing with an ambiguity here, and put in the documents that bear on what part of the various moneys were advanced under this debenture agreement that has been tendered and what part under the subsequent secured notes, as to the Northern Extension.

Mr. Swaine: I think that is fine. I think the Reconstruction Finance Corporation and the Railroad Credit Corporation will join in it. Then the Chase will be relieved of any embarrassment and can put the entire documentary record in in all three capacities.

(Testimony of M. J. Curry.)

Mr. Clay: May I make one suggestion? The Chase in its capacities as trustee of the first mortgage and as trustee of the General and Refunding Mortgage ought to be represented by different counsel.

Mr. Swaine: I understand that all it is doing under that set-up would be to produce the documents.

Mr. Clay: There ought to be somebody represent the general mortgage bondholders, to see that the Chase does put in all the documents.

Mr. Swaine: You three that represent the general mortgage bondholders——

Mr. Wood: I should prefer not to put in any of those documents myself. Incidentally, we did not bring anything under the General and Refunding mortgage with us. We have the debenture files, and if Mr. Coulson wants to put them [2133] in, I am perfectly satisfied to let them go in.

Mr. Coulson: The point I make is this, and I do not want to be misunderstood:

We cannot relieve the Chase from the embarrassments which it gets from acting as trustee under these successive agreements. If there is embarrassment it exists. If at a later stage of the proceeding, I as representing a first mortgage bondholder might complain because the Chase did not have a supplemental indenture executed, I would have a right to complain. In my capacity as representing a junior creditor, if the Chase has been delinquent in any respect I might have a right to complain. But the im-

(Testimony of M. J. Curry.)

portant thing is here that the Chase in limiting its functions narrowly to presenting the documents which Mr. Swaine wishes in defense of an issue which has not yet been pressed by other parties in this proceeding, but is only aimed at sustaining his statement made not only in his plan but repeatedly in the record and in his whole theory of this proceeding, that the first mortgage bondholders are superior in all respects to all other creditors except possibly the equipment trust—I do not think he has put them behind the first mortgage,—but if this is going in, I think of course we ought to have these other records from the files of the Chase in its other capacities. [2134]

Mr. Swaine: We will be very happy to have them in.

Mr. Wood: Mr. Coulson, so far as the Chase is concerned, of course the General Refunding mortgage bondholders are entitled to call on it to introduce any of those documents to support whatever evidence you want to go in, and we will be glad to do it. We do not happen to have them here at this time; but I do not feel that the Chase as trustee or myself as counsel should take the initiative in presenting the evidence, since we have resigned and are taking an inconsistent position under the first mortgage.

Mr. Swaine: That does not apply to the debenture agreement. There you are functus officio. That is a transaction which is closed. As I understand

(Testimony of M. J. Curry.)

it, both Mr. Coulson and I are in agreement, for once, that we would like all the documents affecting the debentures put in the record.

Mr. Wood: We have those here, and we would be glad to put them in.

Mr. Swaine: Those are here?

Examiner *Wilkins*: As I understand this, Mr. Wood, this morning you withdrew your appearance as counsel for the General and Refunding Mortgage.

Mr. Wood: That is right.

Mr. Coulson: And those who hold the General and Refund- [2135] ing mortgage bonds as collateral are left without a trustee to speak for them in this proceeding at the present time.

Mr. Clay: And without access to any of the records.

Examiner Wilkinson: As far as the record shows, directly representing the trustee, that is correct.

Mr. Swaine: But all the holders are here represented by counsel.

Mr. Clay: I would like also to have the record show that the General mortgage bondholders have access to none of the records. They are at present in the possession of the Chase Bank.

Mr. Wood: You will have access to them in the sense that the Chase will produce them whenever it is called upon to do so. We did not anticipate they would be called for, and we did not bring them with us.

(Testimony of M. J. Curry.)

Mr. Clay: I would like to make the additional statement of an apparent fact, that the general mortgage bondholders are not represented at the present time by a mortgage trustee.

Mr. Wood: Of course, I suppose the trustee continues in office until its successor is appointed. You cannot just throw the trust out in the street.

Mr. Coulson: That is why we are embarrassed by your suggestion that you withdraw as counsel without any other [2136] counsel being appointed to represent the trustee, who is a resigning and not resigned trustee.

Mr. Swaine: Can we not go ahead with the first mortgage evidence and the debenture evidence? Those were contemporaneous transactions. If we can get that in, then we can decide what is going to happen about this subsequent mortgage that was executed in 1932, after all this had happened.

Examiner Wilkinson: The indenture dated July 1, 1930, the 5 per cent gold debentures, is received as Exhibit No. 50.

(Exhibit No. 50, Witness Curry, received in evidence.)

Examiner Wilkinson: We will take a recess for five minutes.

(Whereupon, a short recess was taken.)

Q. (By Mr. Wood) Mr. Curry, will you please produce the application of the railroad company to the Interstate Commerce Commission for authority to issue and sell five million dollars principal amount

(Testimony of M. J. Curry.)

of first mortgage bonds to be used for the construction of the Northern California Extension, dated about October 1, 1930?

A. Application dated September 9, 1930, in the matter of Western Pacific Railroad Company for authority to issue securities, five million dollars additional first mortgage 5 per cent bonds. [2137]

Q. That application states that they are to be used in connection with the Northern California Extension?

A. To use the proceeds therefrom in the payment and discharge of liabilities incurred by applicant for the reimbursement of its treasury for money expended by it with respect to the acquisition and/or construction by this company of its proposed so-called Northern California Extension, and so forth.

Q. That is one of the documents of which you have no copies at this time?

A. That is correct.

Q. And which we will offer as we are going to offer these other documents, at a later date?

Mr. Coulson: May I interrupt to ask this witness at this point, if you do not object, whether that application was in terms a reimbursement application or an ear-marking of the proceeds of these bonds for the Northern Extension?

Mr. Swaine: Just a minute.

The Witness: I cannot answer that without reading it.

(Testimony of M. J. Curry.)

Mr. Swaine: That calls for a conclusion. The document states itself, and for the information of Mr. Coulson, the trustee intends to prove that the bonds were deposited and were drawn down, and the papers in connection with their drawing down will be produced.

Mr. Coulson: I am only interested in getting for the [2138] Commission what seemed to me at the outset the only other pertinent item of information in this thing, and that is how the moneys were applied, in the form of a statement which will show to us how much money was realized on this five million dollars, how they were applied, and when they were applied.

If Mr. Swaine is going to put this in through the first mortgage trustee——

Mr. Swaine: The first mortgage trustee will put it in.

Mr. Coulson: ——I will be glad to wait, but I do think the Commission ought to have a statement showing how these moneys were applied, when they were received, how much they were, and how they were applied.

Mr. Wood: That will all appear in the applications for taking down first mortgage bonds, and the cash proceeds.

Mr. Coulson: I do not think any application except a reimbursement application can show on its face that the application was made. I think we need a statement from the company.

(Testimony of M. J. Curry.)

Mr. Swaine: If you will be a little more patient and allow this to unfold, you will get those facts.

Mr. Coulson: I will be very glad to be patient until they are unfolded.

Thank you, Mr. Wood.

Examiner Wilkinson: You withdraw your question? [2139]

Mr. Coulson: Yes.

Mr. Wood: I now offer in evidence certified copy of the order of the Commission and the report entered October 6, 1930, Finance Docket No. 8473, which is the order authorizing the issue of five million dollars of first mortgage bonds. Incidentally, this states:

"The applicant proposes to use the proceeds from the bonds in payment of liabilities incurred and/or reimbursement of its treasury for money expended by it with respect to this construction and acquisition."

That is the Northern California Extension.

Examiner Wilkinson: Is there any objection? (No response.)

The report and order of the Commission dated October 6, 1930, will be received as Exhibit 51.

(Exhibit No. 51, Witness Curry, received in evidence.)

Mr. Coulson: Are we going to be furnished copies of these Commission orders?

Examiner Wilkinson: Not only copies of the orders, but every one of these exhibits.

(Testimony of M. J. Curry.)

Mr. Coulson: We have to study them, Mr. Examiner.

(Discussion off the record.)

Q. (By Mr. Wood) At this point, in order to finish with Mr. Curry, I am going to digress from the order a little bit and ask for the application of the railroad company to [2140] the Commission, dated about February 10, 1932, for a certificate authorizing a loan from the Reconstruction Finance Corporation.

A. I have that. It is application dated February 5, 1932, addressed to the Interstate Commerce Commission.

Q. Mr. Curry, is there a supplemental application dated February 13, 1932, that relates to that?

Mr. Clay: There is a supplemental application of February 13.

The Witness: I have not such an application with me. There may have been. I would have to look through my records.

Q. (By Mr. Wood) Will you make a note of that, please, Mr. Curry, and if there is, will you include that in the list of documents to be produced?

The next is an application some time late in 1931 for authority to issue and pledge General and Refunding Mortgage bonds as collateral security for notes to be issued to A. C. James Company and the Railroad Credit Corporation.

A. Of date February 11, 1932?

Q. I do not know the date.

(Testimony of M. J. Curry.)

A. I have here an application of the Western Pacific Railroad Company for authority to issue and pledge 15 million dollars of its General and Refunding Mortgage gold bonds, [2141] Series A, and to issue five million dollars of its notes.

Mr. Wood: That is one of the documents we will have to offer later.

I now offer in evidence a report and order of the Interstate Commerce Commission entered February 29, 1933, Finance Docket No. 9151, Western Pacific Railroad Company Reconstruction Loan, authorizing a loan from the Reconstruction Finance Corporation.

Mr. Clay: That is offered just merely as evidence of approval of the loan, not as evidence of the lien of the general mortgage bond?

Mr. Wood: Well, it is part of the picture.

Mr. Clay: I know, but that is a legal question. You are offering this merely to show——

Mr. Wood: Whatever bearing it has as a question of fact on the legal question that is involved.

Examiner Wilkinson: Is there any objection to this document?

(No response.)

The order and certificate of the Commission dated February 29, 1932, in Finance Docket 9151, are received as Exhibit 52.

(Exhibit No. 52, Witness Curry, received in evidence.)

(Testimony of M. J. Curry.)

Mr. Wood: I offer in evidence a certified copy of the report and order of the Commission entered February 27, [2142] 1932, Finance Docket No. 9162, authorizing the issue of not exceeding 15 million dollars General and Refunding Mortgage bonds and notes for not exceeding five million dollars.

Examiner Wilkinson: The document just referred to will be received as Exhibit No. 53.

(Exhibit No. 53, Witness Curry, received in evidence.)

Mr. Wood: Mr. Curry, will you please produce the annual reports of the Western Pacific Railroad Company for 1930 to 1934, inclusive?

(Discussion off the record.)

The Witness: I have them, and submit them from 1930 to 1935, inclusive.

Mr. Wood: I will offer them in evidence. You have no objection to putting those in now, Mr. Curry?

Examiner Wilkinson: Is there any objection to the receipt of these documents?

Mr. Coulson: Aside from my running objection there is none.

Examiner Wilkinson: The annual report of the Debtor for the calendar year ended December 31, 1930, is received as Exhibit 54.

The 1931 annual report is received as Exhibit 55.

The 1932 annual report is received as Exhibit 56.

The 1933 annual report is received as Exhibit 57.

[2143]

The 1934 annual report is received as Exhibit 58.

The 1935 annual report is received as Exhibit 59.

(Testimony of M. J. Curry.)

(Exhibits 54 to 59, inclusive, Witness Curry, received in evidence.)

Q. (By Mr. Wood) Will you please produce the minutes of a meeting of the Executive Committee of the railroad company for February 11, 1931?

A. These are extracts from my permanent minute book. They are not copies.

Q. Does that volume contain all of these minutes? A. All of those that you asked for.

Q. I might mention then at this time I am calling for the minutes of the Executive Committee meeting on February 11, June 25, July 23, October 15, November 17, and December 21 of 1931, and January 29, 1932. A. Yes.

Mr. Nicodemus: Do you want the entire records for those dates, or only so far as they pertain to this financing?

Mr. Wood: Only so far as they pertain to the Northern California Extension.

Q. Do you have extra copies of those, Mr. Curry, so that we can offer them now?

A. I have not, no. These are the originals from the permanent book that I brought with me. I have no copies.

Mr. Wood: Mr. Examiner, I want to be clear as to what [2144] the procedure will be about offering these documents later in evidence. In case we do not have another session is it understood that when the copies are ready we can put a copy in evidence

(Testimony of M. J. Curry.)

merely by notifying the Commission and filing the document, and sending the copies around to the other parties?

Examiner Wilkinson: As I understand, the purpose so far has been to identify on the record the data and the documents which you asked to be produced, for the purpose of having them presented as evidence in this case. If there is any objection to the data, with which all counsel here are familiar, having heard it, I would like the record to show it.

Mr. Coulson: I made clear, I think, at the start, Mr. Examiner, that I thought all of this was irrelevant to the issues immediately before us and should be considered only either as explaining an ambiguity in the record, which is already before the Commission, or as sustaining Mr. Swaine's rather sweeping claim in the plan which was filed with the Commission at the last hearing, that the first mortgage bondholders had a first lien on everything.

I understand he does not assert that claim in its complete form anyway, and I think all this amplification of the record as to the Northern Extension is unnecessary, and in that sense irrelevant to the issues we are immediate- [2145] ly dealing with. But I understand that that objection, having been made, was overruled and the Commission allowed me a running objection to all this. I do not want to be deemed to have withdrawn that objection, but aside from that I have no objection to the procedure suggested here.

(Testimony of M. J. Curry.)

Examiner Wilkinson: Are there any other objections?

I understand, Mr. Nicodemus, you undertake to produce through Mr. Curry the documents and data that Mr. Wood requested?

Mr. Nicodemus: What I think we will do is, we will take the originals over to the Chase Bank and let them photostat them in as many copies as they want; and transmit them. They are their exhibits, they are not ours.

Mr. Swaine: Oh, not all of that. These resolutions are your own.

Mr. Nicodemus: Oh, no, we closed our case.

Mr. Swaine: Oh, if you mean it that way, yes. I thought you meant they were the property of the Chase Bank.

Mr. Nicodemus: No.

Examiner Wilkinson: My understanding is you will supply that?

Mr. Nicodemus: Yes, we will undertake to get the documents. [2146]

(Discussion off the record.)

Q. (By Mr. Wood) Mr. Curry, in connection with those minutes which you have produced, will you state who were present at those meetings? Do your records show? A. Yes, they do show.

At the meeting of February 11, 1931, there were present Messrs. Schumacher, Loasby and James, directors.

Mr. Coulson: May I interrupt for a moment?

(Testimony of M. J. Curry.)

It seems to me this is building up the record unnecessarily. If we put in these minutes which show who were present, and the witness says it shows it correctly, why should we read into the record the names of the directors present at the meeting?

Mr. Swaine: You are not putting in the minutes. It was agreed you would put in only the resolution affecting the Northern California.

Mr. Coulson: I did not understand that. If that is so, we certainly want an opportunity to examine these minutes and see if other material in the minutes ought to go in. I thought the working agreement was that we were putting in these documents that he presented.

Mr. Swaine: All that was presented was the excerpt affecting the minutes regarding the Northern Extension. That is all we asked for.

Mr. Coulson: I suggest the best evidence is the record [2147] itself.

Mr. Nicodemus: I was seeking to keep out of this record material which did not relate to this matter at all. There may have been other business at these meetings.

Mr. Wood: I am perfectly willing to have them confined to the minutes as they relate to the Northern California Extension, provided the record also shows what members of the committee were present. If you object to that, then I should ask for the entire minutes of each meeting.

(Testimony of M. J. Curry.)

Mr. Coulson: I do not object to it, Mr. Wood. It was only a desire to shorten this up and avoid duplication. But if you need a statement as to who were at the meeting, I have no objection to it.

Mr. Wood: That is all I wanted.

The Witness: I understand you want the complete attendance?

Mr. Taylor, of counsel.

Q. (By Mr. Wood) Just the members of the Executive Committee.

A. At the meeting June 25, 1931, present, Messrs. Schumacher, Aldrich, James, and Loasby.

At the meeting of July 23, 1931, there were present Messrs. Schumacher, James and Loasby.

At the meeting held October 15, 1931, present, Messrs. Schumacher, James and Loasby. [2148]

At the meeting held on November 17, 1931, Messrs. James, Schumacher, Loasby and Adams.

At the meeting held December 21, 1931, present, Messrs. Schumacher, James, Loasby and Shepard.

At the meeting held January 29, 1932, present Messrs. Schumacher, James and Shepard.

That completes the list.

Q. Mr. Curry, the Mr. James that is referred to in each case is Mr. A. C. James?

A. Mr. Arthur Curtiss James.

Mr. Coulson: And the Mr. Aldrich?

The Witness: Mr. Winthrop W. Aldrich.

Mr. Wood: I now offer in evidence a certificate of the Commission filed and entered June 23, 1932,

(Testimony of M. J. Curry.)

and report and order of the Commission filed and entered February 25, 1933, in Finance Docket No. 9448, Western Pacific Railroad Company Reconstruction Loan.

Mr. Nicodemus: Do you have those as one exhibit?

Examiner Wilkinson: The documents just referred to will be received as Exhibit No. 60.

(Exhibit No. 60, Witness Curry, received in evidence.)

Mr. Wood. That is all we have of Mr. Curry, unless any cross examination is desired, otherwise we will put on another witness.

Examiner Wilkinson: Are there any questions of Mr. Curry? [2149]

Mr. Willard: May we reserve the right until we have an opportunity to examine the documents that will be submitted through him——

Examiner Wilkinson: To recall Mr. Curry if necessary?

Mr. Willard: ——for cross examination, yes.

Mr. Coulson: I would like to make a similar reservation, Mr. Examiner.

Examiner Wilkinson: You are excused under those conditions.

Mr. Clay: We would like to make a similar reservation.

Mr. Swaine: Just a minute, Mr. Curry. Mr. Clay wants to clear up one point.

Mr. Clay: An order of the Commission has been introduced which was entered upon an application

(Testimony of M. J. Curry.)

by the railroad made to the Reconstruction Finance Corporation. If they are going to put the order in, it would seem logical to put the application upon which the order was made in also.

Mr. Swaine: We have no objection.

Mr. Wood: That is, application to the Reconstruction Finance Corporation and the I. C. C. dated May 23, 1932, as amended and supplemented by further applications dated June 7, 1932 and June 10, 1932.

You can produce those, Mr. Curry?

The Witness: Yes.

Mr. Wood: Along with these other documents of which [2150] you have a note.

If there is no further cross examination of Mr. Curry, I would like to put Mr. Buckley on the stand.

Examiner Wilkinson: You are excused, Mr. Curry.

(Witness excused.)

Mr. Wood: I would like to call Mr. Buckley as a witness.

CARL E. BUCKLEY

was sworn and testified as follows:

Direct Examination

Q. (By Mr. Wood) Mr. Buckley, you are an officer of the Chase National Bank? A. I am.

Q. What position do you hold?

A. Second vice president.

Q. You are connected with what department of the bank? A. Corporate Trust.

Q. How long have you been connected with the Corporate Trust Department as an officer?

A. As an officer, since 1929.

Q. You were an officer of the Corporate Trust Department during the period from February 11, 1931, to January 29, 1932? A. I was.

Q. As such an officer you are familiar with the records of the Corporate Trust Department relating to the administra- [2151] tion of corporate mortgages? A. Yes.

Q. During this period February 11, 1931 to January 29, 1932, Mr. Henry E. Cooper, individual trustee under the first mortgage, was a vice president of the Chase Bank? A. He was.

Q. The records of Mr. Cooper, individual trustee, were kept in the Corporate Trust Department of the Chase National Bank? A. They were.

Q. You are familiar with those records?

A. Yes.

Q. Are you familiar with the records of the in-

(Testimony of Carl E. Buckley.)

dividual trustee which were kept in the Corporate Trust Department relating to the authentication and delivery of five million dollars principal amount of the first mortgage bonds and the applications for withdrawal of the cash proceeds of those bonds in connection with the Northern California Extension?

A. I am.

Q. You are also familiar with the procedure that was followed in connection with those applications? A. Yes.

Q. Will you state briefly what procedure was followed in connection with taking down the bonds and taking down the [2152] cash, just to give the picture of what took place?

A. Mr. Henry E. Cooper was the individual trustee during this period. The Corporate Trust Department was organized to take care of transactions involving authentication and delivery of bonds, and the take-down of cash under corporate mortgages was handled in the Corporate Trust Department.

Pursuant to a running arrangement with Mr. Cooper, we handled these transactions referred to.

Q. In what form did the applications come in from the railroad company? Was there one set or were they in duplicate or in what form?

A. The applications came in in duplicate form. When they were approved by our counsel, pursuant to the instructions of the corporate trustee and the individual trustee we delivered one duplicate set to the corporate trustee and retained the other.

(Testimony of Carl E. Buckley.)

Q. The Corporate Trustee at this time was the Crocker First Federal?

A. Crocker First Federal of San Francisco.

Q. Did you act on behalf of the Crocker First Federal Trust Company, as well as Mr. Cooper, in delivering bonds and paying cash?

A. We did. We acted in pursuance to their instructions.

Q. Mr. Buckley, will you produce from the files of the [2153] individual trustee the files relating to the authentication and delivery of one million dollars principal amount of first mortgage bonds on February 11, 1931?

(The Witness complied with the request.)

Q. Will you describe the documents which are in there? Just identify them.

A. This is a copy of a contract dated January 28, 1931, signed by the Western Pacific Railroad Company and the Western Pacific Railroad Corporation.

Q. For what did that contract call?

A. The Corporation purchased from the Company; the Company sold to the Corporation.

Q. By the Corporation you mean——

A. Western Pacific Railroad Corporation.

Q. And "Company" is——

A. Western Pacific Railroad Company—purchased one million dollars principal amount of first mortgage 5 percent gold bonds of the Company at 97.5 percent of their face amount, together with the accrued interest.

(Testimony of Carl E. Buckley.)

Certified copy of resolutions adopted at a meeting of the Executive Committee of the Western Pacific Railroad Company held on February 11, 1931.

Q. What was the effect of those resolutions?

A. The Company resolved that it call upon the trustee under its first mortgage for the authentication pursuant to [2154] paragraph B of Section 2 of Article II of the first mortgage of one million dollars principal amount of first mortgage 5 percent bonds.

Certified copy of a resolution adopted at a meeting of the Board of Directors of the Western Pacific Railroad Corporation, at a meeting held on October 14, 1930. The effect of that was that five million dollars principal amount of first mortgage 5 percent bonds were to be issued by the Company under and secured by its first mortgage dated June 26, 1916, to First Federal Trust Company (Crocker First Federal Trust Company, Successor) and Henry E. Cooper—I do not know how voluminously you wish me to go into these things.

Q. I just want enough to identify them and characterize their contents.

A. The president or any vice president of this company is authorized and directed to execute in the name of the company said First Mortgage 5 Percent Bonds of the aggregate amount of five million dollars in such denominations as he may determine and to cause the corporate seal of the company to be affixed thereto and attested by the sec-

(Testimony of Carl E. Buckley.)

retary of the company, and deliver the bonds to the trustee under such first mortage.

"Further resolved, that in case any of the officers of this company who shall have signed or sealed any of [2155] the permanent bonds of said issues"——

Q. I do not think we need that, just enough to identify it.

A. Certified copy of an order of the Interstate Commerce Commission, Finance Docket 8473, ordering that "The Western Pacific Railroad Company be, and it is hereby, authorized to issue not exceeding five million dollars of First Mortgage 5 Percent bonds under and pursuant to, and to be secured by, the First Mortgage dated June 26, 1916, made by it to the First Federal Trust Company and Henry E. Cooper, trustees."

Said bonds to be sold to the highest bidder in conformity with the regulations prescribed in the Commission's order of October 6, 1919, as amended October 4, 1920, in Ex Parte 54, but at not less than 97.5 per cent of par and accrued interest.

As part of that certified copy is a report of the Commission, docket 8473, submitted October 1, 1930, decided October 6, 1930.

Q. I think that is enough on that order.

A. Letter of transmittal dated October 20, 1930, signed by F. M. Angellotti, general counsel of the Western Pacific Railroad Company.

Q. That was transmitting the application papers?

(Testimony of Carl E. Buckley.)

A. Transmitting certified copy of resolution of the Board [2156] of Directors of the railroad company and certified copy of resolutions adopted by the Board of Directors of the Western Pacific Railroad Corporation.

Letter dated December 4, 1930, from Crocker First Federal Trust Company, addressed to the Chase National Bank, and forwarding to them a million dollars face value of Western Pacific Railroad Company first mortgage Series A gold bonds, stating that they had been executed by the company and certified by the Crocker First Federal Trust Company as Corporate trustee, and requesting the Chase National Bank, when it had received all papers required by the first mortgage for the certification of the bonds, approved in writing by Messrs. Murray, Aldrich and Webb, to certify the bonds as individual trustee, and thereafter the bonds are to be held by us as agent for them as trustee, subject to the receipt of the purchase price for account of the trustee and an order for delivery from the railroad company approved in writing by Messrs. Murray, Aldrich and Webb, and that they be notified upon receipt of such order.

The papers should be obtained in duplicate, and copies sent to the Crocker First Federal Trust Company.

Q. You have some similar letters relating to the additional batches of first mortgage bonds?

A. I have four letters of similar nature, aggre-

(Testimony of Carl E. Buckley.)

gating [2157] four million dollars principal amount of bonds.

Q. I do not think it is necessary to read all those.

Mr. Nicodemus: Is it necessary to introduce all of them? Are they seven identical sets of papers?

Mr. Wood: I want to get the picture of the procedure that took place here after the first set. I think we can shorten it by indicating that the procedure was similar on each of the others, and consequently putting the papers in.

Mr. Nicodemus: I am trying to keep them out on the theory that they are similar.

The Witness: The dates of those are December 3, 1930, December 4, 1930, December 5, 1930, and December 6, 1930.

Telegram addressed to the Chase National Bank of the City of New York by Crocker First Federal Trust Company, dated February 10, 1931, requesting the Chase Bank to deliver a million dollars Western Pacific Company first mortgage 5 per cent bonds upon payment for account of trustees under first mortgage Western Pacific Railroad Company of 97.5 per cent of face value, and on submission of papers approved by Murray, Aldrich and Webb; also requesting the Chase Bank to honor requisition 244 of Western Pacific Railroad Company calling for payment of cash deposited with trustees amounting to $975,000, on submission of papers approved by Murray, Aldrich and Webb. [2158]

The telegram also stated that they will affix docu-

(Testimony of Carl E. Buckley.)

mentary tax stamp to the mortgage; on February 11, 1931.

Letter dated February 14, 1931, addressed to the Crocker First Federal Trust Company and Henry E. Cooper as trustees under the first mortgage of the Western Pacific Railroad Company, dated June 26, 1916.

Q. (By Mr. Wood) That was merely the opinion of counsel that was given?

A. Signed by Murray, Aldrich and Webb, and that is the opinion of counsel given on the transaction involving the authentication and delivery of one million dollars principal amount of first mortgage bonds.

Q. I think that is sufficient to identify that.

A. Letter dated February 14, 1931, addressed to the Chase National Bank by Messrs. Murray, Aldrich and Webb, enclosing their opinion in duplicate, addressed to the Crocker First Federal, and Henry E. Cooper as trustees.

Letter dated February 17, 1931, addressed to Crocker First Federal Trust Company by the Chase National Bank, advising them that on February 11, 1931, they delivered to the Western Pacific Railroad Company a million dollars principal amount of first mortgage Series A 5 per cent gold bonds, and that in connection with the delivery it had received from Murray, Aldrich and Webb their opinion letter dated February 14, 1931, which is enclosed with [2159] the various documents outlined in their

(Testimony of Carl E. Buckley.)

letter. There is also enclosed a receipt of the railroad company for the delivery of the bonds.

Letter dated February 24, 1931, from Crocker First Federal Trust Company, San Francisco, addressed to the Chase National Bank, acknowledging its letter of February 17, 1931, confirming that $500 face amount of documentary United States Internal Revenue stamps have been affixed to the original counterpart of the mortgage and have been cancelled.

Receipt dated February 11, 1931, signed by the Western Pacific Railroad Company, addressed to the Chase National Bank of the City of New York as agent for the trustees under the Western Pacific Railroad Company first mortgage for a million dollars principal amount of Western Pacific Railroad Company first mortgage bonds.

Mr. Wood: Could I see that file just a moment, Mr. Buckley?

I will read the first paragraph in this letter from the Chase National Bank to the Crocker First Federal Trust Company, which copy is here:

"We advise that on February 11, 1931, we delivered to the Western Pacific Railroad Company one million dollars principal amount of first mortgage Series A 5 per cent gold bonds of the Western Pacific Railroad Company, num- [2160] bered"—and the numbers are given—"against payment to us of $975,000 for account of the trustees under the first mortgage."

(Testimony of Carl E. Buckley.)

Does that indicate to you, Mr. Buckley, that that cash was deposited to you? A. It does.

Mr. Wood: I want to offer this file in evidence. We have photostatic copies, but we have not had time to make a sufficient number for distribution. We would like to substitute one photostatic copy with the Commission, with the understanding that we will furnish additional copies for the various parties, and that same understanding I should like to have with respect to all of these first mortgage files.

Examiner Wilkinson: Is there any objection to the receipt?

Mr. Coulson: I would like it understood that I am making the same objection to these documents put in through this witness as I made to the documents put in through Mr. Curry. I think we are dragging in a lot of material that is irrelevant, and I am unpersuaded that it is not irrelevant to this moment.

Examiner Wilkinson: The documents just referred to by this witness, which I understand are known as the first mortgage file——

Mr. Wood: It is a file taken from the files of the [2161] individual trustee under the first mortgage. These applications were submitted in duplicate. They came first as a rule to the individual trustee, and one set was sent to the Crocker First Federal, the corporate trustee, and one set was kept in the files of the Chase National Bank on behalf of the individual trustee.

(Testimony of Carl E. Buckley.)

Examiner Wilkinson: —will be received as Exhibit 61.

(Exhibit No. 61, Witness Buckley, received in evidence.)

Examiner Wilkinson: We will recess now until 1:30 o'clock p. m.

(Whereupon, at 12:40 o'clock p. m., a recess was taken until 1:30 o'clock p. m. of the same day.)

[2162]

After Recess

1:30 o'clock p. m.

CARL E. BUCKLEY

testified further as follows:

Direct Examination

Mr. Wood: Mr. Examiner, apropos of the discussion this morning regarding the production of records from the General and Refunding Mortgage, I want to say on behalf of Mr. Buckley and the Chase National Bank that the bank is ready to produce all of the records of the General and Refunding files at the request of the bondholders. They can get the files down here tonight and have them ready to be put in in the morning.

As counsel I feel that I ought not to take any part in the introduction of those documents. Counsel are here and they can examine the documents before the hearing and put in anything they want. Mr. Buckley will go on the stand and identify them, and

(Testimony of Carl E. Buckley.)

assist counsel in any way possible. A telephone call to New York will get the documents down here to-night or first thing in the morning.

Mr. Swaine: In order to clarify that particular point, there were only three issues of refunding bonds taken down.

Mr. Wood: I think it was three, possibly four.

Mr. Swaine: The documents will not be very voluminous, [2163] will they?

The Witness: On that bond alone?

Mr. Wood: Yes.

Mr. Clay: We think the mortgage trustee should have a counsel. We know nothing about what your file contains. You are still the mortgage trustee.

Mr. Wood: Unfortunately, in this situation there has been no time to make substitution.

Mr. Clay: There is no time for us to familiarize ourselves with the documents.

Mr. Wood: The documents are not very voluminous. You could examine them, I think, in half an hour easily. Mr. Buckley will have them here and can explain what is in them.

Mr. Clay: The responsibility is not the bondholders', it is the mortgage trustee's. Why have a mortgage trustee at all?

Mr. Wood: Unfortunately, we have this conflict where the trustee has resigned and no new trustee has been substituted.

Mr. Clay: You are still the acting trustee.

Mr. Wood: We are, and we are ready to produce the records.

(Testimony of Carl E. Buckley.)

Mr. Swaine: So far as those records are concerned, there is no conflict of interest. All we want is to identify [2164] what documents were delivered to the trustee to take down the bonds. If the documents are produced, why can they not be put in with the consent of all parties in interest? Those are the documents which the trustee received against which the bonds were deposited.

Mr. Clay: Personally, I do not feel I am justified in taking the responsibility of what should go in and what should not, because I do not know what the documents are and I would not want to do it on half an hour's casually going through the files.

Mr. Wood: Anything we have to put in would be on the part of the first mortgage trustee's case, and I think it would be an imposition for me to do that.

Mr. Clay: You mean you are counsel for Mr. Armstrong?

Mr. Wood: Exactly.

Mr. Clay: Of course, our trustee is the Chase Bank, which still is the trustee of the General and Refunding mortgage.

Mr. Wood: Exactly.

Mr. Clay: So you are down here not representing the Chase Bank or Mr. Armstrong?

Mr. Wood: I do not feel I should represent two or three conflicting interests.

Mr. Swaine: I am perfectly willing to resolve that difficulty. As part of the case of the Institutional [2165] Bondholders' Committee I would like

(Testimony of Carl E. Buckley.)

to know what the facts are with respect to the creation of the General and Refunding mortgage. I do not care whom the facts hit. I would like to know what the facts are.

I would like to request that the Chase as trustee under the General and Refunding mortgage produce those documents here tomorrow morning, and I will assume the burden of putting them in if nobody else will. They are perfectly relevant to our case.

Examiner Wilkinson: As far as the Examiner is concerned, he is not making any suggestions to counsel as to how they should try their case. The only thing the Commission is concerned with is to get the facts in the record. If Mr. Wood will see that they are produced here, we will get them in the record.

Mr. Swaine: I would like to make the request, then, on behalf of the Institutional Bondholders' Committee, that the files of the trustee under the General and Refunding Mortgage with reference to the authentication of bonds under that mortgage be produced tomorrow morning.

Examiner Wilkinson: Do you have any objection to that, Mr. Clay?

Mr. Clay: No.

Mr. Willard: No.

Mr. Wood: We undertake to produce the documents. [2166]

(Testimony of Carl E. Buckley.)

Mr. Buckley, if a short recess is taken now, could you telephone to New York and get those documents down here tonight?

(Discussion off the record.)

Mr. Coulson: The difficulty with this course of procedure, trying to sit continuously until we get these documents in, is that it may well be that when all the trustees put in these various documents questions will be suggested to one party in interest or another as to a matter that needs to be supplemented, and we may have to have another hearing anyway. I have no objection to continuous sessions if it serves a useful purpose, but I am afraid we are going by this dumping in of bushels of documents for later examination only to aggravate the time element instead of solving it.

Mr. Swaine: These are just a few documents. They relate to three transactions, and if counsel are going to want to take an adjournment after they see them, let them see them and take an adjournment tomorrow after seeing them, instead of taking an adjournment after two weeks from tomorrow or some later date.

Examiner Wilkinson: I think the sooner they are produced, in as much as they are going to be put in the record, the better it is.

Mr. Nicodemus: They can be produced tomorrow, except [2167] the originals. We have to go back again and photostat them.

Mr. Swaine: That is true of a lot of it.

(Testimony of Carl E. Buckley.)

Mr. Nicodemus: I would much rather come back a week from today with everything in shape.

Examiner Wilkinson: I will be guided by the desires of the parties here.

Mr. Swaine: I think we ought to get these here and produce them and have them identified, then the photostats can be distributed. If there is any need for further hearing, we can have it.

Examiner Wilkinson: If there is no real objection to it on the part of the parties, and if Mr. Buckley wants to be excused here to telephone, we can excuse him temporarily to do that.

We will take a short recess.

(Whereupon a short recess was taken.)

Mr. Clay: Mr. Examiner, while we are waiting, there is a matter I would like to clear up:

The interest due on the notes of the Western Pacific Railroad held by the Reconstruction Finance Corporation to and including June 30, 1936, was $454,689.30. The interest which will be due on said notes to and including December 31, 1936, will be $544,309.90.

Mr. Nicodemus: Is the amount correctly stated in—— [2168]

Mr. Clay: Those figures are taken from the books of the treasurer of the Reconstruction Finance Corporation.

Mr. Nicodemus: Is the amount correctly stated in the Debtor's plan as of January 1, 1936?

Mr. Clay: I do not know.

(Testimony of M. J. Curry.)

Mr. Swaine: Those figures vary quite a bit, $80,000, from the figures stated in the Institutional Bondholders' Committee plan. The figures stated in the plan were obtained from the Debtor; therefore, the Debtor and the Reconstruction Finance Corporation apparently are some $80,000 apart on the amount of interest which will be accrued up to January 1, 1937. I do not care what it is, but I would like to have the facts correct. I wish the Debtor and the Reconstruction Finance Corporation would get together and find out what the difference is, and why it is.

Mr. Clay: The figures which I have just given are the figures of interest which the Reconstruction Finance Corporation claims, and they are taken from the books of the treasurer of the Reconstruction Finance Corporation.

Mr. Curry: I think the reason for that is, Mr. Clay——

Mr. Clay: I do not care about the reason. I just want it stated of record what our claim is.

Mr. Curry: I think you are accruing on a 5 per cent basis. That is what I think. [2169]

Mr. Clay: That is what we are claiming.

Mr. Nicodemus: Can you give us the detail of the claim, its interest base, and the particular rate?

Mr. Clay: The interest specified in the notes is from the date that the interest went into default.

Mr. Swaine: In order that it may appear in juxtaposition to this statement, I think that should

(Testimony of M. J. Curry.)

the Commission approve the plan proposed by the Institutional Bondholders the plan ought to be modified to state the correct amount of principal plus interest accrued to January 1, whatever that may be.

Mr. Clay: I think it should.

Mr. Swaine: The plan as presented ought to be modified if the figure in the plan as presented is incorrect.

Examiner Wilkinson: Has the claim of the Reconstruction Finance Corporation been filed with the court?

Mr. Clay: The claim has been filed with the court.

Examiner Wilkinson: Will that claim correspond with the figures you have given?

Mr. Clay: It will correspond with the figures I have given.

Mr. Swaine: It is approximately $80,000 difference, as I get the figures.

Mr. Clay: No, it is about $120,000.

Q. (By Mr. Wood) Mr. Buckley, in Exhibit No. 61, which [2170] you identified before the adjournment, reference was made to cash requisition No. 244. Will you please produce that? Will you identify and describe the documents, briefly, that are contained in that file?

A. There is a certificate signed by the president and treasurer of the Western Pacific Railroad Company, dated February 11, 1931, attached to which is Exhibit A.

(Testimony of M. J. Curry.)

Q. Exhibit A is what, briefly?

A. Exhibit A is a certified copy of the minutes of a meeting of the stockholders of the company at a meeting called and held on September 22, 1930, which says that——

Q. I would not read the contents; just identify it.

A. Exhibit B is a certified copy of the extracts from the minutes of the meeting of the stockholders of the Western Pacific Railroad Corporation at a meeting held on October 15, 1930.

Q. That is stockholders or directors?

A. Stockholders.

A certified copy of the resolution adopted at a meeting of the Executive Committee of the Western Pacific Railroad Company at a meeting held on February 11, 1931.

An opinion letter dated February 11, 1931, addressed to the Crocker First Federal Trust Company and Henry E. Cooper, trustees under the first mortgage of the Western Pacific Railroad Company, signed by F. M. Angellotti, [2171] general counsel of the Western Pacific Railroad Company.

Letter dated February 14, 1931, addressed to Crocker First Federal Trust Company and Henry E. Cooper as trustees under first mortgage of Western Pacific Railroad Company, signed by Murray, Aldrich and Webb, transmitting certain papers submitted in connection with requisition No. 244.

Copy of letter dated February 14, 1931, addressed

(Testimony of M. J. Curry.)

to Crocker First Federal Trust Company by Chase National Bank, advising it that on February 11, 1931, it paid to the Western Pacific Railroad Company, $975,000, representing the proceeds of sale of one million dollars principal amount of first mortgage bonds of Western Pacific Railroad Company, at 97.5, and stating that the payment was made against the expenditures by the railroad company covered by their requisition 244.

It also transmitted a receipt of the railroad company for the payment, and includes an opinion letter of Murray, Aldrich and Webb, dated February 14, 1931, with various documents mentioned in their letter.

A letter dated February 24, 1931, addressed to the Chase National Bank by Crocker First Federal Trust Company, acknowledging receipt of their letter of February 17, 1931, relative to the payment of $975,000 on requisition 244. [2172]

Duplicate receipts signed by M. J. Curry, assistant treasurer of the Western Pacific Railroad Company, addressed to the Chase National Bank, for $975,000, payment made on requisition 244.

Mr. Wood: I offer that in evidence and we will substitute the photostatic copies as in the other case.

Examiner Wilkinson: The documents just referred to by the witness will be received as Exhibit No. 62.

(Exhibit No. 62, Witness Buckley, received in evidence.)

(Testimony of M. J. Curry.)

Mr. Nicodemus: Can you not stipulate that these documents are substantially identical to exhibit 61, except as to amounts and dates?

Mr. Wood: This is a different one.

Mr. Nicodemus: They all follow the same point. This is just a draw-down of the funds.

Mr. Wood: Let me explain what took place in each of the cases. I think it will make the record a little clearer:

In each case the railroad company first applied for authentication and delivered bonds upon the deposit of the cash proceeds of their sale, which in every case was 97.5 of the face amount. Then simultaneously they made application on these requisitions for the withdrawal of the cash proceeds so deposited against the certification of expenditures on the Northern California Extension. This [2173] second file is the take-down of the cash proceeds of the one million dollars of bonds that were referred to in the first file.

Mr. Nicodemus: I see. In each case we will have a series of take-downs of bonds followed by take-downs of cash simultaneously. The point is that one exhibit is typical of any other series that you produce here to absorb the five million dollars.

Mr. Wood: Exactly.

Mr. Nicodemus: We are cluttering up the record with all this identification of documents that are voluminous and have to be reproduced at great expense.

(Testimony of M. J. Curry.)

Mr. Swaine: The dates are very important here.

Mr. Nicodemus: Cannot the witness supply the dates? Is there any objection to the dates being supplied by the witness?

Examiner Wilkinson: Of course, the exhibit will be in the record and will speak for itself. As I understand, this is purely a question of identification, is it not? The witness' testimony is purely identifying the exhibits?

Mr. Nicodemus: They propose a series, as I understand, of about 14 exhibits.

Examiner Wilkinson: If an exhibit can be offered, and a statement sufficiently descriptive for identifying it can be made, that is all that is necessary, so far as I [2174] see it.

Mr. Nicodemus: You could make a statement on the record, could you not, Mr. Wood?

Mr. Coulson: That is open to the objection, Mr. Nicodemus, that if this point is going to be labored over, the other creditors ought to have an opportunity to examine these documents. It would be a considerable convenience to have copies of them for that purpose. So long as we have let so much of this go in, I do not see why these should not be put in, and give us an opportunity to see them.

Mr. Wood: These documents do vary also in the description of expenditures made. In other words, the expenditures are for different purposes in connection with the construction of the line, so that I think it would be well to have them all in.

(Testimony of M. J. Curry.)

Mr. Nicodemus: If counsel insists on it; my suggestion was only in the interest of holding down the record, which is getting beyond all reasonable proportions.

Mr. Wood: In connection with this first one, I would like to read portions of these as typical of the cash requisitions.

The minutes of the meeting of stockholders of the Western Pacific Railroad Corporation, which is the holding company of the railroad company, begins as follows: [2175]

"The Chairman stated that a further purpose of the meeting was the consideration of a proposal to consent to the authentication and delivery of $5,000,000 principal amount of the First Mortgage bonds of the Western Pacific Railroad Company, to bear interest at the rate of 5 per cent per annum and to be issued under the first mortgage of said company, dated June 26, 1916, and/or the payment of the proceeds of such bonds held in the form of deposited cash by the trustees on this said first mortgage with respect to the constructing, purchasing and/or otherwise acquiring by the Western Pacific Railroad Company of its proposed so-called 'Northern California Extension', consent of stockholders of this corporation being required under said mortgage, because of the fact that the total expenditure made or to be made in connection with such project would exceed $1,000,000."

Then follows a recital of the provisions of the mortgage, and then a resolution:

(Testimony of M. J. Curry.)

"Now, therefore, be it resolved, that the consent of the stockholders of this corporation be and it is hereby given to the authentication and delivery of $5,000,000 principal amount of the first mortgage bonds of the Western Pacific Railroad Company to bear interest at the rate of five per cent per annum, and to be issued under the first mortgage of said company, dated June 26, [2176] 1916, and/or the payment of the proceeds of such bonds held in the form of deposited cash by the trustees under said first mortgage with respect to the constructing, purchasing, and/or otherwise acquiring by the Western Pacific Railroad Company of its proposed so-called 'Northern California Extension' to begin at a point on the existing main line of said company in the vicinity of Keddie, Plumas County, California, and to connect at a point at or near Bieber, Lassen County, California, with a line built or to be built by Great Northern Railway Company from Klamath Falls southerly to said point at or near Bieber, California, being a total distance of approximately 112 miles; and also including a joint terminal to be jointly owned by said company and said Great Northern Railway Company at or near said Bieber; and also including a line of railroad to be jointly acquired and/or constructed and owned by the Western Pacific Railroad Company and Great Northern Railroad Company, extending from a point on the proposed line of said Great Northern Railway Company in the vicinity of Lookout, Mo-

(Testimony of M. J. Curry.)

doc County, California, westerly to a connection with the McCloud River Railroad at or near Hambone, Siskiyou County, California, being a line approximately 36 miles in length."

Mr. Homire: Is this part of the exhibit that is to be put in that you are reading? [2177]

Mr. Wood: This is part of the exhibit.

Mr. Homire: It means it is going in the record twice. Is that necessary?

Mr. Wood: I am not going to read the entire document.

Examiner Wilkinson: The exhibit, of course, will speak for itself. As I understand, this is purely descriptive of the exhibit.

Mr. Wood: Exactly. I am merely calling attention to certain pertinent parts of these exhibits.

Then we have the certificate of the president and treasurer certifying that.

"Expenditures to the amount of $999,998.98 have been actually made by the Western Pacific Railroad Company after June 30, 1916, to-wit, between February 1, 1929 and November 30, 1930, both inclusive, for the construction of a new line of railroad, known as this company's 'Northern California Extension,'"

and then follows the description of the line in language similar to what I just read.

Then it goes on:

"Said expenditures consist of the following items:

(Testimony of M. J. Curry.)

"Engineering	$244,777.82
Land for Transportation Purposes	121,377.67
Grading	589,393.37
Tunnels and Subways	$ 44,450.12

[2178]

And then the total.

"Reimbursement is sought from cash deposited under Section 2 of Article Second of said first mortgage, the amount of reimbursement being $975,000, in accordance with the provisions of said first mortgage."

Then is a description of the line. I will not read all of this.

Mr. Coulson: If the Examiner please, I hesitate to interrupt Mr. Wood, but it seems to me that all of this laboring with factual data offered to the Commission might better be reserved to the brief. It would be interminable here if we have running argument with every exhibit that is put in.

Mr. Wood: I am not going to do it. This is all descriptive.

Examiner Wilkinson: Counsel says that it is descriptive of his exhibit, and the Examiner does not like to cut him off. He expects him to use his discretion, though, of course, to make it as short as possible.

Mr. Wood: I assure you I will do that, Mr. Examiner.

(Testimony of M. J. Curry.)

The certificate then states:

"That so far as known or believed by us the property so constructed or acquired as aforesaid, is not subject to any lien or charge except (a) necessarily undetermined [2179] liens or charges ordinarily incident to construction and (b) the lien of said first mortgage."

The resolutions of the Executive Committee contain the following language:

"All portions of said extension which have been constructed and/or acquired being subject to the lien of said first mortgage and now in the possession of this company."

In the opinion of F. M. Angellotti, general counsel to the railroad company, appears this:

"In my opinion title to all those portions of this company's new line of railroad known as its 'Northern California Extension' and to all of the property which is mentioned in the certificate of H. M. Adams, president, and E. C. Bates, treasurer, of the Western Pacific Railroad Company, dated February 11, 1931, which accompanies this opinion * * * has vested in the Western Pacific Railroad Company, subject only to liens or charges certified in said certificate and to liens or charges of the character not required to be certified under the terms of paragraph 'Second' of sub-section D of section 2 of Article Second of the Western Pacific Railroad Company's first mortgage dated June 26, 1916, and all deeds, conveyances, or other instru-

(Testimony of M. J. Curry.)

ments necessary to vest the title to said property in said company have been executed and delivered [2180] to it, and all said portions of said extension and said property are subject to the lien of this company's first mortgage, and no supplemental indenture or instruments of further assurance are necessary to subject said property or any part thereof, to the lien of said first mortgage, subject only to the liens and charges aforesaid."

That answers a question that was raised earlier in the proceeding.

Mr. Coulson: May I here add, then, to my objection to the receipt of these documents that if the idea of presenting them is to put before the Commission as having probative force opinions of counsel on which the trustee proceeded in refraining from taking a supplemental indenture putting the Northern Extension under the first mortgage, I think it is a quite improper type of evidence. I do not think it is under any theory of law orderly procedure and evidence. It might be important in any action against the trustees on the part of the first mortgage bondholders for negligence, but putting it in this record here seems to be quite improper.

Mr. Wood: These are merely introduced as part of the files which the trustees received, the application papers which the trustees received in connection with the take-down of cash.

(Testimony of M. J. Curry.)

Mr. Coulson: My additional objection is prompted by the [2181] emphasis you give to Angellotti's opinion.

Examiner Wilkinson: I think that if counsel hereafter in introducing these exhibits will be a little briefer the Examiner would appreciate it. These exhibits are being received in line with the ruling made at the beginning of this testimony. It is understood that all of the evidence will be subject to a motion to strike after the other parties have received copies of them.

Mr. Wood: Mr. Examiner, I merely wanted to use the first two as typical of the others.

Mr. Nicodemus: You were reading from Exhibit 62? I want to make that clear.

Mr. Wood: 62, yes, with those which follow.

If it is agreeable, I am going to ask Mr. Buckley merely to identify the files without even identifying the individual documents, with the understanding that the documents contained are similar to those which have just been introduced.

Mr. Homire: It is understood that the Reconstruction Finance Corporation will reserve the right to strike this evidence out if on examination of it we find it objectionable.

Examiner Wilkinson: The parties to the proceeding will have the right to move to strike them from the record after they have seen them. [2182]

Mr. Wood: Mr. Buckley, will you please produce the file relating to the authentication of one

(Testimony of M. J. Curry.)

million dollars of bonds on June 25, 1931, against the deposit of $975,000 in cash, and with that requisition No. 246 relating to the payment on the same date of that $975,000 in cash?

(Discussion off the record.)

Mr. Wood: First let us have the bond takedown. I do not think you want me to do any more than offer it in evidence, Mr. Examiner.

Examiner Wilkinson: The documents referred to will be received as Exhibit No. 63.

(Exhibit No. 63, Witness Buckley, received in evidence.)

Mr. Wood: Then the requisition No. 246 calling for $975,000 of cash.

Examiner Wilkinson: The document will be received as exhibit No. 64.

(Exhibit No. 64, Witness Buckley, received in evidence.)

Mr. Wood: Then on July 23, 1931, authentication and delivery of $900,000 of bonds in deposit of $877,500 in cash.

Examiner Wilkinson: The document will be received as Exhibit 65.

(Exhibit No. 65, Witness Buckley, received in evidence.)

Mr. Wood: On the same date, requisition No. 247 for $812,571.03 in cash. [2183]

Examiner Wilkinson: The documents will be received as Exhibit 66.

(Exhibit No. 66, Witness Buckley, received in evidence.)

(Testimony of M. J. Curry.)

Mr. Wood: October 24, 1931, requisition No. 248 for $64,928.97 in cash.

Examiner Wilkinson: These documents will be received as Exhibit 67.

(Exhibit No. 67, Witness Buckley, received in evidence.)

Mr. Wood: On November 25, 1931, authentication and delivery of $750,000 of bonds against deposit of $731,250 in cash.

Examiner Wilkinson: These documents will be received as Exhibit No. 68.

(Exhibit No. 68, Witness Buckley, received in evidence.)

Mr. Wood: On the same date, requisition No. 250 calling for $731,250 in cash.

Examiner Wilkinson: These documents will be received as Exhibit No. 69.

(Exhibit No. 69, Witness Buckley, received in evidence.)

Mr. Wood: On January 8, 1932, application for $350,000 of bonds against deposit of $341,250 in cash.

Examiner Wilkinson: These documents will be received in evidence as Exhibit No. 70.

(Exhibit No. 70, Witness Buckley, received in evidence.)

Mr. Wood: On the same date, requisition No. 251, call- [2184] ing for $241,250 in cash.

Examiner Wilkinson: These documents will be received as Exhibit No. 71.

(Testimony of M. J. Curry.)

(Exhibit No. 71, Witness Buckley, received in evidence.)

Mr. Wood. On January 29, 1932, application for one million dollars of bonds against deposit of $975,000 in cash.

Examiner Wilkinson: These documents will be received as Exhibit No. 72.

(Exhibit No. 72, Witness Buckley, received in evidence.)

Mr. Wood: On the same date, requisition No. 252, calling for $975,000 in cash.

Examiner Wilkinson: These documents will be received as Exhibit 73.

(Exhibit No. 73, Witness Buckley, received in evidence.)

Q. (By Mr. Wood) Mr. Buckley, I show you a telegram and ask you if that was received by the Chase National Bank. A. It was.

Mr. Wood: This telegram is a telegram from the Crocker First National Bank, the corporate trustee, stating what its records show as to the recordation of the first mortgage in Plumas and Lassen Counties, which are the counties in which the Keddie-Bieber Line is situated. I realize it is not the best evidence, but I would like to offer it, if there is no objection. If you desire the original docu- [2185] ments we can get them from San Francisco at a later date, but it may save time if we proceed on this telegram. You realize, of course, that we do not have time to get the original documents here for this hearing.

(Testimony of M. J. Curry.)

Examiner Wilkinson: Is there any objection to the form of this telegram?

Mr. Coulson: No.

Examiner Wilkinson: It will be received as Exhibit 74.

(Exhibit No. 74, Witness Buckley, received in evidence.)

Mr. Wood: I would like to substitute a copy, and we will supply additional copies.

Mr. Nicodemus: Dated what day? October 21, 1936.

Mr. Wood: Now, Mr. Buckley, will you get those debentures files?

Mr. Nicodemus: Have you finished with the first mortgage?

Mr. Wood: I have finished with the first mortgage.

Mr. Nicodemus: Does that cover the entire five million dollars?

Mr. Wood: That covers the five million dollars.

Mr. Nicodemus: What are these resolutions in 1931 and 1932?

Mr. Wood: You mean that Mr. Curry identified?

Mr. Nicodemus: Yes.

Mr. Wood: I think those are the minutes of the meet- [2186] ings at which the resolutions in those files were adopted.

Mr. Nicodemus: Was your last draw-down the 17th of November?

Mr. Wood: No, January 29, 1932 was the last one.

(Testimony of M. J. Curry.)

Mr. Nicodemus: Have you covered that drawdown?

Mr. Wood: Yes.

Mr. Nicodemus: All right.

Mr. Wood: That was Exhibits 72 and 73.

Q. Mr. Buckley, will you please produce the file relating to the authentication and delivery on February 27, 1931, of one million dollars of debentures under the indenture of July 1, 1930, under which the Chase National Bank was trustee?

Unless counsel for the general mortgage bondholders wish to identify these further, I am going to offer them in the same way that I have offered these first mortgage files, without reading them or doing any more than marking them as exhibits. But I wish to say this, Mr. Examiner, that we have not had photostatic copies of these made and I would like to have them subject to the same understanding as those Mr. Curry produced, that we will identify them and then offer them in evidence with photostatic copies as soon as we can have them made.

Examiner Wilkinson: As I understand it, you are not proposing now to offer physically any of these exhibits? [2187]

Mr. Wood: I do not want to put these original bank files into the record without being able to withdraw them. We have not been able to make photostatic copies.

Examiner Wilkinson: When is it proposed to supply copies of these?

(Testimony of M. J. Curry.)

Mr. Wood: As soon as we can have photostats made, and that will be as soon as we get back to New York. It will take only a few days to make them.

(Discussion off the record.)

Mr. Wood: The next is an application for $600,000 of debentures, authenticated on March 26, 1931.

Mr. Nicodemus: Did you put in the one for February 27?

Mr. Wood: That is the one that I just mentioned.

The Witness: A million dollars.

Mr. Wood: The next one is application for $530,000 of debentures, authenticated on May 25, 1931.

The next is application for $995,000 of debentures, authenticated on June 20, 1931.

The next is an application for $309,000 of debentures, authenticated on August 25, 1931.

The next is an application for $600,000 of debentures, authenticated on October 20, 1931.

The next is an application for $120,000 of debentures, authenticated on November 25, 1931.

The next is an application for $350,000 of debentures, [2188] authenticated on January 29, 1932.

The next is an application for $347,000 of debentures, authenticated on March 28, 1932.

The next is an application for $149,000 of debentures, authenticated on May 31, 1932.

Q. Mr. Buckley, on March 1, 1932, do your files show cancellation of debentures? A. Yes.

(Testimony of M. J. Curry.)

Q. Will you state what took place on that date with respect to that cancellation?

A. On March 1, 1932, the Chase Bank received $4,504,000 principal amount of Western Pacific Railroad Company 5 per cent gold debentures.

Q. How many were outstanding on that date according to your records?

A. That was the principal amount outstanding also.

Q. In other words, these were all of the debentures then outstanding?

A. All of the debentures authenticated and delivered, outstanding, for cancellation.

Q. Is there a letter in that file, Mr. Buckley, from Mr. W. W. Carman, vice president of the A. C. James Company relative to that cancellation?

A. Yes.

Q. Will you state briefly what the contents of the letter [2189] are?

A. This is addressed to the Chase National Bank and it says in connection with the delivery and surrender to the Chase National Bank as trustee of $4,504,000 principal amount of 5 per cent gold debentures of the Western Pacific Railroad Company which were issued and are registered in the name of A. C. James Co., I desire to advise you that I have been authorized by each of the directors of A. C. James Co. to deliver and surrender the said debentures in exchange for the note of the Western

(Testimony of M. J. Curry.)

Pacific Railroad Company in the principal sum of $4,504,000, with interest at the rate of 5 per cent per annum, secured by $5,630,000 principal amount of the railroad company's general and refunding mortgage gold bonds, Series A.

It goes on to say that a certified copy of the resolution when adopted confirming this action will be furnished to you.

Q. Do you have a copy of that resolution that is referred to?

As to that, Mr. Examiner, I should like to offer this, and it is subject to the same understanding as these preceding files, that we will submit copies and offer the photostats in evidence.

Examiner Wilkinson: Mr. Wood, to get this straight on the record, I do not understand that you are offering [2190] these.

Mr. Wood: We are calling on Mr. Buckley to produce them.

Examiner Wilkinson: As I understand it, this is data which Mr. Swaine has requested you to produce.

Mr. Wood: Right.

Examiner Wilkinson: We have a witness here with the originals, and you undertake to furnish to Mr. Swaine the data which you are here describing?

Mr. Wood: That is right.

(Discussion off the record.)

(Testimony of M. J. Curry.)

Q. (By Mr. Wood) Mr. Buckley, in connection with the last two applications for debentures, the one on March 28, 1932 and the one on May 31, 1932, do those files show anything with respect to the cancellation of the debentures that were authenticated and delivered? There was a peculiar procedure there. Will you describe from the papers what took place in connection with that authentication and delivery?

A. In connection with the $347,000 authentication and delivery, there is a certified copy of a resolution adopted at a meeting of the Board of Directors of A. C. James Company held on March 5, 1932, which resolves that the acts of the officers of the company in exchanging $4,504,000 principal amount of the Western Pacific Railroad Company's 5 per cent debentures for a three-year [2191] note of the Western Pacific Railroad Company secured by the deposit of $5,630,000 principal amount General and Refunding Mortgage gold bonds of the railroad company be and is hereby ratified and approved and adopted as the act of the company.

Be it further resolved that the officers of the company are authorized and directed to advance to the Western Pacific Railroad Company the sum of $347,000, to be represented by a collateral note of the Western Pacific Railroad Company bearing 5 per cent interest payable quarterly, maturing three years from the date thereof, secured by $443,750 principal amount of the general mortgage gold bonds of the Western Pacific Railroad Company.

(Testimony of M. J. Curry.)

It goes on:

Resolved, that in the event that the Western Pacific Railroad Company is advised by its counsel that the advance to be made by A. C. James Company as authorized by the Board must pursuant to the authority of the Interstate Commerce Commission be consummated by an initial issue of the debentures of the railroad company and their immediate exchange for collateral notes, the officials of this company are hereby authorized and directed to consummate the transaction authorized by this Board in that manner, and to do any further acts and execute any further instruments necessary to carry out the purposes of this resolution. [2192]

Q. Do your files show that the debentures authenticated and delivered were immediately exchanged for a note and turned in to the trustee for cancellation?

A. The files show that the $347,000 principal amount of debentures were surrendered on the same date, March 28, 1932, by Western Pacific Railroad Company, for cancellation.

Q. With respect to the final application, do the files show that a similar transaction took place?

A. That is correct, with respect to $149,000 principal amount of debentures, on May 31, 1932.

Mr. Wood: Yes.

We are through with our case, Mr. Examiner.

Examiner Wilkinson: As I understand it, Mr. Wood, these last data that the witness has been tes-

(Testimony of M. J. Curry.)

tifying concerning are to be furnished in the shape of an exhibit for the record?

Mr. Wood: All of those files will be photostated and the file will be offered. Each file will be offered in evidence, with the request that a photostated copy be substituted for it and copies supplied to the various parties.

Mr. Homire: If they have finished, there are one or two things I would like to have the record show on behalf of the Reconstruction Finance Corporation:

We would like to have in the record the Commission's [2193] valuation reports on the Western Pacific, the report which is reported in 29 Valuation Reports, pages 239 to 279, and any supplements if there are any, up to date. I am not sure whether there are or not.

Mr. Nicodemus: Can that be introduced by reference to the published report?

Mr. Homire: I assume not, on the same theory that was advanced earlier in the proceeding.

Mr. Swaine: Can it be stipulated that the Commission's valuation was a certain amount as of a certain day, and that the additions since that day have been so much, so that by bringing it down to date the total valuation as of the last date that you have would be so much? We will stipulate that.

Mr. Nicodemus: I think it should be done that way, in the interest of brevity.

Mr. Swaine: You are not interested in the detail of that value, are you?

(Testimony of M. J. Curry.)

Mr. Homire: The same question came up as came up before. I have not examined carefully enough to know how much. I take it for granted all that we will want to put in is the final valuation as of the final date on which the Commission has placed a value on it. If there is anything in the report that we would like in, we would like to be at liberty to put it in. [2194]

Mr. Nicodemus: Those valuation reports are interminably long. They are referred to in the plan, and I do not think they have ever been put in the record, so far as I know.

Mr. Swaine: Before we leave that, can we not stipulate there as to the total valuation? You do not care about the detail, how much of it is in one thing and how much in another, do you?

Mr. Homire: It might be important as to some of these properties as to which the liens are in dispute.

Examiner Wilkinson: As a matter of fact, as far as the Western Pacific is concerned, unless this testimony is changed today, I do not understand that there were any separate mortgage divisions or anything of that type, that the value of the property would be applicable to the entire property as a unit, and so all you would be concerned with would be purely the final value. I think the suggestion of counsel that you could stipulate it would be better than trying to incorporate it by reference, because I will state now that I do not think we will be able to

(Testimony of M. J. Curry.)

allow anything in here by reference. If there is any difficulty by reason of anything today, it has to do solely with the Northern California Extension, and there would be no objection to stipulating the value of the Northern California Extension, certainly.

[2195]

Mr. Homire: We do not know to what extent there will be dispute.

Examiner Wilkinson: As a matter of fact, Mr. Nicodemus on some of the Debtor's exhibits or the plan shows these data to which Mr. Homire is referring.

Mr. Nicodemus: I think there is some evidence of the valuation.

Examiner Wilkinson: It seems to me that it is stated in the plan.

Mr. Homire: They have it stated, yes.

Mr. Nicodemus: I think in the record somewhere there is a statement to the effect that the valuation is so many dollars, as of a particular date, but I would have to check it to know.

(Discussion off the record.)

Mr. Coulson: I thought we agreed this morning that the Commission was going to consider the question of whether or not this after-acquired property clause was a self-executing clause. From that point of view I think we must have this valuation report in. But I think also it is a document of considerable importance in connection with this particular property, because property valuation is very

(Testimony of M. J. Curry.)

important in any of these properties where there have been lines constructed during the depression. I think that the Commission will need to consider this property [2196] report here. I would be in favor of its going in, much more than any of these documents we have put in this morning.

Mr. Swaine: We do not object if the parties want it.

Mr. Coulson: I would like it in.

Mr. Nicodemus: You are making the record, Mr. Examiner.

Examiner Wilkinson: Mr. Homire, if you want that document in, I should think that you could get copies very easily and offer them physically. The Examiner would prefer that you do that.

Mr. Homire: I meant to make clear that we would procure copies and offer them. We do not have them here today. Then if any part of it is deemed irrelevant—and probably a good deal will be—we will be perfectly willing to have that taken out.

I want to ask further that the record show some facts with regard to the common stock of the Denver & Rio Grande Western Railroad Company. Certificates representing 150,000 shares of that stock were pledged to the Reconstruction Finance Corporation by the Denver & Rio Grande Western Company directly. That company is now in bankruptcy.

Mr. Nicodemus: The pledge was made by the railroad company.

(Testimony of M. J. Curry.)

Mr. Homire: The pledge was made by the holding company. [2197]

Mr. Nicodemus: No, the pledge was made by the company, I think.

Mr. Homire: I have the pledge right here. It was made by the holding company. I am ready to offer this pledge in evidence. The holding company pledged these certificates. Is that what you question?

Mr. Nicodemus: No. I am just trying to ascertain what was done. My impression was that the holding company loaned the collateral to the railroad company and that the railroad company pledged it, but it may have been done directly.

Mr. Homire: I will offer in evidence a photostatic copy of the resolution of the Western Pacific Railroad Corporation authorizing the pledge of these certificates, together with a photostatic copy of the assignment by that corporation to the Reconstruction Finance Corporation. I have copies of it here.

Mr. Nicodemus: That is all right.

Mr. Homire: I think if the record does not show it we would like to have it stipulated that that stock represents one-half of the voting stock of the Denver & Rio Grande Western.

Examiner Wilkinson: You want to introduce it into the record?

Mr. Homire: Yes. [2198]

Mr. Swaine: No objection. I want this statement corrected.

Mr. Nicodemus: He has not finished it.

Mr. Homire: The total outstanding stock of the Denver & Rio Grande Western common stock, which is the voting stock, is 300 shares, and what is pledged with the Reconstruction Finance Corporation is one-half the total outstanding stock.

Mr. Nicodemus: A further correction:

The voting stock certificates are pledged, and not the stock. Is not that correct?

Mr. Homire: What you say is correct. This assignment shows exactly what is pledged. They are called stock trust certificates.

Examiner Wilkinson: The document which was just referred to is received as Exhibit 75.

(Exhibit No. 75, Witness Buckley, received in evidence.)

Mr. Homire: I also would like the record to show that the voting trust agreement under which that stock is held expired by its terms on the 31st of December, 1934, and that the District Court has held that the efforts to renew it were ineffectual, and that an appeal is now pending from that decree and that appeal is undetermined.

Mr. Nicodemus: And the case is in the United States Circuit Court of Appeals for the Eighth Circuit. [2199]

Mr. Homire: I also would like to have the same privilege that the Commission has allowed us as to the valuation of the Western Pacific applied to the valuation of the Denver & Rio Grande Western, 26

(Testimony of M. J. Curry.)

Valuation Report 733. We will obtain copies of that and produce it.

Mr. Nicodemus: I am somewhat alarmed by these valuation reports.

Examiner Wilkinson: Do you want to put in the valuation of the Denver & Rio Grande Western in this case?

Mr. Swaine: Oh, it has no relevancy at all.

Examiner Wilkinson: What is your basis for that, Mr. Homire?

Mr. Homire: It is part of the Reconstruction Finance Corporation's collateral.

Mr. Swaine: We do not purport to disturb the Reconstruction Finance Corporation's collateral except as an added claim against the Western Pacific.

Mr. Nicodemus: Mr. Homire's position is that there is a substantial equity in the stock of the Denver & Rio Grand Western. He wants to prove that by the valuation records.

Mr. Homire: I think Mr. Nicodemus is going a little far in stating what our position it, but we would like to have this valuation in to show whatever we think is relevant as to the value of the Denver & Rio Grande Western [2200] stock.

Mr. Swaine: I object to that.

Examiner Wilkinson: I right offhand fail to see where the rate-making value of the Denver & Rio Grande Western has anything to do with the Western Pacific, and particularly with this reorganization. And it is quite a bulky document.

(Testimony of M. J. Curry.)

Mr. Nicodemus: I think in each case if the valuation is put in it should be the figures and not the Valuation Reports.

Examiner Wilkinson: I think unless there are certain facts in these Valuation Reports outside of the final value figure or certain ultimate value figures it would be better if you could stipulate and agree as to what those figures are, rather than put the report itself in.

As far as putting in the Valuation of the Denver & Rio Grande Western, the Examiner is going to deny that request.

Mr. Homire: We will ask, then, that we be permitted to put in the final valuation figures on the property.

Examiner Wilkinson: Of the Denver & Rio Grande Western?

Mr. Homire: Yes, in lieu of the Valuation Reports.

Examiner Wilkinson: Is there any objection to this final figure?

Mr. Swaine: I object to its as.irrelevant and immateri- [2201] al. The plan does not purport to do anything to the Reconstruction Finance Corporation's interest in the Denver, it only purports to adjust its interest in the Western Pacific. This Denver stock is not owned by the Debtor, never came into the possession of the Debtor and has nothing at all to do with the interest of the Reconstruction Finance Corporation in the Western Pa-

(Testimony of M. J. Curry.)

cific, except it is a separate thing for them to adjust in the reorganization proceeding.

Examiner Wilkinson: The Examiner is going to deny the request that the Denver & Rio Grande Western final value figure be put in this record.

Mr. Homire: We will note an exception, please.

I wanted to check just one or two of these docket numbers with Mr. Wood that he was talking about this morning, but if there is to be another hearing I can check up on those docket numbers and report at the next hearing if there is any correction to be made.

Examiner Wilkinson: Are there any questions of Mr. Buckley?

Mr. Coulson: I would like to reserve a right to cross examine the witness after an examination of the voluminous data presented through him, if such need of cross examination should develop, but I would like in a preliminary way at this time to ask him just one or two questions just to [2202] complete the record.

Examiner Wilkinson: Very well.

Mr. Coulson: Mr. Buckley, was the Chase National Bank of the City of New York trustee from and after January 1, 1932, of the General and Refunding Mortgage executed by the Western Pacific Railroad Company to the Chase National Bank of the City of New York as of the date January 1, 1932?

Mr. Swaine: Would it not be well there to begin by giving the date of delivery of the mortgage?

(Testimony of M. J. Curry.)

The Witness: You have so many dates there that I am not sure I follow that.

Mr. Coulson: I can give the date of execution. I do not know that I can give the date of delivery, but the mortgage apparently is executed as of the 29th day of February, 1932, executed on that day, and presumably delivered about that date.

Mr. Wood: That is not necessarily the date on which it was delivered.

Mr. Coulson: No, but I just wanted to have the record show whether the Chase is trustee under that mortgage and has been since its execution and delivery. That is my question.

The Witness: Yes, we were trustee under the General and Refunding Mortgage of the Western Pacific Railroad Company, [2203] but I have not in my mind the dates involved.

Mr. Coulson: Let me ask you also, Mr. Buckley, whether the Chase was from and after execution and delivery of the indenture dated as of July 1, 1930, between the Western Pacific Railroad Company and the Chase National Bank of the City of New York as trustee, the trustee under that indenture, that being the indenture which secures the 5 per cent gold debentures as to which you testified this morning.

Mr. Swaine: Oh, I object to the form of that question because it shows on its face that they were not secured. You should state the one under which they were issued.

(Testimony of M. J. Curry.)

Mr. Coulson: Under that indenture. I will always accept Mr. Swaine's corrections as to the form of my questions, and I accept that correction.

The Witness: We were trustee under that indenture.

Mr. Coulson: Are you not still trustee under that indenture?

The Witness: My recollection is that all of the bonds authenticated and delivered under that indenture, which in the aggregate were the amount authorized, five million dollars, were cancelled of record on the trustee's records.

Mr. Wood: That will show in those files which we have just had Mr. Buckley identify.

Mr. Coulson: Will you be prepared to make sure that the [2204] record shows wherein your responsibility ceased? Am I correct in understanding that the Chase National Bank of the City of New York is still acting as trustee under the General and Refunding mortgage dated as of January 1, 1932, but is in the process of withdrawing as trustee?

The Witness: I have no direct knowledge of that. I have been busy on other things. I have heard that this morning, but of my own knowledge I do not know. I can ascertain, of course.

Mr. Coulson: Can you tell us whether in the handling of these various trust matters in your department there is any administrative distinction or distinction as to the administative handling of matters arising under this first mortgage in which Mr. Cooper, a vice president of the Chase, was act-

(Testimony of M. J. Curry.)

ing as individual trustee, and these other documents under which the Chase was directly and as a corporation acting as corporate trustee?

Mr. Wood: Mr. Coulson, I think that question is a little bit ambiguous. Just what do you mean by "distinction"?

Mr. Coulson: I will ask him whether there was any distinction in the handling of these various trust matters in his department as between these three indentures as to which he has given testimony this morning.

The Witness: As to the first mortgage trust we were [2205] acting as agent under instructions from the trustees, the corporate trustee and the individual trustee. Of course, under the other two which you mentioned, the Refunding and General and the indenture of July 1, we were acting directly as trustee.

Mr. Coulson: Did that technical difference as between the acting directly and acting as agent for the California corporate trustee and the individual trustee make any difference in the method of handling the matters in your Corporate Trust Department, that is all I want to bring out. The records are kept in the same department of the Chase, are they?

The Witness: That is true, yes, sir.

Mr. Coulson: That is all I want to know.

I would like to reserve, however, the right to cross examine the witness as to some of these exhibits put in this morning if it should be deemed

(Testimony of M. J. Curry.)

necessary to supplement them by other documents in the possession of the trustee in its various capacities, or if it should be necessary to examine the witness further as a further basis for a motion to strike out any of these data.

Examiner Wilkinson: Are there any further questions at this time of Mr. Buckley?

Mr. Homire: We would like to make the same reservation as to further cross examination of the witness. [2206]

Examiner Wilkinson: You are excused subject to being recalled, Mr. Buckley.

(Witness temporarily excused.)

Mr. Wood, that completes your presentation this afternoon?

Mr. Wood: That completes our presentation this afternoon.

Examiner Wilkinson: Mr. Swaine, do you have anything further?

Mr. Swaine: Nothing further.

Examiner Wilkinson: Mr. Homire?

Mr. Homire: Nothing.

Examiner Wilkinson: Mr. Nicodemus?

Mr. Nicodemus: Nothing further.

Examiner Wilkinson: Mr. Coulson, do you have anything?

Mr. Coulson: If the Commission please, at the last hearing I asked for an adjournment to consider the

question as to whether a further plan would be submitted to the Commission on behalf of A. C. James Company, a secured creditor. I think perhaps I ought to say briefly on the record the factors that have led us to prepare and to submit today such a plan, in order that there may be no misconceptions or misapprehensions drawn from our submission of such a plan.

In the first place, the A. C. James Company is a [2207] secured creditor, classified as a separate class by the California court; in other words, holding 100 per cent of one class, so far as that tentative classification continues. If the court in California should modify its tentative classification and group all the secured creditors, the so-called junior creditors, in one class, the A. C. James Company would still have in excess of 10 per cent of that class, and of course it has in excess of 5 per cent of the total debt, so would be a creditor of the type who might originally have filed a petition under Section 77 if it had so desired.

There are already two plans before the Commission. There I think I ought to state briefly the justification for adding to the problems of the Commission by filing a third plan.

The first plan was filed as the plan of the Debtor company. There seems to be some doubt as to its paternity. Mr. Nicodemus has told us that it was prepared by Mr. Swaine's Committee of Institutional Bondholders, and presented by the company, while Mr. Swaine said he had merely remote control at best as to that plan.

When it was introduced, on behalf of A. C. James Company I expressed our approval of the general principle of the plan, which was in the case of this railroad company to maintain debt as debt, to protect the property [2208] from future difficulties in the case of a recurring depression of the type we have just been through, of transferring to contingent interest all of the fixed charges necessary, and to protect the property from similar embarrassments in the future.

That I think is a proper principle in the case of the Western Pacific if it is anywhere, because, as has been pointed out to the Commission, the property valuation here is something like $145,000,000 and the total debt is, roughly, $63,000,000, or less than 45 per cent of the property valuation.

I did object at the time we intervened as a creditor to certain phases of the company's plan which, while incidental, seemed to me quite important. It was at that time my intention to rely on pointing out to the Commission these incidental features of the company plan which seemed to me inconsistent with the public interest and with the interest of the property in the various creditors and security holders of the property, relying on the Commission's exercising its function of modifying the plan to the extent that might be necessary.

Since that time a second plan has been put in, on behalf of the Institutional Bondholders' Committee, which carries forward the features of the Debtor company plan to which I expressed objection on our

petition of inter- [2209] vention. Those objections I will not repeat here, if your Honor please, I think it had better be taken care of by brief, anyway.

But it also has what seems to us a further objection, of abandoning the principle on which the original plan of the Debtor company was framed and filed.

In view of the decision of the Commission to accept this plan that was presented to it by the Institutional Bondholders' Committee, I feel forced to present a plan and propose to present a plan today. I am the more willing to do that because it seems to me that in addition to the objections I have already expressed in our petition of intervention to the original Debtor company plan, both of these plans are open to a basic objection, or I might say to several basic objections, but one that I did not mention in the petition of intervention that they are not realistic in the sense of recognizing the problem that we all face in these railroad reorganizations under the Federal Revenue Act of 1936.

While we have in our tax laws a provision which puts an almost prohibitive tax on undistributed corporate surpluses and while that tax is applicable to railroad properties, I do not think any of us can soundly rely on financing future capital needs through a compulsory segregation of current income. The tax cost is far too high for the good of the [2210] property.

So in the plan which I propose to submit, I have, I may say, provided mechanics as best I could for

future senior and junior financing of capital needs.

That involves, of course, the creation of a new first mortgage in which the present mortgage bondholders do not participate as a channel of future senior financing. I have also made provision in another respect for a matter not covered by our petition of intervention; that is, I have endeavored in framing this plan to set up a reorganization committee or to provide machinery for setting up a reorganization committee which will be representative of all the security holders and creditors of the property rather than of the Institutional Bondholders only, because I think I have expressed here the view previously that I doubt whether the insurance company bondholders are representative of all the first mortgage bondholders, and that no plan of reorganization should be adopted—and I may say the two prior plans both contemplate that—under which the committee which is acting and has acted for the Institutional Bondholders should act as a reorganization committee for the property.

I do not intend any of this by way of argument, but I want to make two definite further qualifications in the light of which I am presenting the proposed plan. [2211]

In this plan I have placed the so-called junior creditors, namely, the Railroad Credit Corporation, the Reconstruction Finance Corporation, and the A. C. James Company, all of which creditors hold notes of the railroad company secured by General and Refunding Mortgage bonds, in a category

whereby I propose to give them obligations which are inferior to the obligations given the first mortgage bondholders as to the entire system. I do not want that taken, however, as a concession that Mr. Swaine is correct in the recitals to his plan submitted at the last session, that the first mortgage bondholders have a superior lien on all elements of property of the system, because I do not think it is accurate. I am afraid that my suggestion to Mr. Swaine that we could not at least accept his sweeping claims has been responsible for some of this testimony this morning. On the other hand, I do think it proper and just, and have so included it in the plan, that these first mortgage bondholders, who have an undoubted first lien as to the property conveyed to the trustee when that mortgage was executed, who make certain concessions as to interest, both the interest rate and unearned and undistributed interest, should have their sacrifice recognized by the other secured creditors taking an inferior position, and I have so provided. But I do not intend it as a concession that that is their pres- [2212] ent position, and reserve the right to contend that it is not.

I might here interject and say that of course this plan is submitted wholly on behalf of the A. C. James Company. It is not joint in any respect, nor is it the result of suggestions made by either the Reconstruction Finance Corporation or the Railroad Credit Corporation.

I want to make one further statement, and that is that the plan which I propose to tender, while it is tendered by the A. C. James Company, which is designated as a junior creditor—accepting the characterization we have used in these proceedings, but with the qualifications that we have been laboring over today—while I am presenting it as a junior creditor, I do not want the Commission to understand or the parties to understand that it is framed solely with the desire to protect the position of the A. C. James Company as a so-called junior creditor. It is intended to represent what I feel is a realistic approach to this problem today, in the interest of all the creditors and all the security holders, taking into account the factual situation which we face now and recognizing some of these problems which arise out of the tax laws and other features.

And I want to say that because I do represent clients who hold upwards of $6,500,000 of first mortgage [2213] bonds on the Western Pacific Railroad Company property, in part owned outright, but for the most part as collateral to debts, which debts, however, are in all cases in default, and where the face of the debts is far in excess of the value of the collateral, so for our present purposes they are in the same position as if they were owned outright.

I say that as to those first mortgage bonds, not only is this plan not tendered in derogation of their rights, but as to those creditors they would be quite willing to accept this plan as first mortgage bondholders.

I present this proposed plan of reorganization on behalf of A. C. James Company under date of October 26, 1936.

Examiner Wilkinson: This plan of reorganization for the Western Pacific Railroad Company, proposed by A. C. James Company, will be received as Exhibit 76.

(Exhibit No. 76, by counsel, received in evidence.)

[Printer's Note: Exhibit 76 is here omitted as same is identical with "Plan of Reorganization for the Western Pacific Railroad Company proposed by A. C. James Co., a junior creditor" set out at page 101 of this printed record.]

Mr. Coulson: I think the Examiner made some suggestion in connection with the other plan that it also be filed in the office of the Commission. Is that correct?

Examiner Wilkinson: I believe so. We ought to follow the same procedure.

Mr. Swaine: May I ask Mr. Coulson a question or two? I assume he is presenting the plan. [2214]

Mr. Coulson: Yes. I have no witnesses.

Mr. Swaine: Mr. Coulson, Mr. A. C. James bears what relation to the A. C. James Company?

Mr. Coulson: He is the principal stockholder and is president of the A. C. James Company.

Mr. Swaine: What proportion of the stock of the Western Pacific Corporation is owned either by Mr. A. C. James or by corporations in which Mr. A. C. James is interested?

Mr. Coulson: I think that is already of record in this proceeding, but I will be glad to furnish the details precisely. You mean as to the holding company?

Mr. Swaine: No. What proportion of the holding company stock is owned either by Mr. James as an individual or by corporations in which Mr. A. C. James is the controlling stockholder?

Mr. Coulson: I will be glad to furnish the details in a statement which can be put on the record, as to those stocks. I think it is already in the record.

Mr. Swaine: It is a very substantial amount, is it not?

Mr. Coulson: Very substantial.

Mr. Swaine: Is it control of the Western Pacific Corporation?

Mr. Coulson: I do not know how you would define control in that situation. [2215]

Mr. Swaine: Is it a majority of the stock?

Mr. Coulson: No.

Mr. Nicodemus: There is nothing in the record about it at the present time.

Mr. Coulson: I think that in proving our claim for this junior creditor in the California court we stated that fact in our proof of claim. If we did not, I will see that it is put in the record here. There is no secret about it. It has all been of record a number of times.

Mr. Nicodemus: But it is not in the Interstate Commerce Commission record.

Mr. Coulson: I will be glad to furnish it.

Mr. Swaine: This plan, as Mr. Coulson has indicated, varies from the other two plans as to the posi-

tion of the new money. The Debtor's plan has the ten million dollars of new money provided alongside of 15 million dollars additional bonds under the same mortgage given to the existing first mortgage bondholders. The Institutional Bondholders' Committee plan provided for ten million dollars of bonds for new money alongside of ten million dollars of bonds to go to the existing first mortgage bondholders.

Mr. Coulson's plan, however, provides new money upon ten million dollars of bonds which are the sole issue under the new first mortgage.

I would like to ask Mr. Coulson if he proposes to [2216] introduce any testimony or make any statement as to the necessity for giving those bonds that lien in order to raise the money, and I call the Examiner's attention to the fact that I made the statement that the Institutional Bondholders that I represent are prepared in the present market to take those bonds of the character contemplated by the Institutional Bondholders' Committee. I believe that if the market conditions remain at all as they are at the present time those bonds can be sold, can be underwritten commercially. But I wonder if Mr. Coulson is to produce any evidence to show that a better bond is necessary in order to raise the money.

Mr. Coulson: I think I can answer Mr. Swaine's question without producing a witness, because I do not think any witness can testify usefully as to the matter.

I tried to point out in presenting this plan that I thought we all, if we were going to approach this reorganization question realistically now and in the light of the existent situation must provide a plan which will, and the Commission before it certifies a plan as being in the public interest must, take into account the fact that any railroad property may and probably will have future capital needs, and that they must be provided for. I do not think that any statement of Mr. Swaine's on the record or any statement of any witness who is familiar with [2217] the movements in the money market would remove the practical situation we face, that you must provide in any plan of reorganization just as soundly as you can a vehicle for senior financing, which, in the light of changes in the money market, adverse changes, will constitute the most marketable security you can have.

Any dilution of that by existing debt which is frozen in the property seems to me quite inconsistent with this new problem we face of providing for all future capital needs by the issue of securities rather than by the aggregation of current income.

I hold the hope as a lawyer that the Commission may throw its weight in Congress in favor of removing the railroads from the application of the undistributed corporate surplus tax. I have no hope that the principle of the undistributed corporate surplus tax is coming out of our law as to other corporations.

Have I answered your question, Mr. Swaine?

Mr. Swaine: Yes. As I understand it, you base that provision not on any idea that it is necessary in respect to the present situation of the new money, but solely upon the idea that it is necessary to make your first mortgage adequate as a vehicle for future financing, if I understand your position. I only asked you whether you were going to introduce evidence, in order to determine [2218] whether that was your position. I will answer it in the brief.

Mr. Coulson: I am not going to introduce evidence, aside from your translation of my long statement. I am not going to introduce evidence on it, I think.

Examiner Wilkinson: As I understand, Mr. Coulson, you stand upon this record here as giving evidence which will justify and support the plan you propose?

Mr. Coulson: Yes. That is subject to the qualification that it is pretty hard to stand on the record, because none of us knows what is in it at the present date. But I stand upon it, subject to a review of the splendid information that has been poured out.

Examiner Wilkinson: Are there any further questions of Mr. Coulson?

Mr. Nicodemus: Not on behalf of the Debtor.

Mr. Homire: None for the Reconstruction Finance Corporation.

(Discussion off the record.)

Examiner Wilkinson: In view of the discussion off the record, the Chase National Bank will not have to produce tomorrow the documents which they promised to produce tomorrow, but will produce them on or before November 5.

This hearing is adjourned to November 5.

Mr. Wood: That also applies to the documents which the [2219] railroad company was to produce?

Examiner Wilkinson: Yes.

Mr. Nicodemus: As soon as copies are available they will be distributed, if in advance of November 5.

Examiner Wilkinson: Exactly.

We have put in the record here today exhibits beginning with Exhibit 45 and going to Exhibit 75. Of those exhibits there is only one copy, and that has gone into the record. The Examiner must have at least two copies of each one of those exhibits, and counsel are also entitled to a copy of those exhibits. The parties who are to furnish these exhibits will supply counsel with copies accordingly.

Mr. Swaine: Mr. Examiner, there is one other question:

At the last hearing when the matter of briefs was under discussion it was stated by Mr. Boyden—I do not remember whether it was on the record or afterwards—that only one brief would be permitted to each party. It seems to me that if that rule is to be adhered to the Examiner ought today to notify the only two interests that have not yet filed plans, namely, the Reconstruction Finance Corporation and the Railroad Credit Corporation, that they should at the hearing to be held next Thursday state what modifications they desire to be made in any or all of these plans, or put in their own plan. [2220]

I make that statement for this reason:

If suggestions of modifications as to the plan of the Institutional Bondholders Committee are made by the Reconstruction Finance Corporation and appear for the first time in the Reconstruction Finance Corporation's brief which is filed at the same time that the Committee's brief is filed, we will have absolutely no opportunity to answer those modifications. The presentation of those modifications will be entirely ex parte, and the briefs of the two parties in interest might go sliding right by each other without coming head-on.

Therefore, it seems to me that one of two things should be done, and I do not care which, the only purpose being to have both sides of all arguments presented:

Either all suggested modifications should be made at next Thursday's hearing and the Commission adhere to its rule that there is only one brief, or all parties should have opportunity to file a reply brief at some short interval after all the main briefs are exchanged. Thus both sides of any question that is first raised in the direct brief can be elucidated to the Commission.

Mr. Coulson: There is another suggestion that might be possible, Mr. Swaine, that is perhaps not practicable under Commission procedure. I suggest it only subject to that possible impracticability.

[2221]

Mr. Swaine's suggestion would meet the suggestions of modification that would originate with the various parties to the proceeding, but I have always read Section 77 as imposing a considerable duty of

initiative on the Commission; and Mr. Swaine will have no chance under this procedure to meet the modifications that the Commission might initiate.

If it were feasible for the Commission in making its findings and suggested plan of modification to let the parties consider the tentative findings and modifications—as is done many times under many judicial and administrative forum procedures—and then brief them if necessary, that would be far better than Mr. Swaine's suggestion.

Mr. Swaine: I understand that the Commission is receiving briefs to determine what plan it will suggest, and my purpose is that the Commission before it makes up its mind as to what plan it will suggest shall have the benefit of all the views of the parties on all possible suggestions, and not have them merely ex parte.

Examiner Wilkinson: The Examiner might say here that under the Commission's practice in Finance cases or in a docket such as this all briefs are filed at one and the same time, and the practice does not provide for reply briefs. [2222]

However, as to the Examiner's suggesting that the Reconstruction Finance Corporation or the Railroad Credit Corporation file plans or suggestions of a plan, the Examiner does not feel as if that is any of his business. Of course, the Commission would be very glad to receive and hopes that all the parties to this proceeding will give it all the assistance they can. If they have any statements to make, the Commission would be very glad to receive them.

Mr. Swaine: Mr. Examiner, my point is this, and it is perhaps a little technical under the Act:

The Act states that any party can suggest a modification at a hearing.

Examiner Wilkinson: Absolutely.

Mr. Swaine: If a modification is suggested at a hearing, namely, the next hearing, all the parties can brief that modification.

Examiner Wilkinson: Certainly.

Mr. Swaine: If, however, the first suggestion of the modification of any one of these plans is made in Mr. Willard's brief, in the first place, that is not a modification at a hearing suggested at a hearing, and in the second place, under the Commission's rules nobody else will have an opportunity to discuss that modification, so the Commission would not have the benefit of any discussion by the other parties. [2223]

All I suggest is that the Commission should do one of two things: Either be technical about the Act and require the modifications to be proposed at a hearing, as the Act says, which I shall not urge on it at all, or else not be technical about its own rules and permit any modifications which are suggested in the main briefs to be discussed in briefs to be filed, let us say ten days or two weeks after the date the main briefs are required.

Mr. Coulson: It seems to me Mr. Swaine is being unduly legalistic about this thing. I do not see why any of us cannot appeal to the wisdom of the Commission to make changes in any plans if the Com-

mission should adopt some other plan. Why can we not say in a brief that we think that if the Commission does not adopt this plan we favor, or if it adopts the other plan, it should be done with modifications? I will say frankly that if the Commission made the modifications in the Debtor company plan which I think should be made in the interest of the public and in the interest of a present-day application of rules of logic, I would be quite content with the company plan. Why can I not say that?

Mr. Swaine: I want you to say it. That is just the point I am arguing, that you shall be allowed to do it. But when you have suggested your modifications, I want a chance to answer them if they are modifications that I [2224] hear for the first time in respect to the committee plan, or if they are modifications that I hear for the first time in respect of the company plan. Because, I point out, unless that is done the party who proposes the plan will have no opportunity at all to discuss modifications which are suggested, and certainly the Commission wants the benefit of comment on modifications. A modification may be just as vital as an original plan, and it ought to be briefed just as thoroughly as the original plan.

Mr. Coulson: It seems to me Section 77 had that in mind when it put in the provision for coming back to the Commission after the Commission released the plan, with a motion for reconsideration and rehearing.

Mr. Nicodemus: It allows 60 days for that purpose.

Mr. Coulson: Yes, it allows 60 days for that purpose. I think we are being a little too technical in this proceeding, myself.

Mr. Swaine: I would like to state now that if any modification is proposed to any of the plans in any of the main briefs which have not been suggested up to date, I would like leave to file a short brief discussing the modification so that the Commission will have the benefit of the Institutional Bondholders' Committee's views on any modifications that are suggested up to that time.

Examiner Wilkinson: Of course, the Examiner cannot very [2225] well rule specifically on a request such as that.

Mr. Swaine: I understand you cannot.

Examiner Wilkinson: I can repeat that if there are any parties to this proceeding who from a study of the evidence and the record desire to suggest modifications of any one of the three plans, before the record is closed is the time to suggest them. That is all the Examiner can say.

Mr. Willard: That does not mean that we would be foreclosed from suggesting them in a brief?

Examiner Wilkinson: I am not attempting to pass at all upon what is going to happen hereafter. I am merely talking about this record here.

Mr. Willard: I do not think you can regiment the briefs of opposing counsel.

Mr. Swaine: I do not want to regiment the briefs, I merely want a right to answer new material that has not been brought up before.

Examiner Wilkinson: Mr. Swaine's request will be presented to the Division or the Commission in the event briefs are filed subsequently which do propose modification of the plans. That is all the Examiner can say.

Mr. Swaine: That is all I can ask. I think it would be helpful if the other parties could suggest their modifications now. Then we would get to grips with the problem [2226] instead of dealing in a lot of generalities.

Examiner Wilkinson: The hearing is adjourned until November 5.

(Whereupon, at 3:30 o'clock p.m., an adjournment was taken until 10 o'clock a.m., Thursday, November 5, 1936.) [2227]

Before the
Interstate Commerce Commission
Finance Docket No. 10913

WESTERN PACIFIC RAILROAD)
COMPANY REORGANIZATION.)

Ante Room A, I. C. C. Building,
Thursday, November 19, 1936.

Hearing in the foregoing matter was resumed at 10 o'clock, a.m., pursuant to adjournment.

Before:

Examiner Harvey H. Wilkinson.

Appearances:

The same as heretofore noted.

Additional Appearances:

H. C. McCollom, and Orrin G. Judd, 1 Wall Street, New York, N. Y., appearing for Irving Trust Company, as Successor Trustee under General Refunding Mortgage of Western Pacific Railroad Company. [2229]

PROCEEDINGS

Examiner Wilkinson: Are you ready to proceed, gentlemen?

Mr. Nicodemus: Mr. Examiner, since the last hearing the Irving Trust Company has been substituted in the place of the Chase National Bank of the City of New York as Trustee under the Western Pacific Railroad Company General and Refund-

ing Mortgage dated as of January 1, 1932.

I should like to offer in evidence the instrument of appointment executed by the railroad company pursuant to the terms of the General and Refunding Mortgage, and the instrument executed by the Irving Trust Company accepting the trust. These documents have been circulated among counsel, with possibly one or two exceptions which we can take care of now.

I offer the copies of the originals.

Examiner Wilkinson: Are there two separate documents?

Mr. Nicodemus: There are two separate documents, which may go in as one exhibit or two exhibits, according to the desire of the Examiner.

Examiner Wilkinson: As long as they pertain to the same thing, one exhibit number, I think, will be sufficient.

Mr. Nicodemus: All right. [223]

Examiner Wilkinson: They will be received as Exhibit No. 77.

(Exhibit No. 77, By Counsel, received in evidence).

Mr. Nicodemus: I understand that counsel representing the Irving Trust Company are present, and perhaps they would like at this juncture to enter an appearance.

Examiner Wilkinson: They should.

Mr. McCollom: H. C. McCollom and Orrin G. Judd, appearing for Irving Trust Company, as

Trustee under the General and Refunding Mortgage.

I shall like to present at this time the petition of Irving Trust Company as Trustee for intervention.

Examiner Wilkinson: This is a petition for general intervention?

Mr. McCollom: Yes.

Examiner Wilkinson: Do any of the parties have anything to say in regard to this petition?

Mr. Nicodemus: The Debtor interposes no objection to the intervention.

Mr. Swaine: The Institutional First Mortgage Bondholders Committee has no objection to the intervention.

Examiner Wilkinson: The petition will be granted.

Mr. McCollom: Copies are being distributed among counsel here, and the proper number will be filed with the Commission. [2232]

(The petition of the Irving Trust Company for leave to intervene was received and granted.)

(Discussion off the record.)

Mr. McCollom: The Examiner will note that the appointment contains as a last page the acknowledgment of the receipt thereof by the Irving, and that the acceptance of the appointment by Irving contains as a last page acknowledgment of the receipt thereof by the railroad company, just completing the substitution. In other words, the appointment has to be delivered to the railroad company under the terms of the mortgage.

Mr. Nicodemus: At the last hearing it was understood that from time to time during the pendency of this proceeding we would furnish operating results by months. Since the last hearing we have received the accounts for the month of September. Two copies have been furnished to the Commission, and copies have been circulated among counsel. I would like to offer that statement in evidence.

Examiner Wilkinson: That will be received as Exhibit 78.

(Exhibit No. 78, by Counsel, received in evidence.)

Mr. Nicodemus: Examiner Boyden requested the debtor to prepare and file as an exhibit a corporate history of the debtor. Such a history is now in the course of [2233] preparation, but due to the precedence required by this large order of Exhibits, we have been unable to complete that. We expect to have it available for filing within two weeks. If the hearing is adjourned before that date I ask leave to file it as a supplementary exhibit.

Examiner Wilkinson: There will be no objection to that, I assume.

Mr. Nicodemus: I am going to say for the information of counsel that it is a statement somewhat similar to the corporate history, and its preface is the valuation report. It simply states the origin of the company and its subsidiaries, and traces them through to date.

It is something designed to be helpful to everybody.

The Debtor's case was closed at the last hearing. We close it again.

Examiner Wilkinson: You have nothing further at this time.

Mr. Wood: Mr. Examiner, at the last hearing with Mr. Curry and Mr. Buckley on the stand, a number of exhibits were produced which were not offered in evidence at that time because no copies were available. We expect to offer those exhibits in evidence this morning.

There were also a number of exhibits that were actually offered in evidence, but as to which the number of copies required was not available. We now have copies here [2234] for the Commission, and I think the parties have received all but a few.

I will call Mr. Curry.

Examiner Wilkinson: Have copies of the exhibits which were received at the last hearing been circulated to counsel?

Mr. Wood: With the exception of the few orders of the Interstate Commerce Commission, I think all have been circulated, and I have copies here to supply those which have not been.

Examiner Wilkinson: Suppose we take up during the recess the distribution of the copies which have already been received in evidence, rather than distributing them at the present time, if it is your purpose right now to distribute those.

Mr. Nicodemus: There are only four or five.

Mr. Wood: I was particularly making a preliminary statement as to what I planned to do, and I was going to call Mr. Curry for the purpose of offering in evidence a number of documents which he produced at the last hearing, but which were not formally tendered.

Examiner Wilkinson: In connection with this line of testimony, the Examiner might admit that he was taken more or less by surprise at the last hearing that the question of this issue was going to be raised. He would [2235] like to have on the record now the position of the Trustee under the First Mortgage as to the relevancy of their claim in connection with this line of testimony. Would you mind making a statement, Mr. Wood?

Mr. Wood: Mr. Examiner, the first mortgage Trustee was informed that claims were being asserted or would be asserted by the General and Refunding Mortgage Bondholders. The exact nature of those claims was not known to us, except that we were told that a claim would be made to a lien, either prior to or pari passu with the first mortgage on the Northern California extension and the first mortgage Trustee's claim that the First Mortgage is a first lien on the entire northern California extension.

I believe that at the last hearing a question was raised as to the priority of the first mortgage on certain pledged securities, and I believe that testimony was offered as to what securities were pledged with the First Mortgage Trustees and what securi-

ties were pledged with the general and refunding mortgage Trustees.

Of course, we claim a first lien on all securities actually pledged under the First Mortgage.

Mr. Nicodemus: You mean actually deposited under the First Mortgage, or pledged?

Mr. Wood: Delivered and held by the Trustees under the [2236] First Mortgage.

Mr. Swaine: May I add something on behalf of the Institutional Committee?

The plan proposed by the Institutional Committee made the statement that all other classes of securities of the railroad company other than equipment obligations are entirely junior in lien to the first mortgage.

That plan is predicated upon that thesis, that the First Mortgage is a first lien upon everything. I made an oral statement that I found in respect to certain negligible stocks of subsidiaries that was in error and the record shows what those stocks are and also shows the value of those stocks.

The state of the record otherwise is this, that as to the granting clauses of the First Mortgage, as I understand they do not expressly describe the northern California extension. The granting clauses of the general and refunding mortgage do expressly describe the northern California extension. There is no supplemental indenture to the First Mortgage expressly describing the northern California extension. Therefore, this testimony is relevant to show how the northern California extension became sub-

ject to the lien of the First Mortgage. Our thesis is that the Interstate Commerce Commission must know the liens of the respective securities upon the [2237] property of the debtor before it can possibly determine whether a plan is fair or not.

Examiner Wilkinson: But in that connection, only as to whether a plan is fair and equitable, as to whether the different classes participate equitably in the plan, and not for the purpose, of course, of having the Commission as a matter of law adjudicate the rights between these mortgages.

Mr. Swaine: That is right. Section 77 requires that the plan shall, of course, be fair and equitable, "affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding participations of the various classes of creditors and stockholders."

In order to determine that question the Commission has to know whether a given mortgage is a first mortgage or a third mortgage.

Examiner Wilkinson: In these proceedings we are all more or less at a disadvantage. We do not have any pleadings and do not draw any particular issues or join any issues. But it occurred to the Examiner subsequent to the last hearing that so far as the record is concerned there is really nothing in the record to show [2238] that any other parties to this proceeding controvert the position that the First Mortgage is a prior lien on all the property,

other than by inference. I think Mr. Coulson stated that he did not agree with that. But so far as the record is concerned, he does not take any position here of contending that the bondholders under the first mortgage are not entitled to preferential treatment. I would think that if the other parties to the proceeding are contesting preferential treatment, they should so state here on the record.

Mr. Willard: The Railroad Credit Corporation has contested the position of the Institutional Bondholders as set out in their plan, to effect that, as urged here by Mr. Swaine, a first lien was claimed on all the property of the Western Pacific. We believe and we had reason to believe that there was some property that was subject to a first lien of the Refunding and General, and that if the First Mortgage had any claim at all on that property it was junior to the Refunding and General.

Mr. Swaine: What is that property, to be specific?

Mr. Willard: There are those stocks that you mentioned the other day. Now, we do not know. We have relied on the trustee of the general mortgage to develop that point. We have tried to be of some assistance, but there has been a shift of trustees recently without [2239] notice to us until after it was accomplished, and we have not been able to develop that point fully. It has not seemed to us that we had any obligation to point out specifically at this time what property was subject to the general mortgage as a first lien and on what

property that mortgage had merely a second lien.

Examiner Wilkinson: But it is the position of the Railroad Credit Corporation that the bondholders under the first mortgage are not entitled to preferential treatment in this plan, using the word "preferential" as we all understand?

Mr. Willard: As to all property.

Examiner Wilkinson: As to all property.

Mr. Willard: Of course, that goes to the point of determining the value of securities held under pledge by the Railroad Credit Corporation to secure its claim against the Western Pacific. That is all that is important; also, as Mr. Swaine has pointed out, in order to determine what our position is and should be under any plan of reorganization.

Examiner Wilkinson: Do you care to state here now that of the three plans which have been put in the record, all three, as I recall it, give preference to the First Mortgage bondholders—the Railroad Credit Corporation objects to that treatment?

[2240]

Mr. Willard: Yes, sir, certainly to the first two plans. Our objections are not so strong as to the plan submitted by Mr. Coulson at the last hearing. We think that plan is fairer, more practical than the other two, having that in mind.

Examiner Wilkinson: The Examiner is laboring here trying to get a reasonable basis for going along with this line of testimony, inasmuch as the Commission cannot adjudicate these rights. But as the Examiner sees it under the Act, if there is a contro-

versy and a question here as to the priority of these mortgages which does have a bearing on whether a plan is fair and equitable, inasmuch as the plans which have been submitted do give preference to the First Mortgage Bondholders, if the other parties to the proceeding object to that, then the Examiner sees that this evidence is relevant and material.

Mr. Willard: I think it will be necessary to develop the facts before we can tell precisely what claim should be made. We are not alone. We are not the only holders of general and refunding bonds. We are a minor holder; the mortgage trustee is represented by counsel.

Examiner Wilkinson: Perhaps counsel for the General and Refunding Mortgage would care to make a statement here as to the position of the Trustee under that mortgage. [2241]

Mr. McCollom: We take the position that it is perfectly plain that the first mortgage is not the prior lien on all property. I think, to make the situation a little clearer, the whole sentence should be read which Mr. Swaine started to read.

Since all other classes of securities of the railroad company other than the equipment obligations are entirely junior in lien to the first mortgage, obviously any stock so allotted to the present First Mortgage Bondholders, whether for principal or for accrued interest, should have rights as to both assets and income prior to those of the stock allotted to such other creditors and stockholders of the railroad company.

In other words, while I suppose no one would dispute that on the main, original line of the railroad, which is described in the mortgage, the First Mortgage has the prior lien, nevertheless there may well be other substantial items of property as to which the general mortgage is the prior lien. A plan which proposes that as to all securities proposed to be issued the first mortgage shall have priority is naturally objectionable, because it is based upon a premise which is plainly wrong.

As to the extent to which the general mortgage is prior, I do not think there is anyone at the present moment who can definie the property as to which the general mortgage [2242] is prior. That is the reason why at the conclusion of the hearing I am going to ask the Examiner for an adjournment of the hearing in order that we may consider the situation in respect of other property. It just so happens that at the present moment there have been pointed out two items of property in respect of which the General Mortgage is claimed to be prior.

I should hope that it might work out—although I am speaking entirely out of turn; I am a stranger here—that the plans might be adjusted, perhaps, as between reasonable people, without the necessity of encumbering this record later with a long batch of testimony with reference to comparative priority of mortgage liens.

Examiner Wilkinson: That is what the Examiner is trying to do at the present time, of course.

Mr. McCollom: It might well be that during the

adjournment which I am going to request that perhaps will come about, but in the meantime with a plan standing before this Commission based upon the assumption that the first mortgage is the prior lien upon all property, we can do nothing but dispute that to the best of our ability.

Mr. Swaine: May I state that we have conceded that with respect to stocks which were identified by Mr. Curry and as to which the record is clear, as to the earnings [2243] and companies concerned and the book values, the First Mortgage is not a first lien on those few stocks. We say that our statement in the Plan is substantially true anyway, that those things are of negligible importance.

The only item as to which there is any substance in dispute is the northern California extension, and that dispute arises by reason of the fact that the granting clauses of the First Mortgage did not specifically describe it because it was not in existence. Therefore, then, it seems to me that this testimony is relevant and really should have been introduced by the Debtor. In all of these proceedings that I have had anything to do with up to date the Debtor came and made proof of the liens of the various securities as the basis upon which its plan was founded and upon which the Commission should determine any plan. It seems to me that it was part of the Debtor's proof here to establish that notwithstanding the granting clauses did not describe this, nevertheless the Debtor had drawn down bonds for the purpose of building a line, and there-

fore the northern California line did pass under the first mortgage by reason of the specific provisions of the mortgage. The Debtor having failed to do that, the First Mortgage Bondholders Committee called on the Trustee to do it, and all we are trying to do is to establish that prima facie fact. [2244]

Examiner Wilkinson: As the Examiner sees it, the other parties to the proceeding have the right at any time during the proceedings to controvert any of the allegations in any of the plans; still, the institutional bondholders plan and the Debtor's plan have been in this record for many months, and it was not until recently that any question has been raised along this line. However, since the parties have stated that they do contest this, the Examiner will let the type of proof here go ahead. You may proceed.

Mr. McCollom: I should just like to say this, Mr. Examiner, that it is hardly appropriate for Mr. Swaine, representing the First Mortgage Bondholders, to say that the only question—perhaps he did not say that; perhaps he said that the only question that has been raised up to date is the question of the lien on the stock pledged with the General Mortgage trustee and the lien of the northern California extension. But I do not know at the moment, having been in this case only a few days, whether there may not be other very substantial items of property.

Examiner Wilkinson: That will be taken for granted. The statement of Mr. Swaine will not bind the general mortgage trustees.

Mr. Wood: Mr. Curry, will you please take the stand? [2245]

(Discussion off the record.)

M. J. CURRY

testified further as follows:

Direct Examination

Q. (By Mr. Wood) Mr. Curry, at the last hearing on page 343 of the record you were asked to produce an application to the Interstate Commerce Commission for authority to construct the northern California extension. That was dated February 8, 1929.

Do you have those documents in sufficient number so that we can distribute copies?

A. Application to the Reconstruction Finance Corporation for a loan?

Q. No, application to the Interstate Commerce Commission dated February 8, 1929. It is Finance Docket No. 7440.

A. Yes, I have such a document here.

Q. This is in Finance Docket No. 7440, in the matter of the application of the Western Pacific Railroad Company under paragraphs (18) to (21), inclusive, of Section 1 of the Interstate Commerce Act for a certificate of public convenience and

(Testimony of M. J. Curry.)

necessity for the construction and/or acquisition of a new line of railroad in the counties of Plumas, Lassen, and Modoc, California." A. Correct.

Mr. Wood: I will offer that in evidence, and ask [2246] leave to substitute a copy for the origina..

Do you have the necessary copies for the Commission, and you have already distributed copies to counsel, I understand.

The Witness: That is right, I have. I have the necessary copies for the Commission, and counsel have already been furnished with copies.

Examiner Wilkinson: The document referred to will be marked Exhibit No. 79.

(Exhibit No. 79, Witness Curry, received in evidence.)

Q. (By Mr. Wood) You were asked to produce a return to the questionnaire of the Interstate Commerce Commission, dated September 11, 1929, page 344 of the record.

Mr. Nicodemus: I want to object to the return to the questionnaire. I do not see how this bears on the lien of the mortgages. It is a large, voluminous document. It is not going to be helpful to anybody in the case.

Mr. Wood: It is part of the record showing the facts on which the claim to a lien rests.

Mr. Nicodemus: If you pick out the facts, winnow the wheat from the chaff, it will be all right. I do not think there is anything in there that you would want to offer as an independent fact. I object

(Testimony of M. J. Curry.)

on the ground it is irrelevant and immaterial, and voluminous.

Mr. Swaine: The part that we consider relevant is the [2247] statement as to how they intend to finance the building of the California extension.

Mr. Nicodemus: Do you mind having the witness read that into the record, and withdraw the exhibit?

Mr. Swayne: I have no objection to identifying the pages.

Mr. Nicodemus: This is like proving a word in the dictionary by offering the whole dictionary.

Mr. Swaine: It is question 29. It begins on page 22.

The Witness: "Question 29.

"The manner in which it is proposed to finance construction and equipment, and the kind and amount of securities to be issued, and the approximate terms of their sale; to what extent funds for financing are available, and which, if any, of such securities will be underwritten by industries to be served by the proposed line."

Mr. McCollom: Mr. Examiner, I must say that I join in the objection, for this reason, that this is a statement of what the railroad company proposes to do. It does not seem to me that it is of any materiality. It is a question of what happened rather than what was proposed to be done, it seems to me.

Examiner Wilkinson: It is true to a certain

(Testimony of M. J. Curry.)

extent, but you have to remember that this is not a court and we are not going to attempt to adjudicate this matter. This [2248] matter goes to the question of the fairness and equitableness of the plan. The Examiner sees that certain statements by the Debtor in these applications, while perhaps not competent or relevant or material in court, would be here. So you may proceed.

Likewise, if you can cut it short, we would appreciate that.

Mr. Coulson: Mr. Examiner, have you not stated the root of this thing, though, when you say that all you are interested in is the issue of whether the proposed plans are fair and equitable? I take it that the Commission is not going to try to decide in these 77 proceedings all the minute and detailed issues as to the relation of various lienors to spur lines and additions and equipment that might necessarily be decided by the court in a foreclosure proceeding. It is quite impossible.

I was as much surprised at the last hearing as the Examiner was to see an enormous mass of material brought before the Commission, solely because some of the creditors who were concededly junior creditors as to the main property of the road protested and said they would not accept the extreme claim that appeared in a plan filed with the Commission at the hearing immediately prior to the last hearing, that the first mortgage represented

(Testimony of M. J. Curry.)

a first lien on everything from the pencils on the [2249] president's desk down.

Mr. Swaine: Are you prepared to concede that it is a first lien on the northern California extension? If you are, ——

Mr. Coulson: May I finish, Mr. Swaine?

We said we would not concede that. It is absurd that it should be conceded, and I think there is a certain absurdity in a representative of a group of first mortgage bonds trying to prove that a first mortgage is a first lien on everything the railroad has, because it cannot be done and we all know it.

We raised the question, yes, and I think it was a proper question to raise, to say that we would not concede that extreme claim. But here we are piling an enormous mass of documents into a record which is necessarily a large record, when all you need to know is that there is some doubt about whether all the property of the Western Pacific is under the First Mortgage. Everybody admits it is a prior lien on the main line. If we are going to attempt to prove its relationship to every spur and every bit of equipment we will be here for two years.

As to Mr. Swaine's offering this testimony admitting that the after-acquired property clause of the First Mortgage comes into a question as to the northern [2250] California extension, I think if you inspected that, —— I think the record already shows it—as to the amount of First Mortgage

(Testimony of M. J. Curry.)

money that was spent on the northern California extension, and the amount of junior creditor money that was spent on the northern California extension, you have everything the Commission needs to decide whether the plans are fair and equitable.")

[2251]

I think this enormous mass of documents cluttering up the record is all wrong.

Mr. Swaine: I am rather surprised to hear Mr. Coulsen refer to the Northern California extension as a mere spur.

Mr. Coulsen: I am not referring to it that way.

Mr. Swaine: The testimony is, it is a very important piece of line. I will concede at once that if the first mortgage is not a lien upon the California extension, then the junior creditors are entitled to better treatment than any of these plans have given them, and I would expect some one of them to insist upon better treatment; and the Commission still has the power to bring down a plan.

So it seems to me that the Commission cannot properly function under Section 77 unless it has testimony showing how serious the dispute is.

It is our position that the dispute is purely frivolous. It is built up merely to create an assumed air of uncertainty, and we want to lay the ghost.

Exam. Wilkinson: As long as any parties to the proceeding take the position that the first mortgage bondholders are not entitled to preferential treatment along the lines as proposed in the plans,

(Testimony of M. J. Curry.)

I cannot see how we can fail to go ahead with this line of testimony, because the Northern California extension is a very important part of the Western Pacific property. [2252]

Q (By Mr. Wood). Mr. Curry, will you proceed with your reading of that?

A. "Answer 29."

Examiner Wilkinson: Just a moment. As I understand, now, what you are proposing to do is read a certain extract from this document which has been identified, rather than offer the document itself?

Mr. Wood: Exactly.

Mr. Nicodemus: Correct.

Examiner Wilkinson: Is there any objection to that?

(No response.)

Proceed.

The Witness: "Answer 29:

"It is proposed to finance the proposed construction as follows:

"(a) To the extent of fifty per cent of the cost of construction, but not exceeding $5,000,000, by the issuance and sale at par and accured interest of applicant's debenture bonds or notes maturing January 1, 1950, and bearing interest at the rate of 5 per cent per annum, payable semi-annually, redeemable in whole or in part at par at option of applicant upon any interest date on thirty days' notice. It is proposed to

(Testimony of M. J. Curry.)

sell said bonds or notes under the provisions of the Clayton Act. [2253]

"(b) As to the remainder of the cost of construction:

"It is proposed to finance the same from applicant's cash assets insofar as the same may be available for such use at the time of construction; and to the extent that funds in the treasury of applicant are not available therefor, by the issuance and sale of applicant's bonds under its first mortgage of date June 26, 1916, with a maturity date of March 1, 1946, in substantially the form of the existing bonds outstanding under said first mortgage.

"(c) As to financing the acquisition of necessary equipment:

"Insofar as additional equipment of applicant will be necessary by reason of the operation of the proposed line, it is proposed to finance the cost by the use of treasury funds to the extent such funds are available for that purpose at the time of the acquisition of the same, and to supplement the amount of funds so available insofar as may be necessary by equipment trust certificates and/or the issuance and sale of applicants' first mortgage 5 per cent bonds. It is not possible at this time to state the amount of securities so to be issued or [2254] the approximate terms of their sale.

"No securities to be issued will be underwrit-

(Testimony of M. J. Curry.)

sten by any industry or industries to be served by the proposed line."

Mr. Wood: At page 345 of the record and again at page 356, Mr. Curry, you were asked to produce a letter from A. C. James Company to the Western Pacific Railway Company dated May 14, 1929, and that was introduced as exhibit 45. Do you have the copies available for the Commission?

(Discussion off the record.)

Mr. Wood: Perhaps, Mr. Examiner, we could proceed and Mr. Curry can find those during the recess.

The Witness: Yes; I shall endeavor to find it. It must be here. I do not seem to be able to pick it up right away.

Mr. Wood: And No. 4 on my list, Mr. Curry, is the amended application to the Commission for authority to construct the Northern California extension, dated August 8, 1929. That is referred to on page 356 of the record.

For the purpose of shortening the record on this exhibit, Mr. Examiner, I will ask Mr. Curry what change this application made in the proposed line, as distinguished from the one which was introduced as exhibit 79.

That shows on the map which is annexed to the exhibit. [2255]

The Witness: This is a joint application by the Great Northern, in the matter of application by the Great Northern and the Western Pacific——

(Testimony of M. J. Curry.)

Mr. Swaine: Can it not be stipulated by all counsel that the only relevant change made by this application from the application that is already in evidence is that the point of connection of the new line will be changed from Lookout to Bieber, and there was added to the line a line from Hambone to Siskiyou.

Mr. Nicodemus: We will make that stipulation if you will leave out the word "relevant."

Mr. Swaine: All right. In other words, it slightly changed the line. That is our only purpose in wanting it.

Examiner Wilkinson: Are the other parties willing to agree to that?

Mr. McCollom: I am in no position to agree to anything of that nature because I have not studied these documents, but I should think that Mr. Curry perhaps would know that to be the fact; or if Mr. Nicodemus knows it to be the fact, I am satisfied.

Mr. Nicodemus: I believe it to be the fact.

The Witness: I believe it to be the fact, so stated in this document here.

Mr. Wood: I originally had planned to bring it out by [2256] Mr. Curry's testimony, but I am perfectly willing to stipulate it.

Mr. Nicodemus: That is the correct way to develop the record, in my judgment; bring it out by the witnesses and not by the documents themselves.

Examiner Wilkinson: As the Examiner takes it, then, the parties are in agreement as to that statement?

(Testimony of M. J. Curry.)

Mr. Swaine: That is the fact, is it not, Mr. Curry?

The Witness: To the best of my belief, yes.

Mr. Swaine: You have a basis for that belief in having read the document?

The Witness: Yes. I am reading it now. Yes, I think that is a true statement.

Mr. Swaine: All right.

Mr. Wilkinson: Proceed.

Q. (By Mr. Wood). Mr. Curry, do you have exhibit No. 46? That is the letter from A. C. James Company, dated June 19, 1929. It is No. 5 on by list, referred to at page 358 and 360 of the record.

That is already in evidence. Will you supply the Commission with the necessary copies?

A. Very well.

(Producing copies.)

Q. Will you please produce the application to the Interstate Commerce Commission for authority to issue $5,000,000 [2257] principal amount of debentures? It was dated October 28, 1930, and was referred to on page 360 of the record. It is Finance Docket 8548.

A. I have this document in my hand. This is application of the Western Pacific Railroad Company for authority to issue securities, $5,000,000 of 5 per cent gold debentures, Finance Docket No. 8548, dated October 28, 1930.

Mr. Nicodemus: Can you select from this the part that you think is relevant? I call attention to

(Testimony of M. J. Curry.)

the fact that it has a number of exhibits which are already in the record in other connections.

Examiner Wilkinson: This exhibit is not in the record.

Mr. Nicodemus: I say, it has exhibits, for instance, the debenture mortgage, annexed to it. It is going in as an independent exhibit.

Mr. Wood: I am willing to eliminate that part of it.

Mr. Nicodemus: I want to see if we cannot eliminate 99 per cent.

Mr. Swaine: Cannot all the exhibits be eliminated? Is not the debenture indenture already in?

Mr. Wood: That is attached to it. The other exhibits consist of the balance sheet and exhibit VIII, which is the resolution of the executive committee, which I think are important.

Mr. Nicodemus: They are not in. I think you put in a [2258] series of executive committee resolutions.

Mr. Swaine: I think the only thing that can be omitted from this is exhibit VI and the balance sheet.

Mr. Wood: I offer this in evidence, with the exception of the two exhibits which Mr. Swaine has mentioned.

Examiner Wilkinson: The document will be received as exhibit No. 80.

(Exhibit 80, Witness Curry, received in evidence.)

(Testimony of M. J. Curry.)

Q (By Mr. Wood). Mr. Curry, will you please produce your affidavit dated March 2, 1931, and the documents which accompany it, relating to bids for the $5,000,000 principal amount of debentures? That is exhibit 48, so we will skip that for the moment. What I want is the application to the Interstate Commerce Commission for authority to issue $5,000,000 principal amount of first mortgage bonds, dated September 9, 1930, referred to at page 377 of the printed record.

A. This is the application, "In the Matter of the Application of the Western Pacific Railroad Company for authority to issue securities ($5,000,000 additional first mortgage 5 per cent bonds). (Northern California Extension.)"

It is Finance Docket 8473.

Mr. Swaine: For the purpose of shortening the record, we suggest that the balance sheet constituting the last six pages be omitted from the record.

[2259]

Mr. Wood: Exhibit 5 is the balance sheet.

I offer this in evidence. We will take out the balance sheet, which appears as exhibit 5 of this document.

Examiner Wilkinson: Is there any objection by any of the parties to the deletion of the balance sheet?

The document will be received as exhibit 81.

(Exhibit 81, Witness Curry, received in evidence.)

Mr. McCollom: Mr. Examiner, it is my under-

(Testimony of M. J. Curry.)

standing that on the record at the present time there is an understanding that these various documents which have been offered, insofar as they might contain opinions of counsel or of the railroad company, for example, as to priority of the first mortgage, are not to be taken as binding any party; that these documents are put in merely for factual purposes.

Just having come into the case, I should like to be understood that any of these documents, so far as they express opinions or conclusions, are not to be taken as binding upon us in any way in that respect.

Examiner Wilkinson: The Examiner has stated that the Commission will not attempt to adjudicate this question. In the first place, if they did, it would not be binding upon the other parties. We all know that.

Mr. Swaine: We want to show only the fact of the opinion and what we shall argue from it, that it was an [2260] opinion that was caused to be given to the first mortgage trustee by a company under the influence of Mr. A. C. James, who bought the other securities, and therefore it also operates as an estoppel against Mr. A. C. James, who participated in causing this opinion to be given.

We want just the fact of the opinion in evidence.

Examiner Wilkinson: Pardon me just a moment. There are other parties besides A. C. James.

(Testimony of M. J. Curry.)

Mr. Swaine: We concede that if there is anyone here who takes anything free of any equity against Mr. A. C. James, who has rights higher than Mr. A. C. James, on the ordinary law of negotiable instruments they of course would not be bound by the estoppel. We want to found the estoppel as against him.

Mr. Wood: I take it that all we are doing is offering the facts for the Commission, and nothing else.

Mr. CcCollom: I had so understood.

Examiner Wilkinson: As bearing upon the fairness and equitableness of the plan. That is what this testimony goes for.

Q. (By Mr. Wood). Mr. Curry, will you produce the application to the Reconstruction Finance Corporation for a loan of $799,000, that is dated February 5, 1932?

Mr. Nicodemus: Mr. Examiner, before that is offered, I [2261] should like to ask counsel for the institutional bondholders whether he will segregate the relevant from the irrelevant matter in this document.

Mr. Wood: We have not come to that yet, Mr. Nicodemus.

The Witness: This is a different one.

Mr. Groome: This apparently is part of the application, but there is something that preceded it.

Mr. Nicodemus: This is apparently worse than I thought it was. There are going to be two instead of one.

(Testimony of M. J. Curry.)

Mr. Wood: We thought that this was the document until we discovered that Mr. Curry had something that preceded it.

(Discussion off the record.)

The Witness: I have here a copy of application and letters correcting inaccuracies therein, dated February 5, 1932, to the Reconstruction Finance Corporation, for a loan, to the Interstate Commerce Commission for approval thereof.

Q. (By Mr. Wood). Are those two related and should they go as one exhibit?

A. It is my understanding they should, because when the application was filed we were asked to make formal application in accordance with Circular 2 of the Reconstruction Finance Corporation, and this is the answer to Circular 2. [2262]

Mr. Swaine: Let me say that we are satisfied with Schedules F, L and P, plus the statement that those were part of the application dated so-and-so to the Reconstruction Finance Corporation for a loan.

If the Reconstruction Finance Corporation does not want the whole application, we are content to omit everything except schedules F, L and P.

Mr. Wood: Mr. Examiner, we have here the application which Mr. Curry has just described, a different and separate document which is really a part of it, but which contains answers to various requirements of the Reconstruction Finance Corporation, and as to which Mr. Swaine has stated

(Testimony of M. J. Curry.)

that he wishes to offer only schedules F, L and P.

Mr. Swaine: Understand, that is only for the first mortgage bondholders committee. If the trustee has any different view, that is your responsibility.

Mr. Wood: That is agreeable to us. I will offer that as one exhibit, the application and those schedules in the *accompany* document.

Examiner Wilkinson: Is there any objection to just part of this document being introduced?

Mr. Coulson: Do I understand, Mr. Examiner, that this offering of parts of documents which all the parties have not had an opportunity to examine thoroughly is subject to [2263] the right of the other parties to ask to reintroduce parts?

Mr. Swaine: That is not so, now. The parties have had these documents for a long time.

Mr. Coulson: How long a time, Mr. Swaine?

Mr. Swaine: They have had ample opportunity to look at them.

Mr. Coulson: How long a time? I have had mine for 24 hours in my office.

Mr. Swaine: These documents have been in our office for a considerably longer time.

Mr. Coulson: You have a great advantage over the other contestants in this proceeding from the start.

Mr. Homire: These documents reached the Reconstruction Finance Corporation some time in the last two days.

(Testimony of M. J. Curry.)

Mr. Nicodemus: I think that an agreement to produce the balance would be satisfactory to everybody.

Mr. Swaine: These were sent to everybody on November 14th. I have the letter of transmittal. They were sent to you at the same time they were sent to me.

The Witness: They were delivered personally, if you will pardon me, to the New York parties on Monday. They were delivered on Monday.

Mr. Swaine: At Mr. Coulson's office.

The Witness: That is this Monday.

Mr. Coulson: I do not know whether this particular docu- [2264] ment—some of them got in yesterday after I left the office—got to me Monday, Tuesday or Wednesday, but I know I have not been over it.

Examiner Wilkinson: As the Examiner ruled at the last hearing by reason of the fact that the copies of the exhibits could not be given to the parties in the proceeding, we received them but permitted the other sides to move to strike them out after they had had an opportunity to examine them.

If they have not received copies of these documents—

Mr. Swaine: They received them on Monday, Mr. Examiner.

Examiner Wilkinson: That is your statement, Mr. Swaine. Mr. Coulson said he received his yesterday afternoon.

(Testimony of M. J. Curry.)

Mr. Swaine: It is Mr. Curry's statement that they were delivered at Mr. Coulson's office on Monday.

Examiner Wilkinson: It is a rather embarrassing proposition here for the Examiner to try to pass upon when these documents were received, and he naturally is going to give counsel an opportunity to examine them. That is all he can do.

Mr. Swaine: Quite right.

Examiner Wilkinson: I understand there is no objection to the offer of this exhibit with the understanding that only portions of it are to be received as evidence?

Mr. Nicodemus: I object to it on the ground that it is [2265] irrelevant.

Examiner Wilkinson: You mean you object to the whole exhibit?

Mr. Nicodemus: I object to the whole thing, but I am reconciled to its going in if it is limited to one or two exhibits.

(Discussion off the record.)

Examiner Wilkinson: The whole document will be received as exhibit 82.

(Exhibit 82, Witness Curry, received in evidence.)

Mr. Swaine: That is why we brought down the whole exhibit. We were afraid we would then be met by the technical objection we had only half a document.

Mr. Coulson: Nobody has made a technical

(Testimony of M. J. Curry.)

objection. All we want to do is have an opportunity to complete this record.

Examiner Wilkinson: You have an opportunity to study this record, and then you can move to strike it out.

Mr. Nicodemus: I think the Examiner misunderstood my position. I objected to even the three exhibits that he culled out of the great mass of documents there as irrelevant. I am not objecting to the process of surgery. I think that ought to be applied very definitely. I do not like to see that huge application to the Reconstruction Finance Corporation go in. You see what it contains, maps, [2266] forecasts—

Mr. Swaine: Well, we have omitted all the maps and forecasts.

Examiner Wilkinson: The Examiner is certainly not going to read this exhibit over and pass on it now. He is receiving it subject to a motion to strike.

Mr. Coulson: I understood that all these exhibits along this line bearing on the equity and fairness of Mr. Swaine's plan were received subject to a motion to strike. Was not that agreed at the last hearing?

Examiner Wilkinson: That is correct, because you did not have copies of the exhibits at that time, and naturally you could not object or you could not approve it.

Mr. Coulson: Do I understand, Mr. Examiner, that in this ruling of yours the Commission is re-

(Testimony of M. J. Curry.)

ceiving these documents, subject to a motion to strike out, for the lmited purpose of proving the fairness and the equity of the plan, and that you limit the word "plan" there to Mr. Swaine's plan, since neither the debtor's plan nor the A. C. James plan has asked for such proof as to fairness and equity?

Examiner Wilkinson: It does not mean Mr. Swaine's plan nor the institutional bondholders' plan alone. It means all the plans.

Mr. Swaine: Including any plan the Commission might hand down. [2267]

Examiner Wilkinson: Including any plan that is presented here.

Q. (By Mr. Wood) Mr. Curry, will you please produce the amended and supplemental application to the Reconstruction Finance Corporation for a loan, dated February 13, 1932, referred to on page 381 of the record?

A. Here it is (producing document). That is the amended supplemental application referred to.

Mr. Nicodemus: That seems to be relatively inoffensive. It is only a few pages.

Mr. Wood: I offer this in evidence.

Examiner Wilkinson: The document will be received as exhibit 83.

(Exhibit 83, Witness Curry, received in evidence.)

Mr. Wood: Now, the application to the Interstate Commerce Commission for the approval of the Reconstruction Finance Corporation loan dated

(Testimony of M. J. Curry.)

February 13, 1932, is also referred to on page 381 of the record, and I offer that in evidence.

Examiner Wilkinson: It will be received as exhibit 84.

(Exhibit 84, Witness Curry, received in evidence.)

Mr. Wood: And the application to the Interstate Commerce Commission dated February 11, 1932, for authority to issue $15,000,000 of general and refunding mortgage bonds and $5,000,000 principal amount of notes, referred to at page [2268] 381 of the record.

The Witness: This is the application referred to (producing document).

Mr. Wood: I offer that in evidence, with the exception of the printed copy of the mortgage, which is an exhibit to it.

Examiner Wilkinson: Is there any objection to deleting the copy of the mortgage?

Mr. Wood: The copy of the mortgage is already in evidence.

Examiner Wilkinson: It will be received as exhibit 85.

(Exhibit 85, Witness Curry, received in evidence.)

Mr. Nicodemus: Is it understood that we have a reservation of a general objection to all of this testimony as irrelevant? I do not want to be repeating it.

(Testimony of M. J. Curry.)

Examiner Wilkinson: I understand that Mr. Coulson made that objection at the beginning, and the Examiner ruled that he would have a general objection along that line. I do not know that you made the objection. The record will show it. But if you want to object to all of this testimony at the present time, you may state it on the record.

Mr. Nicodemus: I think it would be safer to make an objection each time that it is offered. I will try to do it briefly, then follow it up at the end with a motion to strike out most of the exhibits. I think about three or [2269] four of these exhibits are relevant. I think the drawdown under the first mortgage is relevant. I doubt the relevancy of the rest of it.

Q. (By Mr. Wood) Mr. Curry, will you produce the minutes of the executive committee meetings on February 11th, June 25th, July 23rd, October 15th, November 17th, and December 21st, 1931, and January 29, 1932? Those were referred to on page 384 of the record.

A. These are the minutes referred to (producing documents.)

Mr. Wood: I offer them in evidence.

Examiner Wilkinson: They will be received as exhibit 86.

(Exhibit 86, Witness Curry, received in evidence.)

Mr. Nicodemus: Record my objection to it, please, Mr. Reporter.

(Testimony of M. J. Curry.)

Q. (By Mr. Wood) Mr. Curry, will you produce the application to the Reconstruction Finance Corporation dated May 23, 1932, for a loan of $759,000?

A. That is it. I have the application referred to here. (Producing document.)

Mr. Nicodemus: It has a number of exhibits that are already in.

Mr. Wood: It may be that by going over this we can eliminate some of it.

Examiner Wilkinson: We will take a recess here for 5 [2270] minutes.

(A short recess was taken.)

Mr. Wood: Mr. Curry, you have that application to the Reconstruction Finance Corporation dated May 23, 1932, for a loan of $759,000, referred to on page 390 of the record.

I will offer in evidence the application itself, and schedules E, L and P, also exhibit C, which are annexed to that document.

Examiner Wilkinson: The exhibit will be received as exhibit 87.

Mr. Nicodemus: Under the general objection that it is irrelevant.

(Exhibit 87. Witness Curry, received in evidence.)

Q. (By Mr. Wood) Next, Mr. Curry, the application to the Reconstruction Finance Corporation, dated June 6, 1932.

A. "Amended and supplemental application" to

(Testimony of M. J. Curry.)

the Reconstruction Finance Corporation (producing document.)

Mr. Wood: I offer that in evidence.

Examiner Wilkinson: It is received as exhibit 88.

(Exhibit 88, Witness Curry, received in evidence.)

Mr. Wood: Then the application dated June 10, 1932. I offer that in evidence.

The Witness: This is an amendment and supplement to its application filed June 2, 1932 for loans aggregating $759,000, and its amended supplemental application dated [2271] June 7th for further loans aggregating $1,505,554.

Examiner Wilkinson: It will be received as exhibit 89.

(Exhibit 89, Witness Curry, received in evidence.)

Mr. Wood: Next is the application to the Commission dated August 1, 1932, for authority to issue $5,000,000 of general and refunding mortgage bonds, referred to on page 390 of the record.

I offer that in evidence.

Examiner Wilkinson: Received as exhibit No. 90.

(Exhibit 90, Witness Curry, received in evidence.)

Mr. Wood: And the supplemental application to the Commission dated January 12, 1932, relating to the same issue of bonds. I offer that in evidence.

(Testimony of M. J. Curry.)

Examiner Wilkinson: The document will be received as exhibit 91.

(Exhibit 91, Witness Curry, received in evidence.)

Mr. Nicodemus: Subject to the general objection.

Mr. Wood: I now offer in evidence a certified copy of report and order of the Interstate Commerce Commission filed December 9, 1932, and report and order of the Commission filed February 25, 1932, in Finance Docket No. 9572, which relates to the issue of $4,000,000 of general and refunding mortgage bonds.

Examiner Wilkinson: These statements will be received as exhibit 92. [2272]

Mr. Nicodemus: Subject to our general objection.

(Exhibit 92, Witness Curry, received in evidence.)

Mr. Nicodemus: What is the object of this, to prove $4,000,000 of bonds were issued?

Mr. Wood: Yes. These were part of the picture showing the issue of the general and refunding bonds.

Mr. Nicodemus: The only object of this is the ultimate fact that $4,000,000 of these bonds were issued?

Mr. Swaine: No, that is not so, Mr. Nicodemus.

Mr. Nicodemus: Excuse me. Counsel for the trustee said otherwise. Beg his pardon, not mine.

Mr. Swaine: To show that the general and re-

(Testimony of M. J. Curry.)

funding mortgage was not intended to be a purchase-money lien on any property at any time.

Mr. Nicodemus: I object on the further ground that the refunding mortgage speaks for itself, and it is already in evidence.

Q. (By Mr. Wood) Mr. Curry, will you please produce the notice, specification and bid relative to an issue of $1,000,000 of first mortgage bonds which were authenticated and delivered on February 11, 1931?

A. I have here copies of notice, specifications, agreement and bid, covering purchase of $1,000,000 principal amount first mortgage 5 per cent bonds referred to. (Producing document.) [2273]

Mr. Wood: I offer that in evidence.

Mr. Nicodemus: Objected to, subject to the general objection.

Examiner Wilkinson: It will be received as exhibit No. 93.

(Exhibit 93, Witness Curry, received in evidence.)

Q. (By Mr. Wood) Mr. Curry, do you have a similar notice, specifications and bids, relating to the subsequent issues, of first mortgage bonds, namely, the $1,000,000 principal amount authenticated and delivered on June 25, 1931; $900,000 authenticated and delivered on July 23, 1931; $750,000 principal amount authenticated and delivered on November 25, 1931; $350,000 principal amount authenticated and delivered on January 8, 1932; and $1,000,000 principal amount authenticated and delivered on January 29, 1932?

(Testimony of M. J. Curry.)

A. We have similar papers in our records, yes.

Q. Are the documents relating to those subsequent issues of bonds substantially identical with the ones which have been introduced in evidence as exhibit 93?

A. To the best of my knowledge and belief, they are.

Mr. Wood: Mr. Examiner, for the purpose of shortening the record, I will not offer the subsequent notices, specifications and bids, but will let the record stand on Mr. Curry's statement that they are substantially identical. [2274]

Mr. Coulson: May I ask a question at this point?

Mr. Curry, do these subsequent applications contain the same statement which appears on the second paragraph of exhibit 93 to the effect that the first mortgage is a first lien on the main line aggregating 1050 miles?

Mr. Swain: Read the rest of it, please, if you are going to read part of it.

Mr. Coulson: Is the whole second paragraph included in the subsequent applications?

The Witness: In the specifications that you are reading from?

Mr. Coulson: Yes.

The Witness: The second paragraph?

Mr. Coulson: The second paragraph of the specifications, No. 2943, your exhibit 93.

The Witness: It is my recollection that on the

(Testimony of M. J. Curry.)

balance of the draw-downs the specifications were the same.

Mr. Coulson: They contain the same terms.

The Witness: Yes, sir. It is my recollection that they do.

Mr. Swaine: Mr. Examiner, it goes on to say that it will also be a first lien on the Northern California extension when completed.

Mr. Coulson: I beg your pardon, Mr. Examiner. It ought not to be misstated. The document speaks for itself, [2275] and it does not say the first mortgage will be a first lien. That is the point of it.

Examiner Wilkinson: As I understand it, exhibit 93 is in the record, and the subsequent documents referred to by Mr. Curry contain the same statements or similar statements as in 93. Is that correct?

The Witness: That is correct. That is the understanding, to the best of my knowledge.

Examiner Wilkinson: It will speak for itself, then.

Mr. Wood: The purpose of this, Mr. Examiner, is to show the notice, specifications and bids on the first block of the $5,000,000 of first mortgage bonds which went into the Northern California extension, and to show by Mr. Curry's statement that in the case of the rest of the $5,000,000, the same documents were used.

Mr. Nicodemus: Does the record now show the dates that the subsequent bonds were issued?

(Testimony of M. J. Curry.)

The Witness: Yes. He read them off.

Mr. Wood: I gave the dates of the authentication and delivery of each of the blocks of the first mortgage bonds.

Mr. Nicodemus: That is all right, then. That is quite satisfactory.

Mr. Wood: That is all with Mr. Curry, unless someone wishes to cross examine.

Examiner Wilkinson: Are there any questions of Mr. Curry? [2276]

Do the parties wish to reserve the right to recall Mr. Curry?

You are excused, Mr. Curry.

Mr. Coulson: Just a moment. Mr. Examiner, is not the right to recall inherent in the right you have given us to put in additional parts of these documents if we should need to?

Examiner Wilkinson: The Examiner just wanted to be safe here and have that on the record.

Mr. Nicodemus: It includes that reservation.

Mr. Coulson: I see. Thank you.

Mr. McCollom: Yes. We, of course, would like to have that. I did not know whether you were excusing him without reservation or not.

(Witness excused.)

Mr. Wood: I will call Mr. Buckley.

CARL E. BUCKLEY

testified further as follows:

Direct examination

Mr. Wood: Mr. Examiner, at the last hearing we introduced as exhibit 74 a telegram from Crocker First National Bank of San Francisco to the Chase National Bank relative to the recording of the first mortgage.

I substituted a typewritten copy of the original. I wish to withdraw the typewritten copy and substitute a [2277] photostatic copy, because I think the photostatic copy is more accurate, and we have three photostatic copies here to give the Commission.

Examiner Wilkinson: Mr. Woods, we cannot withdraw it very well. Just introduce that with your statement. It is a copy of it, and we will leave the other one in as well.

Mr. Wood: The original telegram, of course, was offered in evidence.

Examiner Wilkinson: We will leave the record state that this supersedes the other.

Mr. Wood: This supersedes the typewritten copy.

Examiner Wilkinson: It will be received as exhibit No. 94. Exhibit 94 will supersede exhibit 74.

(Exhibit 94, Witness Buckley, received in evidence.)

Q. (By Mr. Wood) Mr. Buckley, will you produce the file relating to the authentication and de-

(Testimony of Carl E. Buckley.)

livery of $1,000,000 of debentures on February 27, 1931? That is referred to on page 427 of the record.

A. I have it here (producing document).

Mr. Wood: I offer that in evidence.

Examiner Wilkinson: It will be received as exhibit No. 95.

(Exhibit 95, Witness Buckley, received in evidence.)

Mr. Wood: I wish to substitute photostatic copy for the [2278] original.

Examiner Wilkinson: Mr. Wood, the original is not in the record and the original has not been offered. As I understand, there was no objection by the parties here to introducing copies rather than the originals; so if you just offer the copies, it will be sufficient.

Mr. Wood: I see. I misunderstood the procedure. I thought we had to offer the original and then withdraw it and substitute the copies.

Examiner Wilkinson: As long as there is no objection by the other parties to copies other than the originals, there is no objection on the part of the Commission.

Mr. Nicodemus: That is the way the record reads.

Mr. Wood: They were merely produced at the last hearing. The originals are here.

Mr. Nicodemus: We object to all of these exhibits relating to debentures, which the record shows were paid off prior to the creation of the refunding mortgage.

(Testimony of Carl E. Buckley.)

Examiner Wilkinson: The objection is overruled. It will be received as exhibit 95.

(Exhibit 95, Witness Buckley, received in evidence.)

Mr. Wood: For the purpose of shortening the record again on these subsequent papers relating to a take-down of debentures, I am merely going to ask Mr. Buckley whether the papers are substantially identical with the ones con- [2279] tained in the exhibit just offered, with the exception, I think, of the last two, in which there were some additional documents.

Q. Mr. Buckley, there were subsequent applications for authentication and delivery of debentures as follows:

$600,000 principal amount authenticated and delivered on March 26, 1931?

A. That is correct.

Mr. Wood: I think perhaps you had better give the amount of the expenditures in the certificate of that application, and the dates on which the expenditures were made.

In each of these cases, Mr. Examiner, the application papers followed forms described in the debenture agreement, and they merely certified that expenditures of certain amounts were made between certain dates on the Northern California extension.

I am going to have Mr. Buckley read into the record the amounts of the expenditures and the dates of the expenditures in each case, so as to complete the factual material.

(Testimony of Carl E. Buckley.)

Examiner Wilkinson: Is there any objection to Mr. Buckley's reading these extracts rather than putting the document in?

Mr. Coulson: I understand he is going to read the dates, [2280] the amounts, and the application of the funds?

Mr. Wood: Mr. Coulson, the papers do not state the application of the funds any more than in the language of the indenture, which says that liabilities shall have been incurred or expenditures made for the construction of a line which is described in the language of the indenture.

Mr. Coulson: Am I wrong, Mr. Wood, in understanding that as a part of exhibit No. 95 there is a document which is the certificate of the president and treasurer of the Western Pacific Railroad Company, paragraph 1 of which begins,

> "That liabilities to the amount of $317,701.82 have been, and or within sixty (60) days next succeeding February 1, 1931, the date of this certificate, will be, incurred by the Western Pacific Railroad Company for the purpose of constructing, purchasing and/or otherwise acquiring the company's 'Northern California Extension' referred to and more particularly described,"

and so on?

Mr. Wood: That is what I refer to, yes.

Mr. Coulson: Do all the others contain that same phrase, the same application of funds? [2281]

(Testimony of Carl E. Buckley.)

Mr. Wood: Yes. That is taken from the indenture, and there is no specification of particular purposes in the way of work on the line or acquisition of particular items of property. I merely want to give the amounts of the liabilities and the expenditures and the dates involved, the amount of the debentures and the dates of authentication.

Mr. Coulson: With the statement in the record that the expenditures were all for the Northern California Extension?

Mr. Wood: Yes. In other words, these papers, with the exception of those which I mentioned, are substantially identical with the one which has just been introduced and contains the description of the line.

Mr. Nicodemus: Mr. Examiner, in view of this statement as to the contents of this document—I was not aware of that fact—I would like to withdraw my objection to exhibit 95. I think that is relevant.

Examiner Wilkinson: All right. Proceed, Mr. Buckley.

The Witness: $600,000 principal amount of debentures, authenticated and delivered March 26, 1931.

Certificate of the president and treasurer dated March 16, 1931, states that liabilities to the amount of $1,049,280.86 have been and/or within 60 days next succeeding March 16, 1931, the date of this certificate, will [2282] be incurred by the Western Pa-

(Testimony of Carl E. Buckley.)

cific Railroad Company, and expenditures to the amount of $150,719.14 have been actually made by the Western Pacific Railroad Company prior to March 16, 1931, for the same purpose.

Q. (By Mr. Wood) The application for $530,000 of debentures which were authenticated and delivered May 25, 1931: Will you please look at the certificate and give the dates and amounts of the liabilities and expenditures referred to?

A. Liabilities to the amount of $588,642.60 have been or within 60 days next succeeding May 15 1931; expenditures to the amount of $471,357.40 have been actually made by the Western Pacific Railroad Company prior to March 16, 1931.

Mr. Wood: Mr. Examiner, in that file there is a correction to be made. The certificate has a variance of dates. This is the file that relates to the $530,000 of debentures authenticated and delivered May 25, 1931. The certificate states that the liabilities have been made within 60 days next succeeding May 15, 1931, and that the expenditures were made prior to March 16, 1931. Those two dates should coincide.

If there is no objection, I should like to state the contents of a letter which occurs in that file, dated June 8, 1931, addressed to the Chase National Bank as [2283] trustee under the indenture, by M. J. Curry, vice president of the railroad company, in which he states that "We have just been advised by our legal department at San Francisco that a typo-

(Testimony of Carl E. Buckley.)

graphical error has been noted," and states that the date given as March 16, 1931 should read May 15, 1931.

In other words, that corrects the discrepancy in the certificate.

Q. Application for $995,000 of debentures, authenticated and delivered June 20, 1931. Will you also give the amount and dates of the liabilities and the amount and dates of the expenditures?

A. Liabilities to the amount of $1,968,732.23 have been or within 60 days next succeeding June 17, 1931, the date of the certificate, will be incurred; and expenditures to the amount of $21,267.77 have actually been made by the Western Pacific Railroad Company prior to June 17, 1931.

Q. The next is application for $309,000 of debentures, authenticated and delivered on August 25, 1931.

A. Liabilities to the amount of $618,000 have been or within 60 days next succeeding August 15, 1931, the date of this certificate, will be incurred by the Western Pacific Railroad Company.

Q. There are no expenditures described in that certificate, only liabilities? and no expenditures?

[2284]

A. Only liabilities; no expenditures.

Q. Next is the application for $600,000 of debentures, authenticated and delivered October 20, 1931.

A. Liabilities to the amount of $821,291.28 have been and/or within 60 days next succeeding October 5, 1931, the date of this certificate, will be incurred

(Testimony of Carl E. Buckley.)

by the Western Pacific Railroad Company; and expenditures to the amount of $378,608.72 have been actually made by the Western Pacific Railroad Company prior to October 5, 1931.

Q. The next is the application for $120,000 principal amount of debentures, authenticated and delivered November 25, 1931.

A. Liabilities to the amount of $12,854.54 have been and/or within 60 days next succeeding November 11, 1931, the date of this certificate, will be incurred by the Western Pacific Railroad Company; and expenditures to the amount of $227,145.46 have been actually made by the Western Pacific Railroad Company prior to October 5, 1931.

Mr. Wood: There is another date wrong there. In that file, Mr. Examiner, the date October 5, 1931, which is given in connection with the expenditures, should read November 11, 1931. There appears in this file a letter dated November 24, 1931, addressed to Mr. Buckley by Mr. Curry, in which he says,

[2285]

"Referring to your conversation with Mr. Bruen yesterday relative to typographical error appearing in next to the last line of paragraph 1 of certificate of President Adams and Treasurer Bates, debenture order No. 7, I am enclosing herewith a copy of a telegram dated November 23, in response to mine of same date, from which you will note that Treasurer Bates of this company has authorized me to instruct you as Trustee to change the words 'October 5, 1931' to 'November 11, 1931'."

(Testimony of Carl E. Buckley.)

The telegram referred to is in the file also.

Q. Next is the application for the authentication and delivery of $350,000 of debentures, authenticated and delivered January 29, 1932.

A. Expenditures to the amount of $700,00 have been actually made by the Western Pacific Railroad Company prior to January 31, 1932, the date of this certificate.

Q. There are no liabilities referred to in the certificate as having been incurred?

A. No liabilities referred to.

Mr. Wood: With respect to the applications for authentication and delivery of $347,000 of debentures on March 28, 1932 and $149,000 of debentures on May 31, 1932, I should like to offer the file, because they contain some additional matter relating to the cancellation of the debentures and the transactions which took place in connec- [2286] tion with the issue of General and Refunding Mortgage Bonds and notes.

Will you produce the application for $347,000 of debentures, authenticated March 28, 1932?

(The witness did so.)

Examiner Wilkinson: Received as Exhibit No. 96.

(Exhibit No. 96, Witness Buckley, received in evidence.)

Mr. Coulson: May I ask a question for the sake of continuity in the record at this point?

Examiner Wilkinson: Yes.

(Testimony of Carl E. Buckley.)

Mr. Coulson: Mr. Buckley, was this application which has just been marked Exhibit 96 received after the General and Refunding Mortgage of the Western Pacific Railroad Company had been filed and recorded and had become a lien upon the property of the Western Pacific Railroad Company?

Mr. Swaine: I object to the form of that question because unless the bonds had been executed and delivered under the mortgage it could not be technically a lien.

Mr. Coulson: May I ask Mr. Buckley whether any bonds had been issued under the General and Refunding Mortgage of January 1, 1932 at the time of this application which has just been admitted into the record as Exhibit No. 96?

The Witness: As to whether or not there were any bonds [2287] authenticated and delivered?

Mr. Coulson: Authenticated and delivered.

The witness: That is a matter of record which I could ascertain only by refreshing my recollection.

Mr. Coulson: Do you know that the mortgage had been recorded at that time?

The Witness: I do not know that. I would have to ascertain.

Mr. Coulson: Am I right that the record shows both those facts, Mr. Nicodemus?

Mr. Nicodemus: I cannot answer that.

Mr. Wood: I think, however, Mr Coulson, that this much appeared at the last hearing in a state-

(Testimony of Carl E. Buckley.)

ment of counsel, that at the time of the execution and delivery of the general and refunding mortgage, which I think was March 1, 1932, the bonds were simultaneously authenticated and delivered. I do not believe that anything appears as to the recording of the mortgage or the dates of the recording.

Mr. Coulson: The point, Mr. Examiner, is that we have of record the application of these funds to the construction of the northern extension. I think we have the dates of application, part of them, prior to the recording of the general and refunding mortgage, which in terms gave to the Trustee of the General and Refunding [2288] Mortgage a lien on the northern California extension.

I think this recording which is being put in here should show the extent to which any take downs of these debentures which were immediately converted into notes secured by General and Refunding Mortgage Bonds were after the date of the recordation of the general and refunding mortgage. That is the only point in which I am interested, in this connection. I think perhaps the record is clear at this point, but we will have a chance to clear it up later, if it is not.

Mr. Nicodemus: So far as the debtor is concerned, it has introduced no evidence as to the date of recording of either the First Mortgage or the General and Refunding Mortgage. I am not sure that the date of the recording of the Refunding

(Testimony of Carl E. Buckley.)

Mortgage is material, in conection with this controversy. It may be a good lien as between the parties regardless of the recording. The recording might be material if there were a third party claiming as a bona fide purchaser.

Mr. Wood: There is evidence on behalf of the First Mortgage Trustees as to the recording of a first mortgage in the two counties in which the northern extension is situated.

Mr. Nicodemus: There is a telegram here that said it was recorded. [2289]

Mr. Coulson: I think that is important. I think the record should also say what property has been added to the property of the Western Pacific since the recordation of the First Mortgage, and the basis on which the bonds have been taken down since that date.

Mr. Nicodemus: I think the Debtor would like to request the Trustee of the Refunding Mortgage to produce the date of the recording of that Mortgage, as shown by the originals on file.

Mr. McCollom: We have something else which we think will do for that purpose; when I come to put all my proof in—there is not much of it—I intend to put that in among the other proof.

Mr. Nicodemus: That is quite satisfactory.

Mr. Wood: Will you produce the application for $149,000 principal amount of debentures, authenticated and delivered May 31, 1932?

(Testimony of Carl E. Buckley.)

(The witness did so.)

Mr Wood: I offer that in evidence.

Examiner Wilkinson: It will be received as Exhibit No. 97.

(Exhibit No. 97, Witness Buckley, received in evidence.)

Mr. Wood: Next, will you produce the files relating to the cancellation of $4,504,000 principal amount of [2290] debentures on March 1, 1932? That is referred to in the record at pages 429 and 430. I offer that in evidence.

Examiner Wilkinson: It will be received as Exhibit 98.

Q. (Exhibit No. 98, Witness Buckley, received in evidence.)

Q. (By Mr. Wood) Mr. Buckley, with respect to these files relating to the authentication and delivery of debentures, that were not actually put in evidence, but from which you read various dates and amounts, with the exceptions which were noted as corrections of certain errors, and in some cases where the certificates certified liabilities only or expenditures only in place of certifying both liabilities and expenditures, they are substantially identical with the file which was introduced in evidence as Exhibit 95? That was the application for $5,000,000 of debentures, which were authenticated on February 27, 1931?

A. I think they are, yes.

Q. Substantially identical.

(Testimony of Carl E. Buckley.)

A. Substantially identical.

Mr. Wood: That is all.

Examiner Wilkinson: Are there any questions of Mr. Buckley?

Mr. Nicodemus: I would like to straighten out this question of the exhibits that were offered in connection [2291] with the authentication of the first mortgage bonds. I understood that Mr. Swaine earlier in the session agreed that everything should be eliminated except the certificate of expenditures and the subseqtuent draw-downs.

Mr. Swaine: So far as we are concerned, if there is the same character of testimony as was just made regarding the debenture take-downs, namely, that all the documents are like the typical one—

Mr. Nicodemus: That is what I want to do.

Mr. Swaine: —with the exception of the certificate of expenditures, then we are quite content to have only the certificate of expenditures.

Mr. Nicodemus: By this motion I want to make we can eliminate 14 exhibits.

Mr. Swaine: No, you do not eliminate fourteen exhibits, you cut down fourteen exhibits, in lieu of the whole exhibit.

Mr. Nicodemus: Each exhibit consisted of about nine documents.

Mr. Swaine: In lieu of the whole document you have a stipulation plus the part of each document which varies from the other documents.

(Testimony of Carl E. Buckley.)

Mr. Nicodemus: I move to strike out Exhibits 63 to 73, inclusive, excepting in each case the certificate of expenditures. Mr. Buckley testified that with the ex- [2292] ception of the certificate of expenditures and the date of the certification of the bonds they are substantially identical.

Examiner Wilkinson: Is there any objection to that?

Mr. Coulson: We want to leave of record the dates of certification, because they have some importance, but aside from that, I think to eliminate these 112 documents which are part of these exhibits is very useful.

Examiner Wilkinson: As I understand it, these exhibits have already been received physically in the record?

Mr. Nicodemus: They were. That is correct.

Mr. Coulson: It means eliminating all the documents in them except one, and the date; show the date and one document.

Examiner Wilkinson: And there is agreement of all parties that this may be done?

Mr. Swaine: He is not striking the exhibit, he is simply cutting the exhibit down in the same manner.

Examiner Wilkinson: You had better have it on your record here so that there will be no question about it, because we cannot take them out of the record physically. They wil stay in there, but if you want the record to show that only certain parts of them—

(Testimony of Carl E. Buckley.)

Mr. Nicodemus: They will not stay in there physically in the sense that you will be required to certify them to [2293] the Court or to the full Commission in the case of a hearing. That is what I am protecting.

(Discussion off the record.)

Mr. Wood: It occurs to me, since these documents are already in, that they might be left as they are, and when it comes to taking the record up to the Court the parties can stipulate to omit from the printing of the record the facts that are not essential. Would not that serve the purpose that Mr. Nicodemus has in mind?

Mr. Swaine: Why is not that a happy suggestion? That is the usual practice in the trial of cases before courts, that a document goes in with the idea that the parties will try to shorten the record on appeal.

Examiner Wilkinson: The only thing is that the Examiner understands we have to certify to the Court the transcript of the proceedings before this Commission. If these exhibits have been before the Commission and have been considered by the Commission, I think we would have to certify them up. So if you want to do anything like that, you had better make an agreement here on the record now that they are not to be considered by the Commission.

Mr. Coulson: It is my impression that under Section 77 the Commission has to send up anything

(Testimony of Carl E. Buckley.)

before it. It is unlike litigation, where the parties can agree to eliminate certain things that were considered by the [2294] inferior tribunal.

Examiner Wilkinson: That is right, so you will have to make the agreement here on the record at the present time.

Mr. Nicodemus: The debtor will be very pleased to make such an agreement now.

Mr. Swaine: And so are we willing to agree that there shall be excluded from the record everything in each of those thirteen draw-downs except the date and the certificate showing the expenditures, it being stipulated by all of the parties that all of the other parts of the certificate are substantially identical with the first of the series.

Mr. Nicodemus: That is right.

Mr. Wood: Of course, you have two kinds of papers.

Mr. Nicodemus: I protected you on that. I gave you two exhibits, 61 and 62.

Mr. Wood: Yes. I just want to get the thing straight on the record.

First of all, you have an application for taking down bonds against the deposit of cash. There are no certificates in connection with those applications. I think the record already shows the dates and amounts of the authentication and delivery. Then you have the cash requisitions on which the deposited cash, the proceeds of the [2295] sale of the

(Testimony of Carl E. Buckley.)

bonds, was taken down against the certification of the expenditures. In those appear the certificates of the officers as to the dates and amounts of the expenditures and the purposes for which they were made. As I understand it, we leave in the first two typical papers, which will be the application——

Mr. Nicodemus: They will be 61 and 62.

Mr. Wood: Exhibit 61, which is an application for a million dollars of bonds, and Exhibit 62, which is the first cash requisition. Then we leave in the record the dates and the amounts on which the bonds were taken down, and the dates and amounts of the cash requisitions and all of the certificates of expenditures on which those requisitions were based. Is that correct?

Mr. Swaine: That is right.

Mr. Nicodemus: That is quite right.

Examiner Wilkinson: As to the rest of the exhibit, the motion is here that it shall not be considered by the Commission?

Mr. Swaine: Instead of doing it that way, why do we not just stipulate it shall not be considered? I do not think that this is open to a motion to strike. I think if we insist on it it is relevant evidence.

Examiner Wilkinson: It is purely a stipulation here.

Mr. Swaine: Instead of a motion to strike, I suggest [2296] that the trustee and we withdraw that part.

(Testimony of Carl E. Buckley.)

Mr. Nicodemus: The excluded parts are withdrawn?

Mr. Wood: Yes. Certain correspondence between the Crocker First Federal and the Chase will vary in the documents. I do not think that they are material, except that they simply show the transaction.

(Discussion off the record.)

Mr. Wood: I make a formal request that the Commission consider with respect to Exhibits 63 to 73, both inclusive, only the portions to which I have just referred. Would the Examiner prefer that in order to get the thing concisely in the record we give again the dates and amounts of the bonds and the cash taken down, or leave that to the record as it now stands? I think it is all in there in the course of the testimony at the last hearing.

Examiner Wilkinson: It was all put in there.

Mr. Wood: The question is whether you would like to have it given concisely as Mr. Buckley gave it with the debentures.

Examiner Wilkinson: I do not think it is necessary, unless the other parties want it.

Mr. Wood: I am satisfied on the record as it stands.

Examiner Wilkinson: The request that has been made is agreed to by all parties? There are no objections?

(No response.) [2297]

The request is granted, then.

(Testimony of Carl E. Buckley.)

Examiner Wood: I have no further questions, Mr. Examiner.

Examiner Wilkinson: Are there any questions of Mr. Buckley? You may be excused, Mr. Buckley.

(Witness excused.)

Mr. McCollom: I would call the Examiner's attention with reference to the general and refunding mortgage to the fact that the mortgage was introduced as Exhibit 6 at page 25 of the minutes. I have never heard of a dispute as to the validity of the mortgage. While I have here various documents such as authorizations of stockholders, authorization of Directors, and so forth, as at present advised I see no necessity of offering any of those papers.

At page 25 of the minutes there is testimony by Witness Elsey that there have been authenticated under the mortgage bonds amounting to $18,99,500, and that they are pledged as collateral under the notes of the A. C. James Company, Reconstruction Finance Corporation, and the Railroad Credit Corporation.

That testimony was not objected to or questioned, therefore I feel no necessity of duplicating the substance of that testimony here by further testimony, as at present advised. [2298]

Also, at page 26, there was introduced Exhibit 9, which is stated to be a complete and detailed statement of the short term obligations of the carrier,

with three issues of notes, to which the witness has referred, and the schedules of collateral therefore.

I assume that that exhibit, although I have not studied it, states what it purports to state, and is adequate for the purpose for which it was introduced.

Also, Exhibit 10 supplements Exhibit 9, to a certain extent, so I merely refer to those exhibits 9 and 10 in passing.

I will call Mr. Buckley.

CARL E. BUCKLEY

testified further as follows:

Direct Examination

Q. (By Mr. McCollom) Mr. Buckley, have you produced from the files of the trustee under the General and Refunding Mortgage, which I will for shortness term the General Mortgage, a letter to the Chase from H. P. Tyler, attorney for the Western Pacific Railroad Company, dated August 17, 1932, showing the dates and places of recording of the General Mortgage?

A. I produced that letter, yes.

Q. Have you produced also photostatic copies of that letter? [2299] A. Yes, sir.

Mr. McCollom: I offer in evidence a photostatic copy of that letter.

Examiner Wilkinson: Have the other parties had copies of this document?

(Testimony of Carl E. Buckley.)

Mr. McCollom: I believe they have not been distributed up until the present moment.

Mr. Swaine: We are quite willing to examine these as they come up and not make any objection on the ground we have not seen them for two days. We have no objection.

Examiner Wilkinson: It will be received as No. 99.

(Exhibit No. 99, Witness Buckley, received in evidence.)

Mr. McCollom: Have you produced from the records of the Chase their transcript of certification and delivery of the General and Refunding Mortgage bonds, together with a photostatic copy?

The Witness: I have not produced the original of that. I did not know that that was necessary.

Q. Have you produced a correct photostatic copy of that transcript? A. Yes.

Mr. Swaine: We have no objection to this, except that I suggest that Mr. Buckley testify as to the meaning of the word "date". Some of those things are rather cryptic. [2300]

Q. (By Mr. McCollom) This transcript which you have produced is in two sheets, is it not, the first relating to bonds designated as General and Refunding Mortgage Gold Bonds, Series A, 5 per cent, due January 1, 1957, and the second relating to the General and Refunding Mortgage Gold Bonds, Series B, 5 per cent, due January 1, 1957?

A. That is correct.

(Testimony of Carl E. Buckley.)

Q. The top sheet shows, does it not, in the first column the date of delivery out by the Chase of the bonds that are referred to on the transcript?

A. The date on the left-hand column is the date on which the transaction occurred which appears opposite that date.

The first block of the form shows the date on which bonds were received from the company.

The next block shows the dates and details relative to the authentication and delivery of bonds.

The next block is a cancellation of bonds, and the next block, the total bonds outstanding.

The last block on the sheet would be the bonds held unissued; if any.

The date on the left would correspond to any of those transactions that appear opposite it.

Q. The column under the heading "outstanding" shows a final balance outstanding, according to the records of [2301] the Chase, in the principal amount of $14,999,500, is that correct?

A. That is correct, under Series A.

Q. Referring to the sheet which relates to the Series B Bonds, that has only one item on it, has it not? A. That is correct.

Q. That relates to $4,000,000 in principal amount of the bonds and shows the date of delivery out and the authority under which delivered, and the balance of Series B bonds outstanding, in the amount of $4,000,000. A. That is correct.

(Testimony of Carl E. Buckley.)

Mr. McCollom: I offer the transcript in evidence.

Mr. Swaine: I have no objection, but I would like to ask just one question on the form.

In the first line, in the first column appears 1932, March 2 as of 1.

In the fourth column appears the figure $14,380,000. In the seventh column appears the figure $5,630,000, and under that also a figure $8,750,000, with nothing carrying over to the first column. Am I to understand as to that figure that it is still under March 2 as of March 1?

A. The figures in the seventh column of $5,630,000 principal amount of series A bonds, and $8,750,000 principal amount of series A bonds are indicated on this record as having been authenticated and delivered on March 1, 1932 [2302]

Mr. Swaine: No. Are you right about that? Is it not March 2nd? The Witness: No.

Mr. Swaine: It says March 2 as of 1. When did you actually do it?

The Witness: March 1, but for some reason—I do not know the reason—the authorizing ticket reflecting the transaction on this record was not posted as of the date of the transaction, and it is just our practice not to put it in as of March 1, the date, but post it as of a subsequent date as of a prior date—to post it as of a subsequent date as of the date on which the transaction took place.

Mr. Swaine: The physical act, then, was on March 1st? The Witness: Correct.

(Testimony of Carl E. Buckley:)

Mr. Swaine: In the seventh column nothing appears opposite the figure $5,030,000, to which you have just made reference, but opposite the figure $8,750,000 appear the words, "Pursuant to Article 2, Section 4—delivered to company."

The Witness: That is correct.

Mr. Swaine: What is the reason for there being no explanation as to the $5,630,000?

The Witness: This "Remarks" column to which you have just referred is a memorandum column, and it refers to [2303] those bonds which were delivered on that day in the aggregate. In other words, it refers not only to the $8,750,000 principal amount which on this sheet is opposite those "Remarks," but also refers to the $5,630,000.

Mr. Swaine: That is just what I was trying to get at. In other words, the fact that it is only against the $8,000,000 was not intended to exclude its applicability to the $5,630,000?

The Witness: That is correct.

Mr. Swaine: That is all I want. I have no objection to it.

(Discussion off the record.)

Examiner Wilkinson: These transcripts, consisting of two sheets, will be received as Exhibit 100, and you will furnish copies.

(Exhibit No. 100, Witness Buckley)

Q. (By Mr. McCollom) The series A and series B, as shown by the last exhibit as outstanding,

(Testimony of Carl E. Buckley.)

according to the records of the Chase, aggregate how much?

A. $18,999,500 principal amount of bonds.

Q. Your records indicate also that all of those bonds were delivered to the company, do they not? A. They do.

Mr. McCollom: May I ask the railroad company to supply for the next hearing, unless it is already in the [2304] record, a statement of the dates of delivery by the railroad company of those bonds?

Mr. Nicodemus: We will do that. Their delivery to the trustee for authentication, or their delivery to pledgees?

Mr. McCollom: The delivery of the authenticated bonds out from the railroad company.

Mr. Nicodemus: To the pledgees?

Mr. McCollom: Yes.

Mr. Nicodemus: Is it not in Exhibit 9?

Mr. Swaine: I do not think the date of the actual delivery is shown, just the date of the note for which the obligations were pledged.

Mr. McCollom: I think it is a very simple matter to state the date of the initial delivery out by the railroad company of the authenticated bonds. You do not know now, I suppose?

Mr. Swaine: We will be glad to stipulate that that can be filed by Mr. Nicodemus, and we will accept it as part of the record as of today, without any opportunity to examine it.

Mr. Nicodemus: All right, that is fine.

(Testimony of Carl E. Buckley.)

Q. (By Mr. McCollom) Have you produced a photostatic copy of the records of the case with reference to the monies held by the Chase as Trustee under the General [2305] Mortgage as proceeds of collateral? A. I have.

Mr. Swaine: We have no objection.

Mr. McCollom: I offer in evidence this transcript.

Examiner Wilkinson: It will be received as Exhibit 101.

(Exhibit No. 101, Witness Buckley, received in evidence.)

Q. (By Mr. McCollom) Have you produced a photostatic copy of the records of the Chase as Trustee under the general mortgage showing the income received on collateral held by it as Trustee under that mortgage? A. I have.

Mr. Swaine: No objection.

Examiner Wilkinson: It will be received as Exhibit No. 102.

(Exhibit No. 102, Witness Buckley, received in evidence.)

Q. (By Mr. McCollom) Have you produced a correct list of securities held by the Chase as Trustee under the General Mortgage as of the close of business October 21, 1936? A. Yes.

(Discussion off the record.)

Mr. McCollom: I offer in evidence the list produced by the witness. [2306]

Examiner Wilkinson: Any objection?

(Testimony of Carl E. Buckley.)

Mr. Coulson: None.

Mr. Wood: No objection.

Examiner Wilkinson: It is received as Exhibit No. 103.

(Exhibit No. 103, Witness Buckley, received in evidence.)

Q. (By Mr. McCollom) Mr. Buckley, you have seen from time to time, have you not, statements of collateral as physically held by the Trustees under the first mortgage of the Western Pacific?

A. I recall one certificate in there from the Trustee.

Q. You know, for example, that that list shows certain securities of the Sacramento Northern Railroad Company?

A. I will have to verify my recollection as to specific details.

Q. I am not asking, Mr. Buckley, as to any specific amount. I am simply asking whether you have seen lists showing the Trustee of the first mortgage to hold certain securities?

A. I recall a list that is in our file.

Q. Of the Sacramento Northern Railroad. Has the Chase ever made any investigation as to the right of the Trustees under the First Mortgage to hold the collateral or securities which that Trustee holds? A. I do not know. [2307]

Mr. Nicodemus: I do not know whether his answer is responsive. Do you know there was no such investigation?

(Testimony of Carl E. Buckley.)

The Witness: I have no knowledge on it now, because I have not looked into the question. If there was any, it is a matter of record. It is the first time I have heard about it, and I have not examined our records to ascertain whether there was or not.

Q. (By Mr. McCollom) You do not know whether the Chase has had any occasion to study that question?

A. No, I do not, Mr. McCollom.

Q. Would the same answer be true as to any other collateral held by the Trustee under the First Mortgage?

A. Except this—the only knowledge I have as to the collateral—that a short time ago I believe Mr. Homire requested Milbank, Tweed, Hope & Webb, our counsel, to furnish him with a memorandum list of collateral handled by us as trustee under the first and refunding mortgage bond indenture.

I had a man make up such a list, and furnished it, I believe, to Mr. Wood of our counsel, and I assume he sent it along in response to your request.

Mr. Wood: It was sent to Mr. Homire.

The Witness: A copy of that list that was furnished to Mr. Homire is in our files. A copy of that list is produced here today by you. That is the copy (indicating). [2308] That is a copy which purports to show the correct amount of collateral held by us as Trustee under the Refunding and General.

(Testimony of Carl E. Buckley.)

But the primary record is still in our office, and while I believe that that is a correct list, and while I believe that there is a certificate from the Crocker First Federal as Trustee under the First Mortgage in our files, has indicated on that list—and I believe that there is a security of the Sacramento Northern as shown on that list—I cannot swear to the correctness of that without getting the primary record, you see.

Q. I do not think you understand my question, Mr. Buckley. My question was whether the Chase so far as you knew had ever made any investigation as to the right of the Trustees under the first mortgage to hold any collateral which they held as trustees under that mortgage.

A. As to that question I do not know, I have no knowledge.

Q. So far as you know, has the Chase as Trustee under the General Mortgage made any investigation as to the property which the railroad company acquired after the date of the first mortgage, and as to whether or not such property is covered by the lien of the first mortgage?

A. I have no knowledge of that, either, sir.

Q. Do you think you would have a present knowledge of it if it had been done? [2309]

A. It is quite likely that I would not. In a matter that has been extending over these years, having it flashed on me out of a clear sky, I might not. If I recollected it, it would just be chance.

(Testimony of Carl E. Buckley.)

Mr. McCollom: That is all we have to offer now, Mr. Examiner.

Examiner Wilkinson: Do you care for Mr. Buckley again?

Mr. McCollom: Mr. Buckley is in New York and I assume that we could always recall him.

Examiner Wilkinson: Any questions of Mr. Buckley?

You are excused, Mr. Buckley.

(Witness excused.)

Examiner Wilkinson: Is there anything further?

Mr. Nicodemus: None on the part of the Debtor.

Mr. Swaine: I understand the Debtor has closed its case. We have closed our case. I suggest that the Examiner fix a date for filing briefs.

Mr. McCollom: That of course would not be entirely satisfactory to us. I think Your Honor must appreciate that the Irving was not substituted as Trustee under this mortgage until last Friday. Since that time I have read several hundred pounds of papers, and there are still several hundred pounds of papers that have to be read. While it is quite true that all of those papers will not [2310] necessarily have any bearing on any question that remains open, still, the moment that you suggest the question of priority as between mortgages, you raise a very serious question. We should

not wish to have the record closed so far as we are concerned until after we had what under all the circumstances will be considered reasonable opportunity to study the facts, with the purpose of finding whether there is further evidence to be introduced in support of the claim of the general mortgage as against the First Mortgage.

I have consulted with the holders of the bonds issued under the general and refunding mortgage, and they feel that there should be a month's adjournment.

Mr. Swaine: Mr. Examiner, the General and Refunding Bonds are not as in the ordinary case held by large numbers of scattered bondholders who must be represented by a trustee or not be represented at all. All of the bonds are held by three institutions, the Reconstruction Finance Corporation, the Railroad Credit Corporation, and the A. C. James Company.

The negotiation of this plan was under consideration for many, many months before a plan was filed at all. All three of those bondholders had ample opportunity to examine as to their rights, because the question of what their rights were was naturally an important item in the [2311] negotiation of the plan.

I have forgotten the exact date on which the plan was filed. The first hearing, as I remember it, in this proceeding, was some time in March. Counsel for all three holders of the General and Refunding Bonds appeared at the first hearing. They

have been here at all the hearings down to date. They have had ample opportunity to have investigated the question to which Mr. McCollom refers.

I have no desire to cut Mr. McCollom short; if he at this last minute or last second finds something more to muddy the record with, all right. He is entitled to that opportunity.

But my practical suggestion is that the Examiner fix a date for briefs, and fix a date which need not be a month, say, let it be two weeks from now, and if Mr. McCollom has any more to offer on that date two weeks from now we can all come down and attend the taking of that testimony. Otherwise, let the record be considered closed as of today, and fix a date for filing of briefs which may give counsel opportunity to take into account any such testimony that may be introduced two weeks from today.

To make it concrete, I would suggest that briefs be filed by December 20th by all the parties.

Examiner Wilkinson: Mr. Swaine, we cannot fix a date for filing briefs until the case is closed, under the Com- [2312] mission's rules.

I appreciate what you have said, and certainly it is the desire of the Examiner and the Commission to close these cases up if possible.

I would like to ask now, if you do not mind, diverting just a moment from Mr. McCollom, as Mr. McCollom's position is clear, does the Railroad Credit Corporation have anything to produce at this hearing?

Mr. Willard: Probably not, Mr. Examiner, but we do not have all the facts before us. I gather Mr. Swaine's suggestion is that we shall prepare our briefs before we know whether there is anything more to go in.

Examiner Wilkinson: That has been disposed of.

Mr. Willard: We would like to know all the facts before we are called upon to prepare a brief and we state our position finally. We have relied on counsel for the Trustee to make the case. We have not made the effort to do it ourselves, as to priority. I think perhaps it is a little bit of a wrong picture to say that a plan has been negotiated for many months, implying that we had had part in it. We did not. We were not consulted when the plan was being prepared, and we came into the picture after the picture was all drawn.

We think that the Trustee for the General Mortgage should have an opportunity to make an examination of the [2313] records and to put in the record in this case whatever seems to be necessary to establish our rights as bondholders.

Examiner Wilkinson: As far as the Railroad Credit Corporation is concerned, at least at the present time, you have nothing ready, and so far as you know you do not intend to put any testimony in, yourself?

Mr. Willard: That is our present intention.

Examiner Wilkinson: Does the Reconstruction Finance Corporation have any evidence it wants to offer at this hearing?

Mr. Homire: No further evidence to offer at this hearing, except that at the last hearing it was understood that we would obtain copies of the Commission's valuation report on the Western Pacific, and I have those here now. I do not believe these have been assigned an exhibit number.

Examiner Wilkinson: At the same time some of the parties made a suggestion that it might be possible to get together and to stipulate certain facts rather than put in the whole report. Has there been any effort along that line?

Mr. Homire: I understood that they would be produced here.

Examiner Wilkinson: All right, if you want to do it. [2314] I just want to know if there is any possibility, rather than put in the entire report—

Mr. Homire: It has not been done.

Examiner Wilkinson: To stipulate as to the facts in there that you want in the record.

Mr. Nicodemus: I would like to undertake to stipulate.

Mr. Homire: That has not yet been done, but I should suppose that we could make the same reservation that is already in as to other evidence, at least as I understand it, that if they want to eliminate it from the record we could stipulate that later.

(Discussion off the record.)

Mr. Homire: We offer the report.

Examiner Wilkinson: The report of the Interstate Commerce Commission in Valuation

Docket No. 126, Western Pacific Railway Company, is received as Exhibit No. 104.

(Exhibit No. 104, by Counsel, received in evidence.)

Examiner Wilkinson: Do you have anything further, Mr. Homire?

Mr. Homire: No, not now.

Mr. Nicodemus: I have one thing further, I would like to have a little time in which to formulate a motion to strike out a great many exhibits that I think can be eliminated. I am quite serious about that.

Examiner Wilkinson: In view of the fact that there [2315] has been a general substitution of the General and Refunding Mortgage Trustee, and that a new one has been appointed only within the last day or two, much as the Examiner would like to close the record, he cannot do so. We will adjourn until December 9th.

Mr. Coulson: Mr. Examiner, I suggest for the convenience of the Commission and to avoid relegating a matter of computation to the briefs, that there be prepared for the various plans before the Commission statements similar to those that the Commission has required in other hearings, showing the effect on the tax expenses of the property of the distribution of income required by the various plans. I have special reference, of course, to the application of the undistributed corporate surplus tax law to plans which require a continuous segregation of income either by way

of providing for capital expenditures or for sinking funds or for other non-distributable purposes.

Examiner Wilkinson: Do you want to put in a statement like that?

Mr. Coulson: It does not apply to the plan I filed, but applies to the other two plans. I think Mr. Nicodemus and Mr. Swaine ought to charge themselves with responsibility for presenting exhibits at the next meeting for their two plans.

[2316]

Mr. Nicodemus: I think Colonel Coulson is an outstanding authority on taxes, and he should prepare that statement.

Mr. Coulson: That would be making it a matter of stipulation.

Mr. Swaine: It requires a great deal of stipulation.

Mr. Coulson: I would rather have Mr. Swaine's office do it as to his plan.

Mr. Swaine: So far as our plan is concerned —and that is true as to the Debtor's plan—that is entirely permissive. If the Board of Directors feels that the tax burden would be less if they did not want to apply income to capital expenditures, they do not have to under our plan. The state of the tax law as it was at the time the problem arose would be the thing that the Directors took into account. You would have to make all sorts of hypotheses. I do not believe it will help very much to make that.

Mr. Coulson: I did not so understand Mr. Swaine's plan, but I will reexamine it from that point of view. If his plan does involve any compulsory segregation of income, then I would respectfully request that the Commission have in this proceeding as in other similar proceedings a statement showing the effect of the additional tax burden. [2317]

Mr. Nicodemus: I would like to give a warning that in the next hearing if he suggests two weeks for filing briefs, that will be wholly satisfactory to us. That is not an adequate time for the preparation of briefs. I do not think he was serious.

Mr. Swaine: I suggested 30 days today, with the hearing in two weeks.

Examiner Wilkinson: In answer to Mr. Coulson, the Commission will be very glad to receive the data.

We will adjourn now until December 9, 1936.

(Whereupon, at 1:55 o'clock, pm., an adjournment was taken until December 9, 1936, at 10 o'clock, a. m.) [2318]

Before the
Interstate Commerce Commission
Finance Docket No. 10913

WESTERN PACIFIC RAILROAD
COMPANY REORGANIZATION.

Ante Room A,
Interstate Commerce Building,
Washington, D. C.
Wednesday, December 9th, 1936.

The above-entitled matter came on for further hearing at ten o'clock a. m., pursuant to notice.

Before:

Examiners Harvey H. Wilkinson, and R. T. Boyden.

Appearances:

Same as heretofore noted.

Additional Appearances:

Ernest S. Ballard, 120 S. La Salle Street, Chicago, Illinois, and Mr. Philip A. Walker, Munsey Building, Washington, D. C., appearing for Missouri Pacific Railroad Company, intervening petitioner.

H. Brua Campbell, 35 Wall Street, New York, N. Y., appearing for Debtor. [2320]

PROCEEDINGS

Examiner Wilkinson: Are you ready to proceed, gentlemen?

Mr. Campbell: Mr. Examiner, my name is H. Brua Campbell. I am appearing here in the place

of my partner, Mr. Nicodemus, who is ill at St. Luke's Hospital, who asked me to appear here, and I would like to enter my appearance for the Debtor, if I may.

Examiner Wilkinson: Yes, sir.

Mr. Campbell: The debtor desires to produce the corporate history of the debtor.

This was prepared in San Francisco and is introduced at the request of Examiner Boyden. We have tried to make it as complete as possible and give information which will be useful. If it contains any statement as to the respective liens of the first mortgage and the general and refunding mortgage, or any other mortgage, which is a legal conclusion, we understand that no one is bound thereby, not even the debtor. It is offered solely for the factual data which it contains, and we ask that it be received as Exhibit No. 105.

Mr. McCollom: May it please the Examiners, may I ask whether I am correct in understanding that in the preparation of this statement the company did not [2322] intend to make any statement with reference to the relative liens as between mortgages?

Mr. Campbell: This is off the record, for the time being.

Mr. McCollom: We do not object to the statement as long as it is understood that nothing contained in the statement is to be taken as stating the railroad's position with reference to liens of mortgages, or that nothing contained in the state-

ment is to be taken as being important with reference to the question of relative liens of the mortgages from the point of view of law.

We stand on the provisions of the general and refunding mortgage, which of course, cannot be modified by a statement of this nature.

Mr. Swaine: Of course the statements of the debtor cannot bind anyone affected by them, we believe. On the other hand they are admissions by the debtor, so far as the debtor is concerned, and I think the document must stand on its face for what it is worth.

Mr. McCollom: The language of the general and refunding mortgage on page 23, after describing the property covered by the mortgage, states as follows:

> "Subject, however, insofar, but only insofar as in law the same respectively may attach to [2323] any part or parts of the trust estate to existing liens and charges of record * * * including the first mortgage."

I should object to the introduction of the statement, if Mr. Swaine proposes that it be in the record, even for the limited purpose for which he states that he finds it should be in the record.

Examiner Wilkinson: Mr. McCollom, I do not see how you can represent the debtor, and this is a statement presented by the debtor in response to a request of the Examiner for a corporate history of the Western Pacific. The Examiner, of course,

has not read it, but naturally it does not bind other parties.

We take it that this is a statement by the debtor as to its corporate history, and it will be received as Exhibit No. 105.

Mr. Coulson: Before you rule that this be received, may I enter a formal objection to this document? I have been handed this document of 35 pages and it contains extended exhibits and tabulations, having received it just at this moment. I have no knowledge what facts are in it, but its probative value, if any, as to factual basis must arise solely from the fact that it is presented by counsel for the debtor.

Creditors appearing in this proceeding—and I [2324] represent one of the Junior Creditors—should have an opportunity to examine this as to the facts presented and as to the necessity of cross examination with reference to any of the facts.

I object to the admission of the exhibit on the basis that no foundation has been laid for it as to relevancy and competency, and if it is accepted by the Examiner, I ask that it be accepted subject to a motion to strike out or to a request on the part of any interested creditor for the right to cross examine insofar as factual data in this statement is concerned.

I have never seen it before.

Mr. Clay: The R. F. C. objects on the same ground.

Examiner Wilkinson: In view of the objection of Mr. Coulson that he has not had time to examine it, we will strike out the receipt of this document and will reserve ruling on it until the close of the hearing.

(Informal discussion off the record.)

Examiner Wilkinson: We will proceed.

Mr. Ware: Mr. Examiner, may I interrupt a moment before you proceed?

I have an intervening petition to offer here, and if this is the proper time, I should like to offer it.

Mr. Campbell: We have another exhibit which we [2325] would like to offer.

Examiner Wilkinson: While we are on the record here, let us finish with that. Let us see the petition.

Mr. Ware: This is a petition filed on behalf of the Missouri Pacific Railroad Company, Guy A. Thompson, Trustee, and this is the original petition. I have sufficient copies to go around.

Mr. Swaine: The Institutional Bondholders' Committee objects to the introduction of the Missouri Pacific petition.

Mr. Campbell: The debtor objects to the intervention of the Missouri Pacific Railroad Company, or its Trustee, on the ground it is not a party within the meaning of Section 77, and that its admission will unduly delay the proceedings.

Mr Ballard: If your Honors please, my name is Ernest S. Ballard and I have a matter relating to which I think something should be presented now.

I am the attorney for the Missouri Pacific Railroad Company, Debtor, as distinguished from the Trustee and I have a petition of intervention here —I do not mean debtor in these proceedings but in another proceeding—and I have a petition of intervention on the behalf of the Missouri Pacific Railroad Company, which I ask leave to file, and at the proper time I am [2326] prepared to be heard on it. I have copies for counsel.

Mr. McCollom: The Trustee under the General and Refunding Mortgage has not seen the petition, and we believe we should withhold statement of our position until we have seen and examined it.

Mr. Swaine: The objection of the Institutional Bondholders' Committee goes to the attempted intervention of the Trustee and the attempted intervention of the Missouri Pacific itself.

Mr. Campbell: The objection of the debtor likewise goes to both the attempted intervention of the Trustee and the attempted intervention of the Missouri Pacific itself.

Examiner Wilkinson: It is necessary, before the Examiner can rule upon this question, to have time to look at these petitions.

Mr. Coulson: Mr. Examiner, I would like to enter an objection to both petitions of intervention; and I would like to be heard as to the grounds of my objection at an appropriate time.

Examiner Wilkinson: At an appropriate time the question will be raised.

Do you have anything further, Mr. Campbell?

Mr. Campbell: Yes, Mr. Examiner. The Debtor desires to introduce a statement prepared by Mr. M. J. Curry, [2327] showing the delivering dates to pledgees of $18,999,500 principal amount of General and Refunding bonds. This was requested both by Mr. Swaine and Mr. McCollom. We ask that it be received as Exhibit No. 106, and with the introduction of that, the Debtor has finished its case in chief.

We understand, however, that other counsel will wish to introduce evidence.

Examiner Wilkinson: Is there any objection to this document by counsel?

Mr. Caulson: May we have an opportunity to examine it?

Examiner Wilkinson: The document will be marked for identification as Exhibit No. 106 and not received at this time but just marked.

(Exhibits Numbers 105 and 106, by Counsel, were marked for identification.)

Examiner Wilkinson: Do you have anything further, Mr. Campbell?

Mr. Campbell: Not at this point.

Examiner Wilkinson: Mr. McCollom, do you have anything at the present time?

Mr. McCollom: The present situation in this case, Mr. Examiner, arises from the fact that the Institutional Committee of First Mortgage Bondholders has [2328] proposed a plan based upon the assumption that the first mortgage is a prior lien upon all property of the Railroad Company and,

therefore, that they must receive for all indebtedness due to them securities which shall out-rank all other securities to be issued. No plan can possibly be based upon such an assumption. There might be more basis for such an assumption if the law were that a first mortgage and the after acquired property clauses presumably cover all property of the Railroad Company. The fact is that the law is exactly to the contrary.

In Mortgage Foreclosure cases presenting a plan of reorganization, the First Mortgagee asserts the coverage of his mortgage upon all property and must prove it. That is an accepted practice. There is nothing whatever in Section 77 to indicate that any other rule applies in 77 proceedings.

Therefore, after the last hearing, and after analyzing the situation, we wrote a letter to Mr. Swaine, dated December 4th, 1936, and sent copies to the Examiner and to the parties. I think it might be appropriate if that letter were either marked in evidence or copied into the record. I have a copy of it here with me.

Examiner Wilkinson: Do you have sufficient copies [2329] for the parties?

Mr. McCollom: They have already gone to the parties. I have two extra copies with me.

Examiner Wilkinson: This letter of December 4, 1936, will be received as Exhibit No. 107.

(Exhibit No. 107, by Counsel, was received in evidence.)

Mr. McCollom: Although the burden is upon the first mortgage, we think that the Commission and the First Mortgage Bondholders are entitled to an indication, so far as we can presently give it, of the classes of property as to which it is asserted either that the property is not subject to the first mortgage or that it is subject to that mortgage, only to the limit of extent that first mortgage monies were expended upon the property.

This we have tried to do by the letter of December 4th, which has just been offered.

Since the last hearing my partner, Mr. Judd, has spent practically all of his time, and I have spent a great amount of my time, in investigating the facts, but it will be understood, I am sure, that in the limited time which we have had, it has not been possible to study all of this property and the facts surrounding all of this property, and to be certain [2330] that there may not be items not mentioned in our letter which are free from the first mortgage.

Of course, the question of whether a mortgage covers property is very largely a question of fact, and also a question of very detailed fact in many cases.

The classes of property which are mentioned in our letter are all of them classes of property which have been held to be free from First or underlying mortgages.

We have some evidence to introduce today which we believe may aid the Commission, but in intro-

ducing this evidence it should be understood that we are not departing to any extent whatever from our position that it is not our burden to disprove the case of the first mortgage bondholders.

Inasmuch as my partner, Mr. Judd, is more familiar with the details of the evidence than I, I think it would save time if Mr. Judd were to introduce the evidence which we have to offer.

Examiner Wilkinson: Your appearance is entered, Mr. Judd?

Mr. Judd: Yes, sir, at the last hearing.

Mr. Curry, will you take the stand? [2331]

M. J. CURRY

testified further as follows:

Direct Examination

Q. (By Mr. Judd) Mr Curry, at the time that Western Pacific Railroad Company was organized in 1916, did its certificate of incorporation include any reference to the Northern California Extension?

A. To the best of my knowledge, it did not.

Q. You have examined the certificate and you know that that is a fact? A. That is a fact.

Q. Can you tell me when the reference to the Northern California Extension was included in the certificate of incorporation approximately?

A. Approximately the year 1927, I think it was —no, pardon me. 1929, I think it was.

(Testimony of M. J. Curry.)

Q. Have you any documents from which you can refresh your recollection?

A. (Examining papers) April 8th, 1929, is correct.

Q. Can you tell me what the total amount of expenditure on account of land for transportation purposes was in connection with the Northern California Extension?

A. Have you a statement there?

Q. I have a copy of one of your statements (handing [2332] paper to witness).

A. The total charges to June 30th, 1932, in connection with the Northern California Extension under Account 2-Land for transportation purposes, amounted to $376,662.17.

Mr. Judd: Mr. Wood, just to be sure of the record, I would like to be assured by you that Exhibits Nos. 62 to 73, as they were cut down at the last hearing, still include the certificates by detailed accounts against which the first mortgage money was requisitioned?

Mr. Wood: That is my recollection, that these certificates went in in toto.

Mr. Judd: If they are physically a part of the record, I think we can assume they are before the Commission.

Mr. Wood: That is subject to correction by looking at the record, but that is what I recall.

Mr. Judd: I would like to ask, Mr. Examiner, that in the event that the portion of those exhibits

(Testimony of M. J. Curry.)

which include the description of the accounts on which expenditures were made, and as a basis for which First Mortgage money was requisitioned, may be considered by the Commission, if they are not in the parts of those exhibits which have been introduced. [2333]

Examiner Wilkinson: That will be done, if you will identify it on the record with sufficient definiteness so that we know just what it is.

(Informal discussion off the record.)

Q. (By Mr. Judd) Mr. Curry, have you produced a copy of the Equipment Trust Agreement dated March 1, 1923, covering certain equipment of the Western Pacific Railroad?

A. I have, yes sir.

Mr. Judd: I offer that in evidence. We have copies to distribute, Mr. Examiner.

The Witness: That is the 1923 one.

Examiner Wilkinson: Is there objection?

(No response.)

Examiner Wilkinson: It will be received as Exhibit No. 108.

(Exhibit No. 108, Witness Curry, was received in evidence.)

Q. (By Mr. Judd) Have you prepared also, Mr. Curry, a copy of the Equipment Trust Agreement dated March 15, 1924, covering such equipment?

A. I have such an agreement in hand.

(Testimony of M. J. Curry.)

Q. Will you read me from page 2 of that agreement the equipment which it covers and the estimated cost?

A. "(a) 5 heavy Mikado Locomotives lettered W.P. and [2334] numbered 322 to 326 both inclusive;

"(b) 5 Mallet Locomotives, lettered W.P. and numbered 206 to 210 both inclusive;

"(c) 775 steel underframe refrigerator cars, lettered P.F.E. and numbered 52001 to 52775, both inclusive;

"(d) 100 logging cars lettered W.P. and numbered 2701 to 2800 both inclusive;

"(e) 200 steel underframe automobile cars lettered W.P. and numbered 14101 to 14300 both inclusive;

"(f) 1 Jordan spreader, equipped with composite ditching and spreading wings, lettered W.P. and numbered 9.

"Together with such additional railroad equipment as shall be required for said trust and subjected to this lease as hereinafter provided.

"The estimated cost of the railroad equipment above specifically described, when completed, has been certified to the trustee to be approximately $3,881,250."

Q. What is the amount of the Equipment Trust Certificates issued under this agreement?

(Testimony of M. J. Curry.)

A. Total issue 5½ per cent Equipment Trust Certificates Series C, $3,105,000. [2335]

Q. Can you find on pages 4 and 5, I believe it is, the number and amount of installments payable on those certificates?

A. "The principal of the Trust Certificates when and as the same shall become payable, whether by declaration or upon the respective dates of maturity thereof, towit:

"December 1, 1924—$207,000."

Q. How many installments of $207,000 are listed?

A. 15 installments of $207,000, maturing December 1st, each year, from December 1, 1924 to December 1, 1938 inclusive.

Q. Now, Mr. Curry, apart from the units described, the dates and the amounts referred to therein, can you state that this Equipment Trust Agreement is substantially similar to the agreement already marked in evidence as Exhibit No. 108?

A. I think I can safely make that statement, yes.

Examiner Wilkinson: Are you offering this Equipment Trust of 1924?

Mr. Judd: I have offered the 1923 Equipment Trust, and I have attempted to show that the Equipment Trust of 1924 is substantially the same in terms, although it covers additional equipment. I do not see that there is any necessity for putting those terms into [2336] the record a second time.

(Testimony of M. J. Curry.)

Q. (By Mr. Judd) Have you produced, Mr. Curry, a third Equipment Trust Agreement covering Series D Certificates and dated May 1, 1929?

A. I have such an agreement in hand, yes, sir.

Q. Can you read to me from page 2 of that agreement the items of equipment which it covers?

A. The listing is as follows:

(a) 5 Heavy Mikado locomotives, lettered W. P. and numbered 332 to 336 both inclusive;

(b) 50 Steel Tank Cars lettered W. P. and numbered 1,201 to 1,250 both inclusive.

(c) 50 50 foot flat cars, lettered W. P. and numbered 2,301 to 2,350, both inclusive;

(d) 150 automobile cars with steel ends, lettered W. P. and numbered 12001 to 12150 both inclusive;

(e) 100 automobile cars with end doors one end and steel end other, and lettered W. P. and numbered 13001 to 13100, both inclusive.

Together with such additional railroad equipment as shall be acquired for said Trust and subjected to this lease as hereinafter provided.

The estimated cost of the above railroad equipment described, when completed, has been certified to [2337] the trustee to be approximattely $1,369,827.30.

Q. What was the total amount of the certificates of Series D issued under that equipment trust agreement?

A. The 5 Per Cent Agreement Trust Certificates Series D, total issue, $1,095,000.

(Testimony of M. J. Curry.)

Q. Can you tell me the number and the amount of the installments payable on those equipment trust certificates, and when they were payable?

A. The principal of the trust certificates, when and as the same shall become payable, whether by declaration or upon the respective dates of maturity thereof, towit, beginning November 1, 1929 to and including November 1, 1943, $73,000 per annum.

Is that sufficient?

Q. That is sufficient. Except with respect to the units covered, the dates and the amounts which you have already referred to is this agreement substantially the same in form as the equipment trust agreement which has been marked Exhibit No. 108, and the equipment trust agreement dated March 15th, 1924? A. I believe it is, yes, sir.

Q. Who is the trustee under these equipment trust agreements at the present time?

A. The Chase National Bank of the City of New York, as successor to the Equitable Trust Company of New [2338] York.

Q. Under all three? A. Under all three.

Q. Will you produce, Mr. Curry, a lease from the Baldwin Locomotive Works to the Western Pacific Railroad Company, dated June 5th, 1931?

A. I have such a lease of locomotives, dated June 5, 1931, by the Baldwin Locomotive Works to the Western Pacific Railroad Company.

Mr. Judd: I offer that in evidence.

(Testimony of M. J. Curry.)

Examiner Wilkinson: Is there any objection?

(No response.)

Examiner Wilkinson: It will be received as Exhibit No. 109.

(Exhibit No. 109, Witness Curry, was received in evidence.)

Q. (By Mr. Judd) This lease refers, Mr. Curry, to payments to be made semi-annually, dating from the average weighted delivery date of all six locomotives hereunder, reading from Page 2. Is there a letter which fixes that average weighted delivery date?

A. Yes, there is such a letter, dated July 31, 1931.

(Producing document.)

Mr. Judd: I offer that letter in evidence.

Examiner Wilkinson: Any objection? [2339]

(No response.)

Examiner Wilkinson: It will be received as Exhibit No. 110.

(Exhibit No. 110, Witness Curry, was received in evidence.)

Mr. Judd: Are you familiar, Mr. Curry, in general, with the provisions of Article V, of Section 16, of the General Mortgage, General and Refunding Mortgage, requiring the Western Pacific Railroad Company for furnish annually to the Trustee under that mortgage a list of the equipment covered by it?

The Witness: I am familiar with such provision in the mortgage.

(Testimony of M. J. Curry.)

Q. (By Mr. Judd) Have you produced a list furnished to the Trustee of the General and Refunding Mortgage, under date of February 12th, 1936?

A. We have such a document here.

(Producing document.)

Mr. Judd: I offer that in evidence.

The Witness: It is a photostatic copy.

Examiner Wilkinson: Is there any objection?

(No response.)

Examiner Wilkinson: The document just referred to and consisting of 6 sheets, will be received as Exhibit No. 111. [2340]

(Exhibit No. 111, Witness Curry, was received in evidence.)

Q. (By Mr. Judd) The numbers describing the equipment listed on this statement, Mr. Curry, correspond do they not, to the numbers opposite specific types of equipment, on Exhibit No. 15, already in evidence? A. They do, yes, sir.

Q. The numbers listed in the statement as descriptive of equipment covered under the Equipment Trust Agreements would include reference to any equipment which has been renumbered or any equipment placed under those agreements pursuant to the requirements to replace worn out or destroyed equipment? A. Yes.

Q. Are you familiar in a general way with the manner of making the initial payment on account of this equipment, and the payments of installments coming due subsequently? A. I am, yes, sir.

(Testimony of M. J. Curry.)

Q. Can you tell me whether those payments were made out of proceeds of First Mortgage bonds or out of free funds of the company?

A. I cannot—you mean the 20 per cent payment?

Q. The 20 per cent payment and later payments.

A. My recollection is that that payment was made out [2341] of free funds.

Q. You do not know of any payments which were made out of First Mortgage Bonds on account of these items of equipment? A. I do not.

Mr. Groom: When you say "items of equipment", you mean just those under the equipment trust?

Mr. Judd: Yes, sir.

Mr. Swaine: You are not referring to this list, which is all the equipment the company owns?

Mr. Judd: No, I am referring to the three equipment trusts and the Baldwin Locomotive Lease, the only ones under which there was any initial payment.

Mr. Swaine: You appreciate that the statement introduced was a list of all the equipment the company owns. The First Mortgage Bondholders do not question that all that equipment is subject to the General and Refunding Mortgage, but subject also to the first mortgage.

Mr. McCollom: All of what equipment?

Mr. Swaine: All of the equipment embraced in this list, which is all the equipment which the company owns. This list which was introduced is not confined to the equipment trust agreement.

(Testimony of M. J. Curry.)

Mr. Judd: It includes all the equipment under the [2342] equipment trust agreement.

Mr. Swaine: It includes all the equipment which the company owns.

Mr. McCollom: Mr. Swaine, have you any question that the equipment under the three equipment trusts and the Baldwin Locomotive Lease is free from the first mortgage?

Mr. Swaine: I have a distinct question, and I will ask Mr. Curry, when you get through with him a question which will establish that it is under the first mortgage.

Q. (By Mr. Judd) Have you produced a copy of the listing application submitted to the New York Stock Exchange in connection with the listing of the last series of bonds issued under the first mortgage at $645,000, authorized by the Interstate Commerce Commission on October 17th, 1931?

A. I have produced such listing application.

Mr. Judd: I offer that listing application in evidence. I am sorry I have not copies of that at the present time, but I will say that one of the purposes for which it is introduced is to show the statement on page 4 thereof in the description of property, on which the mortgage constitutes a first lien, that:

> "The foregoing equipment does not include [2343] additional unmortgaged equipment covered by Equipment Trust Agreements, Series 'B' and Series 'C' and Series 'D', as follows:"

(Testimony of M. J. Curry.)

Do you want to look at it before it goes in?

Mr. Swaine: No.

Examiner Wilkinson: Any objections?

Mr. Swaine: None at all.

Examiner Wilkinson: It will be received as Exhibit No. 112.

(Exhibit No. 112, Witness Curry, was received in evidence.)

Examiner Wilkinson: You will furnish the necessary copies?

Mr. Judd: I will do that as promptly as possible.

Q. (By Mr. Judd) Can you tell me, Mr. Curry, what the mileage operated by the Western Pacific Railroad Company was on or about June 14th, 1916?

A. The first annual report for the calendar ended December 31, 1916 shows the railroad company's operations from July 14th, the date of the reorganization, to December 31st, average mileage operated as 942.98.

Q. Are you familiar in a general way, Mr. Curry, with the branches and extensions described in the General and Refunding Mortgage of the Company dated January 1, 1932? [2344]

A. In a general way, yes, sir.

Q. Have any of those branches of extensions been abandoned since the execution of that mortgage? A. Not to my knowledge.

Q. Mr. Curry, in the balance sheet of the Railroad Company as of December 31, 1935, there is an

(Testimony of M. J. Curry.)

item of Miscellaneous Physical Property listed of $3,856,127.99. Is that the same item which appears in somewhat greater detail in Item 212 of the Company's Annual Report to the Interstate Commerce Commission for December 31, 1935?

A. It is, yes, sir.

Q. Does that embrace substantially the same property which is listed in considerably greater detail in the same item of the company's annual report to the Interstate Commerce Commission for December 31, 1934? A. It is, yes, sir.

Q. That is for the years ended December 31, 1935 and December 31, 1934? A. That is right.

Mr. Judd: I offer in evidence copies of items 212, as it appears in the 1935 and 1934 reports to the Interstate Commerce Commission listing miscellaneous Physical Property.

Mr. Groom: May we see it? [2345]

Examiner Wilkinson: Any objection?

Mr. Swaine: May we see it first?

(Discussion off the record.)

Mr. Swaine: We have no objection to this document.

Examiner Wilkinson: Schedule No. 212, Miscellaneous Physical Property for the year ending December 31, 1934 of the Western Pacific Railroad Company, as shown on four sheets, will be received as Exhibit No. 113.

(Exhibit No. 113, Witness Curry, was received in evidence.)

(Testimony of M. J. Curry.)

Examiner Wilkinson: Schedule No. 212, Miscellaneous Physical Property for the year ending December 31, 1935 of the Western Pacific Railroad will be received as exhibit No. 114.

(Exhibit No. 114, Witness Curry, was received in evidence.)

Examiner Wilkinson: Will you furnish copies of the last statement, Mr. Judd?

Mr. Judd: Yes, sir, I will furnish copies.

Examiner Wilkinson: At the same time please furnish an extra copy of No. 113.

Mr. Judd: Here is an extra copy.

(Producing document.)

Examiner Wilkinson: Thank you.

Q. (By Mr. Judd) Have you produced, Mr. Curry, a copy [2346] of the Reorganization Plan of the Western Pacific Railway Company, dated June 15th, 1915, at the time of the first reorganization of the property? A. I have.

Q. Will you read me from page 8 of that plan the statement which it makes with reference to the First Mortgage Gold Bonds proposed to be issued, pursuant thereto?

Mr. Swaine: I would like to object to that, because the fact that it may have been proposed in some other proceeding to create a different kind of mortgage than was created has no bearing upon the meaning of the document which was ultimately created. The mortgage speaks for itself irrespective of any prior claim about it.

(Testimony of M. J. Curry.)

Mr. Judd: If your Honor please, the first mortgage with which we are concerned in this proceeding was issued as a part of a reorganization of the Western Pacific Railway Company, which began in 1915, and was effectuated in 1916.

The Exhibit which has just been introduced in evidence listing miscellaneous physical property introduced certain items of non-carrier property, some of which we believe, although our information on it is still incomplete, was owned before the organization of the present railroad company. [2347]

We feel——

Examiner Wilkinson: Just a moment. We have been receiving a lot of evidence, and I do not think this makes much difference. So, go ahead.

Mr. Swaine: On the ground that the Commission regards it as irrelevant, I will withdraw my objection.

Mr. McCollom: It is not irrelevant, as a matter of fact, Mr. Swaine.

Mr. Swaine: We can argue that.

Examiner Wilkinson: The statement of counsel will speak for itself.

Q. (By Mr. Judd) Will you read the provisions to which I have referred?

A. Quoting from page 8 of the Western Pacific Railway Company's Plan and Agreement of Reorganization, dated December 15, 1915:

"First Mortgage Gold Bonds (New Bonds) authorized issue $50,000,000, to be secured by

(Testimony of M. J. Curry.)

first mortgage upon all existing Railway properties of the old company and all property hereafter acquired by the operating company integrally connected therewith, and all property acquired by means of the use of proceeds of the new bonds or against which new bonds will be issued."

Q. I call your attention, Mr. Curry, to items 372 and [2348] 374 in the annual report to the Interstate Commerce Commission for the year ended December 31, 1935, and ask you whether those two items include the rent received by the Railroad Company from the items of miscellaneous property listed in Exhibits Numbers 113 and 114?

A. Yes, it is my belief that they cover such items.

Q. How many pieces of property are referred to under Account No. 372?

A. In this report for the year ended December 31, 1935?

Q. Yes, sir.

A. Minor items 291 in number, each less than $5,000 per annum.

Q. How many are referred to in Account No. 374?

A. Minor items 106 in number, each less than $25,000.

Mr. Judd: I offer in evidence copies of those two items in the annual report to the Interstate Commerce Commission, dated December 31, 1935.

(Testimony of M. J. Curry.)

Examiner Wilkinson: Any objection.

(No response.)

The document relating to the income for lease of road for the year ended December 31, 1935 will be received as Exhibit No. 115.

(Exhibit No. 115, Witness Curry, was received in evidence.) [2349]

Examiner Wilkinson: The tabulation headed "Miscellaneous Non-Operating Property", will be received as Exhibit No. 116.

(Exhibit No. 116, Witness Curry, was received in evidence.)

Q. (By Mr. Judd) Can you tell me, Mr. Curry, the amount of cash of the Railroad Company on August 2, 1935, when the petition instituting this proceeding was approved?

A. As of July 31, 1935 the cash balance in all banks was $848,452.30.

Q. That is as of the close of business on July 31st?

A. Yes, sir. That is as of the close of business on July 31st, 1935.

Q. Have you any information as to a date nearer August 2nd, than July 31st?

A. Not with us.

Mr. Judd: I might say that we have tried to get that from San Francisco, but have not yet had a reply, Mr. Examiner.

Q. (By Mr. Judd) Can you tell me the amount of cash of the Railroad Company on November

(Testimony of M. J. Curry.)

13th, 1935, the date of the qualification of the Trustees in reorganization?

A. The cash balances per bank statements at close of [2350] business November 13th, 1935 in all banks amounted to $1,529,643.36.

Q. Mr. Curry, referring back to the exhibit from the 1934 report to the Interstate Commerce Commission, I note Item, Line 111, "Property for non-carrier purposes", listed at $1,579,689.57. Have you any idea as to any of the property included in that item?

A. I have not. I did not prepare this statement. That is a question, I think, for the General Auditor to answer.

Q. Do you know whether any of it includes the Islais Creek property of the Railroad?

A. I do not from this statement here.

Q. Can you state from reference to a telegram which I hand you, which we have received from San Francisco Counsel, whether any portion of it represents the Islais Creek property of the Railroad?

(Handing telegram to witness.)

A. This telegram I assume is in answer to an inquiry made by you upon your representatives in the west, who went to our offices and secured the information.

Q. Yes, sir.

A. And I assume it is correct. It is stated in here that "Miscellaneous Property, Transfer of all

(Testimony of M. J. Curry.)

Property acquired prior to July 14th, 1916, major item being [2351] Islais Creek Property San Francisco."

Q. Can you tell me in a general way what this Islais Creek Property consists of?

A. This is a vast tract of land on San Francisco Bay, which was under water mostly, and it was thought it would make a great industrial center, and subject to considerable development, and subsequently action was taken bringing about the use of this district in that way.

Mr. Judd: That is all that we have of Mr. Curry, Mr. Examiner.

Cross Examination

Q. (By Mr. Swaine) Mr. Curry, was the equipment which was embraced in the list delivered to the Trustee under the General and Refunding Mortgage, including the equipment covered by the three equipment trusts and by the Baldwin Lease, acquired by the Western Pacific for use in the operation of any lines of railroad, extensions or branches subject to the lien of the first mortgage?

Mr. Coulson: I object to the form of the question, asking for the conclusion of the witness and not for factual testimony.

Mr. Swaine: I asked if it was acquired for use in connection with that. [2352]

Mr. Coulson: If it is to be answered, it seems to me it should be in answer to a question as to what

(Testimony of M. J. Curry.)

lines it is used on, whether the main line or Northern California?

Mr. Swaine: We will try to make the question satisfactory to Mr. Coulson.

Q. (By Mr. Swaine) Was it acquired in connection for use in the operation of any of the lines of railroad which are described in the granting clauses of the First Mortgage of the Western Pacific Railroad Company, dated June 26th, 1916?

A. It was acquired for use on all lines, main line and branches.

Q. Including the lines specifically described in that agreement?

A. Including the lines specifically described in that agreement.

Q. That applies equally to the equipment embraced in the Equipment Trust Agreements, does it not? A. It does.

Q. And the Baldwin Lease?

A. To my knowledge, it does.

Q. Has it in fact been so used?

A. It has.

Q. Now with reference to this free cash and the other [2353] so-called free assets in 1934, Mr. Curry, did not the Western Pacific seek from the First Mortgage Bondholders an extension of interest? A. It did.

Q. Interest for what period?

A. Interest due March 1, 1934 and September 1, 1934 on the first mortgage 5 per cent bonds to

(Testimony of M. J. Curry.)

January 1, 1937, the extension of those interest payments.

Q. Do you know approximately what proportion of the First Mortgage Bonds was extended as to interest?

A. It is my recollection that approximately $43,000,000 principal amount of bonds, or 87 per cent of the outstanding bonds assented to the plan of deferment.

Q. In that connection, did the Western Pacific Railroad Company enter into certain agreements with the Reconstruction Finance Corporation, Railroad Credit Corporation, the A. C. James Company and the Western Pacific Corporation with regard to the lien of the extended interest of the First Mortgage Bonds? A. It did.

Mr. Judd: I object to the reference to an unidentified agreement which has not been received.

Mr. Swaine: I will proceed to identify them now.

Q. (By Mr. Swaine) I show you a photostatic copy of a letter on the letterhead of the Reconstruction [2354] Finance Corporation, dated June 23, 1934, and signed by Jesse H. Jones, Chairman, being addressed to the Western Pacific Railroad Company. Mr. Clay will remember it. I will ask you whether that is a photostatic copy of an agreement entered into between the Debtor and the Reconstruction Finance Corporation?

(Handing paper to witness.)

(Testimony of M. J. Curry.)

A. It is, yes, sir.

Mr. Swaine: I offer that in evidence as the next Exhibit number.

Mr. Judd: We want our objection noted, Mr. Examiner. We would like to have a chance to look at it before specifying all the grounds of objections.

Mr. Swaine: Next to that photostat—I thought they were separate—and constituting the third and fourth pages is a document on the letterhead of A. C. James Company, dated July 2, 1934, and signed by A. C. James Co., by E. Hayward Ferry, Vice President. Is that one of the agreements which was taken in connection with the extension of the First Mortgage Bond interest?

(Handing paper to witness.)

A. It is.

Q. Following that, constituting pages 5 and 6, is a document on the letterhead of the Railroad Credit [2355] Corporation, dated July 3, 1934, addressed to Western Pacific Railroad Company and signed by The Railroad Credit Corporation, by E. R. Woodson, Vice President.

Is that also an agreement which was made in connection with the extension of the First Mortgage Bond interest? A. It is.

Mr. Swaine: Now, I offer the document in its entirety.

Examiner Wilkinson: Is there any objection?

Mr. Coulson: I object on the ground that the document is incomplete, unless Mr. Swaine also

(Testimony of M. J. Curry.)

puts into the record the extensive agreement with the First Mortgage Bondholders Committee, so-called.

Mr. Clay: And the supplements to that agreement.

Examiner Wilkinson: Are you in a position to do that, Mr. Swaine?

Mr. Swaine: Yes, sir.

Examiner Wilkinson: Will you do that?

Mr. Swaine: Yes, sir.

Examiner Wilkinson: The document consisting of 6 sheets will be received as Exhibit No. 117.

(Exhibit No. 117, by Counsel, was received in evidence.) [2356]

Mr. Swaine: I show you a photostat of a printed document under date of May 9th, 1934, on the letterhead of the Western Pacific Railroad Company, addressed to the Holders of the Western Pacific Railroad Company First Mortgage 5 per cent Bonds, who have already executed agreements of extension dated as of March 1st, 1934 and ask you whether that is the document constituting the extension of the First Mortgage Bond interest, or is the extension agreement?

(Handing paper to witness.)

A. It is.

Mr. Coulson: May I ask a question about that? I have not seen it. I understood Mr. Swaine in presenting it said it referred to parties who had already executed an agreement of extension.

(Testimony of M. J. Curry.)

The Witness: That is the way it read.

Mr. Swaine: Off the record.

(Discussion off the record.)

Mr. Coulson: Are you going to introduce the Western Pacific Corporation Agreement to which you referred?

Mr. Swaine: Yes, sir, that is, I hope I am. I am going to offer it.

Examiner Wilkinson: The copy of the letter of May 29th, 1934, to the Western Pacific Bondholders [2357] will be received as Exhibit No. 118.

(Exhibit No. 118, by Counsel, was received in evidence.)

Mr. Clay: May I ask a question off the record?

(Discussion off the record.)

Q. (By Mr. Swaine) I show you a letter on the Western Pacific Railroad Corporation's letterhead under date of July 5th, 1934, addressed to the Western Pacific Railroad Company, signed the Western Pacific Railroad Corporation, by T. M. Schumacher, President, and ask you whether that is another one of the agreements taken in connection with the extension of first mortgage bondholders' interest?

(Handing paper to witness.)

A. It is.

Mr. Swaine: I offer that.

Examiner Wilkinson: Is there objection?

(No response.)

(Testimony of M. J. Curry.)

Examiner Wilkinson: This will be received as Exhibit No. 119.

(Exhibit No. 119, by Counsel, was received in evidence.)

Q. (By Mr. Swaine) I show you an agreement dated November 30th, 1934, between the Western Pacific Railroad Corporation and Frederick H. Ecker, John W. [2358] Stedman and Reeve Schley, as a Committee representing the First Mortgage Bondholders, and ask you whether that was an agreement entered into in connection with the extension of the first mortgage bond interest?

(Handing paper to witness.)

A. Yes, it is.

Mr. Swaine: I offer that as the next Exhibit.

Mr. McCollom: Mr. Examiner, with respect to these documents which are now going in, we have never seen them before, and it is absolutely impossible to read them and see whether we think there would be a proper objection.

We do not want to object unless we know there is some good ground of objection, but I think the right ought to be reserved to move to strike them out, whether in the brief or elsewhere.

Mr. Swaine: I may say that these are all agreements, a series of agreements, signed by all the holders of the bonds which Mr. McCollom represents. The First Mortgage Bondholders agreed to this extension, conditioned upon certain agreements by the R. F. C., the R. C. C., the A. C. James Com-

(Testimony of M. J. Curry.)

pany and the Western Pacific, and I am now introducing the agreements which were made by those companies who constitute all the holders represented by the bonds represented by Mr. [2359] McCollom.

Those parties are all represented here, and they participated with me in the actual drafting of the documents and know all about them.

Examiner Wilkinson: I hear no objection and the document will be received as Exhibit No. 120.

(Exhibit No. 120, by Counsel, was received in evidence.)

Mr. Clay: Off the record again.

(Discussion off the record.)

Q. (By Mr. Swaine) Mr. Curry, I show you a printed document on the letterhead of the Western Pacific Railroad Company dated July 25th, 1934, addressed "To all Holders of Western Pacific Railroad Company's First Mortgage 5 Per Cent Bonds (Whether or not they have previously executed any agreements of extension of interest)," signed the Western Pacific Railroad Company, C. M. Schumacher, Chairman of the Executive Committee and Charles Elsey, President, to which is annexed a copy of a letter dated July 23, 1934, from Jesse H. Jones, Chairman of the Reconstruction Finance Corporation, to the Western Pacific Railroad Company, on the letterhead of the Reconstruction Finance Corporation, and ask you whether that letter

(Testimony of M. J. Curry.)

was sent to the First Mortgage Bondholders in connec- [2360] tion with the extension to which we have been referring?

(Handing paper to witness.)

A. It was.

Mr. Swaine: I offer that in evidence and will furnish additional photostatic copies to such parties as do not have them. I think every party who has appeared here has got printed copies of those. Those are printed documents which were a part of the negotiations with these very parties.

Examiner Wilkinson: Is there any objection?

Mr. McCollom: We have not seen it, Mr. Examiner. I have no idea.

Mr. Swaine: Let him look at it then.

In order that we can get the whole story and it will tie in—any objection they might have will go to the next one—the last paragraph of that says:

> "There is enclosed herewith a form of Modified Extension Agreement (which includes a consent to such extension of time to September 30th, 1934), which The Railroad Company requests you to execute and return to The Chase National Bank of the City of New York, as Agent for the Railroad Company, whether or not you [2361] have executed any previous form of interest extension agreement."

Q. (By Mr. Swaine) I show you another document entitled "Modified Extension Agreement",

(Testimony of M. J. Curry.)

dated as of July 25th, 1934, and ask you whether that is the Modified Extension Agreement referred to in the second paragraph?

(Handing papers to witness.)

A. It is.

Mr. Swaine: I offer that in evidence.

Examiner Wilkinson: Is there any objection?

Mr. Coulson: Just a moment. May I look at them?

Mr. Swaine: I wanted to tie it up.

Q. (By Mr. Swaine) When you stated that 87 per cent of the bonds——

Examiner Wilkinson: Just a minute. Put that off a moment. You have offered them and I have asked if *there any* objections. Are there any objections?

Mr. Coulson: I object only on the ground that the record is still apparently incomplete, unless we have the agreements of extension of March 1, 1934, as to which Exhibit No. 119 is on its face a supplement. I understand there are still references to the agreement of March 1, 1934, and I think this series is incomplete without it. [2362]

Mr. Swaine: I am quite willing to complete it. These all supersede the earlier ones, and if there is any value in having them, we can get them.

Examiner Wilkinson: Then the document dated July 25th, 1934, consisting of three sheets will be received as Exhibit No. 121, and the Modified Ex-

(Testimony of M. J. Curry.)

tension Agreement dated July 25th, 1934, consisting of two sheets will be received as Exhibit No. 122.

(Exhibits Numbers 121, and 122, by Counsel, were received in evidence.)

Q. (By Mr. Swaine) When you said a little while ago, Mr. Curry, that 87 per cent of the bonds had extended their interest, you meant that 87 per cent of the bonds had signed these Modified Extension Agreements in the form which we have just introduced in evidence?

A. Yes, sir, I did.

Mr. Clay: In the form of Exhibit No. 122?

The Witness: Yes, sir, the July 25th, agreement.

Mr. Swaine: Mr. Examiner, we do not think it is any real part of the case, and it is only encumbering the record, but we have here the copies of the March 1st, agreement which was superseded by all the other agreements which have been introduced. If anybody wants the March 1st agreement for the purpose of completing the record, we have copies here and they [2363] are free to introduce them.

Examiner Wilkinson: I understand that Colonel Coulson asked that it be put in, and you agreed to put it in.

Mr. Swaine: I am quite willing to put it in.

Mr. Coulson: There are references to that agreement in a number of exhibits introduced, which show the situation in the other agreements of superseded clauses, and I am not sure there is a complete supersedence.

(Testimony of M. J. Curry.)

Q. (By Mr. Swaine) Mr. Curry, are these four sheets the letters sent by the Western Pacific Railroad Company to holders of First Mortgage Bonds, coupon and registered, and the forms of Extension Agreement sent therewith on or about February 26th, 1934?

(Handing papers to witness.)

A. Yes, sir, they are.

Mr. Swaine: I offer those four sheets in evidence to be given one number.

Examiner Wilkinson: The document consisting of four sheets will be received as Exhibit No. 123.

(Exhibit No. 123, by Counsel, was received in evidence.)

Q. (By Mr. Swaine) Mr. Curry, I do not know whether you know the answer to this or not: Was the branch [2364] from Glendale to Bradford Winery in Sacramento County, California, 1.6 miles in length, in existence in 1916?

A. I cannot answer that.

Mr. Clay: Mr. Examiner, may I ask a question at this point?

Examiner Wilkinson: Certainly.

Mr. Clay: Will you rule on these petitions of intervention at this hearing or will they be taken up later?

Examiner Wilkinson: Just as soon as convenient; we will pass on them, just as soon as we finish this.

Mr. Clay: The reason I asked the question is that I have had no advance notice of the presenta-

(Testimony of M. J. Curry.)

tion of these petitions and it may be that I would like to consult the R. F. C. as to what position they would want to take.

Examiner Wilkinson: Off the record.

(Discussion off the record.)

Mr. Swaine: I have no further questions of Mr. Curry.

Examiner Wilkinson: Is there any further questioning of Mr. Curry?

(No response.)

Examiner Wilkinson: You are excused, Mr. Curry.

(Witness excused.) [2365]

Examiner Wilkinson: We will take a five minute recess.

(Thereupon a short recess was taken.)

Examiner Wilkinson: Are you ready to proceed, Mr. Wood?

Mr. Wood: Yes, Mr. Examiner. I will ask Mr. Buckley to take the stand.

Examiner Wilkinson: Mr. Buckley has previously been sworn in this proceeding.

C. E. BUCKLEY

testified further as follows:

Direct Examination

Q. (By Mr. Wood) Mr. Buckley, do the files of the individual trustee under the First Mortgage, kept in the Chase National Bank, contain the cash requisitions under the first mortgage, showing the amounts of cash withdrawn representing first mortgage money in respect of various items of property from the beginning of the mortgage down to the last taking down? A. They do.

Q. You are familiar with those original files?

A. I am.

Q. Can you state from your knowledge of those files what requisitions were made with respect to the construction of the Niles-San Jose Branch, giving the [2366] dates of the requisitions and their numbers, the amounts of cash withdrawn, the expenditures made, and the purposes for which the expenditures were made?

A. There were several requisitions aggregating expenditures of $2,521,229.01 for the construction of the branch line connecting with the main line at Niles, Alameda County, California, and extending to San Jose, Santa Clara County, California.

These requisitions were as follows: —And I will give the requisition number, the date and the amount.

Q. By "amount" you mean the amount of cash withdrawn on the requisition?

A. That is correct.

(Testimony of C. E. Buckley.)

Req. No.	Date	Amount
67	December 18, 1920	$166,860.85
78	December 18, 1920	9,336.22
81	December 22, 1920	125,000.00
83	February 2, 1921	100,093.84
109	June 3, 1921	252,656.59
114	June 3, 1921	19,303.69
119	July 1, 1921	116,020.60
121	July 19, 1921	109,151.39
122	Aug. 9, 1921	359,936.08
123	Sept. 16, 1921	263,712.87

[2367]

125	October 14, 1921	$128,849.65
126	November 9, 1921	160,501.15
127	December 7, 1921	124,403.47
128	December 29, 1921	90,584.19
130½	June 6, 1922	60,747.81
139	March 2, 1922	69,585.88

Mr. McCollom: We have 99 cents.

The Witness: Pardon me?

Mr. McCollom: Is it 99 or 88?

The Witness: 88.

Req. No.	Date	Amount
141	April 3, 1922	$ 57,934.34
143	January 8, 1923	132,028.62
156	July 24, 1923	6,667.89

(Testimony of C. E. Buckley.)

175	May 4, 1925	1,653.33
190	February 12, 1926	128,522.05
212	June 22, 1927	25,955.19

Mr. Wood: I may state at this point, Mr. Examiner, that there are some additional items of expenditure connected with the Niles-San Jose Branch which are not in that list to which Mr. Buckley is now testifying, but which will appear later under a general heading of spurs and tracks and so forth.

Mr. Coulson: May I, for the sake of continuity of [2368] the record, suggest to Mr. Wood that he have his witness show in connection with these branches as to cash requisitions, the amount of money that was requisitioned for right of way and the total cost of the right of way in each case?

Mr. Wood: We can get that from the requisitions, but it will add tremendously to the length of this examination. If Mr. Coulson wishes to ask the question on cross-examination, I think he is entitled to bring it out.

Mr. Coulson: I am in doubt as to the probative force of this testimony, unless it is in some way connected with the total cost of the extension and the cost of land, as distinguished from structures. I do not want to offer any objection to any of this testimony which deals with this conflict of liens question, except on two grounds:

(Testimony of C. E. Buckley.)

One, that is too voluminous, and the other that it is not clear.

I am doubtful whether Mr. Buckley's testimony will be probative unless it is made complete.

Mr. Swaine: If the Examiners please, the First Mortgage permits property to be acquired free of the lien only on certain conditions, one of which is that no proceeds of the First Mortgage Bonds will be used [2369] in connection therewith.

Mr. McCollom: We do not read the mortgage that way.

Mr. Swaine: That is a matter for our briefs.

Mr. McCollom: Yes, sir.

Mr. Swaine: The purpose of this testimony is to show that proceeds from First Mortgage bonds were used in connection with these various properties, and that is all we want to prove. We will brief the legal question later on.

Examiner Wilkinson: Suppose you proceed, Mr. Wood.

Q. (By Mr. Wood) Mr. Buckley, with respect to the Terminous Branch, what do the Cash Requisitions show as to the cash taken down for that branch?

A. An expenditure aggregating $586,215.59 for construction of branch line connecting with the main line at a point east of Kingdon, San Joaquin County, California, and extending to the east bank of Little Potato Slough, San Joaquin County, California, consisting of 7.82 miles of main track and

(Testimony of C. E. Buckley.)

3.03 miles of spurs, sidings, etcetera, constituting the Terminous Branch.

The requisitions are as follows:

Req.No.	Date	Amount
224	April 26, 1929	$561,014.05
234	Sept. 24, 1930	10,546.15

Q. Now, will you please give the same information [2370] regarding the so-called Bidwell Spur?

A. The requisitions were as follows:

Req.No.	Date	Amount
79—		

Mr. Judd: I do not think that the requisitions which you gave on the Terminous Branch add up to the totals which you gave, unless I missed one. I got just two.

Mr. Wood: Mr. Judd, I think the discrepancy, or the so-called discrepancy, is explained this way:

The total figure is the amount of the expenditure. The amounts which Mr. Buckley gave in the individual requisitions represent the amount of cash withdrawn. Where the cash represents the proceeds of sale of bonds—and I may say that these cash requisitions in some cases represent proceeds of bonds and in some cases release money—but where they represent proceeds of bonds and bonds were sold at a discount, the Railroad Company was required to certify expenditures equal to the principal amount of the bonds represented by the cash withdrawal.

(Testimony of C. E. Buckley.)

In other words, if the bonds were sold at 97, expenditures of $100,000 would have to be certified to withdraw $97,000 of cash. So that that may account for the discrepancy which seems to appear here. [2371]

Mr. Judd: If it could be stated that it does account for it, it would be satisfactory.

Mr. Wood: These are the figures which show in the requisition as to the expenditures and as to the amounts of cash. That is the only thing which we are putting in, the actual figures which show there. I am giving the explanation to show that it is not necessarily true that the totals represent the same, because in a great many cases the bonds were sold at a discount.

Mr. Judd: Is the discrepancy in each case entirely accounted for by that discount?

Mr. Wood: I think that is true.

Mr. Judd: I think that should be stated so that we can tell whether it is accounted for by that, or in which instance it represents expenditures not made the subject of requisitions.

Mr. Wood: All we can do is to say that this is what the certificate certified were the expenditures and what the amount of cash withdrawn was. I think the facts will have to speak for themselves.

To check back and see what the discounts show, I think would be out of all proportion to the value of the facts which would be brought out.

Mr. McCollom: Off the record just a minute. [2372]

(Testimony of C. E. Buckley.)

(Informal discussion off the record.)

Mr. McCollom: Where do you get the total which you give in the beginning of the item?

Mr. Wood: It is the total expenditures on those requisitions. Off the record.

(Discussion off the record.)

Mr. McCollom: I do not understand it yet, and I would like to ask Mr. Buckley one or two questions.

Q. (By Mr. McCollom) In stating the totals at the beginning of each amount upon the particular branches, what are those totals? What are they the totals of?

A. They represent the expenditures stated in the Officer's Certificates of expenditures made.

Q. Then when you state individual items, are those statements of individual items of expenditure, or are they statements of cash drawn down?

A. Those items are the amounts of cash drawn down in connection with that particular branch as embraced in the requisition number so and so.

A. And that explains, does it not, why the total of your individual amounts does not always add up to the original of the complete total which you gave at the beginning of your statement with reference to each item? A. That is correct. [2373]

Q. (By Mr. Wood) I believe you had finished with the Terminous Branch and had started on the Bidwell Spur?

(Testimony of C. E. Buckley.)

A. The following requisitions:

Req.No.	Date	Amount
79	Dec. 18, 1920	$ 1,752.76

Q. What was the amount of cash withdrawn there? A. Cash withdrawn, $1,752.76.

Q. I think it might be clearer if in each case you will state the cash withdrawn or expenditures, as the case may be. A. Yes, sir.

Req.No.	Date	Amount
152	Jan. 27, 1923—	

Q. Pardon me, Mr. Buckley, what was the purpose of the expenditure on No. 79?

A. That was Betterments to the main line, consisting of a spur track extending from Bidwell Bar, California.

Req.No.	Date	Amount
152	Jan. 27—	

Mr. Judd: Is that a statement from somebody's requisition or your statement?

The Witness: That is a statement found in the requisition papers.

Mr. Judd: All right. [2374]

Mr. McCollom: Off the record a minute.

(Discussion off the record.)

(Testimony of C. E. Buckley.)

The Witness:

Req.No.	Date	Cash taken down
152	Jan. 27, 1923	$179,486.87
	Total expenditures (including Req. No. 79) $181,239.63.	
164	Feb. 20, 1924	33,760.37
	Total expenditures (including Req. Nos. 79 and 152) $215,000.00.	
176	May 19, 1925	4,608.78
	Total expenditures $5,023.84 for interest during construction of Bidwell Spur.	

Q. (By Mr. Wood) In that last item, the total expenditures of 5 thousand and some odd dollars, that is merely the total on the requisition in carrying forward the previous requisitions, is that true?

A. That is correct.

Q. With respect to the Calpine Branch, will you give the same data, Mr. Buckley?

A. Yes, sir.

Req.No.	Date	Cash taken down
140	March 29, 1922	$397,876.83
	Total expenditures of $412,876.83 for construction of branch line connecting [2375] with main line at Calpine Junction, Plumas County, California, and extending to Calpine, Sierra County, California. $15,000 of cash reserved against existing liens was withdrawn against supplemental requisition dat-	

(Testimony of C. E. Buckley.)

ed December 22, 1930, against discharge of liens, making total amount of cash withdrawn $412,876.83.

Q. May I add to the explanation there with respect to that $15,000.

Under the First Mortgage, where property was certified, which was subject to prior liens, the Railroad Company was not permitted to withdraw the total amount of the expenditures but was required to reserve or set aside out of the deposited cash an amount equivalent to the principal amount of the liens. Then when the liens were discharged, they were entitled to withdraw the cash which was reserved, and that is what happened here.

Now, with respect to the Reno Branch, will you please give the same data?

A. The following requisitions:

Req. No.	Date	Cash taken down
47	Oct. 4, 1919	$1,152,132.23

Expenditure of $1,152,132.23 [2376]

Purpose: Purchase and acquisition of additional line of railroad connecting with main line at Reno Junction, California, and extending to Reno, Nevada.

111	June 3, 1921	$240,421.76

Expenditures of $240,421.76

174	May 4, 1925	$19,515.33

Total expenditures of $21,272.84 for acquisition of real property for betterment of

(Testimony of C. E. Buckley.)

main line, including expenditure of $102.35 for legal expenses and cost of recording deed in connection with land purchased for betterment of Reno Branch (Purchase price of land certified in Requisition No. 137).

Q. Mr. Buckley, in connection with that last requistion No. 174, the total amount of cash on that requisition was $19,515.33, and the total expenditures were $21,272.84. Out of that total expenditure, 102.35 represented expenditures on the Reno Branch. The balance of the expenditures represented items in part on the Reno Branch. Is that true?

A. That is right.

Q. So that you have merely given a total from the requisition and then itemized the part which relates [2377] to the Reno Branch?

A. That is right.

Mr. Wood: In connection with this Branch, there are additional items, which will appear under a different heading, which are not set up at this time. They will all be brought out later.

Q. (By Mr. Wood) Now, with respect to the Loyalton Branch, will you give the same data?

A. The following requisitions:

Req.No.	Date	Amount
35	Feb. 25, 1919	$137,672.69

Expenditures of $137,672.69

Purpose: Betterments to main line consisting of construction of industry and spur

(Testimony of C. E. Buckley.)

tracks, including cost of spur track 2.6 miles long to serve Clover Valley Lumber Company to 2.20 miles south of Loyalton, California ($5,350.08).

Q. The last item which you just mentioned of $5,000 odd, is the only item out of the total of $137,000 odd which applies to the Loyalton Branch. Is that true? A. That is true.

The other requisitions are: [2378]

Req. No.	Date	Amount
74	Dec. 18, 1920	$54.70

Expenditure of $54.70.

Purpose: Betterments to main line consisting of construction of cattle guards on Loyalton Branch.

187	Nov. 9, 1925	$33,868.43

Expenditures of $36,918.55 for betterments to main line, including track betterments between Hawley and Loyalton $87.12 (being balance of total expenditure of $59,764.36 covered in part in Requisitions Nos. 170, 177 and 181).

216	May 16, 1928	$100.00

Expenditures of $109.00 for betterments, including track betterments between Hawley and Loyalton of $730.72 (being balance of total expenditure of $60,495.08 covered in part in Requisitions Nos. 170, 177, 181 and 187).

(Testimony of C. E. Buckley.)

Mr. Judd: Only the $87.00 was spent on the Loyalton Branch?

Mr. Wood: That is not true, Mr. Judd.

The Witness: No, not in this case.

Mr. Wood: There was a total expenditure of [2379] $36,918.55, which was the balance of expenditures certified in another requisition.

Mr. Judd: Did any of that other requisition include expenditures alleged to have been on the Loyalton Branch?

Mr. Wood: Yes, they did.

The Witness: The last requisition is No. 217, date May 16, 1928, amount $37,934.54.

> Expenditures of $37,934.54 for betterments to main line, including track betterments between Hawley and Loyalton ($6,528.43, being balance of total expenditure of $67,023.51 covered in part in Requisitions Nos. 170, 177, 181, 187 and 216).

Mr. Judd: It is not at all clear to me what was spent on the Loyalton Branch.

Mr. Wood: Here we have taken in each case a requisition which included other items and have given the total amount on the requisition and the total expenditures, and we have included the individual amounts which apply to the Loyalton Branch, and some of those are carried forward from previous requisitions, which will be referred to in other parts of this testimony.

(Testimony of C. E. Buckley.)

Examiner Wilkinson: Mr. Wood, would it help, since this witness has these figures in tabular form, they [2380] could be put in in the form of an exhibit rather than through oral testimony?

Mr. Wood: Some of them have been marked up in pencil, and I do not think they are now in shape to put in in that way. I wish we could do it but I do not believe it would be practical to do it.

Examiner Wilkinson: Proceed, then.

Q. (By Mr. Wood) Mr. Buckley, I think that the next heading is called Tooele County Branches.

A. There are a number of requisitions which relate to Branch Lines in Tooele County, Utah, and they give different termini, and we are not sure, without knowing the physical properties, to what extent they are part of one and the same branch, and to what extent they represent different branches, or possibly spurs off of a main branch, so that we have lumped or grouped them under one heading and given the requisitions and the description of the line in each requisition, which I think will be sufficient for the Commission's records.

Q. Will you proceed with what we call the Tooele County Branches, Mr. Buckley?

A. The requisitions are as follows:

Req. No.	Date	Amount
10	Dec. 28, 1917	$265,156.89

[2381]

Expenditure of $265,156.89

(Testimony of C. E. Buckley.)

The purpose was contraction of branch line from a point on the main line at or near Grants, Utah, extending to Tooele, Utah.

35 Feb. 25, 1919 ..... $137,672.69

Expenditures of $137,672.69

Purpose: Betterments consisting of construction of industry and spur tracks in connection with main line, including cost of construction of spur track to serve Ellerbecks quarries, Tooele County, Utah, $57,017.44, and cost of construction of Tooele Branch, $10,403.90 (balance of total expenditure of $275,560.79 being covered in Requistiion No. 10).

Q. Now, with reference to that requisition, Mr. Buckley, is this true: That the total amount of $137,672.69 is the amount certified in that requisition No. 35, covering various items only part of which related to these Tooele County Branches?

A. That is correct.

Q. And the $57,017.44 is one item which relates to the construction of a spur track to the quarries and the other item of $10,403.90 is an item in that requisition relating to the construction of the Tooele [2382] Branch, but that last item is a balance of a total expenditure on the Tooele Branch of $275,560.79, part of which is covered by Requisition No. 10? A. That is correct.

Q. Will you proceed.

(Testimony of C. E. Buckley.)

A. Requisitions are as follows:

Req. No.	Date	Amount
66	Dec. 29, 1920	$7,013.71

The purpose was interest during construction of branch line from Grants to Tooele.

Q. Do you have the amount of the expenditure on that?

A. I am quite certain that it is the same, coincidental, but I have not noted it here. That is, it is the same amount but I do not have it down.

Q. In any event, it would be at least that amount of cash? A. Yes, sir.

110	June 3, 1921	$17,064.54

Expenditures of $17,064.54 for construction of branch line connecting with main line at Ellerbeck, Tooele County, Utah, and extending to Flux and Dolomite, Tooele County, Utah.

133	Feb. 10, 1922	$4,905.53

Expenditures of $4,905.53.

Purpose: Construction of branch line connecting [2383] with main line at Burmester, Tooele County, Utah, and extending to Warner, Tooele County, Utah.

144	Jan. 8, 1923	$2,938.54

Expenditures of $2,938.54

145	Jan. 8, 1923	$574.29

Expenditures of $574.29.

(Testimony of C. E. Buckley.)

Q. (By Mr. Wood) Now, with respect to the so-called North Channel Spur in Stockton, California, will you give us the same data?

A. The requisitions are as follows:

159 July 24, 1923.....Cash $162,689.96

Expenditures of $172,414.69 for betterments to main line, consisting of spur track (North Channel Spur) extending from main line north of Stockton yards into the City of Stockton.

174 May 4, 1925.....Cash $19,515.33

Expenditures of $21,272.84 for acquisition of real property for betterment of main line, Reno Branch, and North Channel Spur, and improvement of terminal facilities in San Francisco, Stockton and Oroville, includes expenditure of $2,783.62 for land south of Mormon Channel, Stockton, and $2,186.25 for purchase of land near Stockton. [2384]

Q. Those last two items were the items which you have picked out of the total of the requisition as applying to the North Channel Spur?

A. That is correct.

Mr. McCollom: Can you tell that they do in fact apply to that spur?

The Witness: I could say that the records, these requisitions, indicate that they do apply to that.

Mr. Wood: I will say this off the record, Mr. McCollom.

(Discussion off the record.)

(Testimony of C. E. Buckley.)

Q. (By Mr. Wood) Next, Mr. Buckley, is the Tesla Branch. Will you give us the same date for that? A. That is as follows:

Req.No.	Date		Amount
1	December 18, 1920	Cash	$39,537.21

Purpose: Betterments to main line.

Includes expenditure of $58.42 for cattle guards on Tesla Branch.

Q. Next is the line for which we have for convenience called a branch line in San Francisco. I think the description of it, as Mr. Buckley will give it, will sufficiently identify it. There does not seem to be any common name for it.

Will you take that up? [2385]

A. Requisition is:

Req.No.	Date		Amount
154	July 17, 1923	Cash	$132,298.27

Expenditures of $132,298.27.

Purpose: Purchase and acquisition of additional line of railroad in City and County of San Francisco connecting with main line, purchased from Ocean Shore Railroad Company.

Q. Now, Mr. Buckley, will you—

Mr. McCollom: Just a minute. Under what heading is that in connection with the General Mortgage?

Mr. Wood: I could not say whether that is described in the General and Refunding Mortgage or not.

(Testimony of C. E. Buckley.)

Mr. Coulson: Off the record.

(Discussion off the record.)

Examiner Boyden: Mr. Wood, in the opinion of the Examiners it is fruitless to sit here and listen to the witness read off the rest of these papers, because we would be here all afternoon. Cannot you submit these papers to other counsel so that they can look them over during the recess and see if there is any matter there which they want to refer to, and set them up in Exhibit form and file them in the record, and save this reading into the record?

Mr. Wood: We can do that, Mr. Examiner. We have [2386] not extra copies to furnish.

Examiner Boyden: Can you furnish extra copies at a later time?

Mr. Wood: If we can have the copies made up, and where we have, as I say, in some cases made pencil corrections, we would have to rewrite the pages. If we will be permitted to file them in corrected form, and send copies to all the parties and the Commission, all right. What I want to do is to get everything in here today.

Examiner Boyden: You can file the copy he has. If they are good enough for him to read from, they are good enough to file in the record.

Mr. Wood: If the Commission will permit us, instead of putting that physically in the record today, to take it back and make the required copies and then file them as exhibits, without coming here,

(Testimony of C. E. Buckley.)

again for that purpose, I think it would be desirable.

Examiner Boyden: It is a matter to be determined by the other parties. Are they going to accept your exhibit without further examination of the witness after inspecting it today?

Mr. Wood: I am prepared to ask Mr. Buckley whether these are accurate summaries of the data contained in the various requisitions which are set [2387] forth here. I think I have already asked him that in substance in the beginning, but to tie it in, I will ask him again.

Q. Mr. Buckley, you have in your hand a memorandum setting forth certain data which respect to these requisitions which you have been looking at in giving your testimony. Are you prepared to state that that memorandum accurately sets forth the data with respect to the cash requisitions that are set forth in the memorandum as shown by the original documents in your files?

A. I am. They are correct.

Q. Can you also state whether your records show that the amounts of cash shown as withdrawn by those requisitions were paid to the Railroad Company? A. I am.

Q. That is a fact, that they were paid?

A. Our records indicate that they were paid to the Railroad Company.

Mr. Wood: Then, Mr. Examiner, I am prepared to offer this in evidence subject to the conditions which you have just mentioned.

(Testimony of C. E. Buckley.)

Examiner Boyden: You cannot offer it, Mr. Wood, until you can physically present it for the record, but if counsel, after looking at it will agree to [2388] permit you to file it as an Exhibit after the hearing closes, without further examination of the witness, that might be done.

Mr. Wood: That is what I had in mind.

Mr. Swaine: It is right here.

Mr. Coulson: Mr. Examiner, we might want to ask this witness a question now, but that question can be asked now or can be put of record and a check made, and we can proceed that way.

Examiner Boyden: Very well.

Mr. Swaine: The document is here and can be produced and filed today. The only difficulty is that there are some penciled corrections which would have to be made on other copies.

Examiner Boyden: I understood Mr. Wood to say that he needed to have it copied, to make copies of it.

Mr. Wood: We can do it right today with that as the master copy.

Mr. Coulson: Mr. Buckley can do it during the Missouri Pacific arguments this afternoon.

Examiner Boyden: Let us proceed that way, Mr. Wood.

Mr. Coulson: Has that been given an Exhibit Number?

Examiner Wilkinson: We cannot give it an Exhibit Number until it is ready to go into the record.

[2389]

(Testimony of C. E. Buckley.)

Mr. Coulson: I understand it is ready to go into the record at the moment, and during the recess they are going to get up another copy.

Mr. Wood: Pardon me, Mr. Examiner. In order to clear up a possible ambiguity here as to what these various memoranda are, I would like to ask Mr. Buckley a question.

The memoranda which you have in your hand, as to which I have just asked you these questions, those are memoranda relating to the Niles-San Jose Branch, the Terminous Branch, the Bidwell Spur, the Calpine Branch, the Reno Branch, the Loyalton Branch, the so-called Tooele County Branches, the North Channel Spur, the Tesla Branch, and what we, for convenience, have called the Branch Line in San Francisco, as to which you have given oral testimony, and also the following as to which you have not yet testified:

Acquisition of land consisting of four pages; then a memorandum consisting of nine pages relating to the acquisition of the Sacramento Northern Railroad Company and the Deep Creek Railroad Company; another memorandum consisting of four pages relating to spurs for industrial tracks. That is the heading of it, "Spurs for Industrial Tracks."

Those are the documents to which I am referring [2390] Mr. Buckley, and as to which you state that they are the accurate summaries of what the original requisitions show?

(Testimony of C. E. Buckley.)

The Witness: That is correct.

Mr. Swaine: Would it not be well to fasten all these together as one document?

Examiner Boyden: Just the ones which he has not read.

Mr. Wood: Would you prefer to put in only the ones to which he has not testified?

Examiner Wilkinson: I do not see any necessity to furnish those already in the record, putting them in any more.

Mr. Wood: That is satisfactory.

Then we will eliminate the documentary summary data on the branch lines and will start with Requisition of Land.

That is all we have, Mr. Examiner.

Examiner Wilkinson: Is there any objection to the receipt of this exhibit, No. 124?

Mr. McCollom: Mr. Examiner, may I make this suggestion: We have had no opportunity to see these documents at all. Could the admission of them be withheld until we have had opportunity to look at them during the recess hour?

Examiner Wilkinson: Yes, of course. [2391]

Are there any further questions of Mr. Buckley?

Mr. Coulson: I would like to ask him just two or three short questions, but I think we would rather withhold our questions until this afternoon.

Mr. Swaine: I have one small matter which will take only a few minutes, I think, to complete the record.

(Testimony of C. E. Buckley.)

At one of the previous hearings I requested that Mr. Coulson obtain and furnish for the record the holdings of Arthur Curtiss James, or the A. C. James Company, either directly or indirectly, in the stock of the Western Pacific Railroad Corporation. I believe Mr. Coulson has procured that information, and if he will read it into the record and state it, I will accept his statement.

Mr. Coulson: The request made by Mr. Swaine, as I understand it, was a request for a statement of the stock of the Western Pacific Railway Corporation held by Mr. Arthur Curtiss James or by the Corporation which he controls.

I have prepared a statement showing the stockholdings of Arthur Curtiss James, or there has been prepared by the proper accounting officers, a statement showing the stockholdings of Arthur Curtiss James in the Western Pacific Railroad Corporation, together with the holdings of the Curtiss Southwestern Corpora- [2392] tion and the Curtiss Southwestern Company, the first a New York Corporation and the second a Delaware Corporation, showing the stockholdings of those two corporations in the Western Pacific Railroad Corporation. In the case of each of the two corporations Mr. James owns 97½ per cent of the stock of the corporations in question.

The A. C. James Company owns no stock in the Western Pacific Railroad Corporation. I would be glad to offer this statement. I have given Mr.

(Testimony of C. E. Buckley.)

Swaine additional copies which are available here for the record.

Examiner Wilkinson: Have you read all of the information on that statement?

Mr. Coulson: No, I suggest that the statement go in.

Examiner Wilkinson: It will be received as Exhibit No. 125.

(Exhibit No. 125, by Counsel, was received in evidence.)

EXHIBIT NO. 125

Arthur Curtiss James
Curtiss Southwestern Corporation
Curtiss Southwestern Company

Holdings in Western Pacific Railroad Corporation Preferred and Common Stock as of November 1st, 1936.

Arthur Curtiss James

Western Pacific Railroad Corpn. Common Stock 1000 shs.

Western Pacific Railroad Corpn. Preferred Stock 1000 shs.

Curtiss Southwestern Corporation

A New York Corporation in which Arthur Curtiss James owns 97½% of the stock, holds:

Western Pacific Railroad Corpn. Common Stock, 310,690 shs.

Western Pacific Railroad Corpn. Preferred Stock 2000 shs.

(Testimony of C. E. Buckley.)

Curtiss Southwestern Company

A Delaware Corporation in which Arthur Curtiss James owns 97½% of the stock, holds:

Western Pacific Railroad Corpn. Common Stock 40,700 shs.

Western Pacific Railroad Corpn. Preferred Stock 30,400 shs.

[Endorsed]: Finance Docket 10913. Exhibit No. 125. By Counsel. Filed Dec. 9, 1936. Paul P. O'Brien, Clerk.

Examiner Wilkinson: We will recess until two o'clock.

(Thereupon at 12:25 o'clock p. m. a recess was taken until 2:00 o'clock p. m. of the same day.) [2393]

Examiner Wilkinson: Mr. Swaine, are you speaking about briefs when this case is closed?

Mr. Swaine: Yes, sir. As I understand it, this case is closed, except for bringing in some papers which are being prepared, that is, the copy with pencil marks which was brought forward this morning, and that is in turn to be presented. When that is done all parties will be ready to close the case.

I would like to have as early a date as practicable, and I suggest thirty days as the date for filing briefs on the three plans.

Mr. Campbell: Mr. Examiner, Mr. Nicodemus asked me to read in his behalf a brief statement,

which will take just a minute, at the conclusion of this hearing. If I have your permission, I should like to read it.

Mr. Swaine asked that at the conclusion of the hearing other counsel be requested to advise of any changes that may be suggested in briefs respecting any of the three plans. We waive the question which naturally arises as to the procedure of one counsel out of so many insisting upon having the last word, and submit the following statement:

> "In view of Mr. Swaine's complete repudiation of the Debtor's plan, which the record shows to [2438] be a compromise plan proposed by Mr. Swaine's clients and accepted by the Debtor as the best plan that could then be negotiated, we think it proper to point out to the Commission the particulars in which the plan is burdensome to the Debtor.
>
> "If the Commission shall undertake to modify the plan in the interest of substantial justice and to comply with the spirit of Section 77, we suggest that it consider the following:
>
> "(a) A small sinking fund for the new 4 per cent bonds."

Examiner Wilkinson: You are referring now to the Debtor's plan?

Mr. Campbell: I am referring now to the Debtor's plan.

> "(b) A reduction of the interest rate on the Series A Income Bonds from 5½% per cent to 4 per cent.

"(c) A reduction in the interest rate on the Series B Income Bonds from 5½% to 4 per cent.

"(d) A reduction in the interest rate on the Junior Lien Income Bonds from 5½% per cent to 4 per cent. **[2439]**

"We also suggest that the Commission consider the elimination of the Voting Trust as an effort on the part of the minority to secure control of the Debtor."

These suggestions are not made as modifications of the Debtor's plan. We stand upon the plan as filed and merely submit the above suggestions to indicate to Mr. Swaine the line of argument that we feel free to submit in our brief.

We may, however, on further reflection, think of other suggestions, and, if so, we shall feel free to place them in our brief.

On the point as to the time for filing briefs Mr. Nicodemus asked me to suggest two months.

Examiner Wilkinson: Just before we come to the date for filing briefs, so that we will have the record clear, the Debtor is not now proposing amendments to its plan?

Mr. Campbell: Not as modifications. They are not proposed as modifications.

Examiner Wilkinson: They are here intimating that they might, if they see fit, make these proposals in their brief?

Mr. Campbell: He says, "We think it proper to point out to the Commission the particulars in which [2440] the plan is burdensome to the Debtor, and if the Commission shall undertake to modify the plan in the interest of substantial justice"—if the Commission shall undertake to modify the plan —"and comply with the spirit of Section 77, we suggest that it consider the following."

It is a mere suggestion.

Examiner Wilkinson: I wanted to make the record clear.

Mr. Campbell: Mr. Examiner, Mr. Nicodemus also asked me at the conclusion of the case to renew in form a motion which he made at one of the earlier hearings, to strike out certain evidence, certain exhibits, and with your permission, since it is just a brief motion, I should like to renew it, the purpose being to lay the ground work for a renewal of such motion upon hearing before Division IV or the Commission.

This is the motion, on which we do not ask any ruling——

Examiner Boyden: Wait a minute.

Mr. Campbell: I beg your pardon.

Examiner Boyden: Do I understand you to say that a motion to strike is going to be argued before Division IV? [2441]

Mr. Campbell: To lay the groundwork for a submission before Division IV. It is his understanding that it will be open for a renewal, because I think this was designed to eliminate burden-

some, extraneous exhibits which are not necessary for consideration and make the record exceedingly cumbersome.

I do not ask any ruling here, but it is to lay the groundwork for renewing it again.

The motion which he wishes me to make is, to strike out the following Exhibits:

That the Examiner strike out the following Exhibits on the ground that they are incompetent, immaterial and irrelevant.

All of the Exhibits numbered from 45 to 104, except the following Exhibits Numbers 51, 52, 53, 60, 61, to 74, 75, 76, 77, 78, 79, 80, 81, 82, 95, 96, 97, 98, 99, 100, 102 and 103.

In addition we move to strike out all parts of Exhibits Numbers 63 to 73, inclusive, except in each case the certificate of expenditures which is a separate detachable document.

Examiner Wilkinson: While you are on that subject, do you not want to include Exhibit Numbers 107 to 125?

Mr. Campbell: I should think that we should like [2442] to suggest the same treatment with respect to all of those where there is a detachable, separate exhibit of a certificate of expenditure, but that was not framed at the time when I discussed this with him.

Examiner Wilkinson: We have not yet quite completed the testimony along this line. We might as well dispose of that question now.

Mr. Coulson, have you an objection along this line? Do you still move to strike out those exhibits?

Mr. Coulson: I will not joint at this time in the motion, because I think, as the Examiner stated this morning, there is so much testimony in this record in bulk that any blanket motion to strike out arouses some concern in my mind that it might be something essential to Mr. Swaine in carrying his burden of proof under his first mortgage, and I have no desire to embarrass any party to this proceeding.

Mr. Swaine: I appreciate that.

Examiner Wilkinson: Do any of the other parties to this proceeding desire to move to strike out any of this evidence which has been received heretofore, subject to the motion to strike?

(No response.)

Examiner Wilkinson: The Debtor's motion is overruled. The Exhibits are received. [2443]

Now we might as well dispose of Exhibit No. 105, which is a corporate history of the debtor, which was marked for identification only this morning.

Have parties had a chance to read it over, and is there any objection to Exhibit No. 105?

Mr. Coulson: I would like to make a suggestion as to that. It seems to me that the corporate history which is produced for identification as Exhibit No. 105 purports to be no more than a summary of factual data already before the Commission.

I think we can allow it to go into the record here, if there is a distinct understanding that it is only such a summary, and subject to correction either as to direct statement of fact or implication, by reference to the testimony, the evidence, that has been put before this Commission by various witnesses subjected to cross examination.

I think, however, that in doing that there are a few verbal changes that might well be made by the parties here before it is accepted by the Commission, and accepted with those verbal changes, so as to avoid subsequent misunderstanding.

I call your attention to the bottom of page 19, the beginning of the next line to the bottom, beginning with the word, "constituting," and running through the [2444] word "mortgage" on the last line of the page.

I suggest that that phrase be stricken out as unnecessary, since the mortgages, plus the voluminous testimony which Mr. Swaine has introduced, speak for themselves, and this conclusion might be misunderstood if allowed to stand uncorrected.

Mr. Swaine: Before you leave that, if you will just look over on page 20, I think you will see that the statement is rather innocuous. It says:

"* * * then owned by the railroad company which was subject to the first mortgage."

Mr. Coulson: I grant it is innocuous, but I would like to render it unambiguous as well.

Examiner Wilkinson: This statement was prepared by the Debtor. Does the debtor agree to the

deletion of the words suggested by Colonel Coulson?

Mr. Campbell: I am disposed to agree with that. Mr. Nicodemus' statement was offered, subject to correction, and it is merely factual data, and no legal conclusions.

Examiner Wilkinson: The Exhibit is received subject to the deletion of the language suggested by Colonel Coulson.

Mr. Swaine: If you delete that, you must delete all the rest of the sentence. [2445]

Mr. Coulson: I will frame a sentence which will perhaps meet what Mr. Swaine has in mind. On the next page a similar conclusion is stated as to the general and refunding mortgage by the use of the words in the second line of that page,

"* * * and constituting a first lien."

I suggest that we strike out the words "and constituting a first lien" and substituting therefor "was expressly a first lien."

Mr. Swaine: I think if you strike out anything you should strike out everything except that there was created a first and refunding mortgage on the date, and let it speak for itself, and do not characterize it.

Examiner Wilkinson: I think it is better to receive this exhibit with the understanding that the statements in the exhibit by the Debtor are not binding upon the parties to this proceeding, other than the Debtor, and that these statements be subject, as Colonel Coulson stated, to verification and

check by the evidence which has already been put in in this case.

Mr. Coulson: With all deference to the Examiner, I think we want something more than not binding, we want something which is not confusing. This statement serves only the purpose of being a convenience [2446] to the Examiner, and is not binding.

Examiner Wilkinson: Just as background.

Mr. Coulson: I think it is quite unsound, despite the desire of all of us to dispose of this case. With petitions of intervention and what not before the Commission, it may be six months before the Commission writes a final decision, and I think if this statement is to serve its purpose it should be put in unambiguous and non-confusing phraseology at this time and I think there is so little in it which is non-confusing that we ought to be able to do it.

Examiner Wilkinson: Off the record.

(Discussion off the record.)

Mr. Coulson: As suggested by Mr. Swaine, strike out on page 19 of Exhibit No. 105 for identification the last two lines on page 19 and the first five and one-half lines on page 20.

On page 22, the next to the last line of the paragraph which finishes at the top of that page, the line which begins "bonds of the railroad company," insert after the word "company" the phrase, "as additional collateral for a debt of the railroad company."

On page 23 at the end of the paragraph which ends at the top of that page, insert the paragraph:

"The railroad company is still indebted to [2447] A. C. James Company to the full amount of its original advances of $4,999,800, and has not made any payment of interest thereon since February, 1934."

Examiner Wilkinson: It is agreed and stipulated by all the parties to the proceeding that the changes stated by Colonel Coulson may be made in Exhibit Number 105, is it?

Mr. Campbell: No objection.

Examiner Wilkinson: Exhibit No. 105 is received.

(Exhibit No. 105, by Counsel, was received in evidence.)

Examiner Wilkinson: Now, Exhibit No. 106 was received for identification.

Mr. Coulson: I would like to make a comment as to that, if I may, Mr. Examiner.

Examiner Wilkinson: Yes, sir.

Mr. Coulson: This is headed, I think, in a misleading way. It starts out, "Statement of Loans from Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James * * *."

It goes on with further data. It is of course not a statement of loans, but rather a statement of the dates when certain general and refunding bonds were issued and delivered. This is not only incomplete, but it is merely [2448] a summation of data that is already in its complete form in the record, and I think it is in this form misleading and will be misunderstood at a later time when our memory of these things is cold, if we allow it to go in.

I suggest that if there is any necessity for a convenient summation of this sort, that there be a mere statement of the dates when these various general and refunding mortgage bonds were issued, and to whom, and for what purpose.

Mr. Judd: That can easily be read into this statement.

Mr. Campbell: Colonel Coulson, in introducing that exhibit and statement prepared by Mr. M. J. Curry, showing the delivery dates to pledgees of $18,995,500 principal amount of general and refunding bonds, the information was given.

Mr. Coulson: But it completely lacks clarity under its present title, and I think is bound to confuse us later. We have already got the data in the Exhibit already put in as Number 105, I think, and in numerous other statements in this proceeding.

Mr. Swaine: No. 105 does not give the dates of delivery.

Mr. Clay: I would like to ask, Mr. Examiner, if [2449] this is to have the same status as Exhibit No. 105, and does not bind the collaterals. The collateral which the R. F. C. holds was delivered contemporaneously with the making of the loans. I do not know whether the dates shown in this Exhibit are dates which coincide with the making of the loans, but I do know that the collateral was delivered at the time of the making of our loans.

Mr. Coulson: I suggest that Mr. Curry might just read into the record the amounts and dates of the delivery, and not have this confusion in the record,

because there are other collaterals here and there are lots of questions which it raises.

Examiner Wilkinson: If it will only take a moment to do it, all right.

Mr. Coulson: It would only take a moment to read in the dates of delivery, I think, Mr. Examiner.

Mr. Curry: Dates of delivery of general and refunding mortgage bonds, 5 per cent, Series A and B as part collateral:

The Reconstruction Finance Corporation—

Mr. Coulson: Put in the dates first, Mr. Curry, so that we will be clear, because that is what we are interested in, the date of each delivery, to whom it went, and the amount. [2450].

Mr. Curry: $8,750,000 principal amount, delivered on March 1, 1932.

$2,000,000 principal amount, delivered March 25, 1933.

To the Railroad Credit Corporation, $2,000,000 delivered March 25, 1933; $2,000,000 principal amount, Series B, delivered March 25th, 1933 by A. C. James Company.

To A. C. James Company: $5,630,000 delivered March 1, 1932; $2,000,000 of such bonds repledged with the Railroad Credit Corporation, delivery of said $2,000,000—

Mr. Coulson: For a debt of the Debtor Company?

Mr. Curry: For a debt of the Railroad Company, delivery of said $2,000,000 being made on March 25, 1933 by A. C. James Company.

$433,500 delivered to A. C. James Company, March 28th, 1932.

$186,000 delivered to A. C. James Company, May 31st, 1932.

Mr. Willard: There again, Mr. Examiner, I assume that the evidence already in would control, in the event of any difference.

Examiner Wilkinson: That is correct.

Mr. Coulson: It is merely a convenient summary of [2451] the dates.

Examiner Wilkinson: In view of the fact that Mr. Curry has read the first parts of this exhibit, and in view of the objections, Exhibit No. 106 will not be received.

C. E. BUCKLEY

testified further as follows:

Direct Examination

(Continued)

Mr. Wood: Mr. Examiner, in offering this document as an Exhibit—I think the identification of it is already in the record—I want to make an explanation which will perhaps clarify the portions which are headed respectively "Acquisition of Sacramento Northern Railway and Spurs and Industrial Tracks."

The memorandum gives in each case the total amount of cash withdrawn on a particular requisition. In a great many cases the expenditures covered a great variety of items, and the amount of

(Testimony of C. E. Buckley.)

cash will be entirely disproportionate to the amount of expenditures that are set forth in the memorandum. The reason for that is this:

Say we had one million dollars of cash withdrawn for all sorts of Additions and Betterments, for [2452] the particular purpose which is set forth in the memorandum as construction of spur and other tracks.

We have picked out merely the amount of expenditures that relate to that particular class of property, namely, spurs and industrial tracks. We have not given the aggregate of expenditures in the whole requisition, although we have given the whole amount of cash. So that you will have one million dollars cash withdrawn and maybe $25,000 as the item of property expended.

With that explanation, I think the memorandum will be a little clearer.

I offer that as an Exhibit.

Examiner Wilkinson: As you will recall, Mr. Wood, it has already been put in the record as Exhibit No. 124.

Mr. Wood: I thought it was for identification only.

Examiner Wilkinson: Exhibit No. 124 will be received.

(Exhibit No. 124, Witness Buckley, was received in evidence.)

Mr. Wood: I will have this rewritten with the changes here in pencil on the document which is

(Testimony of C. E. Buckley.)

now going into the record, and I will distribute copies [2453] to the parties. The Commission would like to have two more, I understand.

Examiner Wilkinson: Very well.

Mr. Swaine: I would like to address to the Examiners a question of personal privilege. I have not had a holiday for two years.

Mr. Coulson: Just a moment. Do you anticipate the cross examination of Mr. Buckley?

Mr. Swaine: No. I thought you were through.

Mr. Judd: I have a couple of questions.

Cross Examination

Q. (By Mr. Judd) Mr. Buckley, with respect to the branches, spurs and other items covered by your testimony and this Exhibit No. 124, are we to understand that you have extracted and summarized everything on those subjects which is contained in requisitions for cash drawn down under the first mortgage?

A. I cannot say that we took every item in those requisitions that referred to the heading of the various loans, and inserted them here.

Q. You can say?

A. I cannot say that we extracted every one. All I can say is that the facts contained in the memoranda are contained in the appropriate requisitions on file with the individual trustee. [2454]

Q. With respect to the individual branches about which you have testified, have you any knowledge of

(Testimony of C. E. Buckley.)

the total amount of money that was spent by the railroad company for right of way on any particular branch? A. I have not.

Mr. Wood: That would appear in the requisitions but it would take a great deal of time to dig it out in each individual case.

Mr. Judd: Would that show, if I may ask you, Mr. Wood, the total amount spent by the railroad company or the total amount cited in the requisitions?

Mr. Wood: The requisitions are certifications of what they have expended, on the basis of which they are withdrawing cash.

Mr. Judd: Are they a certification that nothing will be expended beyond that?

Mr. Wood: No, they show expenditures between certain dates.

Mr. Judd: In connection with the branch from Hawley to Loyalton, may I see the memorandum from which you were testifying concerning the first item of expenditure?

Mr. Wood: At that point I may say this: That the position of the first mortgage trustee is that under the after acquired property clause of the first [2455] mortgage, we take the position that if any first mortgage money went into a branch or extension, that branch in its entirety is subject to the first mortgage.

Mr. McCollom: Of course, we do not agree with that view.

(Testimony of C. E. Buckley.)

Mr. Swaine: That is a matter for briefing.

Mr. Coulson: When they put in testimony as to minor expenditures on a branch this morning, that was brought up, but they show the right of way of a part of the branch of the California extension being shown acquired with mortgage money, and do not show with what money the rest of it was acquired,

Examiner Wilkinson: Proceed.

Q. (By Mr. Judd) Mr. Buckley, am I correct in understanding with respect to requisition No. 35, that the expenditures therein on what you call the Loyalton Branch were made simply for what is termed a spur track, running south from Loyalton?

A. All I can tell you, Mr. Judd, is this: That the papers in requisition 35 will indicate that these expenditures were for the betterment to the main line, consisting of the construction of a spur track, including the cost of the spur track 2.6 miles long, to serve this lumber company to 2.20 miles south of [2456] Loyalton, California.

There is evidence in the 35 papers that indicate that.

Q. And that is the only part of requisition No. 35 which went into what you term the Loyalton Branch?

A. I cannot say that there are not some others, without looking at it, but I know that this particular information did appear on No. 35.

Q. I simply want to bring out that there is nothing in this, as it stands on the record now, to

(Testimony of C. E. Buckley.)

contradict the statement in Exhibit No. 29 that the branch from Hawley to Loyalton was acquired with free funds, and that the treasury was reimbursed for that expenditure on scrapping a part of the branch.

A. I have no knowledge of that.

Mr. Wood: I do not think that that is quite correct, Mr. Judd, because this item does not stand alone here. You have on Number 35 an item of $5,350.08, for one particular purpose, cost of a spur.

Mr. Judd: Yes.

Mr. Wood: Yet the total requisition is 137 some odd thousand dollars.

Coming to that 137 some odd thousand dollars you have an expenditure in the balance of 59 thousand and some odd dollars for betterments to the main line, [2457] including track betterments between Hawley and Loyalton.

Mr. Judd: On that there is only $87.00 as I read this memorandum, which is on track betterments between Hawley and Loyalton.

Mr. Wood: That is the balance which was used under this requisition, but the reference is made to previous requisitions numbers 170, 177 and 181, and the balance is given as $59,764.36.

Mr. Judd: Would you say, Mr. Wood, that that $59,000 purports to represent expenditures on the Loyalton Branch?

Mr. Wood: Exactly, it does. In your next requisition No. 216, you have some more of the track betterments between Hawley and Loyalton.

(Testimony of C. E. Buckley.)

Mr. Judd: Let me see requisition No. 170. I am not going into all of them, but I would like to see if it goes to that amount.

Examiner Boyden: Are you talking about papers in the record or not in the record?

Mr. Judd: I think, as a matter of cross examination of Mr. Buckley, we are entitled to look, within reason, at the papers on which his testimony was based.

Examiner Boyden: Off the record. [2458]

(Informal discussion off the record.)

Mr. McCollom: Mr. Examiner, the requisitions are here, if the Commission feels that they ought to be used, but there were taken from these requisitions, and Mr. Buckley has testified that the data set forth is accurate. Mr. Judd of course, is entitled to ask any questions he wants about them.

Mr. Coulson: I am frank to say that I understood Mr. Buckley's testimony this morning as to the total item mentioned by Mr. Wood as being a total which included items for other purposes, and that the specific item applying to the extension here was the smaller figure here.

Mr. Wood: That is true in part.

Mr. Judd: It is my purpose to see that—

Mr. Coulson: The record showed it this morning.

Mr. Wood: I think that needs explanation. I have a large requisition which includes all sorts of items. In that you will find one item which says $87.12, the amount being shown on this particular requisi-

(Testimony of C. E. Buckley.)

tion, but then there will be a little parenthesis following that, that will say, "being the balance of total expenditures of so much," or it will say, "After deducting amounts covered by requisition No." then giving the number, and say "balance so much." [2459]

In other words, they are carry-overs from previous requisitions, with a total amount, deducting the previous requisitions, leaving a balance which is used on that particular requisition. They refer back, and the total is what is given here.

Mr. Judd: I should think I might look at the one requisition to which I referred, and so far as I am concerned, I have no objection, Mr. Buckley has them in his bag.

(Informal discussion off the record.)

Q. (By Mr. Judd) You do not know, do you, Mr. Buckley, as to whether or not your statement on the acquisition of land covers all the land which has been acquired by the Western Pacific Railroad Company since 1916? A. I do not, no.

Q. You do not know, for instance, with respect to the item of miscellaneous physical property, listed on Exhibit No. 115, I believe it is, warehouse building at Grass and Terminous, acquired in October, 1930 for $35,616, whether that was acquired out of first mortgage money or free funds?

A. I do not know. It may be possible to pick it up by the deductions, but I have no knowledge at the moment. [2460]

(Testimony of C. E. Buckley.)

Mr. Wood: Which item, Mr. Judd.

Mr. Judd: Line 46 on No. 212, being Exhibit No. 113.

Mr. Wood: How does it read?

Mr. Judd: It reads "warehouse building, pump house, pumps, etcetera, Grass and Terminous, California."

Mr. Wood: I do not know any way of tying those up except by comparing the deductions, the amounts, the dates, and taking the requisition, which would necessarily tie it up with that. You would have to go into the railroad company's own records, I suppose, to get the proper tie up.

Mr. Judd: Is the same true as to the spurs, that there has been no comparison made on the industrial spurs and other tracks built by the railroad since 1916 to see whether or not such construction was financed with first mortgage funds?

The Witness: I have made no such comparison.

Mr. Wood: All we have done is to take the requisitions and summaries, what appears in the papers. That is the extent of our examination of this data.

Mr. Judd: I see. If the expenditures listed as $31,000 capital account for construction of tracks to serve the industrial section in San Francisco are [2461] stated in Exhibit No. 31 as uncapitalized, there is nothing in this which in and of itself connects with that or contradicts it?

Mr. Wood: All I say is that we looked at nothing but the requisitions. If there is an obvious tie up

(Testimony of C. E. Buckley.)

between a requisition and that, it speaks for itself. There is no attempt to reconcile the requisition with any data or material.

Mr. Judd: That is for us to dig out later on in brief?

Mr. Wood: If you like.

Q. (By Mr. Judd) Have you made demands on the Chase Bank, Mr. Buckley, on behalf of the general mortgage for payment of interest or dividends upon the collateral held by the Chase Bank as trustee under the general mortgage?

A. Notes or bonds held by us as collateral?

Q. Yes.

A. We have served some notice on obligors, on notes held as collateral. Whether or not that is a demand for payment of interest or a notice that if any interest is paid, it is payable to us as trustee, I cannot recollect the facts.

Q. Do you remember approximately the date when that was done? [2462]

A. My best recollection is that it was shortly after the company went into 77, but I would have to verify that from the record. It is easy to ascertain all of this.

Mr. Judd: Mr. Examiner, I would like to have permission to read for the record a telegram which was just received this morning transmitting information from San Francisco with respect to the payments of interest on the note of Tidewater Southern Railway Company and pledged under the

(Testimony of C. E. Buckley.)

general mortgage, since the date when the general mortgage went into default, to wit, March 1, 1934.

Examiner Wilkinson: Who is the telegram from?

Mr. Judd: The telegram is from our San Francisco Counsel and it reads:

"Western Pacific Reports—meaning the San Francisco office of the Western Pacific and skipping some irrelevant matter—"The Western Pacific Railroad Company has been the only recipient of interest payments since March 1, 1934 on Tidewater Southern Notes for $508,000, pledged under General and Refunding Mortgage, such payments being as follows:

"Interest period September 1, 1933 to February 28th, 1934, $12,706.97. Date paid [2463] March 2, 1934 STOP Interest period March 1, 1934 to August 31, 1934, $12,706.97. Date Paid September 17, 1934 STOP Interest period September 1, 1934 to February 28, 1935, $12,706.97. Date Paid March 6, 1935 STOP Interest period March 1, 1935 to August 31, 1935 $12,706.97. Date Paid September 6, 1935 STOP Total $50,827.88.

(Signed) FELIX T. SMITH",

our San Francisco Counsel.

I would like to offer for the record a copy of the note of the Tidewater Southern Railway Company.

Can you identify that, Mr. Buckley, as a copy of a note in your possession, as trustee, under the General Mortgage?

(Handing papers to witness.)

(Testimony of C. E. Buckley.)

Examiner Boyden: Don't we have copies of all those noted in the record?

Mr. Judd: I believe some particulars of those are in, but in view of the fact that interest has been paid on this note without being paid to the trustee under the General Mortgage, I think it is desirable to have the full provision, the entire notes, in the record. [2464]

Mr. Swaine: So that there will be no misunderstanding, we do not concede that the general and refunding is a first lien on that note.

Examiner Wilkinson: Can you identify that?

The Witness: No, I cannot identify that. I would have to see the original note and see that that is a photostat. I do not carry the figures in my mind.

Mr. Coulson: Can it not be received subject to inspection?

The Witness: I would be glad to.

Mr. Judd: If, after the hearing, I submit to you the letter which you sent over and from which the photostats were made, will you be satisfied that this is a correct copy?

The Witness: I do not know whether this is a photostat of what was sent or not. I suppose it is, but I would have to see the original document.

Examiner Wilkinson: Suppose you offer it, Mr. Judd.

Mr. Judd: I will offer it in evidence, subject to correction.

Mr. Swaine: No objection.

(Testimony of C. E. Buckley.)

Examiner Wilkinson: It will be received as Exhibit No. 126. [2465]

(Exhibit No. 126, by Counsel, was received in evidence.)

Examiner Wilkinson: Have you got copies?

Mr. Judd: Yes, sir.

Examiner Wilkinson: That is all, Mr. Buckley.

Mr. Coulson: May I ask just one question?

The Witness: Yes, sir.

Q. (By Mr. Coulson) Mr. Buckley, I refer to the various branch lines as to which you testified today and the total items of real property itemized in Exhibit No. 124, which has been put in the record in connection with your testimony today, and ask you whether there has been executed and delivered by the debtor company to the first mortgage trustee any supplemental indentures which refer to these various branch lines and other properties?

A. I do not recall.

Q. But you would recall if one had been executed, if you had been connected with the carrier?

Mr. Wood: We will concede there were none. I think that is the fact.

Mr. Coulson: Thank you.

Mr. Clay: Does that mean that there has been no supplemental indentures since the date of the first mortgage in 1916? [2466]

Mr. Swaine: I am so advised by counsel for the trustee.

Mr. Wood: I have worked with the Western Pa-

(Testimony of C. E. Buckley.)

cific for years a great deal and I have never heard of a supplement, but I do not know.

Mr. Swaine: We are perfectly willing to have this case adjudicated on the assumption that there are not any.

Examiner Wilkinson: Any further questions of Mr. Buckley?

(No response.)

(Informal discussion off the record.)

Mr. Wood: Mr. Examiner, if we are through with the discussion about briefs—

Examiner Wilkinson: That was off the record. Do you have anything further of Mr. Buckley?

Mr. Judd: No, sir.

Examiner Wilkinson: Does any other party have any question of Mr. Buckley?

(No response.)

Examiner Wilkinson: You are excused.

(Witness excused.)

Mr. Wood: In connection with the statement Mr. Swaine made about there being no supplements, I think [2467] for the purpose of making the record clear—and this is not for the purpose of committing anybody to a legal conclusion—I think it ought to be pointed out that in the case of each one of these requisitions involving acquisition of property, purchases of land, or branch

lines, there was an opinion of the railroad company's counsel furnished to the trustees as part of the requisition, to the effect that no supplemental indenture was necessary to subject particular property to the lien of the first mortgage, subject to no prior liens, and that is provided in the opinion.

Mr. Clay: Mr. Examiner, that opinion of course, is merely an opinion, and it cannot bind the creditors in this proceeding. I should further like to point out that part of this property is in Utah, and part of the property is in Nevada and part of the property is in California, and it is possible that in one of those states no supplemental mortgage is required. It is quite possible that if the property were located in one or the other states, under the law of that state a supplemental mortgage would be required.

Mr. Wood: Mr. Examiner, I tried to make that clear in the preliminary statement which I made; that we are not putting this in for the purpose of a legal conclusion, but it is merely a statement of facts, to [2468] make the matter clear. I assume that when counsel gives an opinion he has considered the law of a particular state with which he is dealing.

Mr. Coulson: I do not think we can make that a matter of evidence.

Examiner Wilkinson: It is not evidence, and it is not to be relied upon in this proceeding. There is no use of encumbering the record by talking about it.

Mr. Swaine: Wait a minute. It does have an evidentiary value.

Examiner Wilkinson: Has the opinion been put in the record?

Mr. Swaine: No.

Examiner Wilkinson: Are you going to put it in?

Mr. Wood: That is the reason I am making reference to it. Not unless the Commission wants it put in.

Examiner Wilkinson: I am not telling you what to put in. As I said, it would be an admission on the part of the Debtor, but unless you have got it to put in, there is no use in talking about it.

Mr. Swaine: Let us meet it when it comes up. Mr. Coulson asked the question as to whether there was taken by the trustee a supplemental indenture. I concede, so far as my bonds are concerned, that no [2469] supplemental indenture was taken. At the same time I think it is fair to have pointed out that the debtor represented to the trustee on each one of these take-downs, by filing an opinion of counsel, that no supplemental indenture was necessary.

Now that is the fact, and Mr. Coulson knows that it is a fact, and Mr. Buckley can testify to it, or if it becomes relevant we can dig out of the take-down proceedings every opinion on every case. I quite agree with Mr. Clay that that does not bind Mr. Clay to it, but it does show what the intent as between the debtor and the first mortgage

bondholders was, and I think it is a relevant fact.

Examiner Wilkinson: The only thing which I am saying, Mr. Swaine, is that it may be—and I would admit it, if you have it—but I cannot consider as evidence some statement like that.

Mr. Coulson: Mr. Examiner, I would like to say quite clearly—it seems to me we are wasting time on something which is necessarily irrelevant—that the opinions of counsel, even if they were offered and identified as competent counsel, competent to give testimony as to the law of these various states, it [2470] cannot ever be considered evidence here, and as an admission it might have some embarrassment to the debtor, but this question of liens is something in which the debtor company has no personal interest. It is purely a question between the first mortgage bondholders, the junior creditors, and the general creditors of this property, and no one of them can be bound by any opinion that any counsel gave the trustee or the debtor company.

Examiner Wilkinson: I think we have had sufficient on the record in that regard. Proceed please.

Mr. Wood: Mr. Buckley can testify. Will you take the stand, Mr. Buckley?

Mr. Clay: May I suggest that so far as I am concerned, that I am willing to admit that such an opinion was given, but I do not see how the opinion can be binding upon the parties.

Mr. Swaine: I agree with that. It does not bind you.

Examiner Wilkinson: I believe that is sufficient on the record on that.

If you have something else, all right.

Mr. Wood: I would like to have Mr. Buckley testify to the fact that the opinion was given in each case. [2471]

Examiner Wilkinson: All right.

Mr. Wood: Mr. Buckley, in the case of each of these requisitions as to which you have testified, and which was mentioned in the memorandum which went into evidence as Exhibit No. 124, I think it was found from your examination of those requisitions that in each case there was an opinion of counsel as part of the requisition, to the effect that no supplemental indentures or other instrument was necessary to subject the property described in the requisition to the lien of the first mortgage as a first lien, with the exception of any prior lien specifically mentioned in the opinion.

I think in a few cases there were, or in the case of one there was $15,000 reserved, but unless specifically mentioned, there were no prior liens.

Mr. Coulson: I object to the form of the question, as he has not specified what property he has referred to.

Examiner Wilkinson: The objection is overruled. Will you answer the question if you can?

Mr. Buckley: We have received such an opinion.

Examiner Wilkinson: Is there anything further of Mr. Buckley?

(No response.) [2472]

Examiner Wilkinson: Have any parties anything further to offer in this case?

(No response.)

Examiner Wilkinson: The case will be closed, and briefs will be filed on January 11th, 1937, and of course the record speaks for itself with respect to the motions, or rather the petitions of intervention.

(Thereupon at 4:10 o'clock p. m., the hearing in the above entitled matter was closed.)

[Endorsed]: Filed Oct. 3, 1939. [2473]

CERTIFICATE OF CLERK TO TRANSCRIPT OF RECORD ON APPEAL.

District Court of the United States, Northern District of California, Southern Division.

I, Walter B. Maling, Clerk of the United States District Court, for the Northern District of California, Southern Division, do hereby certify that the foregoing pages, numbered from 1 to 2769, inclusive, contain a full, true and correct transcript of so much of the records and proceedings In the Matter of The Western Pacific Railroad Company, Debtor, No. 26591-S, as are included in the Designations of the portions of the record to be contained in the Record on Appeal in said proceeding, filed by the parties to said proceeding in said Court in accordance with Rule 75 of the Rules of Civil Procedure for the District Courts of the United States, and consisting of (a) "Designation

by Appellants, The Western Pacific Railroad Company, The Western Pacific Railroad Corporation, A. C. James Co., The Railroad Credit Corporation, and Irving Trust Company as Trustee under the General and Refunding Mortgage of Western Pacific Railroad Company dated January 1, 1932, of the Portions of the Record, Proceedings and Evidence to be Contained in the Record on Appeal," filed October 10, 1940 (supra pp. 1257 to 1265); (b) "Designation by Appellees, Frederick H. Ecker, John W. Stedman and Reeve Schley, as a Committee for a Group of Institutional Holders of First Mortgage Bonds of the Western Pacific Railroad Company, and Crocker First National Bank of San Francisco and Samuel Armstrong, as Trustees [2770] under the First Mortgage Filed June 26, 1916, of The Western Pacific Railroad Company, of Additional Portions of the Record, Proceedings, and Evidence to be Included in the Record on Appeal", filed October 21, 1940, (supra pp. 1650 to 1654), and (c) "Designation by Appellee, Reconstruction Finance Corporation, of Additional Portions of the Record, Proceedings and Evidence to be Contained in the Record on Appeal", filed October 19, 1940, (supra pp. 1746 to 1747), as the same now remains on file and of record in my office, except (1) the original Exhibits which in accordance with Rule 75(i) of said Rules of Civil Procedure for the District Courts of the United States and the order of said Court made, filed and entered November 27, 1940 (supra pp. 1754 to

1755), have been transmitted to the Clerk of the Circuit Court of Appeals for the Ninth Circuit and are a part of the transcript of record on appeal herein; and (2) the items designated as Numbered 39 and 40, respectively, in the above mentioned Designation of the Appellants filed herein Ocfober 10, 1940, and described in said Designation as "Summary of Issues Remaining for Decision by the Court Filed herein by the Western Pacific Railroad Company and A. C. James Co. on December 20, 1939", and "Summary of Issues as Stated by Counsel for Institutional Bondholders Committee Filed herein on December 20, 1939", respectively, and that the foregoing constitutes the transcript of record on the appeals heretofore taken by the above named Appellants from the order of the above named Court made, filed and entered on August 15, 1940, which approved a Plan of Reorganization of the above named Debtor.

I further certify that neither of said last mentioned items included in said Designation of the Appellants (i.e., Items Nos. 39 and 40) has been included in the foregoing transcript of record on [2771] appeal, for the reason that neither of the documents mentioned in said respective items has been filed in said Court, or is part of the files thereof.

I further certify that the cost of preparing and certifying the foregoing transcript of record on appeal is the sum of $404.10, and that said amount has been paid to me by the attorneys for the Appellants herein.

In witness whereof, I hereunto set my hand and affix the seal of said District Court, this 30th day of December, 1940.

[Seal] WALTER B. MALING,
Clerk.

By J. P. WELSH,
Deputy Clerk.

[Endorsed]: No. 9714. United States Circuit Court of Appeals for the Ninth Circuit. In the Matter of The Western Pacific Railroad Company, a corporation, Debtor. Western Pacific Railroad Corporation, a corporation, The Western Pacific Railroad Company, a corporation and Irving Trust Company, a corporation, as substituted Trustee under the General and Refunding Mortgage of Western Pacific Railroad Company, A. C. James Co., a corporation, The Railroad Credit Corporation, a corporation, Appellants, vs. Institutional Bondholders Committee and Reconstruction Finance Corporation, Appellees. Transcript of Record. (Excluding Certain Portions not Printed, in Accordance with Stipulation and Order.) Upon Appeals from the District Court of the United States for the Northern District of California, Southern Division.

Filed, December 31, 1940.

PAUL P. O'BRIEN,
Clerk of the United States Circuit Court of Appeals for the Ninth Circuit.

In the United States Circuit Court of Appeals.

No. 9714

In the Matter of

THE WESTERN PACIFIC RAILROAD COMPANY,

Debtor.

STATEMENT OF POINTS UPON WHICH APPELLANTS WILL SEVERALLY RELY IN SUPPORT OF THEIR RESPECTIVE APPEALS AND DESIGNATIONS OF PARTS OF THE RECORD SAID APPELLANTS THINK NECESSARY FOR THE CONSIDERATION OF SAID POINTS.

The Western Pacific Railroad Company, debtor herein, The Western Pacific Railroad Corporation, A. C. James Co., The Railroad Credit Corporation, and Irving Trust Company as Trustee under the General and Refunding Mortgage of The Western Pacific Railroad Company, dated January 1, 1932, all of whom have, heretofore, severally appealed to the above entitled Court from the order of the District Court of the United States for the Northern District of California, Southern Division, made, filed and entered on August 15, 1940, by which the last mentioned Court approved a Plan of Reorganization of the debtor, do hereby, (in conformity with Rule 19(6) of the above entitled Court, jointly and severally,

(1) state that the points upon which said re-

spective appellants severally intend to rely in support of their respective [2773] appeals, are the points set forth in the statements of said respective appellants which were filed in said District Court pursuant to Rule 75(d) of the Rules of Civil Procedure for the District Courts of the United States, and which are contained in the certified transcript of record on appeal herein at pages 1266 to 1291, thereof, and constitute a part of said record on appeal; said respective statements of points are, by reference, incorporated herein and made a part hereof; and

(2) designate as the parts of the record on appeal which said respective appellants think necessary for the consideration of their respective points, the entire record on appeal as made up by the Clerk of said District Court and certified by him, and lodged and filed herein December 31, 1940, and the original exhibits which (in conformity with Rule 75(i) of said Rules of Civil Procedure for the District Courts of the United States and pursuant to order of said District Court made, filed and entered November 27, 1940) were sent to the above entitled Court, in lieu of copies thereof, by the Clerk of said District Court, and constitute a part of the record on appeal on said appeals.

Dated: December 31, 1940.

[Endorsed]: Filed Jan. 14, 1941.

Paul P. O'Brien, Clerk. [2783]

[Title of Circuit Court of Appeals and Cause.]

STIPULATION FOR ORDER DISPENSING WITH PRINTING OF CERTAIN PORTIONS OF RECORD ON APPEAL.

Whereas, certain portions of the record on appeal on the several appeals heretofore taken to the above entitled Court from the order made, filed and entered in the above proceeding by the District Court of the United States for the Northern District of California, Southern Division, on August 15, 1940, approving the Plan of Reorganization of the debtor, which are hereinafter described, are voluminous and of a character and size that would not readily lend themselves to reproduction in a printed record; and

Whereas, the substance of the essential parts or legal effect of certain other portions of such record, hereinafter described, are set forth in other portions of said record, and especially in the "Stipulation as to Facts not in Dispute", which appears at pages 960 to 1134, inclusive, in the record as certified to the above entitled Court by the Clerk of the District Court (hereinafter called the "certified record"); and [2783]

Whereas, the parties hereto are of the opinion that it would be impractical and unduly burdensome to require such certain portions of such record to be printed and that the inclusion of said respective portions of said record in the printed record on appeal is unnecessary.

Now, therefore, the parties hereto, in consideration of the premises, do (subject to the approval of the above entitled Court) hereby stipulate as follows:

1. The portions of said record on appeal which are next hereinafter described (and whenever possible are, further, identified by references to the pages in the certified record where they appear) need not be printed or included in the printed record on appeal, on the aforesaid appeals, viz:

(a) The petition for order respecting the filing of claims and division of creditors and stockholders into classes, filed August 20, 1935, being Item Number 3 in Appellants' Designation (pp. 13 to 18);

(b) Order of the District Court dividing claims into classes filed October 20, 1935, being Item Number 4 in Appellants' Designation (pp. 19 to 25);

(c) Petition for appointment of trustees and order respecting notice of hearing of said petition filed August 31, 1935, being Item Number 5, in Appellants' Designation (pp. 26 to 35); [2784]

(d) Claim of A. C. James Co., filed September 10, 1935, being Item Number 6 in Appellants' Designation (pp. 36 to 47);

(e) Claim of The Western Pacific Railroad Corporation filed September 12, 1935, being Item Number 7 in Appellants' Designation (pp. 38 to 49);

(f) Claim of Western Realty Company filed September 13, 1935, being Item Number 8 in Appellants' Designation (pp. 50 to 51);

(g) Claim of The Railroad Credit Corporation filed on or before September 15, 1935, being Item Number 9 in Appellants' Designation (pp. 52 to 107);

(h) Claim filed on behalf of holders or pledgees of General and Refunding Mortgage bonds on or before September 15, 1935, being Item Number 10 in Appellants' Designation (pp. 108 to 110);

(i) Order appointing trustees filed September 23, 1935, being Item Number 11 in Appellants' Designation (pp. 111 to 116);

(j) Order of September 30, 1935, modifying order appointing trustees, being Item Number 12 in Appellants' Designation (pp. 117 to 118);

(k) The exhibits included in, annexed to and/or which form a part of the transcript of the hearings before the Interstate Commerce Commission [2785] of the United States, hereinafter called the "Commission" simply (said transcript being Item Number 16 in Appellants' Designation, and being set forth in the certified record at pages 1755 to 2770, inclusive, thereof) other than the exhibits numbered 1, 22, 27, 29, 32, 33, 38, 42, 76, 125 and 127 to 148, inclusive. None of the original Exhibits included in, annexed to or which form

part of said transcript of the hearings before said Commission, except those numbered 1, 42, 76 and 127 to 148, (both numbers included), are included in the certified record, but all said original Exhibits, other than those last mentioned, have, heretofore in accordance with Rule 75(i) of the Rules of Civil Procedure for the District Courts of the United States and an order of the District Court made, filed and entered November 27, 1940, been transmitted to the above entitled Court as part of the record on appeal herein, in lieu of copies thereof;

(l) That part of the transcript of the hearings before the Commission (said transcript being Item Number 16 in the Appellants' Designation, and being set forth in the certified record at pages 1755 to 2770, inclusive, thereof) which reports the arguments of counsel relating to petitions of intervention filed on behalf of the Missouri Pacific Railroad Company and Guy A. Thompson, Trustee of the Missouri Pacific Railroad Company, being part of the proceedings had before the Commission at the afternoon hearing held on December 9, 1936, the part to [2786] be omitted from the printed record on appeal being pages 630 to 673, inclusive, of said transcript and being set forth in the certified record at pages 2394 to 2437, inclusive, thereof.

(m) That part of the transcript of the hearings before the Commission which reports the arguments of counsel before the Commission at the hearings held on November 17, 1937 and January 20, 1939, the part to be omitted from the printed record on appeal being pages 710 to 1003, inclusive, of said transcript and being set forth in the certified record at pages 2475 to 2769, inclusive thereof.

(n) Order dated December 30, 1938, of the Commission, granting a rehearing, being Item Number 19 in Appellants' Designation (pp. 305 to 306);

(o) Petition of A. C. James Co. for leave to intervene before the Commission, dated April 18, 1936, being Item Number 21 in Appellants' Designation (pp. 373 to 387);

(p) Petition of The Railroad Credit Corporation for leave to intervene before the Commission dated March 14, 1936, being Item Number 22 in Appellants' Designation (pp. 388 to 391);

(q) Petition of Irving Trust Company, as trustee under the General and Refunding Mortgage of the debtor, for leave to intervene before the Commission dated November 19, 1936, being Item Number 23 in Appellants' Designation (pp. 392 to 398); [2787]

(r) Order of the District Court made November 8, 1939, fixing the time within which

objections to the plan of reorganization and claims for equitable treatment might be filed and designating December 8, 1939, as the date for filing such objections and claims, being Item Number 28 in Appellants' Designation (pp. 797 to 802);

(s) Petition of A. C. James Co. for leave to file petition of intervention, and order granting such petition, both filed December 1, 1939, petition of A. C. James Co. for leave to intervene and order made and filed, December 4, 1939, fixing time and place for hearing such petition, notice of filing petition of intervention of A. C. James Co., order granting petition of intervention of A. C. James Co., made and filed December 4, 1939, and notice of making and entry of said order, being Item Number 29 in Appellants' Designation (pp. 803 to 817);

(t) Petition of The Western Pacific Railroad Corporation for leave to file petition of intervention and order granting such petition and fixing date of hearing upon petition of intervention, both filed December 7, 1939, petition of intervention of The Western Pacific Railroad Corporation and notice of filing same, both dated December 7, 1939, order granting petition of intervention, dated December 11, 1939, and notice of making and entry of said order, being Item Number 30 in Appellants' Designation (pp. 818 to 831); [2788]

(u) Petitions, orders and notices relating to intervention of Irving Trust Company as trustee under the General and Refunding Mortgage of the debtor, being Item Number 31 in Appellants' Designation (pp. 832 to 851);

(v) Notice from Clerk of the District Court respecting filing of notices of appeal, being Item Number 52 in Appellants' Designation (pp. 1245 to .....);

(w) Bonds for costs on appeal filed September 20, 1940, by respective appellants, being Item Number 53 in Appellants' Designation (pp. 1246 to 1256);

(x) Verified statement of Crocker First National Bank of San Francisco as Corporate Trustee under the Debtor's First Mortgage, filed in the District Court on September 4, 1935, showing the principal amount of First Mortgage Bonds outstanding under said First Mortgage, being Item Number 1 in the additional portion of the record, proceedings and evidence to be included in the record on appeal filed in said District Court on October 21, 1940 by appellees Frederick H. Ecker, John W. Stedman and Reeve Schley, as a Committee for a Group of Institutional Holders of First Mortgage Bonds of the Western Pacific Railroad Company, and Crocker First National Bank and Samuel Armstrong, as trustees under the First Mortgage dated June 26, 1916 of The

Western Pacific Railroad Company (said designation [2789] being hereinafter called "Institutional Bondholders and First Mortgage Trustees Designation"), (pp. 1292 to 1293);

(y) Opinion and Order of the District Court entered November 9, 1935, confirming appointment of Trustees of the Debtor, being Item Number 2 in Institutional Bondholders and First Mortgage Trustees' Designation (pp. 1294 to 1299);

(z) Petition of the First Mortgage Trustees for order impounding income, for leave to intervene, and other relief, filed March 5, 1936, and Order to Show Cause, dated March 5, 1936, fixing time and place of hearing on said Petition, being Item Number 3 in Institutional Bondholders and First Mortgage Trustees' Designation (pp. 1300 to 1482);

(aa) Order entered March 9, 1936, permitting First Mortgage Trustees to intervene and making provision as to rights of said trustees with respect to income of the debtor, being Item Number 4 in Institutional Bondholders and First Mortgage Trustees' Designation (pp. 1483 to 1485);

(bb) Petition of the Institutional Bondholders' Committee for leave to intervene in proceedings before the Commission, dated June 25, 1936, and filed on or about June 26, 1936, being

Item Number 5 in Institutional Bondholders and First Mortgage Trustees' Designation (pp. 1486 to 1599); [2790]

(cc) Order of Commission entered July 9, 1936, permitting intervention of Institutional Bondholders' Committee in proceedings before Commission, being Item Number 6 in Institutional Bondholders and First Mortgage Trustees' Designation (pp. 1501 to .....);

(dd) Petition of the First Mortgage Trustees for leave to intervene before the Commission, dated October 23, 1936, and filed on October 26, 1936, being Item Number 7 in Institutional Bondholders and First Mortgage Trustees' Designation (pp. 1502 to 1509);

(ee) Petition of the Institutional Bondholders' Committee for leave to file petition of intervention and order granting such petition, both filed November 22, 1939; petition of intervention, verified November 16, 1939, of the Institutional Bondholders' Committee and notice of filing of same dated November 22, 1939, both filed November 22, 1939; order granting Institutional Bondholders' Committee's petition of intervention entered November 27, 1939, and notice of making and entry of said order dated November 28, 1939, being Item Number 13 in Institutional Bondholders and First Mortgage Trustees' Designation (pp. 1599 to 1623);

(ff) Petition of Reconstruction Finance Corporation for leave to file petition of intervention and order granting such petition and fixing date of hearing on petition of Intervention, both filed December 7, 1939; petition of intervention of Reconstruction Finance Corporation and notice of filing of same, both dated December 7, 1939, and order granting petition of intervention dated December 11, 1939, [2791] and notice of making and entry of said order, being Item Number 14 in Institutional Bondholders and First Mortgage Trustees' Designation (pp. 1624 to 1633);

(gg) Claim of Reconstruction Finance Corporation filed on or before September 12, 1935, being Item Number 3 in Reconstruction Finance Corporation Designation (pp. 1667 to 1680);

(hh) Petition of Reconstruction Finance Corporation for leave to intervene before the Commission, dated October 5, 1936, being Item Number 4 in Reconstruction Finance Corporation Designation (pp. 1681 to 1687);

(ii) Order of the Commission dated October 7, 1936, granting intervention to Reconstruction Finance Corporation, being Item Number 5 in Reconstruction Finance Corporation Designation (pp. 1688 to ....);

(jj) Petition of Reconstruction Finance Corporation for leave to file petition of intervention and order granting such petition and

fixing date of hearing on petition of intervention, both filed in District Court December 7, 1939, petition of intervention of Reconstruction Finance Corporation and notice of filing same, both dated December 7, 1939, and order granting petition of intervention dated December 11, 1939, and notice of making and entry of said order, being Item Number 9 in Reconstruction Finance Corporation Designation (pp. 1624 to 1633); [2792]

(kk) The original exhibits offered in evidence at the hearing in the District Court on January 22, 1940 of the objections to the Plan of Reorganization of the Debtor, certified to said Court by the Commission *except* (1) the "Stipulation as to Facts not in Dispute" (less Exhibits "G" and "H" thereto mentioned in the succeeding paragraph [ll] hereof) and the memorandum of corrections therein, identified by the witness, Charles Elsey, which said stipulation and memorandum are included in the certified record at pages 960 to 1133, inclusive, thereof; (2) the following exhibits introduced by Irving Trust Company, viz: Exhibits 1(a) to 1(i), inclusive; page 1 of Exhibit 2 and Exhibits 4 to 12, inclusive; (3) the exhibit introduced by The Western Pacific Railroad Corporation and marked its Exhibit 1, and (4) the exhibits introduced by Reconstruction Finance

Corporation and marked its Exhibits 1 and 2; none of said original exhibits, other than those mentioned in the subparagraph marked (1) hereof, are included in the certified record, but all of said original exhibits, other than those last mentioned, have heretofore, in accordance with Rule 75[i] of the aforesaid Rules of Civil Procedure and the aforesaid Order of the District Court made November 27, 1940, been transmitted to the Clerk of the above entitled Court, in lieu of copies thereof; [2793]

(11) Exhibits "G" and "H" to the aforesaid "Stipulation as to Facts not in Dispute" (pp. 1080 to 1112).

2. That, notwithstanding the provisions of Rules 19 and 21 of the Rules of the above entitled Court, the aforesaid portions of said record on appeal which shall not be printed or included in the printed record on appeal on said appeals, shall constitute and be considered and treated as part of the record on appeal on said appeals and a part of the record on any petition for certiorari to the Supreme Court of the United States that may be filed by any party in this cause, may be referred to by any party in brief or argument, and shall be given the same force and effect as though they were printed and included in the printed record on appeal on said appeals; and

3. That the above entitled Court (or the Senior Circuit Judge of said Court) may, without notice

to any of the parties hereto, make an order approving this stipulation, and, otherwise, providing in accordance therewith.

No. 26591-S

In the Matter of THE WESTERN PACIFIC RAILROAD COMPANY,

Debtor.

ORDER FOR CORRECTION OF RECORD ON APPEAL, FOR SUPPLEMENTING RECORD, AND CERTIFICATION OF SUPPLEMENTAL RECORD.

The motion of A. C. James Co., filed April 3, 1941, for an order correcting the record upon the appeals which are pending in the United States Circuit Court of Appeals for the Ninth Circuit from the order of this Court made August 15, 1940, which approved a plan of reorganization of the above mentioned debtor, by directing the Debtor's Trustees to file with the Clerk of this Court as a part of the record in the proceeding for the reorganization of the Debtor certain statements, particularly described and set forth in said motion, came on regularly this day for hearing. Messrs. Whitman, Ransom, Coulson & Goetz (by Horace E. Whiteside, Esq.) and Messrs. Garret W. McEnerney and Andrew F. Burke, appeared on behalf of the movant; Messrs. Cravath, de Gersdorff, Swaine & Wood and Messrs. Morrison, Hohfeld, Foerster, Shuman & Clark (by Herbert W. Clark, Esq.) appeared for

Institutional Bondholders Committee; C. M. Clay, Esq., and Messrs. Brobeck, Phleger & Harrison, (by Mr. James S. Moore, [1*] Jr.) appeared for Reconstruction Finance Corporation; Messrs. Sloss & Turner (by E. D. Turner, Esq.) appeared for The Western Pacific Railroad Corporation; Allan P. Mathew, Esq. (by John O. Moran, Esq.) appeared for T. M. Schumacher, Esq., and Sidney M. Ehrman, Esq., Trustees of the Debtor; Messrs. Chickering & Gregory and Messrs. Milbank, Tweed & Hope (by Mr. John Philip Coghlan, Jr.) appeared for Crocker First National Bank of San Francisco and Samuel Armstrong as Trustees under the First Mortgage of the Debtor; Messrs. Pillsbury, Madison & Sutro and Messrs. Davies, Auerbach, Cornell & Hardy (by Felix T. Smith, Esq.) appeared for Irving Trust Company, as Trustees under the General and Refunding Mortgage of the Debtor, and Messrs. Pillsbury, Madison & Sutro and Messrs. Milbank, Tweed & Hope (by Felix T. Smith, Esq.) appeared for Chase National Bank of the City of New York.

Evidence was adduced in support of said motion from which it appeared and the Court finds that service of said motion and of Points and Authorities in support thereof and of notice of the hearing thereof was duly made upon all parties to the proceeding, as provided by the Rules of this Court and that the incorporation of certain of the statements particularly described and set forth in said Motion has been agreed to by the parties, as next appears.

It was stipulated in open Court by and on behalf of the parties represented at said hearing, as aforesaid, that the motion of the movant to the extent hereinafter specified in this order might be granted and that this order might be made. To the extent specified in this order no objection was made to the granting of said motion or the awarding of the relief sought therein.

Counsel for the movant stated that Messrs. Pierce & Greer and Charles W. Dooling, Esq., counsel for the Debtor, and Edward G. [2] Buckland, Esq., and W. J. Kane, Esq., counsel for The Railroad Credit Corporation, consented to the granting of the motion in the form and to the extent that the Court might deem proper and that, except to the extent granted herein, said motion might be deemed withdrawn,

Now, Therefore, in consideration of the premises and good cause appearing therefor, It Is Hereby Ordered as follows:

1. That the Trustees of the Debtor shall (and they are hereby directed to) forthwith cause to be filed herein, the statements (copies of which are annexed hereto in "Exhibit A") showing the combined results of the operation of the properties of the Debtor and its subsidiaries, of the character and for the periods next specified:

(a) the monthly income system statement showing the combined results of operations of the properties of the Debtor and its subsidiaries

for the month of December, 1938, and the period January 1 to December 31, 1938, in comparison with the combined operating results for the corresponding periods of the year 1937, as prepared by the Accounting Department under the supervision of the Debtor's Trustees;

(b) the monthly income system statement showing the combined results of operations of the properties of the Debtor and its subsidiaries for the month of December, 1939, and the period January 1 to December 31, 1939, in comparison with the combined operating results for the corresponding periods of the year 1938, as prepared by the Accounting Department under the supervision of the Debtor's Trustee;

(c) the monthly income system statement showing the combined results of operations of the properties of the Debtor and its subsidiaries for the month of December, 1940, and the period January 1, to December 31, 1940, in comparison with the combined operating results for the corresponding periods of the year 1939, as prepared by the Accounting Department under the supervision of the Debtor's Trustees;

(d) the statement of the combined results of operations of the properties of the Debtor and its subsidiaries for the month of January, 1941, in comparison with January, 1940, and prepared by the Accounting De- [3] partment under the supervision of the Debtor's Trustees.

2. That the above mentioned statements and this order shall constitute a supplemental record and a part of the record upon the pending appeals from said order of August 15, 1940, and that as soon as said statements shall have been filed herein, the Clerk of this Court do (and he is hereby directed to) transmit a copy of the statements so filed herein to the Clerk of the United States Circuit Court of Appeals, accompanied by a copy of this order and his Certificate that said copies of said statements and order are true copies of said respective documents, filed in his office, and that, in accordance with this order, the same are and shall constitute a supplemental record and part of the record upon said pending appeals.

3. That the Trustees of the Debtor shall (and they are hereby directed to) cause to be filed herein, promptly, correct copies of each and every monthly statement that shall be, hereafter, prepared and issued, up to and including the date of the argument of said pending appeals, in the United States Circuit Court of Appeals for the Ninth Circuit, (of sufficient number to permit the filing of one of such copies, the certification of another and the service by the Clerk upon each of the interested parties of another copy of each such statement filed with him), which shall show the combined results of operations of the properties of the Debtor and its subsidiaries (corresponding to the monthly statement for January, 1941, with comparisons to January, 1940, which is particularly described in par.

1[d] above); and that as soon as any such monthly statement shall have been so filed, the Clerk of this Court do (and he is hereby directed to) forward a copy of said statement to the Clerk of said United States Circuit Court of Appeals, accompanied by his Certificate that such monthly statement is a true copy of the document so filed [4] and that, in accordance with this order, the same is and shall constitute a supplemental record and part of the record upon the aforesaid appeals from said order of August 15, 1940.

4. That upon the filing of copies of any statement such as is mentioned in the preceding paragraph (3) hereof the Clerk of this Court shall cause one copy of said statement to be served upon counsel for each of the parties herein.

Done in open Court this 7th day of April, 1941.

A. F. ST. SURE,
Judge. [5]

CERTIFICATE OF CLERK TO TRANSCRIPT OF RECORD ON APPEAL.

District Court of the United States, Northern District of California, Southern Division.

I, Walter B. Maling, Clerk of the United States District Court, for the Northern District of California, Southern Division, do hereby certify that the foregoing pages, numbered from 1 to 10, inclusive, contain full, true and correct copies of (1) the "Order for Correction of Record on Appeal, for Supplementing Record, and Certification of Supplemental Record", made by said Court, on April 7, 1941, (hereinafter called the "Order" simply) and filed in my office on the same date; (2) of the statements particularly described in said Order, and copies whereof are appended thereto, and (3) statement of the combined results of operations of the properties of the debtor and its subsidiaries for the month of February, 1941, in comparison with the month of February, 1940, prepared by the accounting department of the debtor under the supervision of the debtor's Trustees, which said Order and said statements (in accordance with the terms of said Order) constitute and are supplement to and a part of, the record upon the appeals heretofore taken by the above named Appellants from the order of the above mentioned Court, made, filed and entered, August 15, 1940, which approved a Plan of [11] Reorganization of the above named debtor.

I further certify that the cost of preparing and certifying to the correctness of said Order and of

said statements, is the sum of $2.40, and that said amount has been paid to me by the attorneys for said Appellants.

In Witness Whereof, I hereunto set my hand and affix the seal of said District Court, this 21st day of April, 1941.

[Seal] WALTER B. MALING,
Clerk,

By E. H. NORMAN,
Deputy Clerk. [12]

District Court of the United States
Northern District of California

CERTIFICATE OF CLERK TO TRANSCRIPT OF RECORD ON APPEAL

I, Walter B. Maling, Clerk of the District Court of the United States, for the Northern District of California, do hereby certify that the foregoing one page, numbered from 1 to 2, inclusive, contain a full, true, and correct transcript of the supplemental records and proceedings in the matter of The Western Pacific Railroad Co., Debtor, No. 26591-S in Bankruptcy, and forwarded in accordance with order of Apr. 7, 1941, for Correction of Record on Appeal, for Supplementing Record and Certification of Supplemental Record as the same now remain on file and of record in my office.

I further certify that the cost of preparing and certifying the foregoing supplemental transcript of record on appeal is the sum of Two Dollars and that the said amount has been paid to me by the Attorneys for the appellant herein.

In Witness Whereof, I have hereunto set my hand and affixed the seal of said District Court at San Francisco, California, this 12th day of May, A. D. 1941.

[Seal] WALTER B. MALING
Clerk

[Endorsed]: Original filed Sep. 13, 1941 with Clerk, U. S. Dist. Court, San Francisco. [1]

District Court of the United States
Northern District of California

CERTIFICATE OF CLERK TO TRANSCRIPT OF RECORD ON APPEAL

I, Walter B. Maling, Clerk of the District Court of the United States, for the Northern District of California, do hereby certify that the foregoing page, numbered 1, contain a full, true, and correct transcript of the supplemental records and proceedings in the matter of The Western Pacific Railroad Co., No. 26591-S in Bankruptcy, and forwarded in accordance with order of Apr. 7, 1941, for Correction of Record on Appeal, for Supplementing Record and Certification of Supplemental Record, as the same now remain on [redacted] and of record in my office.

I further certify that the cost of preparing and certifying the foregoing supplemental transcript of record on appeal is the sum of Two Dollars and that the said amount has been paid to me by the Attorney for the appellant herein.

In Witness Whereof, I have hereunto set my hand and affixed the seal of said District Court at San Francisco, California, this 13th day of September A. D. 1941.

(Seal) WALTER B. MALING,
Clerk.
By C. W. CALBREATH,
Deputy Clerk.

[Endorsed]: No. 9714. United States Circuit Court of Appeals for the Ninth Circuit. Filed Sept. 13, 1941. Paul P. O'Brien, Clerk.

CERTIFICATE OF CLERK TO TRANSCRIPT OF RECORD ON APPEAL

I, Walter B. Maling, Clerk of the District Court of the United States, for the Northern District of California, do hereby certify that the foregoing page numbered 1, *inclusive,* contain a full, true, and correct transcript of the records and proceedings in the matter of The Western Pacific Railroad Co., No. 26591-S in Bankruptcy, and forwarded in accordance with the order of Apr. 7, 1941, "For Correction of Record on Appeal, for Supplementing Record and Certification of Supplemental Record" as the same now remain on file and of record in my office.

I further certify that the cost of preparing and certifying the foregoing supplemental transcript of record on appeal is the sum of Two (2) Dollars and that the said amount has been paid to me by the Attorney for the appellant herein.

In Witness Whereof, I have hereunto set my hand and affixed the seal of said District Court at San Francisco, California, this 14th day of November A. D. 1941.

(Seal) WALTER B. MALING,
Clerk.
E. H. NORMAN,
Deputy Clerk.

Before: Denman, Mathews and Stephens, Circuit Judges.

ORDER DIRECTING FILING OF OPINION AND FILING AND RECORDING OF DECREE

By direction of the Court, Ordered that the typewritten opinion this day rendered by this court in above cause be forthwith filed by the clerk, and that a decree be filed and recorded in the minutes of this court in accordance with the opinion rendered.

[Title of Circuit Court of Appeals and Cause.]

Appeals from the District Court of the United States for the Northern District of California, Southern Division.

OPINION

Before Denman, Mathews and Stephens, Circuit Judges.

Mathews, Circuit Judge:

These appeals are from an order of the District Court[1] which, in a proceeding by The Western Pacific Railroad Company, a railroad corporation (hereafter called the debtor), under § 77 of the Bankruptcy Act, 11 U.S.C.A. § 205, approved a

---

(1) 34 F. Supp. 493, 505-509.

plan of reorganization which had been approved and certified to the court by the Interstate Commerce Commission.[2] The debtor has outstanding:

1. Trustees' certificates issued pursuant to paragraph (3) of subsection (c) of § 77 in the principal sum of $10,000,000. These certificates are owned and held by Reconstruction Finance Corporation.[3]

2. First mortgage 5% bonds dated June 26, 1916, due March 1, 1946, in the principal sum of $49,290,100, with accrued and unpaid interest[4] thereon of $13,143,776—a total of $62,433,876—secured by a mortgage (hereafter called the first mortgage) of which Samuel Armstrong and Crocker First National Bank of San Francisco are trustees.

3. General and refunding mortgage 5% bonds (hereafter called refunding bonds) dated January 1, 1932, due January 1, 1957, in the principal sum of $18,999,500, secured by a mortgage (hereafter called the refunding mortgage) of which Irving Trust Company is trustee.[5] These bonds are pledged to secure payment of the notes hereafter mentioned. They have not been issued for any other purpose.

4. Notes in the principal sum of $2,963,000, with accrued and unpaid interest thereon of $899,870—a total of $3,862,870—secured by the pledge of re-

(5) Irving Trust Company succeeded The Chase National Bank as trustee on November 13, 1936.

funding bonds in the principal sum of $10,750,000 and other collateral. These notes are owned and held by Reconstruction Finance Corporation.

5. Notes in the principal sum of $2,445,610, with accrued and unpaid interest thereon of $146,503[6]—a total of $2,592,113—secured by the pledge of refunding bonds in the principal sum of $4,000,000 and other collateral. These notes are owned and held by Railroad Credit Corporation.

6. Notes in the principal sum of $4,999,800, with accrued and unpaid interest thereon of $1,249,950—a total of $6,249,750—secured by the pledge of refunding bonds in the principal sum of $4,249,500 and other collateral. These notes are owned and held by A. C. James Company.

7. Unsecured indebtedness to The Western Realty Company in the principal sum of $50,000, with accrued and unpaid interest thereon of $11,667—a total of $61,667.

8. Unsecured indebtedness to The Western Pacific Railroad Corporation (hereafter called the holding company) in the principal sum of $5,768,791, with accrued and unpaid interest thereon of $1,980,429—a total of $7,749,220.

9. Six per cent preferred stock of the par value of $28,300,000 (283,000 shares of the par value of $100 each) owned and held by the holding company.

---

(6) These are the Commission's figures (233 I.C.C. 452). They differ slightly from those mentioned in the court's opinion (34 F. Supp. 497).

10. Common stock of the par value of $47,500,000 (475,000 shares of the par value of $100 each) owned and held by the holding company.

The plan provides, in effect, that the above mentioned securities and obligations shall be canceled and that, in lieu thereof, the reorganized company[7] shall issue new first mortgage 4% bonds dated January 1, 1939, due January 1, 1974, in the principal sum of $10,000,000, secured by a new first mortgage; income mortgage 4½% bonds (hereafter called income bonds) dated January 1, 1939, due January 1, 2014, in the principal sum of $21,219,075, secured by a so-called income mortgage; new 5% preferred stock of the par value of $31,850,297 (318,502.97 shares of the par value of $100 each); and 319,441 shares of new common stock without par value. These securities are to be distributed as follows:

To Reconstruction Finance Corporation, $10,000,000 of the new first mortgage bonds,[8] $1,185,200 of income bonds, $1,777,800 of new preferred stock and 15,788 shares of new common stock;[9] to the

---

(7) The reorganized company may be the debtor or a new corporation to which all assets of the debtor shall be transferred.

(8) Thus the $10,000,000 of receivers' certificates now held by Reconstruction Finance Corporation would be exchanged for new first mortgage bonds, dollar for dollar.

(9) Thus, for each $1,000 of indebtedness evidenced by notes now held by it, Reconstruction Finance Corporation would receive $306.82 of income bonds, $460.12 of new preferred stock and 4.087 shares of new common stock.

holders of first mortgage bonds now outstanding, $19,716,040 of income bonds, $29,574,060 of new preferred stock and 230,593 shares of new common stock;[10] to Railroad Credit Corporation, $154,111 of income bonds, $241,681 of new preferred stock and 35,425 shares of new common stock;[11] to A. C. James Company, $163,724 of income bonds, $256,756 of new preferred stock and 37,635 shares of new common stock.[12] The Western Realty Company and the holding company are excluded from participation in the reorganization.

Objections to the plan were filed by the debtor, the refunding mortgage trustee, the holding company, Railroad Credit Corporation, A. C. James Company, The Western Realty Company and a bondholders' committee[13] representing holders of some of the first mortgage bonds now outstanding.

---

(10) Thus, for each $1,000 of indebtedness evidenced by first mortgage bonds now outstanding, holders thereof would receive $315.79 of income bonds, $473.69 of new preferred stock and 3.693 shares of new common stock.

(11) Thus, for each $1,000 of indebtedness evidenced by notes now held by it, Railroad Credit Corporation would receive $59.45 of income bonds, $93.24 of new preferred stock and 13.666 shares of new common stock.

(12) Thus, for each $1,000 of indebtedness evidenced by notes now held by it, A. C. James Company would receive $26.20 of income bonds, $41.08 of new preferred stock and 6.021 shares of new common stock.

(13) The committee consists of Frederick H. Ecker, John W. Stedman and Reeve Schley.

The objections were overruled and the plan was approved. The debtor, the refunding mortgage trustee, the holding company, Railroad Credit Corporation and A. C. James Company have appealed.

Neither the debtor nor the refunding mortgage trustee was adversely affected by the plan or by the order approving it. Hence neither of them was entitled to appeal. King v. Buttolph, 9 Cir., 30 F.2d 769; Loomis v. Gila County, 9 Cir., 101 F.2d 827; In re Western Pacific R. R. Co., 9 Cir., 122 F.2d 807. Their appeals are therefore dismissed.

The holding company objected to the plan on the ground that it is not fair and equitable,[14] but is unfair and inequitable, in that it excludes the holding company from participation in the reorganization. The objection states that the debtor is not insolvent, but has property of a value greatly in excess of its liabilities. Obviously, if the statement is true, the holding company is entitled to participate in the reorganization, and its exclusion therefrom is unfair and inequitable. Thus, to determine the question raised by the holding company's objection, it was necessary to determine the value of the debtor's property as of the effective date of the plan—January 1, 1939. Consolidated Rock Products Co. v. Du Bois, 312 U.S. 510, 517-525.

Railroad Credit Corporation objected to the plan on the ground that it is unfair and inequitable, in that it discriminates unfairly in favor of Recon

(14) Bankruptcy Act, § 77(e)(1), 11 U.S.C.A. § 205(e)(1).

struction Finance Corporation and the holders of first mortgage bonds now outstanding.[15] A. C. James Company objected to the plan on the ground that it is unfair and inequitable in that it discriminates unfairly in favor of Reconstruction Finance Corporation, Railroad Credit Corporation and the holders of first mortgage bonds now outstanding.[16]

That Reconstruction Finance Corporation, Railroad Credit Corporation, A. C. James Company and the holders of first mortgage bonds now outstanding should participate in the reorganization is conceded. Fairness requires that their participation should be in proportion to the value of their respective claims. The question raised by the objections of Railroad Credit Corporation and A. C. James Company was whether the plan complies with that requirement. To determine this question, it was necessary to determine, as of the effective date of the plan, the value of (1) each of the claims of Reconstruction Finance Corporation,[17] (2) the claim of Railroad Credit Corporation, (3) the claim of A. C. James Company, (4) the claims of the holders of first mortgage bonds now outstanding, (5) the $10,000,000 of new first mortgage bonds, (6) the $21,219,075 of income bonds, (7) the 318,502.97 shares of new preferred stock and (8) the 319,441 shares of new

(15) See footnotes 8-11.

(16) See footnotes 8-12.

(17) Reconstruction Finance Corporation has two claims—one as holder of trustees' certificates, one as holder of the debtor's notes.

common stock which the plan provides shall be distributed to said claimants.

To determine the value of the above mentioned claims, it was necessary to determine the value of (1) the debtor's entire property, (2) the property subject to the first mortgage now outstanding, (3) the $18,999,500 of refunding bonds pledged to secure the claims of A. C. James Company, Railroad Credit Corporation and Reconstruction Finance Corporation and (4) the other collateral pledged to secure each of said claims. To determine the value of the refunding bonds, it was necessary to determine the value of (1) the property subject to the refunding mortgage only and (2) the property subject both to the refunding mortgage and to the first mortgage now outstanding. This, of course, necessitated a determination as to which of the debtor's property is, and which is not, subject to each mortgage. Consolidated Rock Products Co. v. Du Bois, supra.

To determine the value of the new first mortgage bonds, income bonds, new preferred stock and new common stock mentioned above, it was necessary to determine the value of (1) the debtor's entire property, (2) the property which would be subject to the new first mortgage and (3) the property which would be subject to the income mortgage.

Subsection (e) of § 77 provides: "If it shall be necessary to determine the value of any property for any purpose under this section, the [Interstate Commerce] Commission shall determine such value

and certify the same to the court in its report on the plan." In this case, as has been seen, it was necessary to determine the value of (1) the debtor's entire property, (2) each of the claims of Reconstruction Finance Corporation, (3) the claim of Railroad Credit Corporation, (4) the claim of A. C. James Company, (5) the claims of the holders of first mortgage bonds now outstanding, (6) the $10,000,000 of new first mortgage bonds, (7) the $21,219,075 of income bonds, (8) the 318,502.97 shares of new preferred stock, (9) the 319,441 shares of new common stock, (10) the property subject to the first mortgage now outstanding, (11) the $18,999,500 of refunding bonds pledged to secure the claims of Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company, (12) the other collateral pledged to secure each of said claims, (13) the property subject to the refunding mortgage only, (14) the property subject both to the refunding mortgage and to the first mortgage now outstanding, (15) the property which would be subject to the new first mortgage and (16) the property which would be subject to the income mortgage. It thus became the duty of the Commission to determine these values and certify them to the court. That duty was not performed.

Lacking the requisite valuation data, the court was in no position to exercise the "informed, independent judgment" which appraisal of the fairness of a plan of reorganization entails. Consoli-

dated Rock Products Co. v. Du Bois, supra. See, also, National Surety Co. v. Coriell, 289 U.S. 426, 436; First National Bank v. Flershem, 290 U.S. 504, 525; Case v. Los Angeles Lumber Products Co., 308 U.S. 106, 115. Therefore, instead of approving the plan, the court should have entered an order dismissing the proceeding or, in its discretion and on motion of any party in interest, referring the proceeding back to the Commission for further action.[18]

The District Court's opinion states (34 F. Supp. 501): "It cannot be gainsaid that the Commission knows all about the debtor, its property, its history, financial and otherwise, its traffic and revenue, and its financial structure. No official body in the country is better qualified by reason of experience, ability and specialized knowledge than is the Commission to find the ultimate facts as to the debtor in relation to any of the matters mentioned." The statement indicates a possible misconception. Subsection (e) of § 77 provides:

> "Upon the certification of a plan by the Commission to the court, the court shall give due notice to all parties in interest of the time

(18) Subsection (e) of § 77 provides: "If the judge shall not approve the plan, he shall file an opinion, stating his conclusions and the reason therefor, and he shall enter an order in which he may either dismiss the proceedings, or in his discretion and on motion of any party in interest refer the proceedings back to the Commission for further action * * *"

within which such parties may file with the court their objections to such plan, and such parties shall file, within such time as may be fixed in said notice, detailed and specific objections in writing to the plan and their claims for equitable treatment. The judge shall, after notice in such manner as he may determine to the debtor, its trustee or trustees, stockholders, creditors, and the Commission, hear all parties in interest in support of, and in opposition to, such objections to the plan and such claims for equitable treatment. After such hearing, and without any hearing if no objections are filed, the judge shall approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; (2) the approximate amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets, for expenses and fees incident to the reorganization, have been fully disclosed so far as they can be ascertained at the date of such hearing, are reasonable, are within such maximum limits as are fixed by

the Commission, and are within such maximum limits to be subject to the approval of the judge; (3) the plan provides for the payment of all costs of administration and all other allowances made or to be made by the judge . . ."

In determining whether a plan of reorganization satisfies the requirements of subsection (e), the court is not concluded by any determination made by the Commission, but may, and must, exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject. Initially, however, the duty of determining the value of any property for any purpose under § 77 rests on the Commission, not on the court.

Order reversed and proceeding remanded with directions to dismiss it or, in the court's discretion and on motion of any party in interest, refer it back to the Commission for further action.

[Endorsed]: Opinion. Filed Nov. 28, 1941. Paul P. O'Brien, Clerk.

Appellees.

DECREE

Appeal from the District Court of the United States for the Northern District of California, Southern Division.

This Cause came on to be heard on the Transcript of the Record from the District Court of the United States for the Northern District of California, Southern Division, and was duly submitted:

On Consideration Whereof, it is now here ordered, adjudged, and decreed by this Court, that the appeals of the Western Pacific Railroad Company and Irving Trust Company, as trustee, be, and hereby are dismissed, and that the order of the said District Court in this cause approving a plan of reorganization be, and hereby is reversed, with costs in favor of the appellants, The Western Pacific Railroad Corporation, Railroad Credit Corporation and A. C. James Co., and against the

appellees, and that this cause be, and hereby is remanded to the said District Court with directions to dismiss it or, in the court's discretion and on motion of any party in interest, refer it back to the Commission for further action.

It Is Further Ordered, Adjudged, and Decreed by this Court, that the appellants, The Western Pacific Railroad Corporation, Railroad Credit Corporation, and A. C. James Co., recover against the appellees for their costs herein expended, and have execution therefor.

[Endorsed]: Filed and entered November 28, 1941. Paul P. O'Brien, Clerk.

[Title of Circuit Court of Appeals and Cause.]

CERTIFICATE OF CLERK, U. S. CIRCUIT COURT OF APPEALS FOR THE NINTH CIRCUIT TO RECORD CERTIFIED UNDER RULE 38 OF THE REVISED RULES OF THE SUPREME COURT OF THE UNITED STATES.

I, Paul P. O'Brien, as Clerk of the United States Circuit Court of Appeals for the Ninth Circuit, do hereby certify the foregoing two thousand six hundred and seventy-six (2,676) pages, numbered from and including 1 to and including 2676, to be a full, true and correct copy of the entire record, excluding certain original exhibits, of the above-entitled case in the said Circuit Court of Appeals, made pursuant to request of counsel for the appellees, and certified under Rule 38 of the Revised Rules of the Supreme Court of the United States, as the originals thereof remain on file and appear of record in my office.

Attest my hand and the seal of the said the United States Circuit Court of Appeals for the Ninth Circuit, at the City of San Francisco, in the State of California, this 17th day of December, 1941.

No.

IN THE MATTER OF

of

THE WESTERN PACIFIC RAILROAD COMPANY, a corporation,

Debtor.

FREDERICK H. ECKER, JOHN W. STEDMAN and REEVE SCHLEY, constituting the INSTITUTIONAL BONDHOLDERS COMMITTEE,

Petitioners,

vs.

WESTERN PACIFIC RAILROAD CORPORATION, a corporation; A. C. JAMES CO., a corporation; THE RAILROAD CREDIT CORPORATION, a corporation; THE WESTERN PACIFIC RAILROAD COMPANY, a corporation; IRVING TRUST COMPANY, a corporation, as substituted Trustee under the General and Refunding Mortgage of Western Pacific Railroad Company; RECONSTRUCTION FINANCE CORPORATION; and CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO and SAMUEL ARMSTRONG, as Trustees under the First Mortgage of The Western Pacific Railroad Company, a corporation,

Respondents.

PETITION FOR A WRIT OF CERTIORARI TO THE UNITED STATES CIRCUIT COURT OF APPEALS FOR THE NINTH CIRCUIT

To the Honorable the Chief Justice and the Associate Justices of the Supreme Court of the United States:

Your petitioners, Frederick H. Ecker, John W. Stedman and Reeve Schley, constituting the Committee[1] representing a Group of Institutional Holders of the First Mort-

---

[1]The Committee was permitted to intervene in the proceeding before the Interstate Commerce Commission by order entered July 9, 1936 (R. 2620) and in the proceeding before the District Court by order entered November 27, 1939 (R. 2620).

gage Bonds of the Debtor,[1] organized pursuant to the provisions of Section 77(p) of the Bankruptcy Act [11 U. S. C. § 205 (p)], respectfully pray for a writ of certiorari to the United States Circuit Court of Appeals for the Ninth Circuit to review a Decree entered November 28, 1941, by said Court, reversing an Order of the United States District Court for the Northern District of California, Southern Division.

The District Court, in a proceeding for the reorganization of The Western Pacific Railroad Company, the Debtor, under Section 77 of the Bankruptcy Act (11 U. S. C. § 205), by Order entered August 15, 1940, approved the plan of reorganization (hereinafter called the Commission Plan) formulated and approved by the Interstate Commerce Commission (hereinafter called the Commission) and certified by it to the District Court (R. 1600). On appeal by several junior interests, the Circuit Court of Appeals for the Ninth Circuit entered the Decree here sought to be reviewed, remanding the proceeding to the District Court with directions to dismiss it, or in the Court's discretion or on motion of any party in interest, to refer it back to the Commission for further action. The Decree also imposes costs of the appeal upon the creditors who defended the Commission Plan before the District Court and the Circuit Court of Appeals.

The opinion of the Circuit Court of Appeals interprets, your petitioners submit erroneously, the decision of this

[1]The members of the Group are John Hancock Mutual Life Insurance Company; Metropolitan Life Insurance Company; Mutual Benefit Life Insurance Company; New York Life Insurance Company; Prudential Insurance Company of America; Travelers Insurance Company; and The Chase National Bank of the City of New York. Their aggregate holdings of First Mortgage Bonds are $16,641,400, principal amount, out of a total of $49,290,100, or 34%.

Court in *Consolidated Rock Products Co.* v. *DuBois*, 312 U. S. 510 (1941). It bases its Decree primarily upon a finding that Section 77 imposed the duty upon the Commission to make 16 specific determinations of value in terms of dollars and cents, and a further finding that "That duty was not performed" (R. 2671), despite specific findings by the Commission that the claims of unsecured creditors and the equity of the stockholders "have no value" and specific evaluations of the other existing claims in terms of the proposed new securities.

OPINIONS BELOW

The Commission's Original Report and Order, dated October 10, 1938 (R. 194), approving a plan for the reorganization of the Debtor, is reported at 230 I. C. C. 61. The Commission's Report and Order on further consideration, dated June 21, 1939 (R. 300), modifying its plan for reorganization of the Debtor, is reported at 233 I. C. C. 409. The Commission's Order dated September 19, 1939 (R. 884), denying the petition of the Debtor seeking modification of the Commission Plan, is reported at 236 I. C. C. 1.

The opinion of the District Court, dated August 15, 1940 (R. 1569), approving the Commission Plan, is reported at 34 F. Supp. 493. The opinion of the Circuit Court of Appeals, dated November 28, 1941 (R. 2663), reversing the District Court, has not yet been officially reported.

JURISDICTION

The jurisdiction of this Court is invoked under Section 240(a) of the Judicial Code, as amended by the Act of February 13, 1925 [28 U. S. C. § 347(a)], and Section

24(c) of the Bankruptcy Act [11 U. S. C. § 47(c)]. The Decree of the Circuit Court of Appeals for the Ninth Circuit was entered November 28, 1941 (R. 2675-6).

STATEMENT

This proceeding is the first in which review has been sought before this Court of a plan of reorganization for a railroad corporation, formulated pursuant to the provisions of Section 77 of the Bankruptcy Act (11 U. S. C. § 205). The findings of the Commission and the basic legal principles adopted by the Commission in the distribution of new securities under the Commission Plan, affirmed and approved by the District Court, but now disapproved by the Circuit Court of Appeals for the Ninth Circuit, are substantially the same as the findings made, and the principles adopted, in numerous other railroad reorganizations under Section 77, some of which are pending in district courts and others of which have been approved by various district courts and are now pending on appeal in various circuit courts of appeals.[1]

The Debtor filed its petition under Section 77, August 2, 1935 (R. 11, 18). The proceedings before the Commission, in which hearings commenced March 23, 1936, culminated September 28, 1939, in the certification of the Commission Plan by the Commission to the District Court (R. 1571).

---

[1]The Circuit Court of Appeals for the Seventh Circuit, on December 4, 1941, reversed the order of the District Court of the United States for the Northern District of Illinois, Eastern Division, approving the plan of reorganization for the *Chicago, Milwaukee, St. Paul and Pacific R. R.* As hereinafter pointed out, this decision (not yet reported) is in some respects in conflict with that of the Circuit Court of Appeals for the Ninth Circuit in the instant case, but in other respects is in accord.

The effective date of the Commission Plan.

Hereinafter the following abbreviations are used: RFC—Reconstruction Finance Corpora- RCC—Railroad Credit Corporation; ACJ—A. C. James Co.; WP Corp.—Western ic Railroad Corporation.

The RFC Notes, the RCC Notes, and the ACJ Notes are collectively secured, in the ic amounts hereinafter stated, by all of the $18,999,500, principal amount, of the Debtor's nding Bonds. No Refunding Bonds have been issued except for such pledge.

The RFC Notes are secured by the pledge of $10,750,000 of said Refunding Bonds and by ond lien upon $2,000,000 of Refunding Bonds pledged under the RCC Notes.

The RCC Notes are secured by the pledge of $4,000,000 of Refunding Bonds, of which 0,000 were repledged with it by ACJ, and by a second lien on all the collateral pledged RFC.

The ACJ Notes are secured by the pledge of $4,249,500 of Refunding Bonds and by a d lien upon $2,000,000 of Refunding Bonds originally pledged under the ACJ Notes but lged by ACJ under the RCC Notes.

n addition, both the RFC Notes and the RCC Notes are secured by certain so-called "ac- nodation collateral", not owned by the Debtor, but pledged to secure said Notes by WP

The RCC Notes are also secured by a first lien on the Debtor's distributive share in und established by the Marshalling and Distributing Plan, 1931. The right of RFC and to resort to this collateral is not affected by the Commission Plan (R. 271, 394-5).

Western Realty Co. is a wholly owned subsidiary of WP Corp., and a small part of the ured debt of the Debtor stands in its name.

2. New Capitalization under the Commission Plan (R. 1575)

Title of issue	Presently to be issued	Annual charges
Undisturbed existing equipment obligations	$ 2,750,050	$ 94,202
First Mortgage 4% Bonds, Series A, due January 1, 1974	10,000,000	400,000
Total annual fixed charges		$ 494,202
Mandatory Capital Fund		500,000
Income Mortgage 4½% Bonds, Series A, due January 1, 2014. Interest cumulative to 13½%, otherwise non-cumulative	21,219,075	954,858
Total funded debt	$33,969,125	
Total annual charges (fixed and contingent) and Capital Fund		$ 1,949,060
Income Mortgage Sinking Fund		106,095
Participating 5% Preferred Stock ($100 par value). Dividends non-cumulative, participating share for share with Common Stock in dividends declared in any year after dividends have been declared on Common Stock at rate of $3 per share	31,850,297	1,592,515
Total securities with par value	$65,819,422	
Total annual charges, Capital Fund, and Preferred dividend requirements		$ 3,647,670
Common Stock (without par value)	319,441 shs.	

3. Distribution under the Commission Plan

The claim of the First Mortgage to a first lien, subject to the Trustees' Certificates, upon substantially all the Debtor's assets, except the securities of certain subsidiary corporations specifically pledged with the Refunding Mortgage Trustee,[1] was disputed, and the value of the collateral upon which the Refunding Mortgage is admittedly a first

[1] In 1934, pursuant to an agreement extending the payment of 1934 interest on the Debtor's First Mortgage Bonds, RFC,

lien was also disputed. In order to allocate the new securities, the Commission preliminarily decided the disputed lien questions, deciding them in favor of the First Mortgage, but expressly subject to ultimate determination by the District Court.[1] The Commission also decided the disputed value questions, in the manner hereinafter stated.

The Commission then found that "the equity of the existing stock has no value," that "the claims of the unsecured creditors have no value," that the securities allocable to the RFC Notes, RCC Notes, and ACJ Notes are "inadequate in value to satisfy their claims," and that "the equity of" RCC in the collateral pledged with RFC "has no value". After making the additional findings hereinafter stated, the Commission excluded from participation in the reorganization the unsecured claims and stock held by WP Corp. and Western Realty Co., and distributed the new capitalization as follows (R. 1578):

Existing Securities of Debtor	New First Mortgage 4% Bonds Series A	New Income Mortgage 4½% Bonds Series A	New 5% Preferred Stock Series A ($100 Par)	New Common Stock (No Par)
First Mortgage 5% Bonds		$19,716,040	$29,574,060	230,593 shs.
RFC (In exchange for Trustees' Certificates and RFC Notes)	$10,000,000	1,185,200	1,777,800	15,788 shs.
RCC Notes		154,111	241,681	35,425 shs.
ACJ Notes		163,724	256,756	37,635 shs.
Totals	$10,000,000	$21,219,075	$31,850,297	319,441 shs.

ACJ, RCC and WP Corp. (the only other creditors affected by the Commission Plan) agreed to subordinate their claims against the Debtor until this 1934 interest (still unpaid) is paid in full. Accordingly the case presents no problem as to the relative rights of senior and junior creditors in unmortgaged assets. I. C. C. Exhibits 117-121 (not printed pursuant to stipulation at R. 2532-8, 2614).

[1]Record references for all the factual statements made under this heading are hereinafter set forth.

4. Valuation Data before the Commission

The Commission Plan was formulated by the Commission itself after more than a dozen different plans had been proposed by the various parties and upon evidence occupying 743 pages of the record. This evidence included physical descriptions of the properties of the Debtor and each of its subsidiaries (R. 1861-3, 1886-1898, 2049-2060), comprehensive data concerning valuation proceedings affecting those properties conducted by the Commission under Section 19(a) of the Interstate Commerce Act (R. 2044-8), analyses of the Debtor's investment accounts (R. 1874-5, 1885-1894, 2040-2043, 2058-2060) and its financial history (R. 1859-1873), detailed studies of revenues and expenses for the years since 1922, broken down as among the Debtor and its subsidiaries (R. 1958, 2033-2092, 2121-8, 2239-2260), detailed forecasts of revenues and earnings for the then future years 1936 to 1940, also broken down as among the Debtor and its subsidiaries (R. 1959-1998, 2027-2032, 2118-2193), and testimony with reference to the probable effect upon revenues and net income of the rehabilitation program then under way (R. 1985-6, 2145-2152, 2172-2185, 2225-2233), of the Northern California Extension, completed in 1931 (R. 1942-8, 2094-8), and of the Dotsero Cutoff, completed in 1934 (R. 1939, 2099-2100). Extensive testimony also dealt with the various lien controversies between the First Mortgage and the Refunding Mortgage (R. 2295-2563).

After hearings, the Commission's Bureau of Finance served upon all the parties a Tentative Report proposing findings and conclusions, including a reorganization plan (R. 116). Following exceptions to this Tentative Report by all parties and a hearing before the full Commission, the

Commission entered its Report and Order dated October 10, 1938, making findings and approving a plan of reorganization (R. 194). Upon petitions for modifications of this Report and Order and a hearing before the full Commission, the Commission entered its Report and Order dated June 21, 1939 (R. 300), modifying both the findings and the plan of reorganization embodied in its earlier Report and Order. After a petition by the Debtor for a "further rehearing and modification", the Commission entered its Report and Order dated September 19, 1939 (R. 884), reaffirming its findings and conclusions of October 10, 1938, as modified June 21, 1939, and denying the Debtor's petition.

5. Findings Made by the Commission

The Commission defined the requirements of "the public interest" with respect to the new capital structure as follows:

"The public interest is not defined, but it would seem obvious that to be compatible with the public interest, the plan must provide a capital structure for the reorganized company which will give it a reasonable opportunity to function efficiently and continuously as a going concern. This requires that the capitalization should not exceed a conservative appraisal of the assets to be taken over by the reorganized company, and that proposed charges, whether fixed or contingent, be within its probable earning power" (R. 243-4).

"If this reorganization is to be successful, the capital structure of the reorganized company must be realistically related to its actual earning power, and consideration given to the investment in its property only to the extent that

such investment is justified by the probable earnings reasonably foreseeable for the future" (R. 244).

The Commission then made the following findings which the Circuit Court of Appeals for the Ninth Circuit has now held to be inadequate:

A. *Findings as to capitalization*

1. Following analysis of the various proposals of the different parties in the light of the Debtor's earnings experience: "if these data are not to be ignored, * * * the fixed interest charges of the reorganized company should not initially and substantially exceed $500,000, if the reorganized company is to maintain its property properly and secure necessary new capital in the future" (R. 246).

2. Following further analysis of the Debtor's earnings experience and analysis of the testimony respecting prospective earnings: "On the basis of the facts heretofore recited with respect to traffic and earnings, we find that the total annual fixed and contingent interest charges of the reorganized company, plus requirements for the capital and sinking funds should not exceed $2,000,000 per annum" (R. 253).

3. Following further analysis of the proposals of the various parties with respect to the new stock issuable and further analysis of the Debtor's forecasts of future earnings: "As hereinbefore stated, the debtor's estimate of income available for interest averaged $2,715,306 per year for the period 1936-40, inclusive, the maximum amount for any one year in the period (1940) being $3,769,836. That

amount, with prior charges of $1,898,223, would permit the payment of dividends at the rate of 5 percent on only $37,432,000 of stock. It is obvious, therefore, that based on the most optimistic estimate of earnings of record, the capitalization of the reorganized company must be maintained within strict limits if any material return on its capital stock is to be expected and the shares of its stock are not to become mere tokens for stock market speculation. It is true that considered alone, the data pertaining to the rate-making value of the debtor's property, and its investment, would support capitalizations approximating those proposed in the three plans. We have hereinbefore stated, however, the reasons why, in our opinion, those factors can not be of controlling importance in a determination of the capital structure for the reorganized company. Considering all relevant data of record, we find that the approved plan should provide for the immediate issue by the reorganized company of not to exceed 295,740-3/10 shares of preferred stock of the par value of $100 per share, and not more than 313,703 shares of no-par-value common stock"[1] (R. 257).

4. On the basis of the foregoing findings the Commission, by its Report and Order dated October 10, 1938, fixed the permissible new capitalization (R. 259, 268). By its later Report and Order dated June 21, 1939, it slightly modified this capitalization to that provided by the Commission Plan (R. 309-310).

---

[1]The amounts of Preferred and Common Stock thus found permissible were slightly modified by the Commission's Report and Order dated June 21, 1939, and the amounts thereof fixed as provided by the Commission Plan. (R. 310-311).

B. *Findings as to classes excluded from participation*

5. "We have hereinbefore found that considering the past, present, and probable future earnings of the debtor, its investment, the data of record pertaining to its rate-making value, and all other relevant data of record, we can not approve the issue of new securities in a greater amount than that hereinbefore approved. On the same basis and for the same reasons we find, therefore, that there is no equity over and above the securities hereinbefore approved; that *the equity of the existing stock has no value,* and hence holders of such stock are not entitled to participate in the plan. Further, considering that the reorganized company's income available for interest and dividends must total $4,318,035, plus any undistributed profits tax that will be payable, before dividends of $3 per share may be paid on the new common stock, it is clear that *even though all the securities remaining available for distribution after satisfying the claims of the first-mortgage bondholders are allotted to the other secured creditors, such securities will be inadequate in value to satisfy their claims.* For this reason, and for the reasons stated with respect to the finding that the equity of the existing stock has no value, we find that *the claims of the unsecured creditors,* of the Western Pacific Railroad Corporation, and of the Western Realty Company, *have no value,* and hence no securities or cash should be distributed under the plan in respect to those claims"[1] (R. 269-270) (Italics added).

---

[1]The Commission had no problem of dealing with the rights of unsecured creditors to participate in unmortgaged assets. See p. 6, n. 1, *supra.*

6. Upon the Debtor's petition for modification of the Reports and Orders dated October 10, 1938, and June 21, 1939, by increasing the amount of Income Bonds $4,475,000, decreasing the amount of Preferred Stock $3,278,137, and increasing the no par value Common Stock 205,859 shares: "The allocation of 8.54 percent of the new common stock to the Western Pacific Railroad Corporation, in its capacity as a general creditor, and 23.59 percent to it in its capacity as a stockholder, and 0.07 percent to the Western Realty Company as a general creditor would require a reversal of our findings that those interests have no value, or a finding that the concessions required of the senior interests are justified and are compensated by concessions to be made by the junior interests. This proposed sharing of common stock affects also our previous finding as to what constitutes fair and equitable treatment of part of the interests of the first-mortgage bondholders. The debtor's petition does not set forth or offer to prove facts indicating that our findings with respect to these matters were erroneous or furnish any other basis for a finding that the proposed new plan would be fair and equitable". (R. 889-890).

C. *Findings as to allocation of new securities*

7. The Commission found that all of the permissible new fixed charge securities would be absorbed by undisturbed equipment obligations and new First Mortgage Bonds required to pay or refund the admittedly preferred $10,000,000 Trustees' Certificates (R. 247, 311).

8. As already stated, the Commission found that the First Mortgage was a legal or equitable first lien upon all of the assets of the Debtor, except cash and securities

specifically held in pledge by the Refunding Trustee. In its Report and Order dated October 10, 1938, the Commission found that the First Mortgage Bondholders' claim of $49,290,100 principal amount, plus accrued interest, secured by these assets, entitled them to all the new Income Mortgage Bonds ($19,716,040), and all the new Preferred Stock ($29,574,060), a par value total of $49,290,100, and 154,241 shares, or slightly less than half, of the new no par Common Stock (R. 270). This allocation was modified by the Report and Order dated June 21, 1939, primarily by increasing the no par Common Stock allocable to the existing First Mortgage Bondholders, as against their accrued interest of $13,143,777, to 230,593 shares and by allocating additional Income Bonds and Preferred Stock to the existing Refunding Bonds (R. 317).

9. The securities pledged under the Refunding Mortgage[1] were a note and stock of Tidewater Southern Railway Company, all of whose funded debt and 97.5% of whose stock are owned and so pledged by the Debtor (R. 313), Central California Traction Company, of whose bonds and stock the Debtor owns and has pledged 33⅓% (R. 314), and Alameda Belt Line Company, of whose stock the Debtor owns and has pledged 50% (R. 315). The Commission analyzed the property accounts, earnings records and earnings prospects of these three companies. In the light of the contributions which the Debtor has been compelled to make to continue the operations of the last two mentioned companies[2] and their poor earnings record, the

---

[1]In addition there are so pledged some admittedly worthless notes of other subsidiaries (R. 1095).

[2]These unreimbursed contributions totalled more than $384,000 for the six years 1930-1935 (R. 2084, 2088).

Commission found that "The holdings of the debtor in the securities of the Central California Traction Company and the Alameda Belt Line, * * *, do not appear to be of much value, except as the debtor through such holdings may be able to secure traffic for its lines which it might not otherwise be able to secure. * * * Thus the lien on the securities of these two companies *has no material value*" (R. 314-5) (Italics added). In respect of Tidewater Southern, the Commission found that the rate-making value of all its property as of December 31, 1935 was $1,850,000 (R. 314). This was 1.3% of the comparable System valuation found by the Commission as of the same date. The Commission also found Tidewater Southern's reported earnings and the revenues from traffic interchanged between it and other lines of the Debtor's System (R. 314). Such reported earnings for the six-year period 1930-1935 (R. 2077) were 7.2% of System earnings, as adjusted (R. 1592), for the same period before deducting from System earnings the Debtor's contributions (R. 2084, 2088) to the deficits of the other two properties on whose securities the Refunding Mortgage was also a first lien. But, said the Commission, "It is apparent that the Tidewater Southern is a paying railroad and also a valuable feeder for the debtor. But its earnings are, to a large extent, dependent upon the divisions of joint rates accorded it by the debtor" (R. 315).[1] After the foregoing findings and after reference to the cash held by the Refunding Mortgage Trustee (R. 313), the Commission found: "From the foregoing, it ap-

[1]It will be remembered that the Debtor owns all the funded debt and 97.5% of the outstanding stock of Tidewater Southern Railway Company, so that the fairness of these rate divisions was not a matter of importance except in reorganization.

pears that the creditors secured by the general and refunding mortgage bonds should be awarded new income mortgage bonds in the amount of $732,010, and new participating preferred stock of a par value of $1,147,955" (R. 315). The amounts stated represent 3.5% of the total Income Bonds and Preferred Stock to be issued in the reorganization.

10. The RFC Notes, the RCC Notes, and the ACJ Notes were secured by pledge, respectively, of 56.6%, 21.1%, and 22.3% of the outstanding Refunding Bonds. "Having found that" the securities "available for distribution are inadequate in value to satisfy the aggregate claims of these parties" (R. 271) the Commission found that "The value of each of the claims is proportionate to the collateral securing it," (R. 271) and hence that the allotment of new securities representing the pledged Refunding Bonds "should be made on the basis of the collateral held rather than on the amount of the claims" (R. 271).

No findings were made as to the value of so-called "accommodation collateral" held by RFC and RCC, but the right of these parties to resort to this collateral was expressly left unimpaired by the Commission Plan (R. 271, 394-5).

11. To insure payment or refunding of the $10,000,000 Trustees' Certificates upon terms not unduly onerous to the other creditors, the Commission Plan, as approved by the Report and Order dated June 21, 1939, provided for treating RFC's entire "bundle of rights" (its $10,000,000 Trustees' Certificates and the RFC Notes) together, by allotting RFC $10,000,000 of new First Mortgage Bonds (to be taken by RFC in exchange for the Trustees' Certificates or to be purchased by RFC at par and the proceeds thereof ap-

plied to the payment of the Trustees' Certificates) and allotting to the RFC Notes treatment *pari passu* with that allotted the Debtor's existing First Mortgage Bonds. With respect to RFC's acceptance of the new First Mortgage Bonds in exchange for its Trustees' Certificates, the Commission found "that in consideration of such purchase and the value of the collateral securing its claim, the Finance Corporation receive for the secured notes of the debtor held by it, treatment equal to that accorded the holders of the debtor's existing first-mortgage bonds" (R. 312). RFC was thus allotted, to offset the difference between the value of its $10,000,000 short term Trustees' Certificates and the value of the $10,000,000 new long term First Mortgage Bonds, to be issued under an open mortgage, $771,025 more new Income Mortgage Bonds and $1,128,282 more new Preferred Stock, but 29,360 less shares of new no par value Common Stock than it would have received solely on the basis of the Refunding Bonds pledged as collateral for the RFC Notes.

12. The "allocation of reorganization securities to the Finance Corporation exhausts the value of the collateral pledged by the debtor under the notes held by the Finance Corporation, and * * * *the equity of the Credit Corporation in such collateral has no value*" (R. 316) (Italics added).

13. On the basis of the findings referred to in the foregoing paragraphs 8, 9, 10 and 12, the Commission divided between the RCC Notes and the ACJ Notes the Income Bonds and Preferred Stock found by the Commission to be allocable as against their respective pledged proportions of the Refunding Bonds. The no par Common Stock remaining after filling out the existing First Mortgage Bonds with 230,593 shares against their accrued interest of $13,143,777, and allotting the RFC Notes *pari passu*

treatment, was then divided between RCC and ACJ. Since this Common Stock necessarily represented (a) the value of the second lien of the Refunding Mortgage upon those assets of the Debtor upon which the First Mortgage was a first lien (R. 267, 271) and (b) any hope for future value of the assets upon which the Refunding Mortgage was a first lien but which the Commission found to be of "no material value" (R. 315), it was allocated to the RCC Notes and ACJ Notes proportionately to the Refunding Bonds held by them as collateral.

14. The ultimate finding of the Commission was: "These securities [*i.e.*, all the new securities available for distribution] represent the equitable equivalent of the debtor's assets available for the satisfaction of claims * * *. Based upon our conclusion as to the relative priority, value, and equity of the various claims and the value of the new securities available in exchange therefor, we find that the new securities should be allotted as follows: (1) First-mortgage bondholders, $19,716,040 of income-mortgage bonds, $29,574,060 of preferred stock, and 230,593 shares of common stock (the common stock to be taken at the price of $57 a share); (2) Finance Corporation, $1,185,200 of income-mortgage bonds, $1,777,800 preferred stock, and 15,788 shares of common stock (the common stock to be taken at a price of $57 a share); (3) Credit Corporation, $154,111 of income mortgage bonds, $241,681 preferred stock, and 35,425 shares of common stock, (the common stock to be taken at a price of $62 a share); and (4) James Company, $163,724 of income mortgage bonds, $256,756 preferred stock, and 37,635 shares of common stock (being the amount of common stock which bears to the amount of common stock allotted to the claim of the

Credit Corporation the same proportion that the principal amount of general and refunding bonds of the debtor held by the James Company as collateral for its claim bears to the principal amount of such bonds held by the Credit Corporation for its claim)" (R. 316-318).

The Commission did not specifically find any certain and absolute value in terms of dollars and cents for all or any part of the Debtor's property, for any of the existing claims against or interests in the Debtor, or for any of the new securities contemplated by the Commission Plan. The lack of such findings is held by the Circuit Court of Appeals for the Ninth Circuit to vitiate a[illegible]e other findings and all the conclusions of the Commission.

6. Proceedings before the District Court

Upon certification of the Commission Plan to the District Court, objections and claims for equitable treatment were filed by RCC, ACJ, WP Corp., Western Realty Company, the Debtor, and the Refunding Trustee, which attacked, as to both form and substance, substantially every provision of the Commission Plan. Although the Committee and RFC also filed some objections and claims for equitable treatment, each of them stated that if the District Court approved the Commission Plan as an entirety they would waive their objections (R. 1760-1761, 1770).

Before the District Court, testimony was taken occupying 293 pages of the record (R. 1283-1529; 1530-1567). On August 15, 1940, the District Court filed a 31 page opinion (R. 1569-1600) overruling all of the objections and, after dealing specifically with the Commission's findings of value, determining them to be adequate in form and correct in substance. The District Judge's opinion further

expressed his accord with all of the conclusions of the Commission on the numerous points in dispute.

Pursuant to its opinion, the District Court, on August 15, 1940, entered an Order approving the Commission Plan, adopting the findings of fact made by the Commission, and making all the other findings in respect of the Commission Plan required at that stage of the proceedings by Section 77 (R. 1600-1607).

7. Action of the Circuit Court of Appeals

From the Order last mentioned appeals were taken to the Circuit Court of Appeals for the Ninth Circuit by RCC, ACJ, the Refunding Mortgage Trustee, WP Corp., and the Debtor.[1] Again the appellants attacked almost every aspect of the Commission Plan, although many of the objections argued before the District Court seem to have been abandoned. The Committee, the First Mortgage Trustees and RFC, designated as appellees, defended the Commission Plan as an entirety.

The Order of the District Court was reversed and the proceeding remanded to the District Court "with directions to dismiss it or, in the court's discretion and on motion of any party in interest, refer it back to the Commission for further action" (R. 2674). Without referring to any of the extensive findings of the Commission above recited, or the careful discussion by the District Court of the prob-

---

[1] The appeals of the Refunding Mortgage Trustee and the Debtor were dismissed upon the ground that neither "was adversely affected" (R. 2668). The pledgees of all the Refunding Bonds were parties to the appeal. On December 20, 1941, counsel for the Refunding Trustee sent counsel for the petitioners a copy of a petition for rehearing, which they stated they intended to file in the Circuit Court of Appeals.

lems of value, the Circuit Court of Appeals thus disposed of the case:

> "Subsection (e) of § 77 provides: 'If it shall be necessary to determine the value of any property for any purpose under this section, the [Interstate Commerce] Commission shall determine such value and certify the same to the court in its report on the plan.' In this case, as has been seen, it was necessary to determine the value of (1) the debtor's entire property, (2) each of the claims of Reconstruction Finance Corporation, (3) the claim of Railroad Credit Corporation, (4) the claim of A. C. James Company, (5) the claims of the holders of first mortgage bonds now outstanding, (6) the $10,000,000 of new first mortgage bonds, (7) the $21,219,075 of income bonds, (8) the 318,502.97 shares of new preferred stock, (9) the 319,441 shares of new common stock, (10) the property subject to the first mortgage now outstanding, (11) the $18,999,500 of refunding bonds pledged to secure the claims of Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company, (12) the other collateral pledged to secure each of said claims, (13) the property subject to the refunding mortgage only, (14) the property subject both to the refunding mortgage and to the first mortgage now outstanding, (15) the property which would be subject to the new first mortgage and (16) the property which would be subject to the income mortgage. It thus became the duty of the Commission to determine these values and certify them to the court. That duty was not performed" (R. 2670-2671).

In addition to this holding, the Circuit Court of Appeals "made certain statements which if taken literally do not

comport with the requirements of the absolute priority rule". *Consolidated Rock Products Co.* v. *Du Bois, supra,* 312 U. S. at 530. As in that case, these statements, together with other statements of the Circuit Court of Appeals with reference to the relative functions of the Court and the Commission, require correction by this Court.

The opinion announces this guiding rule for distribution among existing securityholders: "Fairness requires that their participation should be in proportion to the value of their respective claims" (R. 2669). The opinion does not further clarify its announced rule. A mathematical formula based on dollars and cents valuations of properties, existing claims, and new securities seems to be required rather than determination of the relative order of priority of the participating existing claims in the system earnings.

The opinion of the District Court, in addition to expressing the District Judge's own independent analysis of the valuation problem and his own independent conclusions, had said:

> "It cannot be gainsaid that the Commission knows all about the debtor, its property, its history, financial and otherwise, its traffic and revenue, and its financial structure. No official body in the country is better qualified, by reason of experience, ability and specialized knowledge than is the Commission to find the ultimate facts as to the Debtor in relation to any of the matters mentioned" (R. 1588).

Quoting the foregoing statement of the District Court, the opinion of the Circuit Court of Appeals states:

> "The statement indicates a possible misconception. * * *
>
> * * * * * * *

> "In determining whether a plan of reorganization satisfies the requirements of subsection (e), the court is not concluded by any determination made by the Commission, but may, and must, exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject * * *" (R. 2672-4).

The significance of this comment of the Circuit Court of Appeals, as evidencing its belief that the District Court was under a duty to redetermine *all* of the issues involved in the reorganization and assert its own "informed independent judgment" if in any respect its views differed from those of the Commission, is accentuated by the fact that the District Court, following the quotation commented on by the Circuit Court of Appeals, had said (R. 1596-7):

> "The two issues of (1) amount and character of capitalization and (2) distribution of new securities are closely related. The determination of the amount and character of the capitalization (a legislative function affecting the public interest) is exclusively within the province of the Commission. The only qualification, if any, is that the court shall independently determine whether, in the exercise of its jurisdiction, the Commission has acted fairly, within the bounds of the Constitution, and not arbitrarily. The determination of the questions relating to the distribution of the new securities, including legal priorities and allocations, involves private rights and is a judicial function, within the province of the court."

QUESTIONS PRESENTED

1. Were the findings that "the equity of the existing stock has no value" and that "the claims of the unsecured

creditors * * * have no value," if supported by the requisite valuation data, sufficient to sustain the conclusions that the holders of such stock and such unsecured creditors are not entitled to participate in the reorganization?

2. Were the findings that the securities available for distribution to the RFC Notes, the RCC Notes and the ACJ Notes against the Refunding Bonds held by them as collateral were "inadequate in value to satisfy the aggregate claims of these parties," and that the "allocation of reorganization securities to" RFC "exhausts the value of the collateral pledged by the debtor" under the RFC Notes and that "the equity of" RCC "in such collateral has no value," if supported by the requisite valuation data, sufficient to support the conclusion that the allocation of new securities representing the pledged Refunding Bonds, as between RFC, RCC and ACJ, "should be made on the basis of the collateral held rather than on the amount of the claims"?

3. Must the allocation of new securities under a Section 77 railroad reorganization plan between mortgage bonds, having liens of different rank on the same assets and also liens on different assets, be "in proportion to the value of their respective claims", determined by absolute dollars and cents valuations (a) of the properties upon which they are, respectively, first liens, and (b) of the new securities proposed to be distributed in the reorganization? Or should each existing class be given its "equitable equivalent of the debtor's assets available for the satisfaction" of its claim in terms of the various classes of new securities, having regard for the relative order of priority of the respective existing claims upon the system earnings at the

various levels represented by the proposed new securities and all other relevant factors, all appraised by the Commission's expert judgment subject to the Court's approval of the result as fair and equitable?

4. Even if other allocations must be made on the basis of the mathematical dollars and cents valuation formula prescribed by the Circuit Court of Appeals, may not the preferred claim of RFC on its $10,000,000 Trustees' Certificates and its junior claim on the RFC Notes be dealt with as an "entire bundle of rights" and on the basis of a practicable and fair compromise in order to obviate the necessity of providing $10,000,000 of new money on terms necessarily more onerous to all present creditors of the Debtor?

5. Was the valuation data contained in the record sufficient to support the findings and conclusions of the Commission as to those entitled to participate in the reorganization and as to the allocations of new securities made by the Commission Plan?

6. What are the respective jurisdictions of the Commission and the Court with respect to approval of a reorganization plan under Section 77? Specifically, does not Section 77 vest in the Commission exclusive jurisdiction (subject only to review for arbitrary exercise) to determine whether a railroad reorganization plan is "compatible with the public interest", including jurisdiction to determine total capitalization, the classification thereof, and the financial details of each class of proposed capitalization?

7. Should not this Court, upon the entire record, reverse the Decree of the Circuit Court of Appeals and

affirm the Order of the District Court, approving the Commission Plan, in order to expedite the reorganization in the public interest and obviate the delay and expense which would otherwise result both to the public and to the private parties involved?

8. Are securityholders who defend in the circuit courts of appeals plans promulgated and approved by the Commission, and also approved by the district courts, liable for the costs of the appeals if the appeals are successful, or should such costs be assessed directly against the debtor's estate?

REASONS RELIED ON FOR THE ALLOWANCE OF THE WRIT

1. Pursuant to Section 77, the Commission has formulated plans of reorganizations for fifteen Class I railroads.[1] Of these plans six have been consummated,[2] the remainder being at various stages of the procedure pre-

[1] *Akron, Canton & Youngstown Ry.*, 228 I. C. C. 645 (1938); *Chicago & Eastern Illinois Ry.*, 230 I. C. C. 199 (1938), 230 I. C. C. 571 (1939); *Chicago Great Western R. R.*, 228 I. C. [2] Akron, Canton & Youngstown Ry.; Chicago & Eastern Illinois Ry.; Chicago Great Western R. R.; Erie R. R.; Louisiana & North West R. R.; and Spokane International Ry.

scribed by Section 77. In thirteen of these plans,[1] classes of stockholders have been excluded from participation, and in four,[2] classes of creditors have also been excluded. In all these plans the findings of the Commission upon which the exclusions of stockholders and creditors and allocations of new securities among existing claims were based, the valuation data upon which the findings were based, and the legal principles applied in allocation were substantially identical in character with those found by the Circuit Court of Appeals for the Ninth Circuit to be inadequate and erroneous in the instant case.

The Securities and Exchange Commission, in dealing with the bankruptcy reorganization of public utility holding companies under Section 11(f) of the Public Utility Holding Company Act (15 U. S. C. § 79k(f)), performing functions similar to those performed by the Interstate Commerce Commission under Section 77 [*Peoples Light and Power Co.*, 2 S. E. C. 829, 847 (1937)], has in many cases predicated its plans upon similar findings and similar valuation data.[3]

If, therefore, the decision of the Circuit Court of Appeals for the Ninth Circuit is to stand, the years of effort and the literally millions of dollars expended by both the Interstate Commerce Commission and the affected security-

holders in all pending railroad reorganizations will have been largely futile. They will all revert to the Commission for detailed dollars and cents valuations of properties and old and new securities, inevitably resulting in long delay and great expense to all concerned. Memory of the Commission's valuation proceedings under the La Follette Act (49 U. S. C. § 19a) and their ultimate futility makes this an unhappy prospect. And then, says the Circuit Court of Appeals for the Ninth Circuit, the district courts must determine anew, by their own independent judgments, not concluded by any determination of the Commission, all of the questions involved in the reorganizations.

If this decision is not required by any existing decision of this Court, and as is believed, is in square conflict with decisions of this Court hereinafter referred to, the public interest will be promoted by the prompt settlement in this Court of all the questions involved.

2. In holding inadequate, as a basis for excluding stockholders from participation in the reorganization, the Commission's finding and certification that "the equity of the existing stock has no value" (and, by parity of reasoning, in holding inadequate the Commission's finding that "the claims of the unsecured creditors * * * have no value" and that "the equity of" RCC in "the collateral pledged" under the RFC Notes "has no value"), the Circuit Court of Appeals for the Ninth Circuit decided an important question of federal law in conflict with the decisions of this Court in *Consolidated Rock Products Co.* v. *DuBois*, *supra*; *Case* v. *Los Angeles Lumber Products Co.*, 308 U. S. 106 (1939), with the decision of the Circuit Court of Appeals for the Seventh Circuit in *In re Chicago, Milwaukee, St. Paul and Pacific R.R.* (December 4, 1941, not yet reported), and with

the decisions of the federal district courts in *In re Akron, Canton & Youngstown Ry.* (not reported, N. D. Ohio, 1939), *In re Chicago & North Western Ry.*, 35 F. Supp. 230, 245 (N. D. Ill., 1940), and *In re Missouri Pacific R.R.*, 39 F. Supp. 436, 444 (E. D. Mo., 1941), being all the district court decisions dealing with the specific point.

The express language of Section 77(e), as well as the decisions of this Court above cited, establish that the fact which necessitates exclusion of any class of existing securityholders from participation in a reorganization is the fact that the claim or interest of that class "has *no* value". *In re 620 Church St. Bldg. Corp.*, 299 U. S. 24, 27 (1936). If absence of value is certified by the Commission to the Court pursuant to subsection (e), and is established by adequate valuation data, it is submitted that it is wholly unimportant to know by how great a margin the claim or interest having no value falls short of having value. Hence, for the purposes of the finding and certification under immediate discussion, the determination of the absolute dollars and cents value of the Debtor's property, while it would be relevant as evidence, seems wholly unnecessary if other adequate valuation data is present to support the finding.[1]

---

[1]Such, apparently, has been the rule followed by the Securities and Exchange Commission under Section 11(f) of the Public Utility Holding Company Act. See particularly *West Ohio Gas Co.*, *supra*, 3 S. E. C. at 1026-7 (1938), where the Commission said:

> "In passing upon the fairness of this plan it is not necessary for us to determine the exact value of the property or the amount at which its value shall be recorded on the books of the reorganized company. The evidence which has been submitted to us points to the conclusion that the property has very little, if any, value in excess of the aggregate amount ($1,755,977) of the claims of the bondholders."

If the decision of the Circuit Court of Appeals for the Ninth Circuit with respect to the findings under discussion is not in conflict with the decisions of this Court above cited, then the decision decided an important question of federal law which has not been, but should be, settled by this Court.

3. In deciding that allocations of new securities between those entitled to participate in a reorganization must be "in proportion to the value of their respective claims," determined in accordance with absolute dollars and cents valuations of properties, existing claims, and new securities, the Circuit Court of Appeals for the Ninth Circuit decided an important question of federal law in conflict with the decisions of this Court in *Consolidated Rock Products Co.* v. *DuBois*, *supra*, and *Case* v. *Los Angeles Lumber Products Co.*, *supra*, with the decisions of the Circuit Court of Appeals for the Seventh Circuit in *Jameson* v. *Guaranty Trust Co.*, 20 F. (2d) 808 (1927), *cert. denied*, 275 U. S. 569 (1927), and of the Circuit Court of Appeals for the Second Circuit in *In re Radio-Keith-Orpheum Corp.*, 100 F. (2d) 22 (1939), *cert. denied*, 308 U. S. 622 (1940), and with the decisions of the federal district courts in *In re Akron, Canton & Youngstown Ry.*, *supra*; *In re Chicago & North Western Ry.*, *supra*; *In re Denver & R. G. W. R. R.*, *supra*; *In re Erie R. R.*, 37 F. Supp. 237 (N. D. Ohio, 1940); *In re Missouri Pacific R. R.*, *supra*, and *In re New York, N. H. & H. R. R.*, *supra*.

While this Court, in its decisions above cited, stressed the necessity for adequate valuation data in order to determine the right of a class to participate in a reorganization and the fairness and equity of allocations among those classes entitled to participate, this Court emphasized that

the real measure of allocation is the earning power of the interests represented by the respective existing classes. And while this Court has held that mere observance of the relative order of priorities was not sufficient to validate a reorganization plan in which stockholders whose equity had no value had been admitted to participation, this Court has never indicated that a plan would be valid which did not recognize the relative priorities of the existing classes in the earning power of the venture, in such manner as might be practicable under all the circumstances. *Northern Pacific Ry.* v. *Boyd*, 228 U. S. 482 (1913); *Kansas City Terminal Ry.* v. *Central Union Trust Co.*, 271 U. S. 445 (1926); *Consolidated Rock Products Co.* v. *DuBois*, *supra*; *Case* v. *Los Angeles Lumber Products Co.*, *supra*.

The relative priorities of different claims against overall earning power may be dependent either upon the relative rank of their claims against the same assets, or, in the case of claims secured by liens upon different assets, upon the varying levels of the venture earnings at which the different assets securing the different claims begin to show earning power. Particularly is this true in the case of a railroad reorganization, where the property securing some bonds may show earning power even though the system as a whole may be operating at a deficit, while the property securing other bonds may not show earning power except at a relatively high level of system earnings.

If allocations among those entitled to participate in a reorganization must recognize the relative order of their priorities with respect to the earning power of the venture, at various levels, allocation cannot be made by any mathematical formula dependent upon absolute dollars and cents valuations of the property, existing claims, or new securities. Absolute dollars and cents valuations must neces-

sarily assume some precise level of earnings to be capitalized at some precise rate, and it would, in the case of a railroad, be illusory to attempt to fix such values at any particular earnings level.[1] The problem of a "fair and equitable" reorganization is, as the Commission said in the instant case, to give to each existing class of securities its "equitable equivalent of the debtor's assets available for the satisfaction" of its claim (R. 316) in terms of the new securities to be issued in the reorganization—new securities which will return the "equitable equivalent" to each existing claim *whatever* may be the level to which the earnings of the reorganized venture may fall or rise. The old claims participating in the reorganization must be fitted into the new capital structure at the levels of their respective priorities in the venture earnings so that, as nearly as may be at any given level of earnings, the new securities will produce for the claimant the equitable equivalent of what would have been produced by his old securities.

Such has been the method of allocation followed by the Commission, not only in the instant case, but in all the other reorganization plans approved by it under Section 77. Such too has been the test applied by all of the district courts which have thus far passed upon such plans whether or not they have approved the Commission's allocations.

This Court's decision in *Consolidated Rock Products Co.* v. *DuBois*, *supra*, does not prevent—it requires—that method of allocation.

---

[1] This Court has recognized that "The very notion of a 'full cash value' for a railroad is in many respects artificial. * * * Whatever may be the pretenses of exactitude in determining such a 'value', to claim for it 'scientific' validity, is to employ the term in its loosest sense." *Nashville, C. & St. L. Ry.* v. *Browning*, 310 U. S. 362, 370 (1940).

The opinion of the Circuit Court of Appeals may also imply that upon determination of all of the values found to be necessary, each class of the new securities is to be distributed in the mathematical proportions stated to each class of existing claims entitled to participate. Patently, therefore, the statement of the Circuit Court of Appeals with respect to allocation, "if taken literally", does "not comport with the requirements of the absolute priority rule" or with the necessity for maintaining the relative priorities, and therefore requires correction by this Court. *Consolidated Rock Products Co.* v. *DuBois, supra,* 312 U. S. at 530.

If this decision of the Circuit Court of Appeals for the Ninth Circuit as to the proper basis for allocation of new securities is not in conflict with the decisions of this Court and of the Circuit Courts of Appeals for the Seventh Circuit and the Second Circuit above cited, then it decided an important question of federal law which has not been, but should be, settled by this Court.

4. If the decision of the Circuit Court of Appeals for the Ninth Circuit means that, since no absolute dollars and cents valuations of the claims and new securities involved were made, a fair and practical compromise of the claims of RFC on the $10,000,000 Trustees' Certificates and on the RFC Notes cannot be effected by treating the two claims as an "entire bundle of rights",[1] in order to obviate the necessity of providing $10,000,000 of new money on onerous terms, the Circuit Court of Appeals for the Ninth Circuit decided an important question of federal law in conflict

---

[1] *Consolidated Rock Products Co.* v. *DuBois, supra,* 312 U. S. at 528.

with the decision of this Court in *Case* v. *Los Angeles Lumber Products Co., supra*, 308 U. S. at 130.

RFC gives up the right to collect $10,000,000 in cash on its one-year Trustees' Certificates, a right obviously readily enforceable. The $10,000,000 new 35-year, open-end First Mortgage Bonds into which RFC is willing to permit its Trustees' Certificates to be funded, are clearly less valuable. How much so, it is difficult to say with exactness. The Commission, as an expert in railroad securities, was competent to make an approximate appraisal. Testimony before the District Court indicated that a proper discount at the time of the District Court hearing was somewhere between 10% and 15% (R. 1530, 1532, 1536, 1554). To offset this sacrifice RFC was given, as against its RFC Notes, more Income Bonds and Preferred Stock, but less no par value Common Stock, than it would have been entitled to strictly upon the basis of the collateral securing these Notes. Both the Commission and the District Court thought the compromise fair. The First Mortgage Bondholders and the First Mortgage Trustees supported it. No evidence impugning its fairness was even offered.

To test the fairness and equity of such practical compromises upon the basis of a mathematical formula dependent upon dollars and cents valuations of properties, old securities, and new securities (which would probably be obsolete the day after they were made) is to adopt a wholly unrealistic approach to practical reorganization problems.

5. In deciding that "lacking the requisite valuation data" the District Court "was in no position to exercise the 'informed, independent judgment' which appraisal of

the fairness of a plan of reorganization entails" (R. 2671), the Circuit Court of Appeals for the Ninth Circuit decided an important question of federal law in conflict with the decisions of this Court in *Consolidated Rock Products Co.* v. *DuBois, supra; Case* v. *Los Angeles Lumber Products Co., supra;* and with the decisions of the federal district courts in *In re Akron, Canton & Youngstown Ry., supra; In re Denver & R. G. W. R. R., supra; In re Erie R. R., supra; In re Louisiana & N. W. R. R., supra; In re Missouri Pacific R. R., supra; In re New York, N. H. & H. R. R., supra.*

The Commission had before it almost every conceivable type of valuation study of the properties of the Debtor and of its subsidiaries. Particularly, it had before it studies of past, present, and then prospective earnings, segregated as among the Debtor and each of its subsidiaries, and thus as between the First Mortgage and the Refunding Mortgage.[1]

Exclusion of Classes

The Commission's finding that the equity of the existing stock has no value, and that the claims of the unsecured creditors have no value, was necessarily a finding that the properties embraced in the reorganization, and the new securities to be issued against those properties, had a value less than $87,981,672.75, the aggregate amount of the secured claims as of the effective date of the Commission Plan.

The Commission's finding that the new no par value Common Stock should be allocated against the claim of the existing First Mortgage Bondholders for accrued interest at the price of $57 per share (after allocating Income

[1]See p. 8, *supra.*

Bonds and Preferred Stock of a principal amount and par value equal to the principal amount of the claims of the existing First Mortgage Bondholders), was necessarily a finding that all the properties and new securities had a value for reorganization purposes not in excess of $84,027,559, which is the aggregate of the proposed new securities having a principal amount or par value, plus the entire 319,441 shares of no par value Common Stock taken at $57 per share.

If the valuation data contained in the record establishes that such properties and new securities have a value for reorganization purposes of not more than $84,027,559, then that valuation data clearly sustains the findings excluding unsecured creditors and stockholders from participation in the reorganization, as well as the findings that the second lien equity of RCC in the collateral pledged to secure the RFC Notes has no value, and that the allocation made to RFC in respect of its Notes "exhausts the value of the collateral pledged by the debtor" for the RFC Notes.

To sustain a finding of value for RCC's equity in the Refunding Bonds pledged to secure the RFC Notes[*] (let alone a value for the unsecured debt or stock), the 1934-1940 average earnings would have to be capitalized on at least a 1.72% basis; the 1930-1940 average earnings on at least a 1.91% basis; the 1922-1940 average earnings on at least a 2.76% basis; and the 1940 adjusted earnings on at least a 3.10% basis.

In the light of these facts it is submitted that no possible useful purpose could have been served by any finding

---

[*] Such a finding would require an over-all value in excess of $84,027,559, the total new capitalization if the no par Common Stock is taken at $57 per share, the price at which it was allotted, to RFC. R. 312, 317.

of the Commission as to the precise amount in dollars and cents by which the value of the properties or of the new securities was less than $84,027,559.

Allocations of New Securities

The problem as to the adequacy of the valuation data to sustain allocations among securityholders entitled to participate in the reorganization is slightly different from the problem of its adequacy to support the exclusion or partial exclusion of various classes.

If the proper basis for allocation between two such claims as the existing First Mortgage Bonds and the existing Refunding Bonds is a determination of the equitable equivalents of the two existing claims in the earning power of the reorganized property, in terms of new securities reflecting such earning power, then your petitioners submit that in the instant case the Commission had before it the requisite financial data and made all the requisite findings and certifications.

Form of Valuation Data

In insisting upon findings of precise dollars and cents valuations, your petitioners submit that the Circuit Court of Appeals for the Ninth Circuit ignored substance for form.

Section 77 does not require formal findings, but merely that, "The commission shall state fully the reasons for its conclusions." Section 14 of the Interstate Commerce Act (49 U. S. C. § 14) requires merely that the Commission make its reports in writing, except in cases where damages are awarded, when findings of fact must

---

[1] See *supra*, pp. 4, 13-19.

be included. In other proceedings, "there are no formal requirements for the findings to be made by the Commission." *United States* v. *Louisiana*, 290 U. S. 70, 80 (1933).

6. In deciding that the District Court "misconceived" its duties under Section 77 and should have exercised its own independent judgment with respect to every determination made by the Commission, the Circuit Court of Appeals for the Ninth Circuit decided an important question of federal law in conflict with the decisions of this Court in *Palmer* v. *Massachusetts*, 308 U. S. 79 (1939), *Palmer* v. *Warren*, 310 U. S. 132 (1940), *United States* v. *Morgan*, 313 U. S. 409 (1941), *Gray* v. *Powell*, 10 U. S. L. W. 4096 (U. S. S. C., December 15, 1941), and with decisions of the federal district courts in *In re Akron, Canton & Youngstown Ry., supra; In re Erie R.R., supra; In re Missouri Pacific R.R., supra; In re New York, N. H. & H. R.R., supra*. If said decision of the Circuit Court of Appeals for the Ninth Circuit is not in conflict with the decisions cited, then it decided an important question of federal law which has not been, but should be, settled by this Court.

There is no question of railroad reorganization practice more important than the demarcation of the functions of the Commission and the courts under Section 77.

Subsection (d) requires that the Commission shall determine that the plan which it approves shall be "compatible with the public interest". The subjects as to which Section 77 requires the District Court to be "satisfied" relate to either (a) matters affecting the private rights of the securityholders, such as the fairness or equity of allocation, or (b) purely formal requirements. The question whether the

plan is "compatible with the public interest" is not included. If the District Court is "satisfied" as to the matters committed to its jurisdiction it *"shall"* approve the plan certified to it by the Commission (Italics added).

If, in the face of this distinction so clearly made by the language of Section 77, the district courts must, as the Circuit Court of Appeals for the Ninth Circuit now indicates, redetermine all questions previously determined by the Commission, then the authority of the Commission and the courts would be hopelessly entangled, rather than "intertwined", it would be substantially impossible for the two bodies to "work cooperatively in reorganizations", and "the judicial process", rather than being "brigaded with the administrative process of the Commission"[1] would be off on a frolic of its own.

Obviously the only sensible interpretation of Section 77, as well as the only practical procedure for reorganization, is that the questions of "public interest", *i.e.*, over-all capitalization, classification of capitalization, and financial details of the new securities, as contrasted with the questions of private rights, shall be determined by the Commission, subject only to judicial review for abuse of administrative power. This Court has many times said that such review should be consistent with the principle that administrative agencies and the courts "are to be deemed collaborative instruments of justice and the appropriate independence of each should be respected by the other." *United States* v. *Morgan, supra,* 313 U. S. at 422.

The District Judge in the instant case recognized and, as his opinion indicates, carefully performed his duty to

---

[1]The quotations are from *Palmer* v. *Massachusetts, supra,* 308 U. S. at 87, and *Palmer* v. *Warren, supra,* 310 U. S. at 138.

decide whether the Commission, in its determination of the questions of public interest, had "acted fairly, within the bounds of the Constitution, and not arbitrarily" (R. 1596-7). To the limited extent of such judicial review, he did regard himself, in the language of the Circuit Court of Appeals (R. 2674) as "not concluded by any determination made by the Commission" and, within the proper demarcation of his jurisdiction, he did exercise his "independent judgment".

7. In view of its failure, in conflict with the decision of this Court in *Continental Illinois National Bank & T. Co.* v. *Chicago, R. I. & P. Ry.*, 294 U. S. 648, 685 (1935), to determine all the objections to the Commission Plan raised on appeal, the Circuit Court of Appeals for the Ninth Circuit has left unanswered important questions which the public interest requires promptly to be settled in this Court.

This Court in *Continental Illinois National Bank & T. Co.* v. *Chicago, R. I. & P. Ry., supra,* said, at page 685:

> "The delay and expense incident to railroad receiverships and foreclosure sales constituted, probably, the chief reasons which induced the passage of § 77; and to permit the perpetuation of either of these evils under this new legislation would be subversive of the spirit in which it was conceived and adopted. Not only are those who institute the proceeding and those who carry it forward bound to exercise the highest degree of diligence, but it is the duty of the court and of the Interstate Commerce Commission to see that they do. Proceedings of this character, involving public and private interests of such magnitude, should, so far as practi-

cable, be given the right of way both by the court and by the commission, to the end that they may be speedily determined."

For nearly eight years the Debtor has been in default in the payment of interest on its First Mortgage Bonds, and for nearly seven of those years this reorganization proceeding has been dragging its weary way through the Commission, the District Court, and the Circuit Court of Appeals, over every obstacle which the junior interests could manage to interpose. As already stated, these junior interests, both before the Commission and in the courts, have attacked substantially every feature of the Commission Plan, including the interest rates on the new securities (notwithstanding that they are less than the interest rates on the existing securities against which they are allocated), the conversion right provided for the new Income Bonds, the participating rights granted to the new Preferred Stock, and the terms of the Sinking Fund and the Capital Fund. They have inspired the Refunding Mortgage Trustee to raise numerous lien questions, many of them so frivolous that they have been abandoned by the Refunding Mortgage Trustee along the road, and all of them determined (clearly correctly) by the Commission and the District Court in favor of the First Mortgage. They have set up mutually contradictory claims with respect to the provision of the Commission Plan that reorganization should be effected without prejudice to any claims on "accommodation collateral," one junior interest contending that the Commission Plan should have expressly released the "accommodation collateral" to its pledgors, and another claiming that the Commission Plan should have expressly appropriated this "accommodation collateral" for the benefit of the claim for which it was pledged.

The substance of many of these objections relates to matters of "public interest" and is within what is submitted to be the exclusive jurisdiction of the Commission. In urging that the "accommodation collateral" should be dealt with directly by the plan although it is not the property of the Debtor, these junior interests request action clearly beyond the jurisdiction of a bankruptcy court. The correctness of the determinations of the Commission and the District Court with respect of these and all other objections will be clear to this Court upon a summary examination of the questions involved.

In view of the great public interest in promoting the prompt reorganization of railroads generally, as well as of the present Debtor, your petitioners urge that this Court, as it recently did in *Securities and Exchange Commission* v. *U. S. Realty & Improvement Co.*, 310 U. S. 434 (1940), and in *Consolidated Rock Products Co.* v. *DuBois, supra,* deal with the entire case upon the entire record.[1] Your petitioners believe that upon such consideration of the case this Court can reach no other conclusion than that the decision of the Circuit Court of Appeals for the Ninth Circuit should be reversed and the order of the District Court dated August 15, 1940, affirmed. If, however, this Court shall, as your petitioners do not believe will be the case, find any error in the action of the Commission or the District Court in the entire record, your petitioners urge that this Court, in addition to correcting such error, also affirm such of the determinations of the District Court as may be found to be without error. Only by such action can repetition of pos-

[1]In both of these cases, presumably in order to expedite the particular proceeding and all other similarly situated reorganizations, this Court decided several important questions of bankruptcy reorganization law although rulings on some of those questions were not necessary in order to affirm or reverse the Circuit Court of Appeals.

sible errors already made be avoided without ultimate correction in this Court at some indefinite future time, and the reorganization of the Debtor consummated with some degree of expedition.

8. In assessing the costs of the appeal against the Committee, the First Mortgage Trustees, and RFC, named as appellees before it (R. 2675-6), the Circuit Court of Appeals for the Ninth Circuit has decided an important question of federal law which has not been, but should be, settled by this Court.

Such costs are not nominal. In the instant case they aggregate $4,239.29, and in the more complicated cases already pending in various circuit courts of appeals they will greatly exceed that amount.

Notwithstanding the fact that Section 77 contemplates that the Commission may, as it did in the instant case, formulate its own plan of reorganization independently of any proposals of any of the parties, whereas under Chapter X of the Bankruptcy Act the Securities and Exchange Commission acts only in an advisory capacity in the formulation of reorganization plans (§ 172, 11 U. S. C. § 573), Section 77, unlike Chapter X (§ 208, 11 U. S. C. § 608), provides no specific machinery whereby the Commission may appear in the proceeding in the district court with reference to the plan. Those railroad securityholders who assume the responsibility and expense of defending Commission proposals in the district courts are therefore supplying to the district courts assistance which they might not otherwise have in performing their functions under Section 77.

To penalize such securityholders for continuing to defend the Commission's plans in the circuit courts of appeals after the district courts have approved such plans is not

only wholly unfair and inequitable but necessarily will discourage securityholders or mortgage trustees from performing a useful, if not a necessary, function in assisting the circuit courts of appeals to arrive at proper decisions. See *In re Chicago & North Western Ry.*, 121 F. (2d) 791, 798 (C. C. A. 7th, 1941).

WHEREFORE, your petitioners respectfully pray that a Writ of Certiorari be issued out of and under the seal of this Court, directed to the United States Circuit Court of Appeals for the Ninth Circuit, sitting at San Francisco, California, commanding that Court to certify and send to this Court on a day certain to be named therein, a full and complete transcript of the record and all proceedings in the case numbered and entitled on its docket, No. 9714, *In the Matter of the Western Pacific Railroad Company, a corporation, Debtor; Western Pacific Railroad Corporation, a corporation, et al., Appellants* v. *Institutional Bondholders Committee, et al., Appellees*, to the end that said cause may be reviewed and determined by this Court; that the Decree of said Court, entered November 28, 1941, be reversed, that the Order of the District Court entered August 15, 1940, be affirmed; and that petitioners be granted such other and further relief as to this Honorable Court may seem just and proper.

Dated: December 20, 1941.

ROBERT T. SWAINE,
Attorney for Frederick H. Ecker, John W. Stedman and Reeve Schley, constituting the Institutional Bondholders Committee, Petitioners.

HERBERT W. CLARK,
Of Counsel.

APPENDIX

Bankruptcy Act, § 77 (11 U. S. C. § 205).

* * * * * * * * *

"(d) The debtor, after a petition is filed as provided in subsection (a), shall file a plan of reorganization within six months of the entry of the order by the judge approving the petition as properly filed, or if heretofore approved, then within six months of the effective date of this Act, and not thereafter unless such time is extended by the judge from time to time for cause shown, no single extension at any one time to be for more than six months. Such plan shall also be filed with the Commission at the same time. Such plans may likewise be filed at any time before, or with the consent of the Commission during, the hearings hereinafter provided for, by the trustee or trustees, or by or on behalf of the creditors being not less than 10 per centum in amount of any class of creditors, or by or on behalf of any class of stockholders being not less than 10 per centum in amount of any such class, or with the consent of the Commission by any party in interest. After the filing of such a plan, the Commission, unless such plan shall be considered by it to be prima facie impracticable, shall, after due notice to all stockholders and creditors given in such manner as it shall determine, hold public hearings, at which opportunity shall be given to any interested party to be heard, and following which the Commission shall render a report and order in which it shall approve a plan, which may be different from any which has been proposed, that will in its opinion meet with the requirements of subsections (b) and (e) of this section, and will be compatible with the public interest; or it shall render a report and order in which it shall refuse to approve any plan. In such report the Commission shall state fully the reasons for its conclusions.

"The Commission may thereafter, upon petition for good cause shown filed within sixty days of the date of its order, and upon further hearings if the Commission shall deem necessary, in a supplemental report and order modify any plan which it has approved, stating the reasons for such modification. The Commission, if it approves a plan, shall thereupon certify the plan to the court together with a transcript of the proceedings before it and a copy of the report and order approving the plan. No plan shall be approved or confirmed by the judge in any proceeding under this section unless the plan shall first have been approved by the Commission and certified to the court.

"(e) Upon the certification of a plan by the Commission to the court, the court shall give due notice to all parties in interest of the time within which such parties may file with the court their objections to such plan, and such parties shall file, within such time as may be fixed in said notice, detailed and specific objections in writing to the plan and their claims for equitable treatment. The judge shall, after notice in such manner as he may determine to the debtor, its trustee or trustees, stockholders, creditors, and the Commission, hear all parties in interest in support of, and in opposition to, such objections to the plan and such claims for equitable treatment. After such hearing and without any hearing if no objections are filed, the judge shall approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; (2) the approximate amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets, for expenses and fees incident to the reorganization, have been fully disclosed so far as they can be ascertained at the date of such hearing, are

reasonable, are within such maximum limits as are fixed by the Commission, and are within such maximum limits to be subject to the approval of the judge; (3) the plan provides for the payment of all costs of administration and all other allowances made or to be made by the judge, except that allowances provided for in subsection (c), paragraph (12) of this section, may be paid in securities provided for in the plan if those entitled thereto will accept such payment, and the judge is hereby given power to approve the same.

"If the judge shall not approve the plan, he shall file an opinion, stating his conclusions and the reason therefor, and he shall enter an order in which he may either dismiss the proceedings, or in his discretion and on motion of any party in interest refer the proceedings back to the Commission for further action, in which event he shall transmit to the Commission a copy of any evidence received. If the proceedings are referred back to the Commission, it shall proceed to a reconsideration of the proceeding under the provisions of subsection (d) hereof. If the judge shall approve the plan, he shall file an opinion, stating his conclusions and the reasons therefor, and enter an order to that effect, and shall send a certified copy of such opinion and order to the Commission. The plan shall then be submitted by the Commission to the creditors of each class whose claims have been filed and allowed in accordance with the requirements of subsection (c) hereof, and to the stockholders of each class, and/or to the committees or other representatives thereof, for acceptance or rejection, within such time as the Commission shall specify, together with the report or reports of the Commission thereon or such a summarization thereof as the Commission may approve, and the opinion and order of the judge: Provided, That submission to any class of stockholders shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, (a) that at the time of the finding the corporation is insolvent, or that at the time of

the finding the equity of such class of stockholders has no value, or that the plan provides for the payment in cash to such class of stockholders of an amount not less than the value of their equity, if any, or (b) that the interests of such class of stockholders will not be adversely and materially affected by the plan, or (c) that the debtor has pursuant to authorized corporate action accepted the plan and its stockholders are bound by such acceptance: Provided further, That submission to any class of creditors shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, that the interests of such class of creditors will not be adversely and materially affected by the plan, or that at the time of the finding the interests of such class of creditors have no value, or that the plan provides for the payment in cash to such class of creditors of an amount not less than the value of their interests. For the purposes of this section the acceptance or rejection by any creditor or stockholder shall be in writing, executed by him or by his duly authorized attorney, committee, or representative. If the United States of America, or any agency thereof, or any corporation (other than the Reconstruction Finance Corporation) the majority of the stock of which is owned by the United States of America, is a creditor or stockholder, the interests or claims thereof shall be deemed to be affected by the plan, and the President of the United States or any officer or agency he may designate, is hereby authorized to act in respect of the interests or claims of the United States or of such agency or other corporation. The expense of such submission shall be certified by the Commission and shall be borne by the debtor's estate. The Commission shall certify to the judge the results of such submission.

"Upon receipt of such certification, the judge shall confirm the plan if satisfied that it has been accepted by or on behalf of creditors of each class to which submission is required under this subsection holding more than two-thirds in amount of the total of the allowed claims of such class

which have been reported in said submission as voting on said plan, and by or on behalf of stockholders of each class to which submission is required under this subsection holding more than two-thirds of the stock of such class which has been reported in said submission as voting on said plan; and that such acceptances have not been made or procured by any means forbidden by law: Provided, That, if the plan has not been so accepted by the creditors and stockholders, the judge may nevertheless confirm the plan if he is satisfied and finds, after hearing, that it makes adequate provision for fair and equitable treatment for the interests or claims of those rejecting it; that such rejection is not reasonably justified in the light of the respective rights and interests of those rejecting it and all the relevant facts; and that the plan conforms to the requirements of clauses (1) to (3), inclusive, of the first paragraph of this subsection (e): Provided further, That if, in any reorganization proceeding under this section, the United States is a creditor on claims for taxes or customs duties (whether or not the United States has any other interest in, or claim against, the debtor, as creditor or stockholder), no plan which does not provide for the payment thereof shall be confirmed by the judge except upon the acceptance certified to the court, of a lesser amount by the President of the United States or the officer or agency designated by him pursuant to the provisions of the preceding paragraph hereof: Provided further, That if the President of the United States or such officer or agency shall fail to accept or reject such lesser amount for more than ninety days after receipt of written notice so to do from the court, accompanied by a certified copy of the plan, the consent of the United States insofar as its claims for taxes or customs duties are concerned shall be conclusively presumed. If the judge shall confirm the plan, he shall enter an order and file an opinion, with a statement of his conclusions and his reasons therefor. If the judge shall not confirm the plan, he shall file an opinion, with a statement of his conclusions and his reasons there-

for, and enter an order in which he shall either dismiss the proceedings, or, in his discretion and on the motion of any party in interest, refer the case back to the Commission for further proceedings, including the consideration of modifications of the plan or the proposal of new plans. In the event of such a reference back to the Commission, the proceedings with respect to any modified or new plan shall be governed by the provisions of this section in like manner as in an original proceeding hereunder.

"If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts."

STEDMAN and REEVE SCHLEY, constituting the Institutional First Mortgage Bondholders Committee; and RECONSTRUCTION FINANCE CORPORATION,

Respondents.

PETITION FOR A WRIT OF CERTIORARI TO THE UNITED STATES CIRCUIT COURT OF APPEALS FOR THE NINTH CIRCUIT.

To the Honorable the Chief Justice and the Associate Justices of the Supreme Court of the United States:

The petitioners, Crocker First National Bank of San Francisco and Samuel Armstrong, as Trustees under the First Mortgage of The Western Pacific Railroad Company, respectfully pray for a writ of certiorari to review a deci-

sion of the United States Circuit Court of Appeals for the Ninth Circuit rendered on November 28, 1941 (R. 2663, 2675), which reversed an order of the District Court of the United States for the Northern District of California, Southern Division, entered on August 15, 1940 (R. 1569). The order of the District Court approved a plan of reorganization (hereinafter called the "Commission Plan") for the Debtor, The Western Pacific Railroad Company, which had theretofore been approved and certified to the District Court by the Interstate Commerce Commission (R. 1600), in a proceeding for the reorganization of the Debtor under Section 77 of the Bankruptcy Act, as amended (11 U. S. C. A., § 205).

The Circuit Court of Appeals based its reversal of the order of the District Court upon the narrow ground that Section 77 imposed upon the Commission a duty to determine and certify to the District Court the values of sixteen separate items, that the Commission failed to perform that duty, and that the District Court therefore lacked the "requisite valuation data" to enable it to appraise the fairness of the Commission Plan. The Circuit Court of Appeals cited as authority the decision of this Court in *Consolidated Rock Products Co.* v. *Du Bois*, 312 U. S. 510 (1941). (R. 2670-2672.)

The Circuit Court of Appeals also criticized, as indicating "a possible misconception", a statement in the opinion of the District Court as to the relative functions of the Commission and of the District Court in approving a plan of reorganization (R. 2672-2674).

In discussing the basis upon which the secured creditors should participate in the reorganization, the Circuit Court of Appeals stated that "Fairness requires that their participation should be in proportion to the value of their respective claims" (R. 2669). Although the meaning is not clear, this statement apparently prescribes a rule of distribution at variance with the "full and absolute priority rule" enunciated by this Court in *Case* v. *Los Angeles Lumber Products Co., Ltd.*, 308 U. S. 106 (1939), and *Consolidated Rock Products Co.* v. *Du Bois, supra.*

The decision of the Circuit Court of Appeals omits to discuss the correctness of the District Court's determination of other issues which were before the Circuit Court of Appeals, thereby leaving unanswered important questions which, unless settled by this Court, may become the subject of further litigation having the effect of needlessly prolonging the reorganization proceedings.

The Institutional First Mortgage Bondholders Committee is filing a petition for a writ of certiorari to review the decision of the Circuit Court of Appeals on grounds similar to those urged in this petition and is filing with its petition a certified transcript and additional printed copies of the record in the case, including the proceedings in the Circuit Court of Appeals, in accordance with Rule 38 of this Court. The petitioners beg leave to refer to the certified transcript and additional printed copies of the record so filed by the Institutional First Mortgage Bondholders Committee for all purposes of this petition and respectfully pray that such certified transcript and additional printed copies of the record be deemed to accompany this petition, within the meaning of Rule 38 of this Court.

Summary Statement of Matter Involved.

A statement of the relevant facts as to the nature and history of the proceedings, the findings of the Commission, and the action taken by the District Court and by the Circuit Court of Appeals appears at pages 4-23 of the above-mentioned petition of the Institutional First Mortgage Bondholders Committee. To avoid burdening this Court with what seems an unnecessary repetition, the petitioners beg leave to refer to that statement in the petition of the Institutional First Mortgage Bondholders Committee, which sets forth the factual data relevant to the consideration of this petition.*

---

* The petition of the Committee states, in a footnote on page 20, that counsel for the Committee had received on December 20, 1941, a copy of a petition of the Refunding Mortgage Trustee for a rehearing in the Circuit Court of Appeals. Counsel for your petitioners also received on December 20, 1941, a copy of said petition of the Refunding Mortgage Trustee.

Questions Presented.*

1. Are the Commission's findings (a) that "the equity of the existing stock has no value" (R. 269) and (b) that "the claims of the unsecured creditors * * * have no value" (R. 269-270), if supported by the requisite valuation data, sufficient to sustain the Commission's conclusions that the stockholders and unsecured creditors should be excluded from participation in the reorganization?

2. As to the following findings of the Commission: (a) that the securities available for distribution to the secured creditors holding notes secured by the pledge of Refunding Bonds "are inadequate in value to satisfy the aggregate claims of these parties" (R. 271), (b) that the "allocation of reorganization securities to" Reconstruction Finance Corporation "exhausts the value of the collateral pledged by the debtor under the notes held by" Reconstruction Finance Corporation (R. 316), and (c) that "the equity of" The Railroad Credit Corporation "in such collateral has no value" (R. 316),—are these findings sufficient, if supported by the requisite valuation data, to sustain the Commission's conclusions that the "value of each of the claims is proportionate to the collateral securing it" (R. 271) and that the allocation of new securities issued in respect of the pledged Refunding Bonds "should be made on the basis of the collateral held rather than on the amount of the claims" (R. 271)?

3. Should the participation in the reorganization of the holders of First Mortgage Bonds and of the pledgee holders of Refunding Bonds, respectively, be "in proportion to the value of their respective claims", ascertained by determining the exact dollar values of (1) the Debtor's entire prop-

* The questions presented and the reasons relied on for the allowance of the writ as set forth in this petition are substantially identical with those set forth in the petition of the Committee. This method of presentation has been adopted because the petitioners and the Committee are similarly situated in respect of their applications for certiorari.

erty, (2) the property subject to the First Mortgage as a first lien and to the Refunding Mortgage as a second lien, (3) the property subject to the Refunding Mortgage as a first lien, and (4) the new securities distributable to each class? Or should their participation be based upon a determination by the Commission, in terms of the new securities, of the "equitable equivalent of the debtor's assets available for the satisfaction" of the respective claims of each class, giving due effect to the relative priorities of the respective mortgages upon system earnings at the different levels which such earnings must reach in order to service the various classes of new securities and all other factors which should be considered in order that the District Court may approve the result as being fair and equitable?

4. May not the two claims of Reconstruction Finance Corporation, the one represented by the outstanding Trustees' Certificates and the other represented by notes secured by the pledge of Refunding Bonds, be treated as an "entire bundle of rights" and dealt with on the basis of a practicable and fair compromise which will eliminate the necessity of obtaining elsewhere on less favorable terms the new money needed to refinance the outstanding Trustees' Certificates?

5. Does the present record contain sufficient valuation data to support the Commission's findings and conclusions as to what classes are entitled to participate in the reorganization and as to what new securities should be allocated to each of such classes?

6. Does not Section 77 vest exclusively in the Commission jurisdiction to determine whether a plan of reorganization "will be compatible with the public interest", including jurisdiction to determine the amount, character and financial details of capitalization, and is not the scope of the judicial review of the Commission's determination of such matters limited to an inquiry as to whether the Commission's action was arbitrary or in excess of its constitutional or statutory powers?

7. Should not this Court, upon the entire record, reverse the judgment or decree of the Circuit Court of Appeals and affirm the order of the District Court approving the Commission Plan, in view of the public interest in bringing about a speedy termination of the reorganization proceedings, and in order to prevent further and unnecessary litigation of questions which were before the Circuit Court of Appeals but as to which the Circuit Court of Appeals made no specific determination?

8. Should the costs of a successful appeal be assessed against mortgage trustees whose appearance as appellees before a circuit court of appeals is occasioned solely by reason of the circumstance that the appellants challenge the fairness of the treatment accorded their *cestuis que trustent* under a plan of reorganization approved by the Commission and by a district court, or should such costs be assessed directly against the debtor's estate?

Reasons Relied on for the Allowance of the Writ.

1. The Commission, in finding that "the equity of the existing stock has no value" (R. 269) and that "the claims of the unsecured creditors * * * have no value" (R. 269-270), in effect determined that the value of the Debtor's property did not exceed the value of the claims of the secured creditors. The decision of the Circuit Court of Appeals apparently requires a determination of the exact dollar value of the Debtor's property in order to sustain the exclusion of stockholders and unsecured creditors from participation in the reorganization.

In this respect, the decision of the Circuit Court of Appeals is believed to be in conflict with the decision of the Circuit Court of Appeals for the Seventh Circuit in *In the Matter of Chicago, Milwaukee, St. Paul & Pacific R. R. Co., Debtor,* (C. C. A., 7th Circ., December 4, 1941, not yet reported), and with the decisions of this Court in *Consolidated Rock Products Co.* v. *Du Bois, supra,* p. 2,

and *Case* v. *Los Angeles Lumber Products Co., Ltd., supra*, p. 2.

If the decision of the Circuit Court of Appeals is not in conflict with the decisions of this Court above cited, then the Circuit Court of Appeals has decided an important question of federal law which has not been, but should be, settled by this Court.

The question here presented is not peculiar to this case. The method of determining and stating values employed by the Commission in this case has been employed by it in formulating other railroad reorganization plans, some of which have been consummated, after receiving final approval by the courts, and some of which are now pending before various district courts and circuit courts of appeals. The question is therefore one of widespread public interest which can be authoritatively settled only by this Court.

2. The Circuit Court of Appeals held that the participation in the reorganization of the holders of First Mortgage Bonds and of the pledgee holders of Refunding Bonds, respectively, "should be in proportion to the value of their respective claims" and, to that end, required a determination of the respective values of (1) the Debtor's entire property, (2) the property subject to the First Mortgage as a first lien and to the Refunding Mortgage as a second lien, (3) the property subject to the Refunding Mortgage as a first lien, and (4) the new securities distributable to each class (R. 2669-2670). This apparently requires that the allocation of new securities to these secured creditors be made in accordance with a precise mathematical formula based upon exact dollar values.

In this respect, the decision of the Circuit Court of Appeals is believed to be in conflict with the decision of the Circuit Court of Appeals for the Seventh Circuit in *Jameson* v. *Guaranty Trust Co. of New York*, 20 F. (2d) 808 (C. C. A., 7th Circ., 1927), cert. denied, 275 U. S. 569 (1927), and the decision of the Circuit Court of Appeals for the Second Circuit in *In re Radio-Keith-Orpheum Corporation*, 106 F. (2d) 22 (C. C. A., 2nd Circ., 1939), cert.

denied, 308 U. S. 622 (1940). It is also believed to be in conflict with the decisions of this Court in *Consolidated Rock Products Co.* v. *Du Bois, supra,* p. 2, and *Case* v. *Los Angeles Lumber Products Co., Ltd., supra,* p. 2.

If the decision of the Circuit Court of Appeals is not in conflict with the decisions of this Court above cited, then the Circuit Court of Appeals has decided an important question of federal law which has not been, but should be, settled by this Court.

If the decision of the Circuit Court of Appeals be interpreted as requiring that new securities of each available class be allocated to each class of these secured creditors in amounts proportionate to the respective dollar values of their claims, without regard to the relative priorities of the mortgage liens securing their claims, then the decision of the Circuit Court of Appeals prescribes a rule of distribution which violates the "full and absolute priority rule" enunciated by this Court in *Case* v. *Los Angeles Lumber Products Co., Ltd., supra,* p. 2, and *Consolidated Rock Products Co.* v. *Du Bois, supra,* p. 2.

3. If the decision of the Circuit Court of Appeals be interpreted as holding that the two claims of Reconstruction Finance Corporation may not be treated as an "entire bundle of rights" and dealt with on the basis of a practicable and fair compromise which will eliminate the necessity of obtaining elsewhere on less favorable terms the new money needed to refinance the outstanding Trustees' Certificates, the decision of the Circuit Court of Appeals is in this respect believed to be in conflict with the decision of this Court in *Case* v. *Los Angeles Lumber Products Co., Ltd., supra,* p. 2.

4. The Circuit Court of Appeals held that the District Court lacked "the requisite valuation data" to enable it "to exercise the 'informed, independent judgment' which appraisal of the fairness of a plan of reorganization entails" (R. 2671).

In this respect, the decision of the Circuit Court of Appeals is believed to be in conflict with the decisions of

this Court in *Case* v. *Los Angeles Lumber Products Co., Ltd., supra,* p. 2, and *Consolidated Rock Products Co.* v. *Du Bois, supra,* p. 2.

If the decision of the Circuit Court of Appeals is not in conflict with the decisions of this Court above cited, then the Circuit Court of Appeals has decided an important question of federal law which has not been, but should be, settled by this Court.

5. The Circuit Court of Appeals criticized, as indicating "a possible misconception" (R. 2672), a statement in the opinion of the District Court as to the relative functions of the Commission and of the District Court in approving a plan of reorganization and held that:

> "In determining whether a plan of reorganization satisfies the requirements of subsection (e), the court is not concluded by any determination made by the Commission, but may, and must, exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject" (R. 2674).

In this respect, the decision of the Circuit Court of Appeals is believed to be in conflict with the decision of this Court in *Interstate Commerce Commission* v. *Union Pacific Railroad Company,* 222 U. S. 541, 547-548 (1912), and other decisions of this Court enunciating the familiar doctrine of the finality of administrative determinations, and with the decisions of this Court in *Palmer* v. *Massachusetts,* 308 U. S. 79 (1939), and *Warren* v. *Palmer,* 310 U. S. 132 (1940).

If the decision of the Circuit Court of Appeals is not in conflict with the decisions of this Court referred to above, then the Circuit Court of Appeals has decided an important question of federal law which has not been, but should be, settled by this Court.

6. In omitting to discuss all of the issues which were before the Circuit Court of Appeals, the decision of the

Circuit Court of Appeals has left unanswered many important questions, affecting virtually every feature of the Commission Plan. An authoritative determination of all of these questions is essential to the final approval of a plan of reorganization. Unless these questions are settled by this Court, they are likely to become the subject of further litigation, which will result in further and unnecessary delay and expense to the parties concerned.

The petitioners believe that the public interest will be promoted by prompt settlement in this Court of these questions.

In *Continental Illinois National Bank & Trust Co.* v. *Chicago, Rock Island & Pacific Ry. Co.*, 294 U. S. 648 (1935), this Court said (p. 685):

> "The delay and expense incident to railroad receiverships and foreclosure sales constituted, probably, the chief reasons which induced the passage of § 77; and to permit the perpetuation of either of these evils under this new legislation would be subversive of the spirit in which it was conceived and adopted. Not only are those who institute the proceeding and those who carry it forward bound to exercise the highest degree of diligence, but it is the duty of the court and of the Interstate Commerce Commission to see that they do."

To the end that these reorganization proceedings, which have been pending since 1935, may be speedily determined, the petitioners respectfully pray that this Court review the entire case upon the entire record and determine all of the questions involved.

7. The Circuit Court of Appeals, in assessing the costs of the appeal against the petitioners and the other appellees, the Institutional First Mortgage Bondholders Committee and Reconstruction Finance Corporation (R. 2676), has decided an important question of federal law which has not been, but should be, settled by this Court.

WHEREFORE, the petitioners respectfully pray that a writ of certiorari issue to the United States Circuit Court of Appeals for the Ninth Circuit, commanding said Court to certify and send to this Court, on a day to be determined, a full and complete transcript of the record of all of the proceedings had in this cause, to the end that this cause may be reviewed and determined by this Court; that the decree of the Circuit Court of Appeals be reversed; that the order of the District Court be affirmed; and that the petitioners be granted such other and further relief as may be proper.

Dated, New York, N. Y., December 23, 1941.

ORVILLE W. WOOD,
Attorney for Petitioners, Crocker First National Bank of San Francisco and Samuel Armstrong, as Trustees under The Western Pacific Railroad Company First Mortgage dated June 26, 1916.

ARTHUR A. GAMMELL,
Of Counsel.

BRIEF IN SUPPORT OF PETITION.

Opinions Below.

The Commission's report and order (R. 284) dated October 10, 1938, approving a plan of reorganization for the Debtor, is reported at 230 I. C. C. 61. The Commission's report and order on further consideration (R. 300, 362) dated June 21, 1939, modifying the plan of reorganization approved in the Commission's report and order dated October 10, 1938, is reported at 233 I. C. C. 409. The Commission's order (R. 884) dated September 19, 1939, denying the Debtor's petition for modification of the Commission Plan, is reported at 236 I. C. C. 1.

The opinion of the District Court (R. 1569) dated August 15, 1940, approving the Commission Plan, is reported at 34 F. Supp. 493.

The opinion of the Circuit Court of Appeals dated November 28, 1941, reversing the order of the District Court, has not yet been officially reported but appears at R. 2663.

Jurisdiction.

The decree of the Circuit Court of Appeals now sought to be reviewed was entered on November 28, 1941. The jurisdiction of this Court is invoked under Section 240(a) of the Judicial Code, as amended by the Act of February 13, 1925 (28 U. S. C. A., § 347(a)) and Section 24(c) of the Bankruptcy Act (11 U. S. C. A., § 47(c)).

Statement of the Case.

A summary statement of the relevant facts is incorporated by reference in the petition, *supra*, p. 3.

Statutes Involved.

The statutes involved are set forth in the Appendix, *infra*, pp. 21-26.

ARGUMENT.

POINT I.

The Decision of the Circuit Court of Appeals Raises Questions of Far-reaching Importance in Railroad Reorganizations under Section 77.

Since the enactment of Section 77, the Commission has formulated and certified to various district courts numerous plans of reorganization. In formulating these plans of reorganization, the Commission has uniformly, so far as we are aware, employed methods of determining and stating values similar to those which it employed in formulating the Commission Plan. Many of these plans of reorganization have received the final approval of the courts having jurisdiction and have already been consummated. Others are still pending before various district courts and circuit courts of appeals.

Prior to the decision of the Circuit Court of Appeals in this case, no court, so far as we are aware, had questioned the correctness or sufficiency of the Commission's methods of determining and stating values. Consequently, the decision of the Circuit Court of Appeals in this case fell like a bombshell. Its unsettling effect upon other pending plans of reorganization is apparent.

Less than a week after the Circuit Court of Appeals rendered its decision in this case, the Circuit Court of Appeals for the Seventh Circuit rendered its decision in the *Milwaukee* case (*supra*, p. 6), which added to the confusion, because it agreed in some respects and disagreed in other respects with the conclusions reached in this case with respect to the Commission's methods of determining and stating values.

Under these circumstances, we submit, the public interest urgently requires that the questions involved be authoritatively settled by this Court.

The valuation questions raised by the decision of the Circuit Court of Appeals in this case go to the heart of the entire reorganization process under Section 77. The

other questions raised by the decision—such as the question as to the relative functions of the Commission and of the district courts in approving plans of reorganization—are likewise of far-reaching importance in railroad reorganizations under Section 77. This case is therefore a particularly appropriate one for the granting of a writ of certiorari.

POINT II.

The Decision of the Circuit Court of Appeals on the Valuation Questions is in Conflict with the Applicable Decisions of this Court and with the Decisions of Other Circuit Courts of Appeals.

The valuation questions raised by the decision of the Circuit Court of Appeals have a twofold aspect: (1) in relation to the exclusion of particular classes of stockholders or creditors from participation in the reorganization, and (2) in relation to the allocation of new securities among those entitled to participate.

A. In the first aspect, the question is simply this: May a particular class be excluded from participation in the reorganization upon the basis of a finding that the value of the property does not exceed the amount of all prior claims, provided that the evidence in the record supports that finding? Or must the finding state the exact dollar value of the property?

A finding that the equity of the stock has no value is a finding that the value of the Debtor's property does not exceed the Debtor's liabilities. It is in substance and effect a finding of insolvency in the bankruptcy sense. A finding that the claims of a particular class of creditors have no value is a finding that the value of the property available for the satisfaction of those claims does not exceed the amount of the prior claims against that property.

In the *Los Angeles Lumber Products* case (*supra*, p. 2), this Court said (p. 126):

> "Furthermore, stockholders and other junior interests may be excluded from any plan of reorganization if the court finds that the debtor is insolvent. *In re 620 Church Street Building Corp.*, 299 U. S. 24."

In the *Consolidated Rock Products* case (*supra*, p. 2), this Court, in emphasizing the "criterion of earning capacity" as the essential one in determining values, said (p. 526):

> "Since its application requires a prediction as to what will occur in the future, an estimate, as distinguished from mathematical certitude, is all that can be made."

In the *Milwaukee* case (*supra*, p. 6), the Circuit Court of Appeals for the Seventh Circuit, in the light of the evidence in the record before it, regarded as sufficient to sustain the exclusion of stockholders from participation in the reorganization a finding by the Commission that the equity of the stock had no value, substantially identical with the finding made by the Commission in this case.

In finding that the equity of the stock and the claims of the unsecured creditors have no value, the Commission in this case has made a finding of the ultimate fact upon which the exclusion of the stockholders and unsecured creditors from participation in the reorganization depends. An examination of the record will show that it contains abundant valuation data to support those findings. We submit that no useful purpose would be served by requiring a finding of the exact dollar value of the Debtor's property.

B. In the second aspect, the question broadly stated is this: Must the allocation of new securities among those entitled to participate in the reorganization be based upon a precise mathematical formula, expressed in terms of equivalents of exact dollar values of claims to exact dollar

values of new securities, such dollar values to be ascertained by determining the exact dollar values of the properties securing the respective claims and the respective new securities? Or may the allocation be based upon a determination of the "equitable equivalent of the assets available for the satisfaction" of the respective claims of each class, expressed in terms of new securities?

This question strikes at the very vitals of the reorganization process under Section 77. A requirement that the allocation of new securities be fitted into a precise mathematical formula such as that prescribed by the Circuit Court of Appeals is, we submit, violative of reorganization principles which have received the sanction of this Court in the *Los Angeles Lumber Products* case (*supra*, p. 2) and in the *Consolidated Rock Products* case (*supra*, p. 2), and which have received the sanction of the Circuit Court of Appeals for the Seventh Circuit in the *Jameson* case (*supra*, p. 7) and of the Circuit Court of Appeals for the Second Circuit in the *Radio-Keith-Orpheum* case (*supra*, p. 7).

In the *Consolidated Rock Products* case, this Court held that the "criterion of earning capacity is the essential one" (p. 526). Subsection (e) of Section 77 (11 U. S. C. A., § 205(e)) likewise makes earning capacity the essential criterion of value.

As stated in the *Consolidated Rock Products* case, since the application of the criterion of earning capacity "requires a prediction as to what will occur in the future, an estimate, as distinguished from mathematical certitude, is all that can be made" (p. 526). To apply this test in the strait-jacket formula required by the decision of the Circuit Court of Appeals is a practical impossibility.

A finding of the exact dollar values of railroad properties in terms of earning capacity requires the assumption of a precise level of earnings. The relative priorities of claims of different classes may depend upon the varying

levels of prospective earnings at which the various properties begin to shown earning power.

To adopt the principle enunciated by the Circuit Court of Appeals would be to substitute a rigid scholastic formula for a flexible realistic approach to the complex problems of railroad reorganization.

POINT III.

The Decision of the Circuit Court of Appeals as to the Relative Functions of the Commission and of the District Court in Approving a Plan of Reorganization is in Conflict with the Applicable Decisions of this Court.

Subsection (d) of Section 77 (11 U. S. C. A., § 205(d)), which defines the functions of the Commission in approving a plan of reorganization, confers upon the Commission jurisdiction to determine whether the plan "will be compatible with the public interest". Subsection (e), which defines the functions of the District Court, confers no such jurisdiction upon the District Court. Thus, by the express terms of the statute, jurisdiction to determine whether a plan of reorganization "will be compatible with the public interest" is vested exclusively in the Commission.

This exclusive jurisdiction, we submit, includes jurisdiction to determine the amount, character and financial details of capitalization.

In *Interstate Commerce Commission* v. *Union Pacific Railroad Company, supra*, p. 9, and in other decisions enunciating the well-established doctrine of the finality of administrative determinations, this Court has held that the scope of the judicial review of the Commission's determinations upon matters committed to its administrative juris-

diction is limited to an inquiry as to whether the Commission's action was arbitrary or in excess of its constitutional or statutory powers.

The applicability of this doctrine to the Commission's determinations of the "public interest" questions under Section 77 is indicated by the expressions of this Court in *Palmer* v. *Massachusetts, supra*, p. 9, and *Warren* v. *Palmer, supra*, p. 9.

In *Palmer* v. *Massachusetts*, this Court said (p. 87):

> "The judicial process in bankruptcy proceedings under § 77 is, as it were, brigaded with the administrative process of the Commission. From the requirement of ratification by the Commission of the trustees appointed by the court to the Commission's approval of the court's plan of reorganization the authority of the court is intertwined with that of the Commission."

And in *Warren* v. *Palmer*, this Court said (p. 138):

> "The judicial functions of the bankruptcy court and the administrative functions of the Commission work coöperatively in reorganizations."

The decision of the Circuit Court of Appeals in this case that,

> "In determining whether a plan of reorganization satisfies the requirements of subsection (e), the court is not concluded by any determination made by the Commission, but may, and must, exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject" (R. 2674),

is, we submit, not only contrary to the express provisions of Section 77; it runs counter to a principle of administrative law which has long been established by this Court.

Conclusion.

This case involves questions of widespread public interest and far reaching importance in the field of railroad reorganizations which should be reviewed by this Court, and a writ of certiorari should issue for that purpose as prayed for in the foregoing petition.

Dated, New York, N. Y., December 23, 1941.

Respectfully submitted,

ORVILLE W. WOOD,
Attorney for Petitioners, Crocker First National Bank of San Francisco and Samuel Armstrong, as Trustees under The Western Pacific Railroad Company First Mortgage dated June 26, 1916.

ARTHUR A. GAMMELL,
Of Counsel.

Appendix.

The Statutes Involved.

Subsection (d) of Section 77 of the Bankruptcy Act, as amended (11 U. S. C. A., § 205(d)) provides as follows:

"(d) The debtor, after a petition is filed as provided in subsection (a) of this section, shall file a plan of reorganization within six months of the entry of the order by the judge approving the petition as properly filed, or if heretofore approved, then within six months of August 27, 1935, and not thereafter unless such time is extended by the judge from time to time for cause shown, no single extension at any one time to be for more than six months. Such plan shall also be filed with the Commission at the same time. Such plans may likewise be filed at any time before, or with the consent of the Commission during, the hearings hereinafter provided for, by the trustee or trustees, or by or on behalf of the creditors being not less than 10 per centum in amount of any class of creditors, or by or on behalf of any class of stockholders being not less than 10 per centum in amount of any such class, or with the consent of the Commission by any party in interest. After the filing of such a plan, the Commission, unless such plan shall be considered by it to be prima facie impracticable, shall, after due notice to all stockholders and creditors given in such manner as it shall determine, hold public hearings, at which opportunity shall be given to any interested party to be heard, and following which the Commission shall render a report and order in which it shall approve a plan, which may be different from any which has been proposed, that will in its opinion meet with the requirements of subsections (b) and (e) of this section, and will be compatible with the public interest; or it shall render a report and order in which it shall refuse to approve any plan. In such report the Commission shall state fully the reasons for its conclusions.

"The Commission may thereafter, upon petition for good cause shown filed within sixty days of the date of

its order, and upon further hearings if the Commission shall deem necessary, in a supplemental report and order modify any plan which it has approved, stating the reasons for such modification. The Commission, if it approves a plan, shall thereupon certify the plan to the court together with a transcript of the proceedings before it and a copy of the report and order approving the plan. No plan shall be approved or confirmed by the judge in any proceeding under this section unless the plan shall first have been approved by the Commission and certified to the court."

Subsection (e) of Section 77 of the Bankruptcy Act, as amended (11 U. S. C. A., § 205(e)) provides as follows:

"(e) Upon the certification of a plan by the Commission to the court, the court shall give due notice to all parties in interest of the time within which such parties may file with the court their objections to such plan, and such parties shall file, within such time as may be fixed in said notice, detailed and specific objections in writing to the plan and their claims for equitable treatment. The judge shall, after notice in such manner as he may determine to the debtor, its trustee or trustees, stockholders, creditors, and the Commission, hear all parties in interest in support of, and in opposition to, such objections to the plan and such claims for equitable treatment. After such hearing, and without any hearing if no objections are filed, the judge shall approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; (2) the approximate amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets, for expenses and fees incident to the reorganization, have been fully disclosed so far as they can be ascertained at the date of such

hearing, are reasonable, are within such maximum limits as are fixed by the Commission, and are within such maximum limits to be subject to the approval of the judge; (3) the plan provides for the payment of all costs of administration and all other allowances made or to be made by the judge, except that allowances provided for in subsection (c), paragraph (12) of this section, may be paid in securities provided for in the plan if those entitled thereto will accept such payment, and the judge is hereby given power to approve the same.

"If the judge shall not approve the plan, he shall file an opinion, stating his conclusions and the reason therefor, and he shall enter an order in which he may either dismiss the proceedings, or in his discretion and on motion of any party in interest refer the proceedings back to the Commission for further action, in which event he shall transmit to the Commission a copy of any evidence received. If the proceedings are referred back to the Commission, it shall proceed to a reconsideration of the proceedings under the provisions of subsection (d) of this section. If the judge shall approve the plan, he shall file an opinion, stating his conclusions and the reasons therefor, and enter an order to that effect, and shall send a certified copy of such opinion and order to the Commission. The plan shall then be submitted by the Commission to the creditors of each class whose claims have been filed and allowed in accordance with the requirements of subsection (c) of this section, and to the stockholders of each class, and/or to the committees or other representatives thereof, for acceptance or rejection, within such time as the Commission shall specify, together with the report or reports of the Commission thereon or such a summarization thereof as the Commission may approve, and the opinion and order of the judge: *Provided*, That submission to any class of stockholders shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, (a) that at the time of the finding the corporation is insolvent, or that at the time of the finding the equity

of such class of stockholders has no value, or that the plan provides for the payment in cash to such class of stockholders of an amount not less than the value of their equity, if any, or (b) that the interests of such class of stockholders will not be adversely and materially affected by the plan, or (c) that the debtor has pursuant to authorized corporate action accepted the plan and its stockholders are bound by such acceptance: *Provided further,* That submission to any class of creditors shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, that the interests of such class of creditors will not be adversely and materially affected by the plan, or that at the time of the finding the interests of such class of creditors have no value, or that the plan provides for the payment in cash to such class of creditors of an amount not less than the value of their interests. For the purpose of this section the acceptance or rejection by any creditor or stockholder shall be in writing, executed by him or by his duly authorized attorney, committee, or representative. If the United States of America, or any agency thereof, or any corporation (other than the Reconstruction Finance Corporation) the majority of the stock of which is owned by the United States of America, is a creditor or stockholder, the interests or claims thereof shall be deemed to be affected by the plan, and the President of the United States, or any officer or agency he may designate, is hereby authorized to act in respect of the interests or claims of the United States or of such agency or other corporation. The expense of such submission shall be certified by the Commission and shall be borne by the debtor's estate. The Commission shall certify to the judge the results of such submission.

"Upon receipt of such certification, the judge shall confirm the plan if satisfied that it has been accepted by or on behalf of creditors of each class to which submission is required under this subsection holding more than two-thirds in amount of the total of the allowed claims of such class which have been reported in said submission as voting on said plan, and by or on behalf of stockholders of each class to which submission

is required under this subsection holding more than two-thirds of the stock of such class which has been reported in said submission as voting on said plan; and that such acceptances have not been made or procured by any means forbidden by law: *Provided*, That, if the plan has not been so accepted by the creditors and stockholders, the judge may nevertheless confirm the plan if he is satisfied and finds, after hearing, that it makes adequate provision for fair and equitable treatment for the interests or claims of those rejecting it; that such rejection is not reasonably justified in the light of the respective rights and interests of those rejecting it and all the revelant facts; and that the plan conforms to the requirements of clauses (1) to (3), inclusive, of the first paragraph of this subsection (e): *Provided further*, That if, in any reorganization proceeding under this section, the United States is a creditor on claims for taxes or customs duties (whether or not the United States has any other interest in, or claim against, the debtor, as creditor or stockholder), no plan which does not provide for the payment thereof shall be confirmed by the judge except upon the acceptance, certified to the court, of a lesser amount by the President of the United States or the officer or agency designated by him pursuant to the provisions of the preceding paragraph hereof: *Provided further*, That if the President of the United States or such officer or agency shall fail to accept or reject such lesser amount for more than ninety days after receipt of written notice so to do from the court, accompanied by a certified copy of the plan, the consent of the United States insofar as its claims for taxes or customs duties are concerned shall be conclusively presumed. If the judge shall confirm the plan, he shall enter an order and file an opinion with a statement of his conclusions and his reasons therefor. If the judge shall not confirm the plan, he shall file an opinion, with a statement of his conclusions and his reasons therefor, and enter an order in which he shall either dismiss the proceedings, or, in his discretion and on the motion of any party in interest, refer the case back to the Commission for further proceedings, including the consideration of modifications of the plan or the

proposal of new plans. In the event of such a reference back to the Commission, the proceedings with respect to any modified or new plan shall be governed by the provisions of this section in like manner as in an original proceeding hereunder.

"If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts."

CROSS PETITION OF THE WESTERN PACIFIC RAILROAD COMPANY, THE DEBTOR, FOR A WRIT OF CERTIORARI TO THE CIRCUIT COURT OF APPEALS FOR THE NINTH CIRCUIT FOR A LIMITED REVIEW OF ITS DECREE ENTERED NOVEMBER 28, 1941

To the Honorable the Chief Justice and the Associate Justices of the Supreme Court of the United States:

The Western Pacific Railroad Company, Cross-Petitioner (herein called the Debtor) respectfully asks that

the Petition of Frederick H. Ecker, John W. Stedman and Reeve Schley, constituting an Institutional Bondholders' Committee, and the Petition of Crocker First National Bank of San Francisco and Samuel Armstrong, as Trustees under the Debtor's First Mortgage dated June 26, 1916, bearing Docket Nos. 819 and 820, respectively, be denied as unwarranted by the usages of this Court and that this Court, pursuant to this Cross-Petition, issue a *writ of certiorari* to the Circuit Court of Appeals for the Ninth Circuit for a limited review of the Decree of that Court entered November 28, 1941.

The Debtor, for all purposes of this Cross-Petition, begs leave to refer to the certified transcript and additional printed copies of the record filed by the Institutional Bondholders' Committee with its petition for a writ of certiorari, and respectfully prays that such certified transcript and additional printed copies of the record be deemed to accompany this Cross-Petition, within the meaning of Rule 38 of this Court.

Our reasons may be briefly stated:

First, the reasons for a denial of the Petitions of the Institutional Bondholders' Committee and the Trustees of the Debtor's First Mortgage.

The somewhat elaborate Petitions filed by the Institutional Bondholders' Committee and the Trustees of the Debtor's First Mortgage are significant not for what they disclose but for what they omit. So, without attempting to tear apart the mosaic that these Petitioners have put together by the artful use of detached and deleted sentences from the Reports of the Interstate Commerce Commission, we shall, in the interest of brevity, go straight to the omissions.

The opinion of this Court in *Consolidated Rock Products Co., et al.* v. *Du Bois*, 312 U. S. 510, leaves no doubt in any reasonable mind that it was the duty of the Interstate Commerce Commission in the proceeding for the reorganization of the Debtor under Section 77 of the Bankruptcy Act to find and to certify to the District Court the value of the Debtor's property as an entirety in order to determine whether the Debtor was solvent or insolvent and, if solvent, the value of the equity represented by its capital stock and, if insolvent, the value, if any, of its unsecured debt and the value of the several secured claims; and (we here quote subsection (d) of said Section 77) "to state fully the reasons for its conclusions."

The Circuit Court of Appeals held (we think properly held) that "that duty was not performed" (Tr. 2671).

Assuming, as seems clearly to be the contention of the Petitioners in Nos. 819 and 820, that the bald statement in the Reports of the Interstate Commerce Commission that it finds the Debtor's unsecured debt and capital stock to be without value is the mathematical equivalent of a Finding that the value of the Debtor's entire estate is no greater than its secured debt at the effective date of the Plan—an assumption we deem highly controversial—it nevertheless was not a Finding within the requirements of this Court's opinion in the *Consolidated Rock Products* case "supported by requisite valuation data" that would place the Court in a position "to exercise the 'informed, independent judgment' which appraisal of the fairness of a plan of reorganization entails" because the Interstate Commerce Commission

(a) failed to disclose the factors to which it gave consideration;

(b) failed to disclose the weight which it gave to any one factor;

(c) failed to disclose (as counsel for the Appellants have insisted it was required by law to do) whether it treated earnings as the fundamental test of permissible capitalization and value;

(d) if it did exclude all other factors (as the record indicates must have been done) and based its conclusions *solely* on a capitalization of the Debtor's regulated earnings in a sub-normally depressed period, it failed to disclose either the precise period used or the interest rate at which such earnings were capitalized; and

(e) in any event, it failed to disclose the amount by which the value of the property was inadequate to satisfy in full the secured claims and the true value of each such claim.

In the absence of all this and much other vital information, it was manifestly impossible for the District Court or for the Circuit Court of Appeals to be judicially "satisfied" ("satisfied" is the imperative word used in subsection (e) of Section 77 of the Bankruptcy Act) that the Plan was fair and equitable and afforded due recognition to the rights of creditors and stockholders and otherwise complied with the law of the land.

Accordingly, no course was open to the Circuit Court of Appeals but to reverse the Order of the District Court so that the proceedings might be referred back to the Interstate Commerce Commission to be reconsidered in conformity with the law, and we respectfully submit that such would necessarily be the ultimate action taken by this Court should it issue the *writ of certiorari* asked by the Institutional Bondholders' Committee and the Trustees of

the Debtor's First Mortgage. Under these circumstances, no useful purpose could be served by the issuance of such *writ of certiorari* unless it be to enable this Court to write a new opinion to substitute for the very comprehensive and satisfactory opinion already written in the case of *Consolidated Rock Products Co., et al.* v. *Du Bois* (*supra*).

Second, the reasons for granting the Cross-Petition of the Debtor for a limited review of the decision of the Circuit Court of Appeals.

Notwithstanding that the Opinion and Decision of the Circuit Court of Appeals in all fundamental aspects are sound and salutary, we think the Court of Appeals overlooked paragraph (13) of subsection (c) of Section 77 when it dismissed the appeals taken from the Order of the District Court by the Debtor and by the Irving Trust Company. Each of these parties is named specifically in paragraph (13) among those that "shall have the right to be heard on *all* questions arising in the proceedings" (italics ours). The Debtor was the party which filed the original Petition for reorganization under Section 77 of the Bankruptcy Act and conducted the proceeding through the Interstate Commerce Commission, and in the performance of its duties under Section 77 it filed Objections to the Plan certified to the District Court by the Interstate Commerce Commission and appealed from the Order of the District Court overruling its Objections, its main contention being that the Plan was confiscatory in failing to give recognition to the equity represented by the Debtor's unsecured indebtedness and capital stock (Tr. 1648; 2667-2668, 2671). This fundamental contention was upheld by the Circuit Court of Appeals in connection with an appeal taken by The Western Pacific Railroad Corporation, holder of the Debtor's un-

secured debt and capital stock, which had intervened in the District Court to support the position taken by the Debtor (Tr. 1612, 1635). This action of the Circuit Court of Appeals seems quite at variance with the decision of the Circuit Court of Appeals in the Tenth Circuit cited below* and raises a serious question as to the status of the Debtor and of mortgage trustees in many other proceedings pending under Section 77 of the Bankruptcy Act. For that reason this Court may deem it proper to issue a *writ of certiorari* for the limited purpose of correcting the apparently inadvertent decision of the Circuit Court of Appeals on this minor issue and perhaps also may wish to clarify another feature of the opinion of the Court of Appeals as to which there may be ambiguity.

Referring to the basic objection that the Interstate Commerce Commission had improperly excluded the Debtor's stockholders and unsecured creditors from participation in the Plan, the Court of Appeals said:

> "• • • The objection states that the debtor is not insolvent, but has property of a value greatly in excess of its liabilities. Obviously, if the statement is true, the holding company is entitled to participate in the reorganization, and its exclusion there-

---

* In the case of *Denver and Rio Grande Western Railroad Company* v. *McCarthy, et al.*, 111 F. (2d) 820, the Circuit Court of Appeals for the Tenth Circuit, in an opinion written by Circuit Judge PHILLIPS, said:

> "Undoubtedly, the debtor has important duties to perform in the reorganization proceedings, *Continental Illinois National Bank & Trust Co.* v. *Chicago, Rock Island & Pacific Railway*, 294 U. S. 648, 679, 55 S. Ct. 595, 79 L. Ed. 1110, and is entitled to the services of competent counsel to aid it in the performance of those duties and to have reasonable allowances made for the expenses incurred and the services rendered by such counsel, not only in connection with the formulation and presentation of the plan of the debtor but also in connection with the proceeding, the debtor having the right to be heard on all questions arising therein."

> from is unfair and inequitable. Thus, to determine the question raised by the holding company's objection, it was necessary to determine the value of the debtor's property as of the effective date of the plan—January 1, 1939" (Tr. 2668).

In view of this language, the question arises whether, when the case is referred back to the Interstate Commerce Commission, interests which would profit from a restricted valuation may urge the Commission to value the property of the Debtor *retroactively* at January 1, 1939, so as to exclude from consideration the favorable earnings experience of the property during the years 1939, 1940 and 1941 (Tr. 2635; 2656). To exclude these recent earnings, which not only demonstrate earning power greatly in excess of what reasonably might have been anticipated as of January 1, 1939, and which show that the earnings experience in prior years cannot be used as a "reliable criterion of future performance" and which, moreover, furnish a fair test and demonstration of the natural strength of important new mileage constructed too recently to be reflected in any average based on the Debtor's earning experience prior to January 1, 1939, would be grossly inequitable and unjust to the Debtor.

While it might be difficult to urge that such a retroactive valuation would be justified by the language quoted above from the opinion of the Circuit Court of Appeals and while it is at least doubtful whether the Interstate Commerce Commission would so proceed, nevertheless, as the question is a critical one from the Debtor's standpoint and the language may not be entirely free from doubt or ambiguity, this Court may find the matter of sufficient importance to justify the issuance of a *writ of certiorari* on the

Debtor's Cross-Petition filed only by way of abundant caution to avoid a possible claim that the Debtor had acquiesced in a retroactive valuation; which it does not. On the contrary, it insists that a retroactive valuation would be inadmissible. Subsection (e) of Section 77 expressly provides that the Interstate Commerce Commission upon reference back "shall proceed to a reconsideration of the proceedings under the provisions of subsection (d)" which can only mean that it shall proceed *de novo*.

It will soon be apparent to this Court that the great concentrations of capital as represented by the life insurance companies and the savings banks have reached an accord with the Interstate Commerce Commission in the various Section 77 proceedings whereby the equity interests represented by junior debt and capital stock are to be *theoretically* extinguished by drastic writing down of capitalization but in *reality* are to be transferred by allotments of new stock without par value to the holders of the senior debt.

The present case is typical.

The 19A Valuation is in excess of $150,000,000 (Tr. 1062). The original cost fully depreciated is in excess of $120,000,000 (Tr. 1044-1047; 1114). The secured debt permitted to participate in the reorganization amounted as of January 1, 1939, to only $87,712,654 (Tr. 1576). So, assuming the fair capitalizable value of the Debtor's property to be $120,000,000 (which was what was recommended in the dissenting opinion of Commissioner Miller and is a sum upon which more than 4% is being earned currently as shown by the supplemental tables in Volumes VII and VIII of the Transcript) there is an equity of $32,287,346

for the junior debt and capital stock, all of which would be transferred to the senior creditors under the Commission's Plan. Such facts cannot be concealed if the Interstate Commerce Commission is required to make and certify findings of value supported by adequate underlying data agreeably to the decision of this Court in *Consolidated Rock Products Co. et al.* v. *Du Bois* (*supra*). Naturally there will be a concerted drive (of which the present Petitions may be a part) to undermine that decision.

The Circuit Court of Appeals left undecided a very serious controversy involving conflicting lien claims in respect of more than $10,000,000 of property between the Trustees of the Debtor's First Mortgage and the Irving Trust Company, as Trustee of its Refunding and General Mortgage. These questions were fully argued in the Circuit Court of Appeals both orally and upon brief and being pure questions of law should, we submit, be determined before the Interstate Commerce Commission is asked to value the properties covered by the respective mortgages. A lay Board such as the Interstate Commerce Commission ought not to be required to guess how these lien questions ultimately will be decided by the Courts.

WHEREFORE, the Cross-Petitioner prays that the Petitions in Docket Nos. 819 and 820 be denied and that pursuant to this Cross-Petition a *writ of certiorari* issue to the United States Circuit Court of Appeals for the Ninth Circuit to the ends (a) that so much of the Decree of that Court dated November 28, 1941, as dismisses the appeal of The Western Pacific Railroad Company and the Irving Trust Company, as Trustee, be reversed and directed to be stricken from said Decree, and (b) that this Court may give

such directions as to the further course of this proceeding as to it may seem meet.

Respectfully submitted,

OCTOBER TERM, 1941

No. ——

RECONSTRUCTION FINANCE CORPORATION, PETITIONER

v.

WESTERN PACIFIC RAILROAD CORPORATION, A CORPORATION; A. C. JAMES CO., A CORPORATION; THE RAILROAD CREDIT CORPORATION, A CORPORATION; THE WESTERN PACIFIC RAILROAD COMPANY, A CORPORATION; IRVING TRUST COMPANY, A CORPORATION, AS SUBSTITUTED TRUSTEE UNDER THE GENERAL AND REFUNDING MORTGAGE OF THE WESTERN PACIFIC RAILROAD COMPANY; FREDERICK H. ECKER, JOHN W. STEDMAN AND REEVE SCHLEY, CONSTITUTING THE INSTITUTIONAL FIRST MORTGAGE BONDHOLDERS COMMITTEE; AND CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO AND SAMUEL ARMSTRONG, AS TRUSTEES UNDER THE FIRST MORTGAGE OF THE WESTERN PACIFIC RAILROAD COMPANY

PETITION FOR A WRIT OF CERTIORARI TO THE UNITED STATES CIRCUIT COURT OF APPEALS FOR THE NINTH CIRCUIT

The Solicitor General, on behalf of Reconstruction Finance Corporation, a public corporation

created by Act of Congress,[1] prays that a writ of certiorari issue to review the decree of the Circuit Court of Appeals for the Ninth Circuit rendered in this cause on November 28, 1941 (R. 2663), reversing an order of the District Court for the Northern District of California. The latter order approved a plan of reorganization which had theretofore been approved and certified to the District Court by the Interstate Commerce Commission in proceedings for the reorganization of The Western Pacific Railroad Company.

OPINIONS BELOW

The initial report and order of the Interstate Commerce Commission (R. 194) are reported in 230 I. C. C. 61; its report and order on further consideration (R. 300) are reported in 233 I. C. C. 409; and its order denying the further petition of the Debtor for modification of the plan approved by it (R. 884) is reported in 236 I. C. C. 1. The opinion of the District Court (R. 1569) is reported in 34 F. Supp. 493. The opinion of the Circuit Court of Appeals (R. 2663) is reported in 124 F. (2d) 136.

JURISDICTION

The decree of the Circuit Court of Appeals was entered November 28, 1941 (R. 2675–2676). Petitions for rehearing were filed by Irving Trust Company, a trustee under a mortgage indenture, and by the Debtor, The Western Pacific Railroad

[1] Act of January 22, 1932, c. 8, 47 Stat. 5.

Company, whose appeals had been ordered dismissed by the decree of November 28, 1941. On February 12, 1942, a rehearing was granted. On February 16, 1942, an order was entered setting aside so much of the decree of November 28, 1941, as had dismissed the appeals of the Irving Trust Company and of the Debtor, but denying all further relief sought by the petitions for rehearing (R. 2618). The jurisdiction of this Court is invoked under Section 240 (a) of the Judicial Code, as amended by the Act of February 13, 1925, and Section 24 (c) of the Bankruptcy Act.

QUESTIONS PRESENTED

1. Whether the findings and conclusions of the Interstate Commerce Commission were sufficient to support the exclusion of the stockholders and unsecured creditors of the Debtor from participation in the reorganized company, as provided in the plan approved by the Commission and the District Court.

2. Whether the findings and conclusions of the Interstate Commerce Commission were sufficient to support the allocation of the securities of the reorganized company among those found to be entitled to share therein, in the manner provided in the plan.

3. Whether, as the Circuit Court of Appeals indicated in its opinion, the District Court misconceived the relationship between the functions of the Interstate Commerce Commission and those

of the District Court in connection with plans of reorganization under Section 77 of the Bankruptcy Act.

STATUTE INVOLVED

The relevant portions of Section 77 of the Bankruptcy Act are set forth in the Appendix to the petition for a writ of certiorari in *Ecker et al.* v. *Western Pacific Railroad Corp.*, No. 819, this Term, seeking review of the same decree of which review is sought by this petition.

STATEMENT

The Western Pacific Railroad Company filed its petition for reorganization under Section 77 of the Bankruptcy Act on August 2, 1935 (R. 4–11). Plans of reorganization were filed with the District Court and with the Interstate Commerce Commission in accordance with Section 77 (d). Hearings before the Commission commenced March 23, 1936 (R. 1853), and on September 28, 1939, a plan was certified by the Commission to the District Court (R. 1034–1035). The District Court approved the plan certified by the Commission (R. 1600). The Circuit Court of Appeals, however, reversed the order approving the plan and remanded the cause to the District Court with directions to dismiss it or, in the court's discretion, to refer it back to the Commission for further action (R. 2675–2676).

Reconstruction Finance Corporation holds (1) Trustees' Certificates in the principal amount of

approximately $10,000,000, which were issued by the Trustees of the Debtor with the approval of the District Court, and (2) five secured promissory notes issued by the Debtor, which aggregate, with interest to January 1, 1939, the sum of $3,862,869.98. Reconstruction Finance Corporation was permitted to intervene in the court and Commission proceedings (R. 2621–2622) and has actively supported the plan of reorganization which the District Court approved.

Petitions for writs of certiorari to review the decree of the Circuit Court of Appeals have been filed by the Institutional Bondholders Committee and by Crocker First National Bank of San Francisco and Samuel Armstrong, as trustees under a mortgage given by the debtor. *Ecker et al.* v. *Western Pacific Railroad Corp.*, No. 819, this Term; *Crocker First National Bank et al.* v. *Western Pacific Railroad Corp.*, No. 820, this Term.[2] The relevant facts are adequately stated in those petitions and need not be repeated.[3]

REASONS FOR GRANTING THE WRIT

1. In the present reorganization proceedings the Interstate Commerce Commission, after detailed consideration of the assets and financial history of

---

[2] A cross-petition has been filed by the Debtor, No. 885, present Term.

[3] It is respectfully requested that the certified transcript of record and additional printed copies filed with the petition in No. 819 be deemed to accompany this petition within the meaning of Rule 38 and that reference may be made to them accordingly.

the Debtor and of its past, present, and probable future earnings, determined the maximum permissible capital structure for the Debtor (R. 364). Since the capital structure so determined would not justify any participation by the stockholders of the Debtor, the Commission found that the equity of the stockholders was without value; it further found that the claims of the unsecured creditors were without value and that therefore they, too, must be excluded from participation (R. 269–270, 392–393).[1] The Commission then allocated the proposed new securities among the classes of creditors held entitled to share in the plan in the manner provided therein (R. 389–394). It based this allocation upon detailed consideration of the various claims and of the assets available, for the payment thereof and, in its report, it set forth at length the reasons for its conclusions (R. 194, 300, 884). The District Court approved the plan certified to it by the Commission and adopted the Commission's findings as its own (R. 1600). The court below, however, reversed on the ground that the Commission had not made findings of fact as to the value of the railroad as a whole, the value of the securities held by each class of creditors, and the value of the new securities to be issued. According to the opinion of the court below, some sixteen separate dollar and cents valua-

[1] The Commission found in addition that the junior claim of The Railroad Credit Corporation in the collateral pledged under the notes held by the Reconstruction Finance Corporation had no value (R. 316, 392).

tions should have been made by the Commission. The Court stated that it believed its action was required by the decision of this Court in *Consolidated Rock Products Co. v. DuBois,* 312 U. S. 510.

The decision of the court below presents questions of very substantial importance in the administration of Section 77 of the Bankruptcy Act. The Commission has already certified to the appropriate district courts numerous plans of reorganization of other railroads formulated upon the same general principles and accompanied by a report essentially the same as those involved in this case. It must, in the future, certify plans of reorganization for other railroads which are now in reorganization under Section 77. The aggregate principal amount of the outstanding loans from Reconstruction Finance Corporation alone to railroads or trustees of railroads now in reorganization whose plans of reorganization may be affected by the decision in the present case exceeds $125,000,000. If the requirements as to valuation set forth in the decision below were to be adopted, it would probably be necessary for substantially all of the pending reorganization proceedings to be referred back to or reopened by the Commission, resulting in substantial expense and prolonged delay. It is accordingly essential to the public interest, both from the standpoint of efficient railroad operation and for the rehabilitation of railroad credit, that the validity of the Commis-

sion's procedure be settled by a definitive decision of this Court.

Due to the lack of such a definitive ruling, confusion exists in the decisions of the lower federal courts. The decision below is in square conflict with the decision of the Circuit Court of Appeals for the Seventh Circuit in *Matter of Chicago, Milwaukee, etc., Railroad Company*, decided December 4, 1941, now pending in this Court on a petition for writs of certiorari, Nos. 875–883, this Term, upon the question of whether stockholders can be excluded from participation in the reorganized company upon a finding that their equity is without value because the earnings of the Debtor would not support a capital structure large enough to include them. And although in other respects the Circuit Court of Appeals for the Seventh Circuit adopted the same approach as the court below, nevertheless, in *Matter of Chicago and North Western Ry. Co.*, decided February 9, 1942, it held that valuation findings, of the same type as those here involved were, in the particular circumstances of that case, sufficient.

2. An additional reason for review of the present case is the statement in the opinion of the court below (R. 2672) that the District Court had been acting under "a possible misconception" of the respective functions of the Commission and of the courts under Section 77. The court based this statement upon the fact that

the District Court had referred in its opinion to the specialized knowledge and experience of the Commission and its consequent qualification to find the ultimate facts with respect to the Debtor's financial situation. If the opinion of the court below is to be construed as requiring an independent determination by the District Court of all questions of valuation, despite an initial determination of such questions by the Commission, it constitutes, we believe, a serious misconstruction of the provisions of Section 77. So construed, the opinion is contrary to the views expressed by this Court in *Palmer* v. *Massachusetts*, 308 U. S. 79, 87, where the Court specifically pointed out that "the whole scheme of section 77 leaves no doubt that Congress did not mean to grant to the district courts the same scope as to bankrupt roads that they may have in dealing with other bankrupt estates."

CONCLUSION

In view of the large public importance of the questions involved and of the contrariety of views expressed by the lower federal courts, it is respectfully submitted that this petition for a writ of certiorari should be granted.
